Agatha L. Mergenovich,
Secretary.

[FR Doc. 82-26884 Filed 9-28-82; 8:45 am]
BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the Federal Register of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the Federal Register issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only so long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as confering only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Please direct status inquiries about the following to Team 1, (202) 275-7992.

Volume No. OP1-166

Decided: September 23, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier. Member Chandler not participating.

MC 720 (Sub-80), filed September 16, 1982. Applicant: BIRD TRUCKING COMPANY, INC., P.O. Box 227, Waupun, WI 53963. Representative: Charles L. Volume No. OP4–340

Decided: September 23, 1982.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

W–536 (Sub-3), filed September 9, 1982. Applicant: RIVERWAY BARGE CO., 7703 Normandale Rd., Suite 110, Minneapolis, MN 55435. Representative: William F. King, Suite 304, Overlook Bldg., 6121 Lincolnia Rd., Alexandria, Va 22312, (703) 750–1112. To operate as a *common carrier*, by water, by non-self-propelled vessels with the use of separate towing vessels in the transportation of *general commodities*, and by towing vessels in the performance of *general towage*, between points and ports along (1) the Coosa, Cumberland, Green, Missouri, Red, Black, Ouachita, Tennessee, Alabama, Black Warrior, Tombigbee, White and Yazoo Rivers, and (2) the tributaries of the rivers specified in (1) above.

Note.—This application contemplates operations which should result in decreased energy consumption in comparison with existing energy consumption in the affected area. To the extent traffic will be diverted from existing transportation modes, greater energy efficiencies may be obtained without disruption to existing patterns of energy distribution or to development of energy resources. The application is, in all respects, consistent with prevailing goals and objectives of the National Energy Policy.

MC 107107 (Sub-498), filed September 13, 1982. Applicant: ALTERMAN TRANSPORT LINES, INC., 12805 N.W. 42nd Ave., Opa Locka, FL 33054. Representative: Sidney Alterman (same address as applicant), (305) 688–3571. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), (1) between those points in the U.S. in and west of ND, SD, NE, KS, OK and TX, on the one hand, and, on the other, those points in the U.S. and east of ND, SD, NE, KS, OK, and TX, and (2) Between those points in the U.S. in and east of ND, SD, NE, KS, OK, and TX.

BILLING CODE 7035-01-M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-204

The following applications were filed in Region 2. Send protests to: ICC, Fed. Res. Bank Bldg., 101 North 7th St., Rm. 620, Philadelphia, PA 19106.

MC 163620 (Sub-II–1TA), filed September 13, 1982. Applicant: HARRY T. BROOKS, SR., Rt. 1, Box 166–J, Cascade, VA 24069. Representative: David W. Erdman, P.O.B. 37378, Charlotte, NC 28237. Contract, irregular: *furniture, furniture parts and items related to the manufacturing of furniture* between points in NC, VA, MD, WV, OH, PA, IN, IL, NH, MA, CT, ME, VT, RI, NJ, NY, DE, MI, SC, GA, FL, KY and TN under continuing contract(s) with La-Z-Boy Chair Co. An underlying ETA seeks 120 days authority. Supporting shipper(s): La-Z-Boy Chair Co., 901 N. Douglas St., Florence, SC 29501.

MC 163815 (Sub-II–1TA), filed September 13, 1982. Applicant: HERCULES TRUCKING, INC., 1300 Morrical Blvd., Findlay, OH 45840. Representative: Stephen H. Loeb, Suite 4, 2777 Finley Road, Downers Grove, IL 60515. *Contract, Irregular: Rubber and related products, and materials, equipment and supplies used in the production thereof,* between Findlay, OH, on the one hand, and, on the other, points in the U.S. in and east of ND, SD, NE, KS, OK, and TX under contract with Hercules Tire & Rubber Company for 270 days. Supporting shipper: Hercules Tire & Rubber Company, 1300 Morrical Blvd., Findlay, OH 45840.

MC 161246 (Sub-II–2TA), filed September 15, 1982. Applicant: KENTON CRATE & PALLET COMPANY, INC., 18 Betty St., Milford, DE 19963. Representative: Chester A. Zyblut, 366 Executive Bldg., 1030 15th St., N.W., Washington, DC 20005. *Building materials, and materials and supplies used in the manufacture and distribution of building materials,* between points in DE, MD, VA, PA and NJ, under continuing contract(s) with Master Lumber & Supply, Inc., for 270 days. An underlying ETA seeks 120 days authority. Supporting shipper: Master Lumber & Supply, Inc., P.O. B. 205, Milford, DE 19963.

MC 107012 (Sub-II–237–TA), filed September 13, 1982. Applicant: NORTH AMERICAN VAN LINES, INC., 5001 U.S. Hwy 30 West, P.O. Box 988, Fort Wayne, IN 46801. Representative: Margaret S. Vegeler, (same as applicant). Contract, irregular: *General commodities* (except household goods, classes A and B explosives, and commodities in bulk) between points in the U.S., under continuing contract(s) with Diasonics, Inc., of Milpitas, CA for 270 days. Supporting shipper: Diasonics, Inc., 1545 Barber Lane, Milpitas, CA 95035.

MC 109448 (Sub-II–23–TA), filed September 13, 1982. Applicant: PARKER TRANSFER CO., P.O. Box 256, Elyria, OH 44036. Representative: David A. Turano, 100 E. Broad St., Columbus, OH 43215. *Plastic products,* except in bulk, from points in Licking County, OH to points in MI, IL, IN, KY, WV, PA, and NY for 270 days. Supporting shipper: Sewell Plastics, Inc., Route #79, Hebron, OH 43055.

MC 163814 (Sub-II–1TA), filed September 13, 1982. Applicant: PITT EXPRESS SYSTEM, INC., 115 McLaughlin Run Rd. P.O.B. 12372, Pittsburgh, PA 15231. Representative: John D. Gamble, III, (same address as applicant). *General commodities (except classes A & B explosives, household goods as defined by the Commission and commodities in bulk)* between points in DE, DC, MD, NJ, OH, PA, NY and WV, for 270 days. Supporting shipper(s): Gullick Dobson Inc., 603 Parkway View Dr, Pittsburgh, PA Chem Central, P.O.B. 15597, Pittsburgh, PA American Hospital Supply, 171 Thornhill Dr, Warrendale, PA Bearings & Transmission Inc., 930 Glenwood Ave., Ambridge, PA.

MC 163645 (Sub-II–TA), filed September 13, 1982. Applicant: PLASTIPAK PACKAGING, INC., 18015 St. Rt. 65, Jackson Center, OH 45334. Representative: James Duvall, 220 W. Bridge St., P.O. Box 97, Dublin, OH 43017. *General commodities,* except classes A & B explosives, household goods and bulk commodities, between points in the U.S., except AK and HI for 270 days. Restricted to movements originating at or destined to facilities used by Beatrice Foods Co. and its divisions and subsidiaries. An underlying eta seeks 120 days authority. Supporting shipper: Beatrice Foods Co., Two N. LaSalle St., Chicago, IL 60602.

MC 153918 (Sub-II–TA), filed September 13, 1982. Applicant: TRANSPORTATION & CONSOLIDATION CENTERS, INC., P.O. Box 1524, Harrisburg, PA 17105. Representative: Peter Wolff, 722 Pittston Ave., Scranton, PA 18505. Contract, irregular; *general commodities* (except classes A and B explosives, household goods, and commodities in bulk) between points in CA, CT, DE, DC, IL, IN, KY, ME, MD, MA, MI, MO, NH, NJ, OH, PA, RI, VA, VT, WV and WI, under continuing contract with TCC Inc., Middletown, PA for 270 days. An underlying ETA seeks 120 days authority. Supporting shipper(s): TCC INC., Harrisburg International Airport, Bldg. 33, Middletown, PA 17057.

BILLING CODE 7035-01-M

[Ex Parte No. F387 (Sub-279)]

Union Pacific Railroad Co., Exemption for Contract Tariff ICC-UP-C-0104 (Sugar Beets)

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Provisional Exemption.

SUMMARY: A provisional exemption is granted under 49 U.S.C. 10505 from the

notice requirements of 49 U.S.C. 10713(e), and the above-noted contract tariff may become effective on one day's notice. This exemption may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in this instance to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption request meets the requirements of 49 U.S.C. 10505(a) and is granted subject to the following conditions:

This grant neither shall be construed to mean that the Commission has approved the contract for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review this contract and to determine its lawfulness.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

Decided: September 23, 1982.

By the Commission, Review Board number 3, Members Krock, Joyce and Dowell.

BILLING CODE 7035-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-117]

Certain Automotive Visors; Termination of Two Respondents Based on a Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Termination of investigation as to respondents Toyota Motor Sales Co., Ltd. of Japan and Toyota Motor Sales, U.S.A., Inc., on the basis of a settlement agreement.

SUMMARY: On May 13, 1982, complainant Prince Corporation (Prince), Toyota Motor Sales Co., Ltd. (TMS), Toyota Motor Sales, U.S.A., Inc. (TMS–USA), of California, and the Commission investigative attorney filed a joint motion to terminate the above-captioned investigation with respect to TMS and TMS–USA on the basis of a settlement agreement entered into between Prince, TMS, and TMS–USA. On June 8, 1982, the presiding officer recommended that the joint motion be granted. A **Federal Register** notice was published on July 21, 1982, seeking comments from interested members of the public and other government agencies on the proposed termination of these respondents (47 FR 31631). No comments were received. On September 21, 1982, the Commission granted the joint motion and terminated the investigation as to respondents TMS and TMS–USA on the basis of the settlement agreement.

SUPPLEMENTARY INFORMATION: The Commission is conducting investigation No. 337–TA–117 to determine whether there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation and sale of certain automotive visors, which are alleged to infringe certain claims of U.S. Letters Patent Nos. 3,928,470 and 4,227,241, owned by complainant Prince. The alleged effect or tendency of these unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

Copies of any nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Jane Albrecht, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–1627.

Issued: September 22, 1982.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-130]

Certain Braiding Machines; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint and its amendments were filed with the U.S. International Trade Commission on August 18, 1982, and September 10 and September 13, 1982, respectively, under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of New England Butt Co., Division of Wanskuck Co., 304 Pearl St., Providence, Rhode Island 02907. The amended complaint (hereinafter the complaint) alleges unfair methods of competition and unfair acts in the importation of certain braiding machines into the United States, or in their sale, by reason of alleged common-

law trademark infringement, false designation of origin, and passing off. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that the Commission institute an investigation, conduct expedited temporary relief proceedings, issue temporary exclusion and cease and desist orders, and, after a full investigation, issue permanent exclusion and cease and desist orders.

AUTHORITY: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

SCOPE OF INVESTIGATION: Having considered the complaint, the U.S. International Trade Commission, on September 24, 1982, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain braiding machines into the United States, or in their sale, by reason of alleged common-law-trademark infringement, false designation of origin, and passing off, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—

New England Butt Co., Division of Wanskuck Co., 304 Pearl St., Providence, Rhode Island 02907

(b) The respondents are the following company and individual, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Kokubun Inc., Nakajimacho, Hamamatsu, Japan

Mr. George Sabula, Box 163–A, McEntire Road, Route 1, Tryon, North Carolina 28782

(c) Patricia Ray, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 126, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding officer. The Commission notes that complainant has requested that the administrative law judge schedule a hearing to be completed within a short period after institution of the investigation and issue an initial determination as to whether there is a reason to believe there is a violation of section 337 within thirty (30) days after the close of the hearing on temporary relief. In light of this request and the allegagtions contained in the complaint, the Commission requests that the presiding officer give expeditious consideration to the request for temporary relief. Pursuant to § 210.30(c) of the Commission's rules, discovery should be allowed in connection with the temporary relief phase of the investigation only to the extent necessary to weigh the standards that are applicable in determining whether temporary relief should be granted.

Responses conforming to the requirements of § 210.21(b) of the Commission's rules (19 CFR 210.21(b)) must be submitted by each named respondent. Such responses will be considered by the Commission if received not later than twenty (20) days after the date of service of the complaint.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein or appended thereto, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0176.

FOR FURTHER INFORMATION CONTACT: Patricia Ray, Esq., Unfair Import Investigations Division, Room 126, U.S. International Trade Commission, telephone 202–523–1088.

Issued: September 24, 1982.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 82–26833 Filed 9–28–82; 8:45 am]

BILLING CODE 7020–02–M

[Investigation No. 337–TA–113]

Certain Log Splitting Pivoted Lever Axes; Proposed Termination of Investigation Based on Settlement Agreement and Request for Public Comments

AGENCY: International Trade Commission.

ACTION: Request for public comments on the proposed termination of the above-captioned investigation based on a settlement agreement.

SUMMARY: Notice is hereby given that joint motions have been filed to terminate the above-captioned investigation with respect to all respondents on the basis of a settlement agreement executed by the complainant, Chopper Industries, Inc. (Chopper), and respondent Alltrade, Inc. (Alltrade). Before taking final action on the motions, the Commission requests that interested members of the public submit written comments on the proposed termination of the investigation based on the settlement agreement.

DATES: In order to be considered, comments must be received within 30 days of publication of this notice in the **Federal Register**. Comments should conform with § 201.8 of the Commission's Rules of Practice and Procedure (19 CFR 201.8), and should be addressed to Kenneth R. Mason, Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436.

FOR FURTHER INFORMATION CONTACT: Sheila Landers, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0421.

SUPPLEMENTARY INFORMATION: this investigation is being conducted under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and concerns alleged unfair trade practices in the importation into and sale in the United States of certain log splitting pivoted lever axes. Notice of the institution of the investigation was published in the **Federal Register** of January 6, 1982 (47 FR 3668).

On July 28, 1982, the complainant, respondent Alltrade, and the Commission investigative attorney filed a joint motion (Motion 113–31) to terminate the investigation with respect to respondent Alltrade pursuant to § 210.51(c) of the Commission's Rules of Practice and Procedure on the basis of a settlement agreement executed by the complainant and respondent Alltrade. The complainant, respondent Alltrade, and the Commission investigative attorney also filed a joint motion

(Motion 113–32) pursuant to § 210.51(a) to terminate the investigation with respect to the two other respondents in the investigation, Taiwan Tool Corp., a/k/a Taiwan Tool Co. (Taiwan Tool) and Formosa Forges Corp. (Formosa).

On August 6, 1982, the presiding officer recommended that both Motion 113–31 and Motion 113–32 be granted.

The settlement agreement

The settlement agreement between complainant Chopper and respondent Alltrade concerns both this proceeding and concurrent Federal district court litigation in California. The settlement agreement provides as a basis for termination that Chopper and Alltrade release each other and their respective suppliers, customers or transferees from any and all claims relating to the "manufacture, use or sale" of their existing axes, including all claims arising out of this investigation and the district court litigation. Specifically, Chopper agrees not to sue Alltrade, its suppliers, or customers for patent infringement by reason of the manufacture, use or sale of log splitting devices having "lever members with pivot points disposed on the centerline of the device" (Par. 6.1). Alltrade similarly agrees not to sue Cjopper, its suppliers, or customers for patent infringement by reason of the manufacture, use, or sale of log-splitting devices having "lever members with pivot points which are laterally offset from the centerline of the device." (Par. 6.2).

Each party further agrees not to "manufacture, ship into, or sell in the United States or Canada" axes "identical to or substantially similar" to those of each other that are currently marketed. Chopper and Alltrade also agree to cease and desist from "comparative advertising" with respect to the alleged safety and/or quality of each other's products and to destroy all such existing comparative advertising materials. In the case of any claim or controversy arising from this agreement, the parties provide that such differences shall be settled in accordance with the commercial arbitration rules of the American Arbitration Association.

The complete text of the settlement agreement is available for public inspection during official business hours (8:45 a.m. to 5:15 p.m.) at the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436.

Issued: September 22, 1982.

By order of the Commission.

BILLING CODE 7020-02-M

[Investigation No. 337–TA–89]

Certain Molded-in Sandwich Panel Inserts and Methods for Their Installation; Issuance of Exclusion Order and Cease and Desist Order

AGENCY: International Trade Commission.

ACTION: Issuance of exclusion order and cease and desist order.

SUPPLEMENTARY INFORMATION: On September 8, 1982, the Commission modified its original remedy determination in the above-captioned investigation. The Commission modified its original action to provide for (1) a general exclusion order prohibiting the importation of infringing inserts for the remaining life of U.S. Letters Patent 3,282,015; and (2) a cease and desist order directed to The Young Engineers, Inc., prohibiting it from selling imported inserts acquired subsequent to institution of the investigation where such sales would contribute to or induce the infringement of U.S. Letters Patent Nos. 3,271,498 and/or 3,392,225. On September 16, 1982, the Commission ordered the above relief.

Notice of consideration of this modification was published in the **Federal Register** on August 9, 1982 (47 FR 34473).

The Commission Action and Order, the Commission Opinion in support thereof, and all other nonconfidential documents on the record of the investigation are available for public inspection during official working hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 161, Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Jane Albrecht, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–1627.

Issued: September 17, 1982.

By order of the Commission.

BILLING CODE 7020-02-M

[Investigation No. 731–TA–87 (Final)]

Certain Seamless Steel Pipes and Tubes From Japan

AGENCY: International Trade Commission.

ACTION: Institution of a final antidumping duty investigation.

SUMMARY: The U.S. International Trade Commission hereby gives notice of the institution of investigation No. 731–TA–87 (Final) to determine, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Japan of seamless heat-resisting steel pipes and tubes,[1] provided for in items 610.5209, 610.5229, and 610.5234 of the Tariff Schedules of the United States Annotated (TSUSA), and seamless stainless steel pipes and tubes,[1] provided for in TSUSA items 610.5205, 610.5228, and 610.5230, which are allegedly sold, or are likely to be sold, at less than fair value.

EFFECTIVE DATE: August 25, 1982.

FOR FURTHER INFORMATION CONTACT: Abigail Eltzroth, Office of Investigations U.S. International Trade Commission; telephone 202–523–0289.

SUPPLEMENTARY INFORMATION:

Background.—On January 20, 1982, a petition was filed with the Commission and the U.S. Department of Commerce by counsel for Babcock & Wilcox Co. alleging that an industry in the United States is materially injured and is threatened with material injury by reason of imports from Japan of seamless heat-resisting steel pipes and tubes and seamless stainless steel pipes and tubes, which are allegedly sold at less than fair value. On March 2, 1982, the Commission determined that there was a reasonable indication that an industry in the United States was materially injured or threatened with material injury by reason of imports of such merchandise. On August 25, 1982, Commerce issued a preliminary determination that such merchandise is being sold, or is likely to be sold at less than fair value. Accordingly, the Commission is instituting a final antidumping investigation. The investigation will be subject to the provisions of part 207 of the Commission's Rules of Practice and

[1] Excluding oil and gas well casing and tubing, oil and gas field drill pipes, and oil and gas line pipes which are manufactured according to API standards.

Procedure (19 CFR Part 207 (1981), as amended by 47 FR 6190 (Feb. 10, 1982)), and particularly subpart B thereof.

Written submissions.—Any person may submit to the Commission on or before November 10, 1982, a written statement of information pertinent to the subject matter of the investigation. A signed original and fourteen copies of such statements must be submitted. In the event that confidential treatment of the document is requested under § 201.6, at least one additional copy shall be filed in which the confidential business information shall have been deleted and which shall have been marked "nonconfidential" or "public inspection".

Any business information which a submitter desires the Commission to treat as confidential shall be submitted in conformance with the requirements of § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6 (1981)). Each sheet of information for which confidential treatment is desired must be clearly marked at the top "Confidential Business Data". All written submissions, except for confidential business data, will be available for public inspection at the Office of the Secretary, U.S. International Trade Commission.

A staff report containing preliminary findings of facts will be made available to all interested parties on October 19, 1982.

Service of documents.—The Secretary will compile a service list from the record of the preliminary investigation and the entries of appearance filed in this investigation. Any party submitting a document in connection with the investigation shall, in addition to complying with § 201.8 of the Commission's rules (19 CFR 201.8, as amended by 47 FR 13791 (April 1, 1982)), serve a copy of each such document on all other parties to the investigation. Such service shall conform with the requirement set forth in § 201.16(b) of the rules (19 CFR 201.16(b)) as amended by 47 FR 6190 (Feb. 10, 1982).

In addition to the foregoing, each document filed with the Commission in the course of the investigation must include a certificate of service setting forth the manner and date of such service. This certificate will be deemed proof of service of the document. Documents not accompanied by a certificate of service will not be accepted by the Secretary.

Public hearing. The Commission will hold a public hearing in connection with this investigation on November 3, 1982, in the Hearing Room of the U.S. International Trade Commission Building, beginning at 10 a.m. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on October 18, 1982. Persons desiring to appear at the hearing and make oral presentations may file a prehearing brief and should attend a prehearing conference to be held at 10 a.m., on October 20, in Room 117 of the U.S. International Trade Commission Building. Prehearing briefs must be filed on or before October 29, 1982.

Testimony at the public hearing is governed by § 207.23 of the Commission's Rules of Practice and Procedure (19 CFR 207.23), as amended by 47 FR 6191 (Feb. 10, 1982). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to new information. All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with rule 207.22 (19 CFR 207.22) as amended by 47 FR 6191 (Feb. 10, 1982). Posthearing briefs will also be accepted within a time specified at the hearing.

For further information concerning the conduct of the investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, subparts A and B (19 CFR Part 207 (1981)), as amended by 47 FR 6190 (Feb. 10, 1982, and part 201, subparts A through E (19 CFR Part 201 (1981)), as amended by 47 FR 6188 (Feb. 10, 1982) and 47 FR 13791 (April 1, (1982).

This notice is published pursuant to section 207.12 of the Commission's Rules of Practice and Procedure (19 CFR 207.12 (1981)).

Issued: September 21, 1982.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-131]

Certain Variable Character Display Devices; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice if hereby given that a complaint was filed with the U.S. International Trade Commission on August 26, 1982, and amended on September 10, 1982, under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of the Staver Company, Inc., 41–51 N. Saxon Avenue, Bay Shore, New York 11706. The complaint alleges unfair methods of competition and unfair acts in the importation of certain variable character display devices ("display devices") into the United States, or in their sale, by reason of alleged infringement by said display devices of the claims of U.S. Letters Patent 4,117,478 and the claim of U.S. Patent Des. 249,985. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated in the United States.

The complainant requests the Commission to institute an investigation and, after a full investigation, to issue an exclusion order, prohibiting importation of the above-mentioned articles into the United States for the life of each patent in issue, or a permanent cease and desist order.

AUTHORITY: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

SCOPE OF INVESTIGATION: Having considered the complaint, the U.S. International Trade Commission, on September 21, 1982, Ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain variable character display devices into the United States, or in their sale, by reason of the alleged infringement by said display devices of the claims of U.S. Letters Patent 4,117,478 and the claim of U.S. Patent Des. 249,985, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—

The Staver Company, Inc., 41–51 N. Saxon Avenue, Bay Shore, New York 11706

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to reserved:

Ferranti-Packard Ltd., c/o Ferranti Transformer Division, Martin & Middle Road, P.O. Box 372, Dunkirk, New York 14048
Ferranti-Packard, Ltd., 600 Ambler Drive, Mississauga, Ontario L4W 2P1 Canada
Identicon, 1 Kenwood Circle, Franklin, Massachusetts 02038

(c) Jeffrey Neeley, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 132, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0176.

FOR FURTHER INFORMATION CONTACT: Jeffrey Neeley, Esq., Unfair Import Investigations Division, Room 132, U.S. International Trade Commission, telephone 202–523–0115.

Issued: September 21, 1982.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-101 (Preliminary)]

Greige Polyester/Cotton Printcloth From The People's Republic of China

Determination

On the basis of the record [1] developed in investigation No. 731–TA–101 (Preliminary), the Commission unanimously determines, pursuant to section 733(a) of the Tariff Act of 1930 (U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is threatened with material injury by reason of imports of greige polyester/cotton printcloth as provided for in items 326.26 through 326.40 of the Tariff Schedules of the United States, with statistical suffixes 32 and 92 from the People's Republic of China (China) which are allegedly being sold at less than fair value (LTFV).

Background

On August 5, 1982, the American Textile Manufacturers Institute and eight member companies filed a petition with the U.S. International Trade Commission and the U.S. Department of Commerce alleging that an industry in the United States is materially injured and is threatened with material injury be reason of imports of greige polyester/cotton printcloth as provided for in items 326.26 through 326.40 of the Tariff Schedules of the United States, with statistical suffixes 32 and 92 from China which are allegedly being sold at LTFV. Accordingly, effective August 5, 1982, the Commission instituted a preliminary investigation under section 733(a) of the Tariff Act of 1930 to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of the importation of such merchandise into the United States.

Notice of the institution of the Commission's investigation and of a conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on August 13, 1982 (47 FR 35365). The conference was held in Washington, D.C. on August 27, 1982, and all persons who requested the opportunity were permitted to appear in person or by counsel.

Views of the Commission

Introduction

After considering the record in this investigation, we determine, pursuant to section 731 of the Tariff Act of 1930, that there is a reasonable indication that an industry in the United States is threatened with material injury by reason of imports of greige polyester/cotton printcloth of chief value cotton from the People's Republic of China which are allegedly being sold at less than fair value.[2]

Standards for Determination

In making a determination as to whether there is material injury, the Commission is required to consider, in addition to other factors it considers relevant: (1) The volume of imports; (2) the effect of imports on domestic prices for like products; and (3) the impact of imports on the domestic industry.[3]

The "threat of material injury" standard "is intended to permit import relief under the countervailing duty and antidumping laws before actual injury occurs." [4] In determining whether an industry in the United States is threatened with material injury, the Commission is required to consider "any economic factors it considers relevant" [5]

---

[1] The "record" is defined in sec. 207.2(i) of the Commission's Rules of Practice and Procedure (47 FR 6190, Feb. 10, 1982).

[2] Commissioner Frank notes that the statute and legislative history require the Commission in its preliminary determinations in both antidumping and countervailing duty investigations to exercise only a low threshold test based upon the best information available to it at the time of such determination which reasonably indicates that an industry in the United States could possibly be suffering injury, threat thereof or material retardation. H.R. Rep. No. 96–317, 96th Cong., 1st Sess. 52 (1979).

[3] 19 U.S.C. 1677(7)(B).

[4] S. Rep. No. 249, 96th Cong., 1 st Sess. 88 (1979); H. Rep. No. 317, 96th Cong., 1st Sess. 47 (1979).

[5] S. Rep. No. 249, *supra* n. 2, at 88.

in light of the conditions of trade and competition and the nature of the particular industry in each case.[6] Findings of a reasonable indication of threat of material injury must be based on a showing that the likelihood of harm is real and imminent, and not on mere supposition, speculation, or conjecture.[7]

In previous investigations the Commission has considered, among other factors: (1) The rate of increases of subsidized or dumped imports into the U.S. market, (2) the capacity in the exporting country to generate exports, and (3) the availability of other export markets.[8]

The Domestic Industry

The industry in an antidumping investigation is defined as the domestic producers of the product which is like that being imported. Specifically, the statute provides:

> The term "industry" means the domestic producers as a whole of a like proudct or those producers whose collective output of the like product constitutes a major proportion of the total domestic production of that product.[9]

"Like product," in turn, is defined as:

> A product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.[10]

The imported article which is subject to this investigation is greige [11] (unbleached and uncolored) printcloth fabric other than 80 x 80 type in chief value of cotton, containing polyester (hereinafter "printcloth"), and provided for in items 326.26 through 326.40 of the TSUS, with statistical suffixes 32 and 92.[12]

Printcloth is a staple "bread and butter" textile fabric that has a wide variety of applications in the manufacture of apparel, including pocketing and lining materials, and household uses such as curtains, bedspreads, and quilts.[13] Both the imports under investigation and domestic printcloth are sold in the same constructions and widths.

Printcloth is to a large extent a fungible item. However, the quality of printcloth fabric can vary depending upon the quality of the raw materials used, the blending of the raw materials, the alignment of the fibers in the yarn, and the number of flaws in the fabric created during the weaving process. The petitioners maintain that the imported product from China is of good, if not excellent, quality and that it is used interchangeably with the domestic product.[14] The respondents maintain that printcloth from China is of lesser quality than domestically-made goods for some applications.[15] However, all but one of the purchaser responses on this issue confirmed that the quality of polyester/cotton printcloth from China was as good, if not better, than much domestically-produced cloth.[16] We conclude that the domestic product "like" the imports of printcloth under investigation is printcloth made of a blend of polyester and cotton containing 50 percent or more of cotton.[17] Therefore, the "industry" consists of the domestic producers of this product.[18]

Condition of the Domestic Industry

Although the overall condition of the domestic industry appears to be relatively favorable at this time, there are indications that it is weakening, and that it will continue to do so.

Apparent domestic consumption of the printcloth under investigation increased steadily by 7 percent between 1979 and 1980, and by 20 percent between 1980 and 1981.[19] Despite this trend, U.S. production increased by only 4 percent between 1979 and 1980,[20] and then declined by 5 percent between 1980 and 1981.[21] Thus the domestic industry's share of the domestic market decreased from 95 percent in 1979 to 93 percent in 1980 and to 74 percent in 1981.[22] Apparent domestic consumption decreased by 7 percent in January–July 1982 compared with the corresponding period of 1981.[23] Domestic production continued its decline by 4 percent during this period compared with the corresponding period of 1981.[24]

U.S. producers' domestic shipments followed the same general trend as production, increasing from 1979 to 1980 by 4 percent, then declining by 1 percent in 1981, with a continued decline of 1.8 percent in January–July of 1982 compared with January–July of 1981.[25] The capacity utilization rate increased from 62.2 percent in 1979 to 67.5 percent in 1980, dropped back to 64.4 percent in 1981, and increased to 66.0 percent in January–July 1982 compared with 65.5 percent in the corresponding period of 1981.[26]

U.S. producers' end-of-period inventories have increased from 17 million square yards in 1979 to 21 million square yards in 1981,[27] and to 32 million square yards as of the end of July 1982, almost double the levels at the end of July 1981.[28] The number of production and related workers has declined steadily by 22 percent from 1979 to 1981, then increased slightly by 4 percent in January–June 1982 compared with the corresponding period of 1981.[29] More significantly, the number of hours worked declined steadily throughouth the period by 13 percent from 1979 to 1981, and by 17 percent in January–June 1982 compared with the corresponding period in 1981.[30]

Profit-and-loss information submitted to the Commission shows a relatively profitable industry through 1981. The ratio of net sales to operating income declined from 9.7 percent in 1979 to 6.6 percent in 1980 then increased to 10.9 percent in 1981.[31] However, in January–June 1982, the ratio of net sales to

operating income dropped to its 1980 level of 6.6 percent.[32]

The current financial experience of domestic producers in large part reflects shipments under long-term contracts entered into during 1981 at prices significantly higher than current market prices. Since 1981, it appears that orders have decreased substantially, and that the impact of this decrease has not yet manifested itself.[33] Information provided by the domestic producers indicates that unfilled orders for January–March 1982 and for April–June 1982 are lower than for any other two succeeding quarters since 1979. In addition, the weighted average price of domestically produced printcloth has fallen steadily from a high of 58.5 cents per linear yard in January–March 1981 to 46.5 cents per linear yard in April–June 1982, the lowest price for the entire period under investigation.[34] On the basis of indications of decreasing orders, coupled with increasing inventory and falling prices, it appears that the domestic industry will soon manifest more substantial indications of material injury than are presently apparent.

Threat of Material Injury by Reason of Alleged LTFV Imports

Volume of Imports

Imports of printcloth from China have increased substantially during the period under investigation, both in absolute and relative terms. Imports of printcloth from China increased from 228,000 square yards in 1979 to 11 million square yards in 1980, an increase of 48 times the 1979 level.[35] In 1981, imports from China again increased to 57 million square yards.[36] In January–July 1982, imports from China continued to increase to 38 million square yards compared with 33 million square yards in the corresponding period of 1981.[37] The ratio of imports from China to apparent domestic consumption increased from less than 0.5 percent in 1979 to almost 11 percent in 1981, and continued to make inroads into the U.S. market in January–July 1982, rising to 13.6 percent, compared with 10.6 percent in January–July 1981.[38]

Effect of Imports on Domestic Prices

Domestic printcloth is sold both by long-term contract and by spot sales, although long-term contracts are preferred by most producers. Importers sell both by long-term contract and by spot sales as well. Prices for both long-term contracts and spot sales are negotiated on a transaction-by-transaction basis. Pricing in the printcloth market is very competitive, and a difference of less than one cent per linear yard can result in a lost sale.[39]

Booking price information [40] on 48" 78 x 54 50/50 printcloth indicates that from July of 1980 [41] through June of 1981 printcloth from China was underselling the domestic product by margins ranging from 1.6 percent to 11.5 percent.[42] In the last two quarters of 1981, the price of the printcloth from China was priced slightly higher than the domestic product.[43] In January–June 1982, underselling of the domestic printcloth by the imported product is again in evidence with margins of 5.4 and 1.7 in the first and second quarters respectively.[44]

Booking price information on 51" 73 x 52 50/50 printcloth indicates a similar pattern of underselling, although the margins of underselling are higher, particularly in the fourth quarter of 1980, which is the first quarter for which importers reported prices.[45] This underselling continued at a rate of 16.4 percent in the fourth quarter of 1980 to 4.3 percent in the third quarter of 1981.[46] In October–December 1981 and January–March 1982, the imported product was overselling the imported product.[47] In April–June of 1982, the most recent quarter for which we have pricing information a margin of underselling of 6.4 percent is again in evidence.[48]

Given the ratio of imports from China to apparent domestic consumption, we have determined that this underselling was clearly a factor in the steady decline in the domestic producers' weighted average prices from the second quarter of 1981 to the present. The information available at the present time indicates that the volume of imports from China entering the market at prices substantially lower than the domestic product contributed to the decline in domestic producers' prices. The impact of such underselling appears particularly pronounced in January–June of 1982, when consumption was declining.

In addition, we have confirmed that the lower price of the imported printcloth resulted in lost sales accounting for 1.6 million square yards.[49] In addition, purchasers have indicated that they have been offered or have purchased greige, polyester/cotton printcloth from China at prices below those of the domestic producers.[50] Thus, there is a reasonable indication that the printcloth from China has been underselling the domestic product, resulting in price suppression, price depression and lost sales.

Furthermore, importers responding to questionnaires have reported a substantial build-up of inventories. Inventories at the end of June 1982 increased eight times over those at the end of June 1981, totaling between 5 and 10 million square yards, and equaling a significant percent of the imports for January–July 1982.[51] Moreover, substantial shipments which have already been contracted for and which are scheduled for delivery later in this year have not yet entered into the United States.[52]

Information on the Chinese printcloth industry and its ability to increase exports to the United States or other markets is limited. However, China, as part of its current overall economic development plan, is emphasizing the development of export-oriented light industry as a means of earning foreign ecchange, and has taken a number of actions to promote the expansion of exports.[53] Textile products are expected to be one of the key product areas in China's efforts to achieve growth in exports.[54] In addition, the United States is a major market for textile exports from China.[55] Furthermore, recent import

[53] *Id.*

[54] *See Emerging Textile-Exporting Countries,* Report on Inv. 332–126 (USITC Pub. 1273) (August 1982) A–70.

[55] *Id.* A–67. Commissioners Frank and Haggart note that the EC, another of China's major export

volumes demonstrate the ability of China to direct large volumes of its printcloth to the U.S. market in a short period of time.[56]

Therefore, we conclude that there is a reasonable indication that imports of greige polyester/cotton printcloth from China threaten the domestic industry with material injury and that the likelihood of harm to the industry is real and imminent.

Issued: September 2, 1982.

markets, has a bilateral agreement with China restricting the imports of broadwoven fabrics, including the print cloth under investigation, to a growth rate of less than 1 percent annually for the period 1980–83. *See* 22 *O.J. Eur. Comm. (No. L 345) 28 (1979).*

[56] In 1980, the United States and People's Republic of China signed a bilateral textile agreement that did not establish specific limits on the imports under investigation, but provided for consultations in the case of market disruption. *See* Agreements Relating to Trade in Cotton, Wool, and Man-Made Fiber Textiles and Textile Products Between the Government of the United States of America and the government of the People's Republic of China, Sept. 17, 1980, T.I.A.S. No. 9620.

On October 18, 1961, the United States called for consultations regarding imports of printcloth. On July 28, 1982, the United States and the PRC agreed to amend the bilateral agreement to impose alimit of 167 million square yards on imports of both all cotton and polyester/cotton printcloth which are exported from China to the United States between January 19, 1982, and December 31, 1982. *See* The United States and the People's Republic of China Amend Bilateral Textile Agreement (U.S. Department of State Press Release, July 28, 1982). The quota ceiling for 1982 is close to the amount of printcloth imported during 1981. At the same time, consumption has decreased in 1982 compared to 1981 levels. In addition, the quota ceiling includes imports other than those under investigation. Therefore, it does not appear at this time that the quota will necessarily limit increases in the total numbers of future imports of the product under investigation.

Chairman Eckes and Commissioners Frank and Haggart refer generally to their views regarding the relationship between quotas and determinations in title VII cases. See Views of Commissioners Eckes, Frank and Haggart in Sugar from the European Community, Inv. No. 104–TAA–7 (USITC Pub. 1247) (May 1982).

Commissioner Stern distinguishes the present case from that of *sugar from the European Community*. In the latter an International Sugar Agreement (ISA) quota was in effect for the product before the Commission, and at issue was how to treat that quota when analyzing threat. In the present case, the arrangement between the PRC and the United States provides for a combined quantitative limit on all printcloth, rather than on the specific imports subject to this investigation. It leaves China free to alter the distribution of the overall quota between all-cotton and polyester/cotton printcloth. Only polyester/cotton printcloth of chief value cotton is the subject of this investigation. Therefore, the quota does not in this case eliminate imports of polyester/cotton of chief value cotton as a potential source of injury to the U.S. industry. Other factors discussed above indicate that China is likely to increase its presence in the U.S. market for polyester/cotton printcloth of chief value cotton.

By Order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

Report to the President on Investigation No. TA–201–46; Tubeless-Tire Valves

September 20, 1982.

Determination

On the basis of the information developed in the course of investigation No. TA–201–46, the Commission [1] determined that tubeless-tire valves provided for in items 692.32 and 692.33 of the Tariff Schedules of the United States (TSUS), are not being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

Background

The Commission instituted the present investigation, No. TA–201–46, on April 29, 1982, following the receipt, on April 16, 1982, of a petition for import relief filed by three U.S. manufacturers of tubeless-tire valves. The investigation was instituted pursuant to section 201(b) of the Trade Act of 1974 (19 U.S.C. 2251(b)(1)) in order to determine whether tubeless-tire valves provided for in items 692.32 and 692.33 of the TSUS are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

Notice of the institution of the Commission's investigation and of a public hearing was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C. and by publishing the notice in the **Federal Register** of May 5, 1982 (47 FR 19492).

A public hearing in this investigation was held in the hearing room of the U.S. International Trade Commission Building in Washington, D.C., on Wednesday, July 14, 1982. All interested parties were afforded an opportunity to be present, to present evidence, and to be heard.[2]

[1] Commissioners Calhoun and Frank not participating.

[2] A transcript of the hearing and copies of briefs submitted by interested parties in connection with the investigation were attached to the original report sent to the President. Copies are available for inspection at the U.S. International Trade Commission, except for material submitted in confidence.

This report is being furnished to the President in accordance with section 201(d)(1) of the Trade Act. The information in the report was obtained from fieldwork and interviews by members of the Commission's staff, and from other Federal agencies, responses to Commission questionnaires, information presented at the public hearing, briefs submitted by interested parties, the Commission's files, and other sources.

Views of Chairman Alfred Eckes, Commissioners Paula Stern and Veronica Haggart

On the basis of the information obtained in this investigation, we have determined that tubeless tire valves provided for in items 692.32 and 692.33 of the Tariff Schedules of the United States are not being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing articles like or directly competitive with the imported articles.

In order to make an affirmative determination in an investigation under section 201 of the Trade Act of 1974, the Commission must find that three criteria are satisfied:

(1) There are increased imports (either actual or relative to domestic production) of an article into the United States;

(2) The domestic industry producing an article like or directly competitive with the imported article is being seriously injured, or threatened with serious injury; and

(3) Such increased imports of an article are a substantial cause of serious injury, or threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

Domestic Industry

Before discussing the statutory criteria, it is first necessary to determine what is "the domestic industry" which may be suffering the requisite injury. The Trade Act of 1974 states that the domestic industry consists of the domestic producers of "an article like or directly competitive with the imported article." The Senate Finance Committee Report defines "like" articles as those which are "substantially identical in inherent or intrinsic characteristics (i.e.,

materials from which made, appearance, quality, texture, etc.)." [3]

The imported articles which are the subject of this investigation are tubeless tire valves (TTVs) for use with tubeless tires on passenger-automobile and light-truck wheels. Two types of TTVs, snap-in and clamp-on, suitable for passenger-automobiles and light-truck tires have been imported into the United States.[4] Both types of valves are inserted into a hole on the rim of the wheel and are designed to control the flow of air into and out of the tire. Both types incorporate two basic components—a spring-activated plunger (core) and a metal tube (stem) in which the plunger is encased. When depressed, the plunger allows the transmission of air in either direction through the valve.[5]

The domestically produced clamp-on and snap-in valves [6] are made from the same material and have the same components and appearnce as imported valves. That is, they are substantially identical to imported valves in inherent or intrinsic characteristics.

We have concluded that, for the purposes of this investigation, the domestic industry consists of producers of snap-in and clamp-on tubeless tire valves.[7] [8]

Imports in Increased Quantities

The first of the three criteria for an affirmative determination is that the imported articles are being imported in "increased quantities." [9] The statute provides that imports are in increased quantities when the increase is in actual or absolute terms, or when the increase is "relative to domestic production." [10]

U.S. imports of TTVs increased minimally, 1.4 percent, from 1977 to 1981, reaching a peak in 1979 and declining thereafter.[11] [12] This downward trend continued through the first 4 months of 1982. There have been no imports of clamp-on valves in 1980 or January–April 1982 and imports of that type valve were negligible in 1981.[13]

The ratio of imported TTVs to total U.S. production of TTVs increased irregularly from 1977 to 1981, peaking in 1980. In 1981 the ratio was the same as in 1979 but was up by 1.6 percent from the ratio in 1977.[14]

Because imports increased over the past 5 years, although minimally, we will consider whether the remaining statutory criteria have been met.

Serious Injury

The second criterion for an affirmative determination is that the domestic industry be seriously injured or threatened with serious injury.[15] While the statute does not define the term "serious injury," it directs the Commission to consider certain economic factors in its analysis of the injury issue and to take into account all economic factors which it considers relevant. These include, but are not limited to, significant unemployment or underemployment within the industry, the inability of a significant number of firms to operate at a reasonable level of profit, and the significant idling of productive facilities in the industry.[16]

As with increased imports, the data on injury only marginally satisfies the statutory crieteria.[17] Serious injury is evident in the declines in the economic indicators between 1977 and 1980 and, since that time, particularly in the continued decline in industry profitability. But the tentative nature of the showing of serious injury is apparent. In 1981 nearly all economic indicators recovered substantially from the 1980 low point. Throughout the entire period of this invetigation capacity has been growing.

From 1977 through 1980 domestic production fell from 170 million units to 127 million units;[18] shipments dropped from 162 million units to 124 million units [19] and employment of production and related workers fell from 467 workers to 337 workers.[20] [21] In 1981, however, each of these indicators showed a substantial increase over the 1980 level. Production rose to 143 million units, shipments to 141 million units and employment to 414 workers.[22] Domestic shipments to the replacement market recovered to roughly the same level as in 1977, 1978 and 1979.[23]

The financial data for U.S. producers of TTVs shows a steady decline for the entire period of this investigation. Operating income dropped from a profit of $1.4 million in 1977 to a loss of $.7 million in 1981.[24] Operating income as a percent of net sales dropped from 7.1 percent in 1977 to a loss of 3.3 percent in 1981. The 1982 data show a further deterioration. In 1980 and 1981, four of the five reporting firms showed losses on their TTV operations and during January–April 1982, all five firms reported losses.[25]

Despite the industry's deteriorating profitability, producers have been increasing capacity. Capacity rose from 219 million units in 1977 to 269 million units in 1981. In 1979 Schrader opened a new plant, substantially increasing that company's capacity. In 1980 Eaton substantially increased its capacity, and in 1981 Nylo-Flex increased its capacity. * * * [26] [27]

---

[3] S. Rep. No. 1298, 93d Cong., 2d Sess. 121–122 (1974).

[4] Petitioner has argued that investigation should be based on a two-industry approach based on market destination: The original equipment manufacturer market (OEM) and the replacement market. The OEM market (U.S. auto companies) is served exclusively by U.S. producers. The replacement market (establishment such as retail tire and service centers, gasoline stations, and auto repair shops) is served by both foreign and domestic producers.

The TTVs produced for both these markets are virtually identical and are produced in the same establishments and on the same production lines. The only distinction is in the final packaging of the valves. Therefore, the Commission considers the OEM and replacement markets as one industry for the purpose of this investigation.

Commissioners Stern and Haggart note that this definition of industry does not preclude an analysis of developments in each market in considering the causation issue.

[5] Confidential Report, p. A–3.

[6] Snap-in valves constitute nearly all of domestic production and consumption.

[7] Imports of clamp-on valves have been negligible or nil since 1980.

[8] There are characteristics that distinguish clamp-on valves from snap-in valves, see Report at A–3, which might arguably support a finding that there are two domestic industries. Such a finding, however, would have no significant impact on our analysis since there have been virtually no imports of the clamp-on variety since 1979, and it constituted a miniscule portion of domestic production (less than 1.61 percent) and consumption (*** percent) in 1981.

[9] Sec. 201(b)(1), 19 U.S.C. 2251(b)(1).

[10] Sec. 201(b)(2)(C), 19 U.S.C. 2251(b)(2)(C).

[11] Nearly all the imports were supplied by just one manufacturer in West Germany so the import data are confidential and therefore may be discussed in general terms.

[12] Commissioner Haggart notes that imports reached a higher level in 1981 than any other year except the peak year of 1979. Confidential Report, p. A–14.

[13] Confidential Report, pp. A–13—A–15.

[14] Confidential Report, p. A–13.

[15] Sec. 201(b)(1). 19 U.S.C. 2251(b)(1)

[16] Sec. 201(b)(2)(A). 19 U.S.C. 2251(b)(2)(A)

[17] Commissioner Stern, having found no substantial causal link between the imports and the condition of the U.S. industry, has assumed for the sake of argument that the statutory criteria of increased imports and serious injury have been met.

[18] Confidential Report, p. A–13—A–19.

[19] Confidential Report, p. A–21—A–25.

[20] Capacity utilization also dropped dramatically during the period, from 75.7 percent to 46.1 percent. This drop, however, must be evaluated in light of the substantial increase in capacity during the same period.

[21] Confidential Report, p. A–33.

[22] For the first four months of 1982 each of these indicators declined somewhat. We note, however, that shipments to the replacement market continued to increase during this period.

[23] Imports compete only in the replacement market.

[24] The 1979 data is for four firms which account for 93 percent of U.S. production; the 1980 data is for five firms which account for 94 percent of U.S. production.

[25] Confidential Report, p. A–40.

[26] Confidential Report, p. A–19.

[27] Commissioner Haggart has assumed for the sake of argument that the statutory criterion of serious injury has been met in this particular case but does not make an affirmative determination since she finds that increased imports are not a substantial cause of any injury that is being suffered.

Substantial Cause of Serious Injury

The statute requires that for an affirmative finding imports must be a "substantial cause of serious injury, or threat thereof."[28] The term "substantial cause" is defined in the statute as "a cause which is important and not less than any other cause."[29] Thus, for increased imports to be a substantial cause of injury, they must pass a dual test. They must be an "important" cause of injury and a cause "not less than any other cause" of injury.[30]

The statute directs the Commission, in determining substantial cause, to take into account all economic factors which it considers relevant, including but not limited to, an increase in imports, either actual or relative to domestic production, and a decline in the proportion of the domestic market supplied by domestic producers.

We find that the imports under consideration here do not meet either of the two statutory causation requirements. They are neither an "important" cause of serious injury to the domestic TTV industry nor a cause "not less than any other cause."

As previously noted, imports of TTVs have barely increased over the last five years and as a percent of production they have remained essentially steady since 1979.[31] From 1977 to 1981 the import to production ratio rose only 1.8 percentage points, while the market share of U.S. producers declined but less than 2 percent.

The injury sustained by the tubeless tire valve industry can best be explained by two developments:[32] The 1980 decline in consumption of TTVs in the replacement market; and increased domestic competition from OEM producers[33] in the replacement market due to the decline in OEM consumption. These two causes are more important causes of injury to the TTV industry than increasing imports.

In 1980, apparent consumption in the replacement market dropped by 17 percent from the 1979 level.[34] Testimony at the hearing attributed the 1980 decline primarily to the increasing popularity of radial tires, which have a longer lifespan than other tires; the substantial drop in automobile usage (miles driven) in that year; and the trend toward smaller cars which, because of their lighter weight, tend to reduce tire wear.[35] The precipitous drop in demand in the replacement market in 1980 is an important explanation of the particularly sharp drop in the economic indicators for this industry in 1980.[36]

The serious decline in sales of new automobiles in the past few years has resulted in a concomitant decline in demand by original equipment manufacturers for TTVs. The OEM share of U.S. TTV consumption fell steadily from about 45 percent by quantity in 1977 to about 35 percent in 1981. Shipments to the OEM market declined nearly 31 percent between 1977 and 1981. Unlike the situation in the replacement market, shipments to the OEM market increased only slightly in 1981, and in January–April 1982, they again declined from the corresponding period in 1981.[37]

At the same time that demand was declining in the replacement market, the largest U.S. producers of TTVs (Bridgeport, Eaton and Schrader) intensified their efforts to sell in that market to offset their declining OEM sales. The increased competition in the replacement market resulted in a decline in the market share of small firms and also of imports.[38] Data available to the Commission show that increased shipments to the replacement market by two of the large domestic producers had a greater effect on the smaller producers than did imports.[39]

Analysis of data from questionnaires show that from 1979, the peak year for sales of both domestic and imported valves, to 1981, shipments to the replacement market by the larger domestic producers rose two percent while inports declined 18 percent and shipments by the smaller producers declined 16 percent. From 1980–1981, total shipments to the replacement market by the three largest firms increased by an average of 22 percent, while imports increased by three percent, and shipments by the smaller firms in that market increased by two percent.[40]

In sum, the decline in consumption since 1979 and the increased competition in the replacement market between U.S. producers far outweighed the imports as causes of injury to the domestic TTVs industry.

Substantial Cause of Threat of Serious Injury

The Senate Finance Committee Report states that: "[T]he threat of serious injury exists when serious injury, although not yet existing, is clearly imminent if import trends continue unabated."[41]

Imports have been decreasing since 1979, and evidence received by the Commission indicates that exports to the United States from West Germany, traditionally the principal supplier of imported TTV, are not likely to increase significantly in the near future.

The State Department has reported that Turkish production and exports may increase greatly and all of Turkish production is likely to be exported to the United States.[42] Actual imports from Turkey to date have been well below State Department predictions, and no firm commitments to increase production for export to the United States have been disclosed. It would be conjectural to assume that serious injury is clearly imminent as a result of increased imports from Turkey.

Issued: September 20, 1982.

By Order of the Commission.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (82-56)]

NASA Advisory Council, Space Systems and Technology Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Advisory Subcommittee on Space Electronics.

DATE AND TIME: October 18, 1982, 2 p.m. to 5 p.m.; October 19, 1982, 8:30 a.m. to 5:30 p.m.

ADDRESS: Lyndon B. Johnson Space Center, Room 152, Building 16, Houston, TX.

FOR FURTHER INFORMATION CONTACT: Mr. Lee Holcomb, National Aeronautics and Space Administration, Code RTC-6, Washington, D.C. 20546 (202/775-2364).

SUPPLEMENTARY INFORMATION: This Informal Advisory Subcommittee on Space Electronics was established to review and make recommendations on NASA research and technology programs and plans in space electronics which include microelectronics devices, sensors, information systems, automation, and guidance and control technology. The Subcommittee, chaired by Dr. Raj Reddy, is comprised of 11 members. The meeting will be open to the public up to the seating capacity of the room (approximately 35 persons, including the Subcommittee members and participants).

TYPE OF MEETING: Open.

Agenda

October 18, 1982

2 p.m.—Subcommittee Business.
3 p.m.—Computer Science Memorandum of Understanding and Program Overview.
5 p.m.—Adjourn.

October 19, 1982

8:30 a.m.—Computer Operations and Data Systems.
4 p.m.—Custom Large Scale Integration.
5:30 p.m.—Adjourn.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on October 7-9, 1982, in Room 1046, 1717 H Street, NW, Washington, DC. Notice of this meeting was published in the **Federal Register** on August 25, 1982.

The agenda for the subject meeting will be as follows:

Thursday, October 7, 1982

8:30 A.M.-8:45 A.M.: Opening Session (Open)

The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to ACRS activities.

8:45 A.M.-12:45 P.M.: WPPSS Nuclear Plant Unit 2 (Open)

The ACRS Members will hear the report of its subcommittee and consultants who are present regarding the request for an Operating License for this unit. Representatives of the NRC Staff and the applicant will also make presentations and respond to questions regarding this matter. Portions of this session will be closed as necessary to discuss Proprietary Information and safeguards information applicable to this project.

1:45 P.M.-3:45 P.M.: Human Factors Integrated Program Plan (Open)

The Committee will hear the report of its subcommittee regarding the proposed NRC plan for an integrated human factors program.

Members of the NRC Staff will make presentations and respond to questions regarding this matter.

3:45 P.M.-4:45 P.M.: Future ACRS Activities (Open)

The Members will discuss anticipated subcommittee activities and proposed activities of the full Committee.

4:45 P.M.-5:30 P.M.: ACRS Subcommittee Activities (Open)

The Committee will hear and discuss the reports of designated subcommittees regarding safety related matters including proposed NRC requirements for staffing at Nuclear Power Plants (10 CFR Part 50) and other matters related to nuclear power plant operations.

Friday, October 8, 1982

8:30 A.M.-11:30 A.M.: Reactor Pressure Vessel Thermal Shock (Open)

The Members will hear the report of the ACRS subcommittee and consultants who are present regarding the NRC proposed plan of action to resolve the concerns associated with repressurization of reactor

pressure vessels following an overcooling transient.
Members of the NRC Staff will make presentations and respond to questions regarding this matter.
Representatives of the nuclear industry will participate as appropriate.
Portions of this session will be closed as necessary to discuss Proprietary Information related to this matter.

11:30 A.M.–12:15 P.M.: ACRS Subcommittee Activities (Open)

The Members will hear and discuss the reports of designated ACRS subcommittees regarding safety related matters including the reliability of D.C. power supplies, ongoing work regarding complete loss of electrical power, and the controlinstrumentation systems for the CRBR.

1:15 P.M.–3:15 P.M.: Emergency Core Cooling Systems (Open)

The ACRS Members will hear the report of its subcommittee regarding the impact of small break LOCAs on natural circulation in systems using once-through steam generators and proposed changes in 10 CFR 50, Appendix K, ECCS Evaluation Models.
Members of the NRC Staff and the nuclear industry will participate as appropriate.
Portions of this session will be closed as necessary to discuss Proprietary Information applicable to this matter.

3:15 P.M.–5:30 P.M.: ACRS Reports to NRC (Open)

The Committee Members will discuss proposed ACRS reports to the NRC regarding items considered during this meeting.
Portions of this session will be closed as necessary to consider Proprietary Information applicable to the matters being discussed.

Saturday, October 9, 1982

8:30 A.M.–12:00 Noon: ACRS Reports to NRC (Open)

The Members will discuss proposed reports to the NRC regarding matters considered during this meeting.
Portions of this session will be closed as necessary to consider Proprietary Information applicable to the matters being discussed.

12:00 Noon–12:30 P.M.: Activities of ACRS Members (Open)

Proposed activities of ACRS Members will be discussed.
Portions of this session will be closed as necessary to discuss information, the release of which would represent a clearly unwarranted invasion of personal privacy and to discuss matters which relate solely to internal personnel rules and practices.

Procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on September 30, 1981 (46 FR 47903). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a telephone call to the ACRS Executive Director (R. F. Fraley) prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with Subsection 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss Proprietary Information (5 U.S.C. 552b(c)(4)), and matters which relate solely to the internal personnel rules and practices of the agency (5 U.S.C. 552b(c)(2)), and safeguards information (5 U.S.C. 552b(c)(3)), and information, the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 A.M. and 5:00 P.M. EDT.

Dated: September 24, 1982.

John C. Hoyle,

Advisory Committee Management.

[Docket No. 50–364]

Alabama Power Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 17 to Facility Operating License No. NPF–8 issued to Alabama Power Company (the licensee), which revised Technical Specifications for operation of the Joseph M. Farley Nuclear Plant, Unit No. 2 (the facility) located in Houston County, Alabama. The amendment is effective as of the date of issuance.

The amendment extends for one-time only the visual surveillance interval for inaccessible hydraulic snubbers until the refueling outage scheduled to begin on October 22, 1982.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for

amendment dated August 2, 1982. (2) Amendment No. 17 to License No. NPF–8, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 22nd day of September, 1982.

For the Nuclear Regulatory Commission,

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. 50–313]

Arkansas Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 69 to Facility Operating License No. DPR–51, issued to Arkansas Power and Light Company (the licensee), which revised the Technical Specifications (TSs) for operation of Arkansas Nuclear One, Unit No. 1 (ANO–1) located in Pope County, Arkansas. The amendment is effective as of the date of issuance.

The amendment revised the TSs to require chlorine detection and protection capability for the control room.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the licensee's application for amendment dated July 14, 1982, as supplemented August 24, 1982, (2) Amendment No. 69 to License No. DPR–51, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room 1717 H Street, NW., Washington, D.C. and at the Arkansas Tech University, Russellville, Arkansas. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 21st day of September 1982

For the Nuclear Regulatory Commission,

John F. Stolz,

Chief, Operating Reactors Branch #4, Division of Licensing.

BILLING CODE 7590–01–M

[Docket Nos. 50–317 and 318]

Baltimore Gas & Electric Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 75 and 56 to Facility Operating Licenses Nos. DPR–53 and DPR–69, issued to Baltimore Gas and Electric Company, which revised Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant, Units Nos. 1 and 2. The amendments are effective as of the date of issuance.

These amendments correct typographical errors involving inservice inspection and valve testing; allow start up of the reactors with one or more inoperable but isolated power operated relief valves; incorporate numerical values of containment leakage rates and incorporate by reference the latest applicable version of Regulatory Guide 1.33.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for amendments dated August 2, 1982, (2) Amendment Nos. 75 and 56 to License Nos. DPR–53 and DPR–69, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Docment Room, 1717 H Street, NW., Washington, D.C. and at the Calvert County Library, Prince Frederick, Maryland. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission. Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 20th day of September 1982.

[Docket Nos. 50–317 and 318]

Baltimore Gas & Electric Co., Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 76 and 57 to Facility Operating Licenses Nos. DPR–53 and DPR–69, issued to Baltimore Gas and Electric Company, which revised Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant, Units Nos. 1 and 2. The amendments are effective as of the date of issuance.

These amendments revise the Technical Specifications to allow continued operation of Unit 1 for up to 21 days with one control room air conditioning unit inoperable during the October 1982 Unit 2 refueling outage. In addition, the comparable wording in the Unit 2 TS has been deleted since its applicability terminated on July 21, 1982.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the

license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for amendment dated August 26, 1982, (2) Amendments Nos. 76 and 57 to License Nos. DPR–53 and DPR–69, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Calvert County Library, Prince Frederick, Maryland. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

BILLING CODE 7590-01-M

Amended Subagreement 2 Between the Washington State Energy Facility Site Evaluation Council and the United States Nuclear Regulatory Commission for a Protocol for the Conduct of Joint Hearings on the Skagit Nuclear Power Project, Units 1 and 2

A memorandum of Understanding between the NRC and the State of Washington, signed on September 6, 1978 was published September 27, 1978 (43 FR 43774 ff). Subagreement 2 to that MOU was originally published August 17, 1981 (46 FR 41646 ff).

The Amendment to Subagreement 2 published below describes the cooperative regulatory policy being implemented by the NRC and the State of Washington with respect to protocol for the conduct of joint hearings for Skagit Nuclear Power Project, Units 1 and 2.

This amendment is requested by the State because of a recent change in State law. Previously, regulatory and administrative agencie of State government were able to use hearing examiners (administrative law judges) in the conduct of contested case hearings. Effective the first of July 1982, this is no longer the case. The legislature has created a new Office of Administrative Hearings which is to independently conduct such hearings for an agency and return a recommended decision to the agency. The other option available under this recent change is for the agency to conduct the hearing itself, dispensing with the services of a hearing examiner.

The Washington State Energy Facility Site Evaluation Council has advised NRC that they feel they cannot turn their responsibilities over to an independent agency. Therefore, they have elected to handle their own hearings with the Chairman or a Council member designated by the Chairman actually presiding. This action necessitates the amendments to Subagreement 2.

FOR FURTHER INFORMATION CONTACT: Frank Young, Office of State Programs, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone (301) 492–9879.

Dated at Bethesda, Maryland this 21st day of September 1982.

BILLING CODE 7590-01-M

Documents containing reporting or recordkeeping requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: New

2. The title of the information collection: Mark I Containment Program and NUREG–0661, "Mark I Containment Long Term Program"

3. The form number if applicable: Not Applicable

4. How often the collection is required: Nonrecurring

5. Who will be required or asked to report: BWR Operating Power Reactor Licensees and Applicants with Mark I Containments.

6. An estimate of the number of responses: 16

7. An estimate of the total number of hours needed to complete the requirement or request: 16,000

8. An indication of whether Section 3504(h), Pub. L. 96–511 applies: Not Applicable.

9. Abstract: NRC has issued Orders requiring BWR licensees with Mark I containments to make modifications to restore intended safety margins. The NRC is evaluating the licensees plant unique analyses to determine their acceptability against NUREG–0661. To complete the review additional information related to deviations from NUREG–0661 and issues part of the Mark I program but not specifically addressed in NUREG–0661 will have to be provided.

Copies of the submittal may be inspected or obtained for a fee from NRC Public Document Room, 1717 H Street, NW. Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer, Gwendolyn W. Pla, (202) 395–6880.

NRC Clearance Officer is R. Stephen Scott, (301) 492–8585.

Dated at Bethesda, Maryland, this 23rd day of September 1982.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

PRESIDENT'S COMMISSION FOR THE STUDY OF ETHICAL PROBLEMS IN MEDICINE AND BIOMEDICAL AND BEHAVIORAL RESEARCH

Meeting

Notice is hereby given pursuant to Section 10(a)(2) of the Federal Advisory Committees Act, that the twenty-fifth meeting of the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research will be held in the Auditorium of The Medical Society of the District of Columbia, 2007 Eye Street NW., Washington, D.C. from 9:00 a.m. to 5:00 p.m. on Friday, October 8, 1982 and from 8:30 a.m. to 5:00 p.m. on Saturday, October 9, 1982.

The meeting will be open to the public, subject to limitations of available space. The agenda will include, among other things, Commission review of a draft report on the ethical and legal implications of genetic screening and counseling, and a draft report on decisions to forego life-sustaining treatment.

During Friday afternoon at approximately 1:30 p.m., and Saturday afternoon, at approximately 1:00 p.m., fifteen minutes will be devoted to comments from the floor on the subject of any of the agenda items, limited to three minutes per comment. Written suggestions and comments will be accepted for the record from those who are unable to speak because of the constraints of time and from those unable to attend the meeting.

Records shall be kept on all Commission proceedings and will be available for public inspection at the Commission office, located in Suite 555, 2000 K Street NW., Washington, D.C. 20006.

For further information, contact Andrew Burness, Public Information Officer, at (202) 653–6051.

Alexander M. Capron,

Executive Director.

SMALL BUSINESS ADMINISTRATION

[License No. 06/06–0241]

Aspen Financial Corp.; License Surrender of Aspen Financial Corporation

Notice is hereby given that Aspen Financial Corporation (AFC), 333 North Belt, Suite 660, Houston, Texas 77060, has surrendered its license to operate as a small business investment company under the Small Business Investment Act of 1958, as amended (the Act). AFC was licensed by the Small Business Administration on March 10, 1961.

Under the authority vested by the Act and pursuant to the Regulations promulgated thereunder, the surrender of the license was accepted on September 3, 1982, and accordingly, all rights, privileges and franchises derived therefrom have been terminated.

[Application No. 05/05–0171]

First Indiana Equity Group, Inc.; Application for License To Operate as a Small Business Investment Company (SBIC)

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1982)), under the name of First Indiana Equity Group, Inc., 20 North Meridian Street, Indianapolis, Indiana 46204, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 *et seq.*) and the Rules and Regulations promulgated thereunder.

The officers, directors and 10 percent of more shareholders of the Applicant are as follows:

Name and Address, Title and Relationship and Percent of Ownership

Thomas R. Creasser, II, 3228 East Tenth Street, Indianapolis, Indiana 46201; Chairman, Board of Directors, 0

L. Gene Tanner, 20 N. Meridian Street, Indianapolis, Indiana 46204; President and Director, 0

Russell Breeden, III, 20 N. Meridian Street, Indianapolis, Indiana 46204; Vice President, 0

Larry R. Smith, 3228 East Tenth Street, Indianapolis, Indiana 46201; Secretary-Treasurer and Director, 0

Raffensperger, Hughes & Co., Inc., 20 North Meridian Street, Indianapolis, Indiana 46204; General Manager, 10.0

Eastside Community Investments, Inc., 3228 East Tenth Street, Indianapolis, Indiana 46201; Shareholder, 90.0

Raffensperger, Hughes & Co., Inc. (Raffensperger), 20 N Meridian Street, Indianapolis, Indiana 46204, is an investment banking firm that has conducted business from this location for approximately thirty years. Raffensperger will conduct the day to day operations of the Applicant.

Eastside Community Investments, Inc. (ECI), is a not-for-profit, non-partisan community development corporation founded in 1976 to promote the economic revitalization of the near eastside of Indianapolis, an area also known as Highland-Brookside. ECI represents 33 citizen groups and has grown from a staff of one in 1976 to twenty-two in 1981. It administered a budget of $25,000 in 1976 and has a budget of more than $4 million in 1981.

The Applicant proposes to begin operations with private capital of $1,000,000 derived from the sale of 900 shares of common stock to ECI, and 100 shares of common stock to Raffensperger.

The Applicant will conduct its operations in the State of Indiana.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness in accord with the Act and Regulations

Notice is hereby given that any person may (not later than 15 days from the publications of this Notice) submit written comments on the proposed company to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice shall be published in a newspaper of general circulation in Indianapolis, Indiana.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies).

Dated: September 23, 1982.

[License No. 02/02–0452]

N.P.D. Capital, Inc.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1982)), under the name of N.P.D. Capital, Inc. (Applicant), for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended, and the Rules and Regulations promulgated thereunder.

The Applicant is incorporated under the laws of the State of Delaware, and it will commence operations with proposed capitalization of $1,010,000.

The Applicant will have its place of business at 375 Park Avenue, New York, New York 10152, and it intends to conduct operations primarily in the State of New York, and the Northeastern Region of the United States. Applicant intends to furnish small business concerns with equity capital and long-term loans including equity features to enable them to grow and expand their operations.

The officers, directors and proposed one hundred percent (100%) stockholder of the Applicant will be:

National Patent Development Corporation—Parent 100%, 375 Park Avenue, New York, New York 10152

Jerome I. Feldman—Chairman, Director, Brooks Bend Farm, Hunterbrook Road, Yorkstown Heights, New York 10598
Irwin S. Friedman—President, General Manager, 400 East 56th Street, New York, New York 10022
Martin M. Pollak—Vice President, Director, 16 Springwood Patch, Laurel Hollow, New York 11791
Allen D. Frisch—Vice President, Finance, 30 Wagonwheel Lane, Dix Hills, New York 11746
David A. Rapaport—Vice President, Legal Secretary, Director, 26 Navajo Road, E. Brunswick, New Jersey 08816

Matters involved in SBA's consideration of the application include the general business reputation of the owner and management, and the probability of successful operation of the new company, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this Notice in the **Federal Register**, submit to SBA, in writing, relevant comments on the proposed licensing of this company. Any such communication should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

TSM Corp.; Filing of Application for Approval of a Conflict of Interest Transaction Between Associates

Notice is hereby given, pursuant to § 107.1004 of the Regulations governing small business investment companies (13 CFR 107.1004 (1982)), by the Small Business Administration (SBA) of a conflict of Interest transaction between TSM Corp. (TSM), 444 Executive Center Blvd., Suite 237, El Paso, Texas 79902, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act) (15 U.S.C. 661 et seq.), and an Associate.

TSM was licensed by SBA on November 16, 1976. Mr. Martin Silva is a shareholder, officer and director of Silva Enterprises, Inc. In addition, Mr. Silva is a Director of the Licensee. As a result of this equity interest, Silva Enterprises, Inc. is deemed to be an Associate of TSM as defined by § 107.3(b) of the SBA Rules and Regulations.

TSM proposes to make a $100,000 loan to Silva Enterprises, Inc., an Associate of TSM as defined by § 107.3(c) of the Regulations.

Notice is hereby given that any person may, not later than ten (10) days from the date of this notice, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in El Paso, Texas.

Verde Capital Corp.; Filing of Application for Transfer of Control of a Licensed Small Business Investment Company (SBIC)

Notice is hereby given that an application has been filed with the Small Business Administration (SBA), pursuant to § 107.701 of the SBA Regulations (13 CFR 107.701(1982)), for the transfer of control of Verde Capital Corporation (Licensee), 6701 Sunset Drive, Suite 104, South Miami, Florida 33143, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act).

The Licensee is currently owned, 50 percent each, by Messrs. Steven J. Green and Max Homberger. It is proposed that Mr. Green sell his shares to Mr. Homberger making the latter the sole shareholder of the Licensee. There will be no change in the officers and directors; Mr. Green will remain a director.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed transferee, and the probability of successful operations under his control, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this Notice, submit to SBA, in writing, comments on the transfer of control. Any such communications should be addressed to the Deputy Associate Administrator for Investment, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Miami, Florida.

Venture Group, Inc.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application for a license to operate as a small business investment company (SBIC) under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. *661 et seq.)*, and the Rules and Regulations promulgated thereunder, has been filed by Venture Group, Inc., 5433 Buffalo Avenue, Jacksonville, Florida 32208, pursuant to § 107.102 of the Regulations governing SBICs (13 CFR 107.102 (1982)).

The proposed officers, directors and sole shareholder of the Applicant are as follows:

Ellis W. Hitzing, 5637 Buffalo Avenue, Jacksonville, FL 32208; President, Director, sole shareholder.
Albert G. Hitzing, 7778 Los Palmas Way, Jacksonville, FL 32216; Vice President, Director.
Kenneth C. Caplan, 8922 Heavenside Drive, Jacksonville, FL 32217; Secretary/Treasurer, Director.

There will be three classes of stock authorized: 1,000 shares of Common Stock with a par value of $1.00 per share; 500 shares of Preferred Stock—Series A, par value $500.00 per share; and 7,500 shares of a special class or classes with a par value of $1.00 per share. Initially only 1,000 shares of Common Stock will be issued with a resultant paid in capital and paid-in surplus of $500,000.

The applicant will conduct its operations principally in the State of Florida.

As an SBIC under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and

conducting the activities contemplated under the Act, which are to provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns to persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management, including adequate profitability and financial soundness in accordance with the Act and Regulations.

Notice is hereby given that any person may (not later than 15 days from the publication of this Notice) submit written comments on the proposed company to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this Notice shall be published in a newspaper of general circulation in Jacksonville, Florida.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies).

Dated: September 22, 1982.

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

Fiscal Service

[Dept. Circ. 570, 1982 Rev., Supp. No. 8]

Surety Companies Acceptable on Federal Bonds

A certificate of authority as an acceptable surety on Federal bonds is hereby issued to the following company under Sections 6 to 13 of Title 6 of the United States Code. An underwriting limitation of $315,000 has been established for the company.

Name of Company: National Excess Insurance Company.

Business Address: 4400 MacArthur Blvd., Newport Beach, California 92660.

State of Incorporation: California.

Certificates of authority expire on June 30 each year, unless renewed prior to that date or sooner revoked. The certificates are subject to subsequent annual renewal so long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1 in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Federal bond-approving officers should annotate their reference copies of the Treasury Circular 570, 1982 Revision, at page 28879 to reflect this addition. Copies of the circular, when issued, may be

obtained from the Operations Staff (Surety), Banking and Cash Management, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: September 17, 1982.

VETERANS ADMINISTRATION

Construction Projects at Medical Centers and National Cemeteries; Finding of No Significant Impact

The Veterans Administration (VA) has determined that potential environmental impacts will be minimal from development of the following projects:

Bath, New York
*Construction of Fire Lane
Huntington, West Virginia
*Warehouse Addition Building 2
Indianapolis, Indiana
Expand Outpatient Clinic
Jackson, Mississippi
*Construct Warehouse
Kansas City, Kansas
Animal Research Facility
Lake City, Florida
Outpatient Clinical Addition
Loma Linda, California
60-Bed Nursing Home Care Unit
Lyons, New Jersey
*Replace Sewage Treatment Plant
Oklahoma City, Oklahoma
Pedestrian Bridge
Providence, Rhode Island
60-Bed Nursing Home Care Unit
Sepulveda, California
Underground Water Reservoir
White City National Cemetery, Oregon
*Administration Service Building
White City National Cemetery, Oregon
*New Entrance and Roadway

An * designates projects for which compliance with Section 106, Historic Preservation Act of 1966 will be necessary.

Development of the projects will have minor temporary impacts on the human and natural environments affecting open space, air quality, noise levels, solid waste, water quality or visual impacts during the construction period of the project. During the construction and operation, the VA will adhere to all applicable Federal, State, and local environmental regulations.

Mitigation of the projects impacts on the environment include appropriate erosion, noise, dust, and fume control during constrtuction as delineated in the Veterans Administration Standard Specifications, Environmental Protection Section.

The significance of the identified impacts has been evaluated relative to the considerations of both context and intensity, as defined by the Council on Environmental Quality (Title 40 CFR 1508.27).

The Environmental Assessments have been performed in accordance with the requirements of the National Environmental Policy Act Regulations, §§ 1501.3 and 1508.9. A "Finding of No Significant Impact" has been reached based on the information presented in each document. The assessments have been placed for public examination at the Veterans Administration, Washington, D.C. Person wishing to examine a copy of an assessment may do so at the following office: Veterans Administration Central Office, Room 423, 811 Vermont Avenue, NW., Washington, D.C. 20420, Telephone No. 202–389–3316. Questions or requests for single copies should be directed to Mr. Willard Sitler, P.E., Director, Environmental Affairs Staff (005B), at the above address.

Dated: September 22, 1982.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, October 4, 1982, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Applications for consent to merge and establish three branches:

Mechanics and Farmers Savings Bank of Bridgeport, Bridgeport, Connecticut, for consent to merge, under its charter and title, with New Canaan Savings Bank, New Canaan, Connecticut, and for consent to establish the three offices of new Canaan Savings Bank as branches of the resultant bank.

Sun Bank of Tampa Bay, Tampa, Florida, for consent to merge with Brandon State Bank, Brandon, Florida, under the charter of Sun Bank of Tampa Bay and with the title "Sun Bank/Hillsborough," and for consent to establish the three offices of Brandon State Bank as branches of the resultant bank.

Request for exemption pursuant to section 348.6(b)(2) of the Corporation's rules and regulations entitled "Management Official Interlocks":

McAllen State Bank, McAllen, Texas.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,407—The Greenwich Savings Bank, New York, New York

Memorandum and Resolution re: Banco de Ahorro de Puerto Rico, San Juan (Hato Rey), Puerto Rico and Banco Economias, San German, Puerto Rico

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications or requests approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: September 27, 1982.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

3

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, October 4, 1982, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors pursuant to sections 552b(c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Notes.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Request for consent to capitalize the value of the core deposit intangible acquired in a merger transaction:

The Hibernia Bank, San Francisco, California, in connection with its merger with Security National Bank, Walnut Creek, California.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC

Building located at 550 17th Street, N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation at (202) 389-4425.

Dated: September 27, 1982.

4

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 9:37 a.m. on Friday, September 24, 1982, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to (1) accept the bid of American Savings Bank, New York City (Manhattan), New York, for an assisted merger with United Mutual Savings Bank, New York City (Manhattan), New York; (2) approve the application of American Savings Bank for consent to merge, under its charter and title, with United Mutual Savings Bank and to establish the main office and 12 branches of United Mutual Savings Bank as branches of American Savings Bank; and (3) provide financial assistance to American Savings Bank, pursuant to section 13(e) of the Federal Deposit Insurance Act, in order to facilitate the merger and prevent the probable failure of United Mutual Savings Bank.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. Doyle L. Arnold, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: September 24, 1982.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

INTERNATIONAL TRADE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 47 FR 41228, September 17, 1982.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 9:30 a.m., Wednesday, September 29, 1982.

CHANGES IN THE MEETING: Emergency action to close a portion of the meeting originally announced as open to the public.

Pursuant to the specific exemptions of 5 U.S.C. 552b(c)(4) and in conformity with 19 CFR 201.36(b)(4), Commissioners Eckes, Stern, Frank, and Haggart voted by action jacket SE-82-11 to hold a portion of the discussion with respect to item No. 5 (Investigation 731-TA-102 (Preliminary) (Certain Radio Paging and Alerting Devices from Japan)—briefing and vote) in closed session.

Commissioners Eckes, Stern, Frank, and Haggart determined, pursuant to 19 CFR 201.37(b) that Commission business requires the change in the determination of the Commission to open or close this portion of the meeting and directed the issuance of this notice at the earliest practicable time.

PERSON FOR MORE INFORMATION: Kenneth R. Mason, Secretary (202) 523-0161.

POSTAL SERVICE

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold meetings at 3:30 p.m. on Monday, October 4, in Riverside, Connecticut, and at 8:30 a.m. on Tuesday, October 5, 1982, in Room 1513, 15th floor, Church Street Station, 90 Church Street, New York, New York. As indicated in the following paragraphs, the October 4 meeting is closed to public observation. The October 5 meeting is open to the public. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meetings should be addressed to the Secretary of the Board, Louis A. Cox, at (202) 245-4632.

At its meeting on September 10, 1982, the Board voted to close to public observation its meeting scheduled for October 4, 1982.

One portion of the meeting to be closed will consist of further consideration of the July 9, 1982, decision of the U.S. Court of Appeals for the Second Circuit in *Time, Inc. et al.* v. *United States Postal Service* concerning the most recent general ratemaking proceeding. Another portion of the Board meeting to be closed will consist of a discussion of Postal Service strategic planning.

Agenda

Monday Afternoon Session (Closed)

1. Further consideration of Court Decision on Rates.
2. Strategic Planning.

Tuesday Morning Session (Open)

1. Minutes of the Previous Meeting.
2. Remarks of the Postmaster General.

(In keeping with its consistent practice, the Board's agenda provides this opportunity for the Postmaster General to inform the members of miscellaneous current developments concerning the Postal Service. Nothing that requires a decision by the Board is brought up under this item.)

3. Report by the Chairman of the Committee on Electronic Communications.
(Mr. Sullivan will report on the current status of E–COM.)

4. Report by the Chairman of the Committee on Corporate Responsibility.
(Mr. Jenkins will report on the current status of the EEO/Affirmative Action contractual study initiated by the Board at its January 1982 meeting.)

5. Review of Capital Investment Program.
(Annually, the Board considers approval of Postal Service capital investment plans, in accordance with section 3.4(f) of the Bylaws. Mr. Biglin, Senior Assistant Postmaster General, Administration Group, will present the Postal Service's capital investment program.)

6. Report on Disposal of Surplus Property.
(The Board will be briefed on the Postal Service's property disposal program. Mr. Biglin will present a report on the results of the program.)

7. Proposed Filing with Postal Rate Commission on Size and Weight Limits.
(Pursuant to Pub. L. 97–242 (August 24, 1982), which amended the Postal Reorganization Act (39 U.S.C. 3682) so as to provide that size and weight limitations for mail matter (whether or not it is letter mail) may be established in the same manner as prescribed for changes in mail classification, the Board will consider authorizing the Postal Service to request the Postal Rate Commission to recommend a decision on changes in the size and weight limitations prescribed by subsections (a) and (b) of 39 U.S.C. 3682 as in effect prior to the August 24 Amendment. Mr. Finch will present management's proposal for the Board's approval.)

8. Regional Postmaster General Report.
(Mr. Mulligan, Regional Postmaster General, and Mr. Shuman, District Manager/Postmaster, New York, will report to the Board on postal conditions in the Northeast Region and in New York City.)

9. Status of Revenue Forgone Appropriations.
(The Board will review the current status of FY 1983 appropriations legislation so that the Governors may consider possible action under 39 U.S.C. 3627 to adjust the rates charged for preferred categories of mail if there were to be a failure of appropriations. Mr. Finch will report on this matter.)

Louis A. Cox,
Secretary.

Part II

Department of Health and Human Services

Health Care Financing Administration

Medicare Program; Schedule of Limits on Skilled Nursing Facility Inpatient Routine Service Costs

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Medicare Program; Schedule of Limits on Skilled Nursing Facility Inpatient Routine Service Costs

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final notice with comment period.

SUMMARY: This notice sets forth a schedule of limits on skilled nursing facility (SNF) inpatient routine service costs that may be reimbursed under Medicare for cost reporting periods beginning on or after October 1, 1982. We are revising the limits to take into account more recent data and the effects of inflation, and to implement sections 102 and 103 of Pub. L. 92–248, the Tax Equity and Fiscal Responsibility Act of 1982. This schedule replaces the current schedule that was published in the **Federal Register** on September 30, 1981 (46 FR 48026).

EFFECTIVE DATE: October 1, 1982. Although this notice is being published in final, we will accept any comments on the provisions of the notice. Comments should be received by November 29, 1982.

ADDRESS: Address comments in writing to: Administrator, Health Care Financing Administration, Department of Health and Human Services, P.O. Box 17073, Baltimore, Maryland 21235. In commenting, please refer to file code BPP–213–FNC.

If you prefer, you may deliver your comments to Room 309–G Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, D.C., or to Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

Comments will be available for public inspection as they are received, beginning approximately three weeks after publication, in Room 309–G of the Department's offices at 200 Independence Ave., SW., Washington, D.C. 20201, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202–245–7890).

FOR FURTHER INFORMATION CONTACT: Carl Slutter, 301–594–9344.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1861(v)(i) of the Social Security Act (42 U.S.C. 1395x(v)(1)) authorizes the Secretary to set prospective limits on allowable costs incurred by a provider of services that will be reimbursed under Medicare, based on estimates of the costs necessary in the efficient delivery of needed health services. Implementing regulations appear at 42 CFR 405.460.

Under this authority we have published limits on SNF per diem inpatient routine service costs annually since 1979. On September 30, 1981, we published in the **Federal Register** (46 FR 48026) a schedule of limits applicable to cost reporting periods beginning on or after October 1, 1981. These limits are applied to adjusted SNF per diem inpatient routine service costs, and are set at 112 percent of the average per diem labor-related and nonlabor costs of each comparison group. The schedule set forth below replaces the September 30 schedule.

In developing the limits contained in this schedule, we have made certain changes from the methodology used for the September 30, 1981 schedule. These changes are discussed below.

II. Major Provisions

The new schedule of limits provides for:

1. Limits on SNF per diem inpatient routine service cost, adjusted by the exclusion of capital-related costs. Capital-related costs include interest, depreciation, insurance, rent, and fixed asset related costs that are normally included in the depreciation accounts on the cost reporting from (HCFA–2552) used for Medicare reimbursement purposes. Inpatient routine service costs in the data base have also been adjusted to reflect the elimination of the inpatient routine nursing salary costs differential for cost reporting periods subject to the limits.

2. A classification system based on whether a SNF is located within a Standard Metropolitan Statistical Area (SMSA). In New England, New England County Metropolitan Areas (NECMAs) are used to determine urban location.

3. Use of actual SNF routine service per diem cost data from Medicare cost reports to device the limits.

4. A market basket index (see Appendix I) that we developed to reflect changes in the prices of goods and services purchased by SNFs. This market basket is used to adjust the SNF cost data to reflect cost increases occurring between the cost reporting periods represented in the data collection to the midpoints of the cost reporting periods to which the limits would apply.

5. A wage index (see Tables II and III) that we developed from hospital wage and employment data obtained from the Bureau of Labor Statistics (BLS). We use this index to adjust for the differing levels of labor-related costs among the areas in which SNFs are located. The change in our methodology for calculating the wage index is described later in this notice.

6. A cost-of-living adjustment to the nonlabor component of the limits for SNFs located in Alaska, Hawaii and Puerto Rico.

7. Use of a single schedule of limits for hospital-based and freestanding SNFs. This change in methodology is described later in this notice.

8. Limits set at 112 percent of the mean labor-related costs and of the mean nonlabor costs of each group.

9. A revised schedule of per diem dollar limits that reflects the methodology described above.

III. Summary of Changes in Methodology

The revised schedule of limits incorporates the following changes in the methodology used to determine the current limits:

A. Statutory Changes

1. *Use of a single schedule of limits for hospital-based and freestanding SNFs.* All previous SNF cost limit schedules have included separate limits for hospital-based and freestanding SNFs. We established separate limits for the two types of SNFs because of concerns raised by hospital-based SNFs that they incurred higher costs due to circumstances beyond their control. These circumstances include the required Medicare methodology for the allocation of overhead costs, and differences in the intensity of care between the two types of SNFs.

On September 3, 1982, Congress enacted Pub. L. 97–248, the Tax Equity and Fiscal Responsibility Act of 1982. Section 102 of the law eliminates separate limits for hospital-based and freestanding SNFs for cost reporting periods beginning on or after October 1, 1982. The statute does, however, provide for adjustments, as appropriate, to be made in the limit applied to hospital-based facilities. The conference agreement expressed the intention that HCFA would, where warranted, recognize legitimate cost differences resulting from such factors as a more complex case-mix or the effects of Medicare cost allocation requirements. (See H.R. Rep. No. 97–760, 97th Cong., 2nd Sess., 423 (1982).)

We have allowed in this notice an "add-on" adjustment to account for certain higher costs of hospital-based SNFs that are attributable to the Medicare allocation procedures. We developed this "add-on" adjustment based on a study of the cost attributable

to general service (overhead) cost centers in 2330 freestanding and 392 hospital-based SNFs which compared the cost of general services in each type of facility. The study covered all SNFs for which our data base contained complete cost allocation data from the Medicare cost report, form HCFA–2552 (approximately 80 percent of all cost reports in our data base). We determined that, in some cases, the required Medicare cost allocation process can result in hospital administrative and general (A&G) overhead costs (for example, non patient telephone, data processing, purchasing, receiving, stores, admitting, cashiering, accounts receivable, and collections) being stepped down to the SNF cost center in greater proportion than the cost center's use of those services. This results from the use of accumulated cost as a statistical allocation basis. Because certain overhead expenses (including A&G) are frequently assigned to the SNF cost center on the hospital cost report before costs from the A&G cost center are allocated, use of this basis of allocation in this instance overstates the SNF cost center's consumption of A&G services from the hospital.

The "add-on" adjustment we are providing is specifically related to the allocation of costs in the administrative and general cost center. This has been accomplished by determining the dollar difference between hospital-based and freestanding SNFs in SMSA and non-SMSA locations in average A&G per diem cost allocated directly to the inpatient routine SNF cost center. The resulting dollar amount will be added to the freestanding limit to determine the limit for a hospital-based SNF. After examining the expenses that constitute the great bulk of the cost differences between hospital-based and freestanding facilities, we have concluded that, apart from the A&G cost center, the allocation procedures are not the chief contributor to the cost difference between the two types of facilities. We note that hospitals and SNFs, regardless of type, use the same cost reports and rules of allocation.

We recognize that hospital-based SNFs have also consistently claimed that they treat sicker patients than those in freestanding SNFs and are delivering more intense care. They contend that this factor contributes to their having higher costs than do freestanding SNFs. Comments from a small number of these SNFs received during development of earlier schedules of limits suggest that this may be true in specific cases. However, there has been a relative lack of information from which to draw generalizations on this issue, particularly with respect to how much of the cost difference may relate to intensity of care.

In the effort to gather more information in this area, we are conducting a limited study through the University of Colorado Health Sciences Center of variations in intensity of care and their effect on cost. The research, which is expected to provide a method for objectivity measuring interfacility variations in intensity of care and patient care needs, should answer the following questions:

1. To what extent do the higher costs of hospital-based SNFs in the sample population appear to result from the provision of more intense care required by the special needs of patients; and

2. Is the development of a research design to study this issue on a national scale feasible?

We do not anticipate that the Colorado study will fully explain how patient mix differences affect Medicare costs. Because the sample of facilities and patients used in the research includes all Colorado nursing homes, both skilled and intermediate care, the findings from the Colorado study will not be directly applicable to Medicare SNF services. Moreover, any final conclusions that are expected to be reached will have to await resolution of such questions as the effect on cost of variations in percentage occupancy and variations in the mix of skill levels in nursing staffs, questions which are beyond the scope of the current study. Nevertheless, the measures of case-mix and intensity of care under development should provide the basis for broader analysis in this area. The researchers conducting the study are in the process of testing and refining a number of the criteria used in the study design. However, the information, which we currently have, is too limited in scope to justify our creating an additional adjustment to the cost limits to reflect variations in patient mix. We point out that exceptions to the cost limits can be granted under 42 CFR 405.460(f) where a SNF's costs are shown to be the result of atypical services needed to meet the special needs of patients treated. Hospital-based SNFs can request an exception under these provisions for higher costs associated with the furnishing of atypical service.

2. *Elimination of inpatient routine nursing salary cost differential.* Under the Medicare regulations (42 CFR 405.430) published in July 1969 and amended in 1981, we have recognized a per diem rate above the facility's average costs for all patients for inpatient routine nursing care furnished to aged Medicare patients. (The differential is also applied to pediatric and maternity patients, who also are assumed to require a greater amount of routine nursing services than other patients.) This is called the "nursing salary cost differential." The differential is not an add-on to the total routine nursing salary costs incurred by a provider, but rather a reallocation of the actual routine nursing salary costs between aged, pediatric and maternity patients, on the one hand, and all other classes of patients on the other. It presumes that, on the average, aged, pediatric and maternity patients receive more routine nursing services than do other patients.

The effect of the nursing differential is that the Medicare program recognizes a higher than average routine per diem cost for aged, pediatric and maternity patients and a lower than average per diem cost for all other classes of patients. (Disabled Medicare beneficiaries are counted in the "all other" category unless they are also pediatric or maternity patients, and the lower than average per diem is applicable to that class of patient.)

The total impact of the differential on a particular facility's Medicare reimbursment will vary depending on the provider's patient mix. If all of the provider's patients were aged, pediatric and maternity, no differential would be applicable.

We presently recognize a nursing salary differential equal to 8.5 percent of the provider's average per diem nursing salary costs for SNFs. However, section 103 of Pub. L. 97–248, amended section 1861(v)(1)(J) of the Social Security Act to state that "regulations may not provide for any inpatient routine salary cost differential as a reimbursable cost for hospitals and skilled nursing facilities." According to its terms, section 103 is effective for all cost reporting periods subject to the cost limits contained in this notice. Therefore, the limits properly would not recognize any nursing salary cost differential.

We will be publishing a separate regulation reflecting the provisions of section 103. However, section 103 has also necessitated an adjustment of the cost limits because all of our current cost report data incorporates the

inpatient routine nursing salary differential in Medicare costs. We have adjusted the SNF data to exclude the differential and the cost limits set forth below reflect this adjustment. Because the majority of days of care in a SNF are aged days, the effect of the adjustment on the limit is not significant

B. Technical Change

Use of a combined wage index. As discussed earlier, we have changed the methodology used to compute the limits to include a combined wage index. This change is purely technical and, as discussed further below, has no effect on the amount of the limit for any SNF.

In developing and applying the 1979, 1980 and 1981 cost limit schedules, we used a hospital wage index to account for differences in the level of labor-related costs among the areas in which SNFs are located. To develop this wage index, we first calculated the national average wage for hospital workers in urban (SMSA or NECMA) areas, and a separate national average wage for hospital workers in non-urban (i.e., non-SMSA and non-NECMA) areas. We then divided the average wage for each urban and non-urban area by the appropriate national average (urban or non-urban). This calculation resulted in a separate index value for each urban area that reflected the wage level for that area relative to the national average of all urban areas. The calculation also resulted in an index value for each non-urban area that reflected the wage level for that area relative to the national average for all non-urban areas. We call this type of index, which relates the average wage for each individual area to separate urban or non-urban national averages, a "split" index.

Because the wage index we used to calculate the current limits is a split index, there are some cases in which the index value for an urban area is lower than the value for an adjacent non-urban area. The use of the split index has caused concern and confusion among SNFs in urban areas. To avoid further confusion on this point, we have, in developing the revised limits, used a "combined" wage index that relates the average area wages for both urban and non-urban areas to a single national average wage for all areas. Although the change from a split to a combined wage index has no effect on either the accuracy or the dollar amount of any SNF's limit, we believe use of a combined index will permit direct comparison of the index values for urban and rural areas, and thus make it easier for SNFs to understand how the wage index values for their areas were computed. The following example demonstrates that the final result using a split wage index, as compared to a combined wage index, is identical.

Example

(1) *Split wage index* = .8824: labor share = $44.33; labor deflated costs: $44.33 ÷ .8824 = $50.24; mean labor deflated costs = $45.85; area labor share limit: $45.85 × .8824 = *$40.46.*

(2) *Combined wage index* = .9694: labor share = $44.33; labor deflated costs: $44.33 ÷ .9694 = $44.80; mean labor deflated costs = $40.89; area labor share limit: $40.89 × .9694 = *$40.46.*

The following hypothetical sample array is the source of the data used in this example. The split and combined wage index used in the hypothetical sample array were derived as shown below.

HYPOTHETICAL SAMPLE

Area	Average monthly hospital wage	Split wage index	Combined wage index
1	$900	0.7059	0.7916
2	1,050	.8235	.9235
3	1,125	.8824	.9894
4	1,500	1.1765	1.3193
5	1,800	1.4118	1.5831
Total	$6,375		

Urban or rural nat'l avg. monthly hospital wage =

$$\frac{\text{Total urban or rural avg. monthly hospital wage}}{\text{Number urban or rural areas}} = \frac{\$6375}{5} = \$1,275$$

Combined nat'l ave. monthly hospital wage =

$$\frac{\text{Total urban avg. monthly hosp. wages plus Total rural Avg. Monthly hospital Wages}^{1}}{\text{Number urban areas plus number rural areas}} = \frac{\$6,375 + \$4,990^{1}}{10} = \$1,137$$

[1]Total Rural Average Monthly Hospital Wages are computed from average monthly hospital wages for five rural areas.

Example:

(1) Computation of split wage index

Area 1 average monthly hospital wage = $900; urban or rural nat'l. avg. monthly hospital wage = $1,275; area 1 split wage index: $900 ÷ $1,275 = .7059.

(2) Computation of combined wage index

Area 1 average monthly hospital wage = $900; combined national average monthly hosp. wage = $1,137; area 1 combined wage index: $900 ÷ $1,137 = .7916.

HYPOTHETICAL SAMPLE ARRAY

1	2	3		4	
Area	Labor share 80.32	Wage index: Split	Wage index: Combined	Labor deflated cost[1] using split wage index	Using combined wage index
1	80.10	0.7059	0.7916	56.91	60.86
2	37.50	.8235	.9235	45.54	40.81
3	44.33	.8824	.9894	50.24	44.80
4	51.32	1.1765	1.3193	43.62	38.90
5	46.65	1.4118	1.5831	33.04	29.47
Mean labor deflated arrayed costs =				$45.85	$40.89

[1]Col. 2 divided by corresponding value in col. 3.

5	6		7		8	
Area	Wage index: Split	Wage index: Combined	Mean labor deflated cost: Split wage index	Mean labor deflated cost: Combined wage index	Area limit (labor share)[1]: Split wage index	Area limit (labor share)[1]: Combined wage index
1	0.7059	0.7916	45.85	40.89	32.57	32.57
2	.8235	.9235	45.85	40.89	37.76	37.76
3	.8824	.9894	45.85	40.89	40.46	40.46
4	1.1765	1.3193	45.85	40.89	53.94	53.94
5	1.4118	1.5831	45.85	40.89	64.73	64.73

[1]Col. 7 multiplied by appropriate value in col. 6.

In developing the wage index for the limits, we have also used approximate, rather than actual, index values for 40 areas. (These approximate values are identified by asterisks in Tables II and III). We have done this because BLS, which supplies the data on wages and numbers of employees that we use to calculate the wage index, has informed us that its confidentiality requirements prohibit it from disclosing actual data for areas that include fewer than three reporting units. (A reporting unit need not be a single hospital. Reporting unit is defined by BLS as the smallest unit for which data are recorded on the employer's contribution report. For example, two facilities in the same area owned by one employer could appear as one reporting unit.) To make it possible to calculate limits for these areas, we have asked the BLS to identify the areas having wage index values numerically closest to, but not less than, the areas for which it cannot supply actual data. In the case of each area for which actual data are unavailable, we have substituted the wage index value identified by BLS as being closest to the actual value. We believe that the use of approximate rather than actual values for these areas will not affect the accuracy of the limits significantly, and will assure that no SNF's limit is reduced because actual data for its area are unavailable.

We have also, in developing the wage index used for the limits, excluded data

for Federal government hospitals. Because these hospitals typically use national pay scales, the amounts they pay their employees do not necessarily reflect area wage levels. They also do not normally participate in the Medicare program and, therefore, excluding these data is appropriate, We have included wage indexes in Table II for those newly designated SMSAs and NECMAs that were classified as such as a result of the 1980 census. (See appendix II for listing of newly designated SMSAs and NECMAs.) In addition, we now have wage indexes for Puerto Rico.This means that cost limits can now be applied to SNFs in Puerto Rico for the first time. (See Tables II and III.)

IV. Summary of Retained Methodology

1. *Separate group limits for labor-related and nonlabor components of per diem routine service costs.* As in the current schedule, we have retained separate group limits for the labor-related and nonlabor components of per diem routine service cost. We calculate these separate limits by first obtaining actual SNF per diem inpatient routine service cost data for each freestanding SNF. Next, to make the data reflect current conditions more accurately, we adjust the data from the midpoints of the cost reporting periods represented in the data collection to the midpoint of the initial cost reporting period to which the limits would apply. We than separate each freestanding SNF's per diem cost into labor-related and nonlabor portions, and divide the labor-related portion by the wage index for the SNF's location (see item 2 below). We then compute separate group means for the labor-related and nonlabor components, and multiply each group mean by 112 percent. For each group, the resulting amounts are shown in Table I.

2. *Adjustment of SNF cost data by wage index.* We are again using a hospital industry wage index to account for area wage differences. Use of the hospital industry index is necessary since there are not industry-specific data available on SNF wages. Because hospitals and SNFs generally compete in essentially the same labor market for employees, we believe an index based on geographic variations in hospital wages provides an accurate measure of geographic variations in wages paid by SNFs.

We developed the wage index from hospital wage data obtained from BLS. The data used are those for the "hospital industry", a standard BLS reporting category. The wage index we used for the revised limits is based on data for calendar year 1980, which are the latest available data. Data for 1981 will not be available until late in 1982.

We have been advised by the BLS that the wage index values for some areas are based on estimated 1980 data and may beed to be revised based on actual data that were not available when we computed the wage index values shown in Tables II and III.

If we receive additional 1980 data that require further changes in any wage index after the indexes for this final schedule have been calculated, we will notify the Medicare intermediaries of the corrected index and will direct them to recalculate the limits for the affected SNFs.

3. *Use of SNF market basket.* We have continued to base the cost limits on reported costs, adjusted for actual and projected cost increases by applying the SNF market basket index. The values used in deriving the index are contained in Appendix I below.

The market basket comprises the most commonly used categories of SNF routine service expenses. The categories we are using are based primarily on those used by the National Center for Health Statistics in its National Nursing Home Surveys.

The categories of expenses are weighted according to the estimated proportion of SNF routine service costs attributable to each category. The weights for all major categories of SNF costs are based on the National Nursing Home Surveys for 1972 and 1976. These are the most current and comprehensive sources of national data on the distribution of costs in SNFs. (The second column of the index table specifies the weights used for each category.)

In developing the market basket index, we obtained historical and projected rates of increase in the prices of goods and services in each category. The market basket index table, in the third and fourth columns, identifies the price variables used and the source of the forecast for calendar years 1980 through 1984.

The market basket index also provides for adjustments to be made in the limits if our forecasts of economic trends prove erroneous. If the final rate of increase in the market basket index for a year exceeds the estimated rate of increase by at least .3 of 1 percentage point, we will advise the Medicare intermediaries to use the actual rate to adjust each SNF's limit retroactively at final settlement of the SNF's cost report.

4. *Application of the hospital wage index to employee benefits, health service costs, costs of business services, and other miscellaneous expenses.* In developing the current schedule, we applied the wage index discussed above to five categories of labor-related costs: wages, employee benefits, health service costs, business service costs, and other miscellaneous costs. We have retained this method in developing this revised schedule of limits. The proportion of adjusted routine service costs we adjust by the wage index is 80.22 percent.

For purposes of applying the wage index, employee benefits include such items as FICA tax, health insurance, life insurance, facility contributions to employee retirement funds, and all other compensation that the SNF records in the "employee health and welfare" cost center on its Medicare cost report. (The Medicare Provider Reimbursement Manual, HCFA-Pub. 15–I, Chapter 4, and the instructions to the HCFA cost reporting forms, HCFA-Pub. 15–II) describe the types of costs that are to be recorded in that cost center.)

Health service costs are a category used by the National Nursing Home Survey conducted in 1977 by the Office of Health Research, Statistics and Technology, National Center for Health Statistics of the Public Health Service. They include the costs of routine services that are purchased under arrangement from outside sources.

Business services costs include costs of banking, contract laundry, telephone, and other services SNFs purchase at retail from outside suppliers.

Other miscellaneous costs include various types of routine operating costs not allocated to any other category of the market basket.

Thus, we will apply the wage index to the total portion of cost (80.22 percent) attributable to wages, fringe benefits, health service costs, business service costs, and other miscellaneous expenses rather than to the wage portion (61.26 percent) only. We are continuing this method because our analysis of the data we used to develop the hospital limits shows that area variations in routine per diem costs in these additional categories are closely related to area variations in prevailing wage levels. We believe that applying the wage index to the other categories of labor-related costs specified above, rather than to wages only, results in individual limits that are more equitable and more appropriate to each SNFs actual market environment.

5. *Limits set at 112 percent of mean.* We are maintaining the revised limits of 112 percent of the average labor-related and average non-labor costs of each group.

6. *Cost-of-living adjustment for Alaska, Hawaii, and Puerto Rico.* To avoid disadvantaging SNFs located in

Alaska and Hawaii, we are continuing to provide a cost-of-living adjustment for these States. In addition, since the cost limits can now be applied to SNFs in Puerto Rico, we are providing a cost-of-living adjustment for that area. This is an adjustment of the nonlabor component of the limit that applies to these areas, based on the amount of the most recently determined cost-of-living differentials developed by the Office of Personnel Management. Since we adjust the labor-related component by the applicable wage index, this cost-of-living adjustment applies only to the nonlabor component.

V. Impact Analyses

We have determined that this final notice is not likely to result in an annual economic impact of more than $100 million or more, or meet other threshold criteria of section 1(b) of Executive Order 12291. It is estimated that setting the limits at 112 percent of the mean and using a single schedule of limits for hospital-based and freestanding facilities will result in Medicare program savings over and above savings under the present rule of $20 million in FY 83, $53 million in FY 84, $62 million in FY 85, $69 million in FY 86, and $77 million in FY 87. The notice is therefore not a "major rule" as defined in Executive Order 12291, and a Regulatory Impact Analysis is not required.

The Regulatory Flexibility Act of 1980 (Pub. L. 96–354) requires a Regulatory Flexibility Analysis for all rules determined to have a significant economic impact on a substantial number of small entities. The analysis must contain the following information:

- A description of the reasons why the agency is considering taking action;
- A statement of the objectives and legal basis for the proposed rule;
- A description and an estimate of the number of small entities that would be affected by the proposed rule;
- A description of the projected reporting, recordkeeping or other compliance requirements of the proposed rule;
- An identification of any other rules that may duplicate, overlap or conflict with the proposed rule; and
- A description of any significant alternatives considered.

This notice requires such an analysis because it would, as discussed below, significantly impact a substantial number of nursing care facilities.

The following analysis, together with the remainder of this notice is presented to meet the requirements of the Regulatory Flexibility Act.

Section 1861(v)(1) of the Social Security Act (42 U.S.C. 1395x(v)(1)) authorizes the Secretary to set prospective limits on the costs that are reimbursed under Medicare, based on estimates of the costs necessary in the efficient delivery of needed health services. This provision of the Act is implemented under regulations set forth at 42 CFR 405.460. Section 102 of the Tax Equity and Fiscal Responsibility Act of 1982 amended the provision to require SNF cost limits based on the cost of freestanding facilities.

We have published schedules of limits on SNF per diem inpatient routine service costs annually since 1979. On September 30, 1981, we published in the **Federal Register** an annual update of the SNF limits applicable to cost reporting periods beginning on or after October 1, 1981.

This revised notice replaces the current schedule and applies to SNF inpatient routine service costs for cost reporting periods beginning on or after October 1, 1982.

In computing the revised limits, we adjusted errors in classifying capital-related costs found on the cost reports, we excluded all capital-related costs, we eliminated separate limits for hospital-based and freestanding SNFs as required by section 102 of Pub. L. 97–248, and we eliminated the effect of the inpatient routine nursing salary differential as required by section 103 of the same law. We will use the limits set forth below which reflect these changes in methodology, because we believe they will be more effective than the current limits in preventing payment for costs due to operating inefficiency.

We have 3,492 SNFs in our data base, 30.0 percent of which will exceed the limits. While most SNFs are considered to be small entities, cost reports indicate 1179 of the SNFs in the data base have less than 100 beds. Of these smallest providers, 308 (26.1 pecent) would exceed the limit. By comparison, we expect 740 (or 32.0 percent) of the 2312 SNFs with more than 100 beds will exceed these limits. Therefore, we do not expect the limits will impact a greater number of small entities.

We believe much of the impact of these revised cost limits can be reduced by more efficient operation. That is, affected SNFs can greatly reduce impact by initiating management improvements to reduce costs to levels which the majority of SNFs are now able to meet.

VI. Waiver of Proposed Notice and 30-day Delay in Effective Date

We have developed the revised limits set forth below by using the same basic methododdology that we used to develop the current SNF cost limits which were published on September 30, 1981. The methodology used to develop the September 30, 1981 limits had previously been published in a proposed notice for public comment (see 45 FR 41292). These comments, and our responses to them, are described in the final notice of SNF cost limits published September 45, 1980 (45 FR 58699).

We have described above in detail the changes to the methodology used to develop the limits. The changes eliminating separate limits for hospital-based and freestanding SNFs and eliminating the inpatient routine nursing salary cost differential were made to implement the provisions of Pub. L. 92–248, and are not discretionary. This change to a combined wage index is purely techncial and was made to eliminate confusion over the manner in which the limits are derived and the wage index adjustment applied. This change, as explained earlier, does not affect the amount of any SNF's limit.

Because the remaining methodology used for the revised schedule has previously been published for public comment, we do not believe it would be either necessary, useful or in the public interest to request comment on that methodology again. Therefore, we find good cause to waive publication of a proposed notice and publish this notice of revised limits in final form.

In the past, we generally have attempted to allow a 30-day period between the date of publication of each cost limit schedule and the effective date of the schedule. Since prompt publication of the limits would be in the public interest, in order to meet the effective date established by law, there is good cause to waive the customary 30-day delay between publication of new limits and their effective date, and apply them beginning on or after October 1, 1982.

VII. Methodology for Determining Per Diem Routine Service Cost Limit

Development of Published Limits

1. *Data.* We have developed the limits by using actual freestanding SNF inpatient routine service cost data, less capital-related costs allocated to general inpatient routine services, obtained from Worksheet D–1 of the latest Medicare cost reports available as of November 15, 1981. We have adjusted the data from Worksheet D–1 to exclude the inpatient routine nursing salary cost differential.

We adjusted these data using the market basket index discussed above, to project costs from the cost reporting periods in the data base to the midpoint of the first cost reporting period to

which the limits will apply. The annual percentage increases in the market basket over the previous year that we used for this projection are: 1979, 9.4; 1980, 10.1; 1981, 9.8; 1982, 6.9[1]; 1983, 6.9[1]; 1984, 7.0.[1]

The projected rate of increase in the market basket will be adjusted to the actual inflation rate if the actual rate of increase is at least .3 of 1 percentage point above the estimated rate. Should this occur, we will notify the Medicare intermediaries of the actual rate of increase and advise them to adjust each SNF cost limit at the time of final settlement.

2. *Use of Wage Index to Adjust Cost Data.* We divided each freestanding SNF's adjusted per diem routine service costs into labor-related and nonlabor portions. We determined the labor-related portion by multiplying each freestanding SNF's adjusted per diem routine service cost by 80.22 percent, which is the labor-related portion of cost from the market basket. We then divided the labor-related portion of each freestanding SNF's per diem cost by the wage index applicable to the SNF's location (see Tables II and III) to arrive at an adjusted labor-related portion of routine cost.

3. *Group Means.* We calculated separate means of labor-related and nonlabor adjusted routine service costs for each freestanding SNF group established in accordance with the SNF's SMSA/NECMA or non-SMSA/non-NECMA location.

4. *Components of Limit.* For each freestanding SNF group, we multiplied the mean labor-related and mean nonlabor costs by 112 percent (see Table I).

Adjustment of Published Limits

1. *Adjustment of Labor-Related Component by Wage Index.* To arrive at a labor-adjusted limit for each SNF, we multiply the labor-related component of the limit for the SNF's group by the wage index developed from wage levels for hospital workers in the area in which the SNF is located. (See Tables II and III) The adjusted limit that applies to an SNF will be the sum of the nonlabor component, plus the adjusted labor-related component, unless the SNF qualifies for the cost reporting year adjustment discussed in item 2 below.

Example—Calculation of Adjusted Limit for a Freestanding SNF Located in Dallas, Texas

Labor-Related Component, $39.13 (published in Table I); Non-Labor Component, $10.77 (published in Table I); SMSA Wage Index, 1.0222 (published in Table II).

COMPUTATION OF ADJUSTED LIMIT

Labor-related component	$39.13
Wage index	× 1.0222
Labor component	$40.00
Nonlabor component	+ 10.77
Adjusted limit	$50.77

Example—Calculation of Adjusted Limit for a Hospital-based SNF Located in Williamsport, Pennsylvania

Labor-Related Component, $39.13 (published in table I); Non-Labor Component, $10.77 (published in table I); Hospital-based SNF "add-on", $4.37 (published in table I); SMSA Wage Index, .9890 (published in table II).

COMPUTATION OF ADJUSTED LIMIT

Labor-related component	$39.13
Wage index	× .9890
Adjusted labor component	$38.70
Non-Labor component	10.77
Hospital-based SNF "add-on"	+ 4.37
Adjusted limit	$53.84

2. *Adjustment for Cost Reporting Year.* If an SNF has cost reporting period beginning after October 1, 1982, the intermediary will increase the limit that would otherwise apply to the SNF by the factor from Table IV that corresponds to the month and year in which the cost reporting period begins. Each factor represents the monthly increase that we derived by dividing the projected annual increase in the market basket by twelve. This adjustment is needed to account for price increases that occur after the date on which the limits are effective.

Example—SNF A has a cost reporting period that begins July 1, 1983

The otherwise applicable limit for the SNF is $53.84.

COMPUTATION OF REVISED SNF LIMIT

Individual SNF adjusted limit	$53.84
Adjustment factor from table IV	× 1.05225
Revised Limit	$56.65

If an SNF uses a cost reporting period that is not 12 months in duration, a special adjustment factor must be calculated. This results from the fact that projections are computed to the midpoint of a cost reporting period and the adjustment factors in Table IV are based on an assumed 12-month reporting period. For cost reporting periods of other than 12 months, the calculation must be done for the midpoint of the specific cost reporting period. The SNF's intermediary will obtain this adjustment factor from HCFA.

VII. Schedule of Limits

Under the authority of section 1861(v) of the Social Security Act, the following group per diem limits apply to the adjusted SNF inpatient routine service costs reimbursed under Medicare for cost reporting periods beginning on or after October 1, 1982. Medicare fiscal intermediaries will compute the adjusted limits for SNFs using the methodology set forth in this notice, and will notify each SNF of its applicable limit. These limits, as adjusted by the wage indexes in Tables II & III, and the cost reporting year adjustment factors in Table IV, will remain in effect until replaced by a revised schedule of limits published in final in a notice in the **Federal Register.**

TABLE I.—SNF GROUP LIMITS

Location	Labor related component	Nonlabor component[1]
SMSA	$39.13	$10.77
Non-SMSA	$41.53	9.34
Hospital-based SNF "add-on":		
SMSA		4.37
Non-SMSA		1.82

[1] The non-labor portion of the limits for SNFs located in States of Alaska and Hawaii and the commonwealth of Puerto Rico will be increased by the following cost-of-living adjustments:

	Factor
Alaska:	
Anchorage	1.225
All others	1.25
Hawaii (islands):	
Oahu	1.175
Kauai	1.175
Molokai	1.175
Maui and Lanai	1.175
Hawaii	1.10
Puerto Rico	1.075

TABLE IV.—COST REPORTING YEAR ADJUSTMENT FACTORS[1]

	The adjustment factor is [2]—
If a SNF cost reporting period begins:	
Nov. 1, 1982	1.00575
Dec. 1, 1982	1.01150
Jan. 1, 1983	1.01725
Feb. 1, 1983	1.02300
Mar. 1, 1983	1.02875
Apr. 1, 1983	1.03475
May 1, 1983	1.04050
June 1, 1983	1.04642
July 1, 1983	1.05225
Aug. 1, 1983	1.05808
Sept. 1, 1983	1.06392

[1] Based on projected market basket inflation rates of 6.9 percent and 7.0 percent for 1983 and 1984 respectively. These adjustment factors are subject to change based on later estimates of cost increases.

If, for any reason, we do not publish a new schedule of limits to be effective on October 1, 1983, or do not announce other changes in the current schedule by that date, the current limits will continue in effect, with the adjustment factor increased by .00583 (.583 percent) per month, until a new schedule of limits or other provision is issued.

Appendix I.—Derivation of "Market Basket" Index for SNF Routine Service Costs

Category of costs	Relative [1] importance 1980	Forecaster [2] percent changes (1980–84)	Price variable used
Payroll expenses	61.26	DRI–CFS	Percentage changes in average hourly earnings of employees in nursing and personal care facility. (SIC 805) Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Employment and Earnings* (monthly) Table C–2.
Food	9.71	DRI–MM	Processed foods and feeds component of producer price index. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, Table 23.
		DRI–MM	Food and beverage component of Consumer Price Index, all urban. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, Table 22.
Employee benefits	7.92	DRI–MM	Supplements to wages and salaries per worker in nonagricultural establishments. For supplement to wages. Source: U.S. Dept. of Commerce, Bureau of Economic Analysis, *Survey of Current Business*, Table 1.11 For total employment. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Employment and Earnings* (monthly), Table B–4.
Fuel and other utilities	5.26	DRI–MM	A. Implicit price deflator-consumption of fuel oil and coal (derived from fuel oil component of Consumer Price Index). Source: U.S. Dept. of Commerce, Bureau of Economic Analysis, *Survey of Current Business*, (*monthly*) *Table 7.11.*
		DRI–MM	B. Implicit price deflator-consumer of electricity (derived from electricity component of Consumer Price Index). Source: U.S. Dept. of Commerce, Bureau of Economic Analysis.
		DRI–MM	C. Implicit price deflator for natural gas (derived from utility (piped) gas component of Consumer Price Index). Source: Same as electricity above.
		DRI–CFS	D. Water and sewage maintenance component of the Consumer Price Index.
Miscellaneous	4.97	DRI–MM	Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, Table 23. All Item Consumer Price Index, all urban.
Other business services	4.87	DRI–MM	Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, Table 23. Services component of Consumer Price Index, all urban.
Supplies	3.40	DRI–MM	Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, Table 23. All Item Consumer Price Index, all urban. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, Table 23.

Category of costs	Relative [1] importance 1980	Forecaster [2] percent changes (1980–84)	Price variable used
Drugs	1.40	DRI–CFS	Pharmaceutical preparations, ethical component of producer price index. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Producer Prices and Price Indexes*, (monthly), Table 6.
Health services	1.21	DRI–CFS	Physician services component of Consumer Price Index for all urban consumers. Source: U.S. Dept. of Labor, Bureau of Labor Statistics, *Monthly Labor Review*, Table 23.

[1] The basic weights for all major categories of skilled nursing home costs were obtained from the DHEW-National Center for Health Statistics (NCHS) National Nursing Home Surveys (NNHS) for 1972 and 1976 for homes certified for participation in the Medicare program. See *Nursing Home Costs 1972, United States: National Home Survey, August 1973–April 1974, DHEW, NCHS: National Nursing Home Survey: 1977 Summary for the United States, Vital and Health Statistics, Series 13, Number 43.*

A Laspeyres price index was constructed using 1977 weights and price variables indicated in this table. In calendar year 1977 each "price" variable has an index value of 100.0. The relative routine service cost weights change each period in accordance with price changes for each price variable. Cost categories with relatively higher "price" increases get relatively higher cost weights and vice versa.

Department of Health and Human Services

Health Care Financing Administration

Medicare and Medicaid Programs; Schedule of Limits on Home Health Agency Costs Per Visit

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Medicare and Medicaid Programs; Schedule of Limits on Home Health Agency Costs Per Visit

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final notice with comment period.

SUMMARY: This notice sets forth a schedule of limits on home health agency (HHA) costs that may be reimbursed under the Medicare program. We are revising the limits to take into account more recent data and the effects of inflation, and to implement section 105 of Pub. L. 97–248, the Tax Equity and Fiscal Responsibility Act of 1982. Limits are established by type of service and are expressed as costs per visit. Although we have established separate limits by type of service, we are applying them to each home health agency as a single "aggregate" limit, based on the agency's number of visits for each type of service. This schedule applies to HHA costs for the entire cost reporting period which begins on or after September 3, 1982. It replaces the current schedule that was published in the **Federal Register** on September 30, 1981 (46 FR 48020).

EFFECTIVE DATE: September 3, 1982. Although this notice is being published in final, we will accept comments, particularly on the discussions on the areas we specify in the preamble, as described below. Comments should be received by November 29, 1982.

ADDRESS: Address comments in writing to: Administrator, Department of Health and Human Services, Health Care Financing Administration, P.O. Box 17073, Baltimore, Maryland 21235.

If you prefer, you may deliver your comments to Room 309–G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, D.C., or to Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to BPP–189–FNC.

Comments will be available for public inspection, beginning approximately two weeks after publication, in Room 309–G of the Department's office at 200 Independence Ave, SW., Washington, D.C. 20201, on Monday through Friday of each week from 8:30 to 5:00 p.m. (202–245–7890).

FOR FURTHER INFORMATION, CONTACT: Carl Slutter, 301–594–9344.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1861(v)(1) of the Social Security Act (42 U.S.C. 1395x(v)(1)) authorizes the Secretary to set prospective limits on allowable costs incurred by a provider of services that will be reimbursed under Medicare, based on estimates of the costs necessary in the efficient delivery of needed health services. The limits may be applied to direct or indirect overall costs or to the costs incurred for specific items or services furnished by the provider. This provision of the statute is implemented under regulations at 42 CFR 405.460.

Under this authority we have published limits on home health agency per visit costs annually since 1979. On June 30, 1981, we published in the **Federal Register** (46 FR 33645) a schedule of limits applicable to cost reporting periods beginning on or after July 1, 1981. These limits contained provisions related to (1) A classification system based on whether a HHA is provider-based or freestanding, and whether the HHA is located within a Standard Metropolitan Statistical Area (SMSA), a New England County Metropolitan Area NECMA), or a non-SMSA; (2) a "market basket" index developed from the price of goods and services purchased by HHAs; (3) adjustments to the limits by an area wage index developed from hospital wages; (4) a cost of living adjustment for HHAs in Alaska and Hawaii; (5) limits set at the 80th percentile; (6) calculation of per visit limits by type of service; and (7) application of the limits to each HHA in the aggregate.

On September 30, 1981, we published a special revision of the limits that replaced the June 30 schedule (see 46 FR 48020). This special revision implemented section 2144 of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35), which required that the level of the limits be set at the 75th percentile of unweighted per visit costs, rather than the 80th percentile. We used the same methodology in developing the September 30 revision as that used in the June 30 schedule.

On September 3, 1982 the Congress enacted Pub. L. 97–248, the Tax Equity and Fiscal Responsibility Act of 1982. Section 105 of this law eliminates separate limits for hospital-based and freestanding HHAs for cost reporting periods beginning on or after the date of enactment of the law. We are eliminating separate limits with cost reporting periods beginning on or after September 3, 1982. The Conference Committee report accompanying the statute (see H.R. No. 97–760, 97th Cong., 2nd Sess., 423 (1982)) does, however, provide for adjustments, as appropriate, that recognize legitimate cost differences in hospital-based facilities resulting from such factors as the effects of Medicare cost allocation requirements.

II. Provisions Of The Notice

This revised schedule uses essentially the same methodology as that used in the current schedule. Changes in the methodology, indicated in items 1 and 3, are explained in the next section. The new schedule of limits is based on the following provisions.

1. A classification system based on whether an HHA is located within a SMSA, a NECMA, or a non-SMSA/non-NECMA area. We have eliminated separate limits for provider-based and freestanding agencies, which have been classified separately in previous notices, and, instead, have set a single limit for all HHAs as required by section 105 of Pub. L. 97–248 (see discussion under section III. A.1 below). This single limit will be based on the par visit costs of freestanding agencies. We provide for an adjustment of the freestanding HHA limit to take into account the effect of required Medicare administrative and general (A&G) cost allocation on the hospital-based agency.

2. A market basket index, developed from the price of goods and services purchased by HHAs, that we use to account for the impact of changing wage and price levels on HHA costs. The market basket was first introduced effective July 1, 1980, and is used to adjust HHA cost data from July 1, 1980 to the midpoint of the cost reporting periods to which the limits will apply. The effect on inflation before use of the market basket is accounted for by actuarial estimates of the rate of increase in home health reimbursement.

3. Wage index, developed from hospital wages, used to adjust the labor-related portion of the limits and the A&G add-on to reflect differing wage levels among the areas in which HHAs are located. The employee wage portion of the market basket index (63.99 percent), plus a factor representing a proportionate share of contract services (4.72 percent) are used to determine the wage component (68.71 percent) of all home health agency per visit costs used to set the limits. This updates the present wage component of 69.28 percent.

4. A cost of living adjustment applied to the non-wage portion of the limit for HHAs in Alaska, Hawaii, Puerto Rico and the Virgin Islands.

5. Limits set at the 75th percentile.

6. Calculation of per visit limits by type of service.

7. Application of the limits in the aggregate after the provider's actual costs are reduced by (i) the amount of individual items of cost that are found to be excessive under Medicare principles of provider reimbursement and (ii) reimbursable costs that are not included in the limitation amount.

III. Summary Of Changes To Methodology

A. Statutory Changes

1. *A single schedule of limits for provider-based and freestanding HHAs.*

Beginning with the schedule of limits published on June 5, 1980 (45 FR 38014), we adopted separate limits for provider-based and freestanding agencies to recognize the higher costs incurred by provider-based HHAs due to Medicare cost reporting requirements (see 42 CFR 405.453) beyond their control. Section 105 of Pub. L. 97–248 requires the Secretary to establish a single schedule of HHA limits based on the cost experience of freestanding agencies. The revised schedule of limits set forth below reflects this change in methodology.

2. *Use of an add-on adjustment for hospital-based HHAs.*

The Conference Committee Report accompanying Pub. L. 97–248 (see H.R. Rep. No. 97–760, 97th Cong., 2nd Sess., 423 (1982)) directs the Secretary to make necessary adjustments to the limits for hospital-based HHAs to recognize "legitimitate cost differences in hospital-based facilities resulting from such factors * * * as the effects of Medicare cost allocation requirements." Therefore, we have developed an "add-on adjustment" to the freestanding limit for hospital-based HHAs to account for the higher reported costs associated with Medicare hospital cost-finding requirements.

Program instructions require hospital-based agencies to use the step-down method of cost finding which allocates a share of overhead expenses from the parent facility to the home care department. In order to determine the appropriate add-on amount, we examined the relationship between these indirect costs and the direct visit costs incurred by the hospital-based HHA. The data used in this study were extracted from worksheet B of the hospital cost report (HCFA–2552) from a sample of 285 hospitals with home care departments. This study confirmed an earlier finding that approximately 26 percent of the total cost reported by hospital-based agencies is attributable to overhead costs which are allocated from the hospital to the HHA under Medicare cost reporting requirements.

To determine the extent to which these overhead costs should be recognized, we isolated individual cost components that contribute to the higher per visit costs reported by hospital-based HHAs, and analyzed the statistical bases used to allocate these costs. As part of this process, we computed the average amount of administrative and general costs represented in the hospital overhead and compared it to the average amount of other indirect costs that are stepped down into the home care department from other costs centers (for example, depreciation, employee health and welfare). We determined that half of the 26 percent overhead cost differential results from the step-down of administrative and general (A&G) costs (approximately 13 percent), whereas the remaining 13 percent is spread across all other cost centers.

The functions of the A&G cost center are directed toward overall management and control of the hospital and contain a variety of activities which do not convert easily to quantitative measurement. Therefore, costs are allocated from the parent institution on the basis of accumulated costs and, as a result, the hospital-based HHA receives a substantial amount of hospital administrative and general costs that are not directly commensurate with the volume or value of service received from the hospital. Although these costs are reimbursable as allowable hospital costs, they are essentially added costs that must be reported by, but are not actually incurred by, the home health agency.

We also made this type of comparison for the other costs that are distributed to the home health cost center, such as housekeeping, operation of plant and medical records considering both the type of expense and basis for allocation. We have concluded, that with few exceptions (e.g., medical education), the other types of expenses are analogous to those of freestanding agencies and, the statistical bases for allocating these other costs are appropriate to the type of expense (e.g., square feet, time spent). Therefore, no adjustment has been made for those hospital overhead costs which are similar to those of freestanding agencies. In unusual circumstances, a hospital-based agency may request an exception to the limits under 42 CFR 405.460(f)(2) for legitimate expenses that are not similar to those of freestanding agencies. However, the fact that the costs are higher than those incurred by freestanding agencies is not a basis for an exception.

In accordance with congressional intent, we have developed an add-on adjustment to account for the higher administrative and general costs incurred by the hospital-based agency due to Medicare cost allocation requirements. The add-on amount has been calculated by determining the median cost of each discipline for hospital-based agencies and computing 13 percent of that amount. The resulting dollar amount, with the wage portion of that amount adjusted by the appropriate wage index, will be added to each freestanding limit to determine the discipline limit for hospital-based agencies. Table II shows the appropriate add-on amounts. The example following Table II shows how a hospital-based agency's limit will be determined.

For cost limit purposes, an agency will be considered to be hospital-based if it is a part of a hospital that is required to file a HCFA-2552 cost report (see PRM, HFCA Pub. 15. section 2326.2) and meets the requirements specified in the notice published June 5, 1980 in the **Federal Register** (45 FR 38014).

The Conference Committee report (see H.R. Rep. No. 97–760, 97th Cong., 2nd Sess., 423 (1982)) accompanying Pub. L. 97–248 does not direct the Secretary to make adjustments to the limits for rehabilitation agency-based or skilled nursing facility-based HHAs. Further, the data are insufficient to determine accurately whether, and to what extent, differences in cost exist between these agencies and freestanding facilities. Thus, the new limits for rehabilitation agency-based and/or skilled nursing facility-based HHAs will remain at the same level as for freestanding agencies. These agencies may also request an exception to the limits under 42 CFR 405.460 for legitimate costs that are not similar to those of freestanding agencies and result from the application of cost finding rules.

B. Non-Statutory Changes

1. *Separate treatment of labor-related and non-labor components of per visit costs.*

In the notice published on September 30, 1981, we established, for each HHA comparison group, a single basic limit for each type of service set at the 75th percentile of the array.

Under that schedule, we divided a constant percentage (69.28 percent) of each HHA's cost by the wage index to arrive at the adjusted wage portion used in deriving the cost limits. We then applied the cost reporting year adjustment, if applicable, to the HHA's wage adjusted limits to determine the limits by type of service for each HHA.

The adjusted wage portion and the non-wage portion were recombined for each HHA before the limit amount was established. The adjustment of the wage portion by the wage index, in effect, increases or decreases the ratio of wage costs to non-wage costs in the cost limit groupings, depending on whether the average wage index value is greater or less than 1. As a result, combining the costs prior to setting the limits and then using a constant percentage as the wage share of the limit can overstate or understate the actual wage and non-wage costs in each group. This produces limited amounts which can give too much weight to either the wage or non-wage component. This effect is avoided if we compute separate percentiles for wage and non-wage costs and recombine these portions after the level of limits is set.

Under the revised method, we obtained actual HHA per visit cost data for each agency and increased those data by the actual and projected increases in the HHA market basket. We then separated each HHA's per visit costs into wage and non-wage portions, and divided the wage portion by the wage index for the agency's location in order to standardize for the effect of wage differences. The non-wage and wage adjusted portions of per visit costs are not recombined prior to determining cost per visit limits for each group as was done in deriving the current limits. Separate percentiles are computed for the wage and non-wage components of per visit costs. For each comparison group, the resulting amounts are shown in Table I. Since this represents a change from the current system, we invite public comment on this revision.

2. *Computation of wage index used to adjust HHA cost data.* The wage indexes used in this schedule are based on updated wage data for the year 1980. They were developed from data supplied by the Bureau of Labor Statistics (BLS) for the hospital group, a standard BLS reporting category.

The wage indexes used in previous schedules were developed by computing separate national average hospital wages for urban and rural areas. To develop the urban index, we computed the national SMSA (or NECMA) average hospital wage and divide this average into the average hospital wage for each SMSA (NECMA). For non-SMSA areas, we computed the national non-SMSA average hospital wage and divided this average into the average hospital wage for all non-SMSA counties in a State. The results of these calculations were expressed as index numbers which were used to adjust the wage portion of the group limits.

Use of the separate wage index computation for urban and rural areas has caused some misunderstanding among HHAs in the past because some rural areas had higher wage indexes than adjacent urban areas. The anomaly in the wage indexes resulted from the use of two different national averages—one for urban areas and one for rural areas as bases for calculating the index. For purposes of this revised schedule of limits, we are using a combined wage index that is based on a single national average wage. This revised index measures every area against the same standard, and overcomes the confusion created by the split wage index. We believe a wage index based on a single national average that compares all areas to a common norm will be easier to understand and to administer. This change results in corresponding urban and rural indexes having the same relative dollar value and allows for direct comparison of index numbers across urban and rural areas. To develop the combined wage index, we computed the national average hospital wage for all areas (SMSAs, NECMAs and non-SMSAs) and divided this average into the average hospital wage for each area. The result of this calculation is expressed as an index number for each area which is used to adjust the wage portion of the group limits.

This change has no effect on the limits which will be applied to any area. Under the methodology used to compute the limits, wage costs are deflated (divided) by the applicable wage index prior to determining the 75th percentile. When the limit is applied to an individual agency, the 75th percentile is then multiplied by the area wage index to determine the actual wage portion of the limit. The following example demonstrates that the final result of the computation is identical.

Example:

(1) *Split wage index*=.7059; wage share=$42.77; wage deflated cost: $42.77÷.7059=$60.5893; 75th percentile of all wage deflated costs=$57.64; Area wage share limit: $57.64×.7059=*$40.69*.

(2) *Combined wage index*=.7916; wage share=$42.77; wage deflated cost: $42.77÷.7916=$54.0298; 75th percentile of all wage deflated costs=$51.40; area wage share limit: $51.40×.7916=*$40.69*.

The following hypothetical sample array is the source of the data used in this example. The split and combined wage indexes used in the hypothetical sample array were derived as shown below.

SAMPLE DATA

[Can be urban or rural]

Area	Average monthly hospital wage	Split wage index	Combined wage index
1	$600	0.7059	0.7916
2	700	.8235	.9235
3	750	.8824	.9894
4	1,000	1.1765	1.3193
5	1,200	1.4118	1.5831
Total	4,250		

Urban or rural national average monthly hospital wage=

$$\frac{\text{Total urban or rural average monthly hospital wages}}{\text{Number urban or rural areas}} = \frac{4,250}{5} = \$850$$

Combined national average monthly hospital wage=

$$\frac{\text{Total urban average monthly hospital wages + total rural average monthly hospital wages}}{\text{Number urban areas + number rural areas}} = \frac{4,250+3,325}{10} = \$758$$

Example:

(1) Computation of Split Wage Index

Area 1 average monthly hospital wage=$600.00; urban or rural national average monthly hospital wage=$850.00; area 1 split wage index: $600.00÷$850.00=.7059

(2) Computation of Combined Wage Index

Area 1 average monthly hospital wage=$600.00; combined national average monthly hospital wage=$758.00; area 1 combined wage index: $600.00÷$758.00=.7916.

SAMPLE ARRAY

1	2	3		4	
Area	Wage share $$.71	Wage index		Wage-deflated cost[1]	
		Split	Combined	Using split wage index	Using combined wage index
1	42.77	0.7059	0.7916	60.5893	54.0298

Area	Wage index		75th percentile wage deflated cost		Area limit (wage share [1])	
	Split	Combined	Split wage index	Combined wage index	Split wage index	Combined wage index
1	0.7059	0.7916	$57.64	$51.40	$40.69	40.69
2	.8235	.9235	57.64	51.40	47.47	47.47
3	.8824	.9894	57.64	51.40	50.86	50.86
4	1.1765	1.3193	57.64	51.40	67.81	67.81
5	1.4118	1.5831	57.64	51.40	81.37	81.37

[1] Col. 7 multiplied by appropriate value in col. 6.

Constraints inherent in the use of the BLS data prevented derivation of a wage index applicable to Guam and the Virgin Islands, and none are included in the list of indices. However, a wage-index value of 1 will be assumed for applying the limits in these areas until an actual value can be computed, effectively making no adjustment relative to the national average.

The data we used to develop the hospital wage index were supplied by BLS, and are the most reliable data available. All hospitals were required under the State unemployment compensation laws to report these data. If we discover that we, or BLS, have made any error that results in incorrect wage indexes for any area, and will notify the Medicare intermediaries of the corrected index and will direct them to recalculate the limits for those affected providers. However, BLS has advised us that they are unable to correct any inaccuracies in the wage index that may result from a hospital's failure to report the required wage data.

3. *Inclusion of wage indexes for newly designated SMSAs.*

Under the current cost limits system, providers are classified as either urban or rural. With few exceptions, urban locales consist of those counties which comprise either an SMSA or NECMA as defined by the Office of Management and Budget (OMB), Executive Office of the President. Rural areas consist of those counties within a State that lie outside an SMSA or NECMA. The wage index for each urban area (SMSA/NECMA) is based on the combined BLS records for all counties within the SMSA/NECMA. Similarly, the wage index for each rural area is derived from the aggregated BLS data for all non-SMSA/NECMA counties in each State.

On June 19, 1981, OMB announced the designation of new SMSAs and NECMAs based on the results of the 1980 Census. Certain revisions in metropolitan classification were also announced. In developing the revised limits, we have incorporated wage indexes for OMB's newly designed metropolitan locales as well as indexes for existing SMSAs and NECMAs that have been redefined. We have included in Appendix I a listing of the newly designated metropolitan locales and the revised NECMAs.

4. *Inclusion of wage indexes for Puerto Rico.*

In the past, BLS has not collected wage data from hospitals located in Puerto Rico. Therefore, derivation of a wage index specific to that area was not possible. Recent refinements in the BLS system now permit computation of actual wage values for Puerto Rico. These wage indexes were used in development of the limits and are included in Tables III A and III B.

IV. Summary of Retained Methodology

In addition to the changes discussed earlier, we have retained the following provisions:

1. *Classification system.*

We have eliminated separate limits for provider-based and freestanding HHAs, as required by section 105 of Pub. L. 97–248 and discussed above. However, we have retained an urban/rural distinction of agencies as an element of the classification system.

2. *Limits set at the 75th percentile.*

We have maintained the basic service limit at the 75th percentile. Each HHA's individual limits will be increased or decreased by application of the wage index as described in item 2 of the methodology section of this notice.

3. *Use of HHA market basket index.*

In the initial schedule of home health agency limits published June 1, 1979 (44 FR 31814), we obtained the inflation adjustment factors from actuarial projections of change in HHA interim reimbursement rates. Because we believe the cost of goods and services purchased to provide home health care is a more accurate measure of inflation, we developed a market basket price index specifically related to the home health industry. For a more detailed explanation of the HHA market basket, including weights and categories, see the notice published June 30, 1981 (46 FR 33645).

We have developed the revised limits in the same manner as the current limits. They are based on reported costs, adjusted for actual and projected cost increases, using factors developed from actual historical increases in home health reimbursement. The costs are adjusted to reflect historical increases occurring between each provider's cost reporting period reflected in our data base and June 30, 1980. We then apply the HHA market basket index beginning July 1, 1980.

In developing the market basket index, we obtained historical and projected rates of increase in the resource prices for each category. The price variables and the source of the forecast for calendar years 1980 through 1984 are identified in the third and fourth columns of the updated market basket included in this notice.

In applying the market basket index, we also provide for adjustments to be made in the limits if our forecast of economic trends proves to be erroneous. We will adjust the projected rate of increase in the market basket index to actual, if the actual rate of increase is more than 3/10 of 1 percentage point above the estimated rate. We will advise the Medicare intermediaries to use the actual rate of increase to adjust each HHA's limits at the time of final settlement.

HOME HEALTH AGENCY INPUT "PRICE" INDEX: COST CATEGORIES, WEIGHTS, FORECASTERS AND PRICE VARIABLE USED

Cost categories	Relative importance 1980 [1]	Forecaster percent changes (1981-84) [2]	Price variable used

Contract services	6.87	DRI–MM	Weighted mean of price variables for items 1 through 8 above.
Total [4]	100.0	HCFA–HHS	

[1] Relative cost weights vor 1976 were derived from special studies by the Health Care Financing Administration using primarily data from HCFA medicare cost reports and data from the Council of Home Health Agencies and Community Health Services. A laspeyres price index was constructed using 1976 weights and "price" variables indicated in this table. In calendar year 1976 each "price" variable has an index value of 100.00. The relative cost weights change overtime in accordance with "price" changes for each "price" variable. Cost categories with relatively higher "price" increases get relatively higher cost weights and vice versa.

[3] See Freeland, Mark S., Gerard Anderson and Carol Ellen Schendler, "National Hospital Input Price Index", *Health Care Financing Review*, Summer 1979, pp. 37–61.

[4] May not sum to 100.00 due to rounding.

4. *Application of the wage index to employee wages and a proportionate share of contract services.*

In this revised schedule,we are retaining an adjustment to the wage component of the limit which includes wages and salaries, plus an estimated percentage of contract service costs. These percentages are calculated by adding an estimated wage percentage of contract service costs (4.72 percent) to the wage and salary weight shown in the market basket (63.99 percent). The proportion of cost to be adjusted by the wage index is now 68.71 percent. This is a change from the 69.28 percent used in the current notice and is due to use of updated market basket weights.

Use of cost-of-living adjustment for Alaska, Hawaii, Puerto Rico and the Virgin Islands.

To avoid disadvantaging HHAs located in Alaska, Hawaii, Puerto Rico and the Virgin Islands, we are providing a cost-of-living adjustment for these areas. This adjustment is the same as the provision included in the current schedule, except that it now applies to HHAs located in Puerto Rico and the Virgin Islands. In keeping with current practice, the non-wage component of the limits applicable to Alaska, Hawaii, Puerto Rico and the Virgin Islands will be adjusted by the amount of the Office of Personnel Management cost-of-living differential for those areas. We adjust the wage component by the appropriate wage index; therefore, this adjustment applies only to the non-wage component.

6. *Application of limits in the aggregate.*

We are aware of the congressional concern to improve reimbursement methodology and to make the HHA cost limits more precise. The conference report (H.R. Report No. 97–208, 97th Cong., 1 Sess. 949, (1981)) which accompanied the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) "urges the Secretary, as soon as feasible" to apply limits by type of service. We agree that conversion to limits by type of service would be an improvement over the aggregate methodology currently used because it would be a more accurate measure of efficiency. However, the feasibility of converting to per visit limits is dependent on development of a data base using a single method of cost finding and cost apportionment. We published a final rule requiring HHAs to use a single method of cost finding and cost apportionment for cost reporting periods beginning on or after October 1, 1980 (45 FR 57126, August 27, 1980). Unlike the data now available which are derived from multiple cost reporting methods, data based on a single cost reporting system will be consistent for all agencies and types of services, and will permit direct cost comparisons between various types of agencies. We anticipate that the complete data base, using the new cost report, will be available about mid-1983. Therefore, we will delay application of the limits by type of service until such time as we have the data from the new cost reports.

V. Application of Limits to State Medicaid Rates

Methods of reimbursement for home health agencies under Medicaid are determined by the individual State agencies. There is no existing regulatory requirement that Medicare cost limits be applied to payment rates for HHA services under Medicaid. Therefore, Medicare cost limits for HHAs will apply only to Medicaid payments in those States that choose to incorporate the limits into their plans for payment for home health services.

VI. Impact Analyses

Executive Order 12291

We have determined that the revised schedule of limits set forth in this notice will not result in an annual economic impact of $100 million or more. This notice will also not meet other criteria of the order

This final notice sets forth limits on HHA costs per visit that are intended to implement section 105 of Pub. L. 97–248 and to prevent Medicare reimbursement for costs not related to patient care or due to operating inefficiencies. Implementation of these limits would result in Medicare savings of $16 million in fiscal year 1983, compared to the retention of earlier limits set at the 80th percentile and using separate schedules for hospital-based facilities. Furthermore, all but $2 million of the fiscal year 1983 savings is due to the percentile reduction established in law and hence not the "result" of this notice.

Accordingly, we find no evidence that would require a regulatory impact analysis.

Regulatory Flexibility Act

The Secretary certifies under 5 U.S.C. 605(b), enacted by the Regulatory Flexibility Act, (Pub. L. 96–354), that the revised schedule of limits set forth in this notice will not have a significant economic impact on a substantial number of small entities.

As stated above, only $2 million of the $16 million incremental savings estimated for FY 83 can be attributed to the elimination of the separate schedule of limits for hospital-based facilities. Continuation of separate limits for hospital-based home health agencies would have resulted in limits higher than those now established for these agencies. Consequently, the hospital-based agencies will be the only ones affected by this policy change.

The savings are projected from a data base of 1771 participating home health agencies that includes 186 hosptial-based agencies, of which 74 are expected to exceed the proposed limits. The $2 million savings attributed to the single limit proposal is derived from the estimated dollar impact on the 74 hospital-based providers adjusted to reflect 1983 expenditures for all hospital-based agencies. We believe that this effect, which averages about $10,000 per affected provider, does not result in a significant impact on these providers when compared to average revenues of $20 million expected to be received by hospitals in FY 83. This impact averages less than one-tenth of one percent of revenues. Moreover, these institutions can take steps to reduce their costs to levels which other institutions now meet. Additionally, an exception may be granted under section 1861(v)(1)(A) of the Social Security Act, implemented by regulations at 42 CFR 405.460(f), for hospital-based agencies whose reimbursement is unfairly restricted by the limits. Accordingly, a regulatory flexibility analysis is not required.

VII. Waiver of Proposed Notice and 30-Day Delay in Effective Date

As we indicated earlier, we have used the same methodology to develop the revised limits that was used to develop the current schedule published September 30, 1981. The methodology used to develop the September 30, 1981 limits had previously been published for public comment (see 45 FR 10450). In developing those limits, we considered all comments received.

Because the main features of the methodology used in this revised schedule were previously published for public comment, we believe that it would be impracticable and unnecessary to again request public comment. To do so would be contrary to the public interest. Therefore, we find good cause to waive publication of a proposed notice. However, we are allowing a 60-day comment period on areas of the methodology that have been revised.

In the past, we generally have attempted to allow a 30-day period between the date of publication of each cost limit schedule and the effective date of the schedule. In this case, it would be impracticable and contrary to the public interest to do so because the effective date of the statutory changes is the date of enactment of Pub. L. 97–248. Since prompt publication of the results of these changes in the limits would be in the public interest, we find good cause to waive the customary 30-day delay between publication of new limits and their effective date, and apply them to HHAs effective September 3, 1982.

VIII. Methodology for Determining Cost Per Visit Limits

1. *Data.* We determined the revised limits by using actual cost per visit data obtained from the latest Medicare cost reports for periods ending on or before June 30, 1981. We adjusted the data to reflect cost increases occurring between the cost reporting periods contained in our data base and March 31, 1983 (the midpoint of the first cost reporting period to which the limits will apply), using factors developed from actual historical increases in home health reimbursement (prior to July 1, 1980) and market basket factors (beginning July 1, 1980). The annual percentage increases used to compute the per visit costs are:

Calendar year	Percent increase
1978	[1]8.7
1979	[1]7.2
1980 (1/1/80–6/30/80)	[1]4.0
1980 (market basket, 7/1/80–12/31/80)	[2]11.7
1981 (market basket)	[2]12.1
1982 (market basket)	[2]9.6
1983 (market basket)	[2]8.9
1984 (market basket)	[2]7.8

[1] Actuarial estimates subject to change based on later estimates of cost increases.
[2] Final rate.
[3] Forecasted increases.

The projected rate of increase in the market basket index will be adjusted to the actual inflation rate if the actual rate of increase is more than 3/10 of 1 percentage point above the estimated rate. We will notify the Medicare intermediaries of the actual rate of increase and advise them to adjust each home health agency's cost limit at time of final settlement.

2. *Deflation by Wage Index.* After adjustment by the market basket, we divide each HHA's adjusted per visit costs into wage and non-wage portions. We determine the wage portion of costs (68.71 percent) by using the 63.99 percent employee wage and benefit factor derived from the market basket weight, plus 4.72 percent representing a proportionate share of the market basket weight for contract services. We then divide the wage portion of per visit costs by the wage index applicable to the HHA's location to arrive at an adjusted wage cost.

The current hospital wage index was developed from data for the year 1980 supplied by the Bureau of Labor Statistics (BLS) for the "hospital industry", a standard BLS reporting category.

3. *Basic Service Limit.* A basic service limit equal to the 75th percentile of the wage and non-wage portions is calculated for each type of service, derived from the per visit costs of freestanding HHAs. Separate determinations of percentile for the non-wage and wage portions are necessary since the wage index adjustment discussed above changes the ratio of wage to non-wage costs.

4. *Computing the Adjusted Limit.* To arrive at the wage adjusted limit applied to each service furnished by a HHA, the Medicare fiscal intermediary multiplies the wage limit component for the comparison group by the appropriate wage index. (See Tables IIIA and IIIB.)

The adjusted limit that will apply to a HHA is the sum of the non-wage component plus the adjusted wage component.

Example—Calculation of Adjusted Occupational Therapy:
Limit [1]
Non-Wage Component—$16.19
Wage Component—$32.44
Wage Index—1.0694

Computation of Adjusted Limit [1]

Wage Component—$32.44
× Wage Index—1.0694
Adjusted Wage Component—$34.60
+ Non-wage Component—$16.19
Adjusted Limit for Occupational Therapy—$50.68

5. *Adjustment for Reporting Year.* If a HHA has a cost reporting period beginning on or after November 1, 1982, the adjusted per visit limit for each service will be revised upward by a factor from Table IV that corresponds to the month and year in which the cost

[1] Includes three months of inflation to reflect cost reporting period beginning January 1, 1983. Limit in Table I multiplied by factor of 1.0173 from Table IV.

reporting period begins. Each factor represents the monthly increase that we derived by dividing the projected annual increase in the market basket index by 12, and is used to account for inflation in costs that will occur after the date on which the limits became effective.

Example—HHA A's cost reporting period begins January 1, 1983. The wage adjusted per visit limit for occupational therapy for A's group is $50.01.

Computation of Revised Limit for Occupational Therapy

Adjusted Per Visit Limit—$50.01
Adjustment Factor from Table IV—1.0173
1.0173×$50.01=$50.88

In this example, the revised adjusted per visit limit for occupational therapy applicable to A for the cost reporting period beginning January 1, 1983, is $50.88 per visit.

If a HHA uses a cost reporting period that is not 12 months in duration, a special calculation of the adjustment factor must be made. This results from the fact that projections are computed to the midpoint of a cost reporting period and the factor of .575 is based on an assumed 12-month reporting period. For cost reporting periods other than 12 months, the calculation must be done specifically for the midpoint of the cost reporting period. The HHA's intermediary will obtain this adjustment factor from HCFA.

6. *Adjustment for Hospital-Based Agencies.* If a HHA participates in the Medicare program as part of a hospital that is required to file a HCFA–2552 cost report (see PRM (HCFA Pub–15) § 2326.2), and meets the requirements specified in the notice published June 5, 1980 in the **Federal Register** (45 FR 38014), the HHA will be considered to be a hospital-based agency. Therefore, the HHA will be entitled to an adjustment of the per visit limit to account for higher administrative and general costs resulting from the Medicare cost allocation requirements. The intermediary will compute the adjusted cost limit as described in the example following Table II.

IX. Schedule of Limits

The schedule of limits set forth below applies to the 12-month cost reporting period beginning on or after September 3, 1982, and remains in effect until superseded. The fiscal intermediary will compute the adjusted limits using the wage index published in Tables IIIA and IIIB and notify each HHA of its applicable limits.

The HHA costs that are subject to the limits include the cost of medical supplies routinely furnished in conjunction with patient care. Medical supplies that are not routinely furnished in conjunction with patient care visits and are directly identifiable services to an individual patient (i.e., medical supplies for which a separate charge is made, in addition to the per visit charge) are excluded from the per visit cost if: (1) The common and established practice of comparable HHAs in the area is to charge separately for the items; (2) the HHA follows a consistent charging practice for Medicare and non-Medicare patients receiving the item; (3) generally, the item is not frequently furnished to patients; (4) the item is directly identifiable to an individual patient and its costs can be identified and accumulated in a separate cost center; and (5) the item is furnished at the direction of the patient's physician and is specifically identified in the plan of treatment. This explanation of non-routine medical supplies is consistent with instructions for reporting the cost of these supplies on the revised HHA cost report, forms HCFA–1728 and HCFA–2552K. The reasonable cost of medical appliances and supplies that are not routinely furnished in conjunction with patient care visits will be reimbursed without regard to the schedule of limits.

The fiscal intermediary determines the limit for each home health agency by multiplying the number of Medicare visits for each type of service furnished by the provider by the respective per visit cost limit. The sum of these amounts is compared to the home health agency's total allowable cost.

Example: Home Health Agency A, a freestanding agency located in Charlottesville, Virginia made 6,000 skilled nursing, 1,000 physical therapy and 3,000 home health aide covered visits to Medicare beneficiaries during its 12-month cost reporting period beginning January 1, 1983.

The aggregate cost limit would be determined as follows:

Type of visit	Visits	Non-wage portion [1]	Adjusted wage portion 1.06941 [1]	Adjusted limit	
Skilled nursing	6,000	16.08	35.56	51.64	$309,840
Physical therapy	1,000	15.73	34.14	49.87	49,870
Home health aide	3,000	12.75	26.86	39.60	118,800
Aggregate cost limit					478,510

[1] Limits include three months of inflation to reflect a cost reporting period beginning January 1, 1983.

Before the limits are applied at cost settlement, the provider's actual costs will be reduced by the amount of individual items of cost (e.g., administrative compensation, contract services) that are found to be excessive under Medicare principles of provider reimbursement. In this regard, the fiscal intermediaries will review the various reported costs against such screens as the cost guidelines for physical therapy under arrangements (see 42 CFR 405.432) and against the limitation on costs that are substantially out of line with those of comparable agencies (see 42 CFR 405.451). The provider's cost will also be reduced by the amount of reimbursable costs that are not included in the limitation amount (e.g., medical appliances).

TABLE I.—PER VISIT LIMITS FOR HOME HEALTH AGENCIES [1]

Type of visit	Limit	Wage portion (68.71%)	Non-wage portion (31.29%)
SMSA (NECMA) Location			
Skilled nursing care	48.50	32.69	15.81
Physical therapy	46.84	31.38	15.46
Speech pathology	47.56	31.89	15.67
Occupational therapy	47.80	31.89	15.91
Medical social services	57.86	38.80	19.06
Home Health aide	37.21	24.66	12.53
Non-SMSA Location			
Skilled nursing care	54.74	39.09	15.65
Physical therapy	54.85	38.98	15.87
Speech pathology	57.98	41.22	16.76
Occupational therapy	56.25	39.56	16.69
Medical social services	53.41	37.48	15.93
Home health aide	40.09	28.65	11.44

[1] Non-labor component of limits for HHAs located in Alaska, Hawaii, Puerto Rico and the Virgin Islands will be increased by multiplying them by the following cost-of-living adjustment factors:

Location	Adjustment factor
Alaska:	
Anchorage	1.225
All other localities	1.250
Hawaii:	
Oahu	1.175
Kauai	1.175
Maui and Lani	1.175
Molokai	1.175
Hawaii (Island)	1.10
Puerto Rico	1.075
Virgin Islands:	
St. Croix	1.125
St. Thomas and St. John	1.125

TABLE II.—ADD-ON AMOUNTS FOR HOSPITAL-BASED HOME HEALTH AGENCIES

	A and G add-on	Wage portion (68.71%)	Non-wage portion (31.29%)
SMSA (NECMA) Location			
Skilled nursing care	$6.49	$4.31	$2.18
Physical therapy	6.42	4.27	2.15
Speech pathology	6.36	4.21	2.15
Occupational therapy	6.51	4.31	2.20
Medical social services	6.64	4.35	2.29
Home health aide	6.37	4.22	2.15
Non-SMSA Location			
Skilled nursing care	$6.68	$4.74	$1.94
Physical therapy	6.47	4.59	1.88
Speech pathology	6.83	4.80	2.03
Occupational therapy	6.11	4.20	1.91
Medical social services	6.78	5.01	1.77

TABLE II.—ADD-ON AMOUNTS FOR HOSPITAL-BASED HOME HEALTH AGENCIES—Continued

	A and G add-on	Wage portion (68.71%)	Non-wage portion (31.29%)
Home health aide	6.45	4.62	1.83

Example

A hospital-based agency in New York City has a wage index of 1.3979. It provides the following services:

Skilled Nursing (SN)—1,527 Visits
Physical Therapy (PT)—1,286 Visits
Home Health Aides (HHA)—1,391 Visits

The aggregate limit for that agency is calculated as follows:

	Limit [1]		Add-on [1]	
	Wage portion	Non-wage portion	Wage portion	Non-wage portion
SN	$33.26	$16.08	$4.36	$2.22
PT	31.12	15.73	4.34	2.19
HHA	25.11	12.75	4.29	2.19

[1] Includes three months of inflation to reflect a cost reporting period beginning January 1, 1983.

Calculation of Limit

To calculate the limit multiply the wage portion by the wage index and add the non-wage portion:

SN—($33.26)×1.3979=$46.49+$16.08=$62.57
PT—($31.92)×1.3979=$44.62+$15.73=$60.35
HHA—($25.11)×1.3979=$35.10+$ 12.75= $47.85

Calculation of A & G Add-On Amount

To calculate the A & G add-on amount, multiply the wage portion by the wage index and add the non-wage portion:

SN—($4.38)×1.3979=$6.12+$2.22=$8.34
PT—($4.34)×1.3979=$6.07+$2.19=$8.26
HHA—($4.29)×1.3979=$6.00+$2.19=$8.19

Computation of Aggregate Limit

The limit and the A & G add-on for each discipline are totaled and multiplied by the number of visits for that discipline. These results are added to determine the aggregate limit:

	Limit	A&G Add-on	Total	Visits	Allowable costs
SN	$62.57	8.34	$70.91	1,527	$108,280
PT	60.35	8.26	68.61	1,286	88,232
HHA	47.85	8.19	56.04	1,391	77,952
Aggregate limit					$274,464

TABLE IV.—COST REPORTING YEAR ADJUSTMENT FACTORS[1]

	The adjustment factor is—
If the HHA cost reporting period begins—	
Nov. 1, 1982	1.0058
Dec. 1, 1982	1.0115
Jan. 1, 1983	1.0173
Feb. 1, 1983	1.0236
Mar. 1, 1983	1.0300
Apr. 1, 1983	1.0363
May 1, 1983	1.0426
June 1, 1983	1.0490
July 1, 1983	1.0553
Aug. 1, 1983	1.0616
Sept. 1, 1983	1.0679
Oct. 1, 1983	1.0743
Nov. 1, 1983	1.0806
Dec. 1, 1983	1.0869
Jan. 1, 1984	1.0933

[1] Based on projected market basket inflation rates of 6.9 percent for 1983 and 7.6 percent for 1984. These adjustment factors are subject to change based on later estimates of cost increases.

If, for any reason, we do not publish a new schedule of limits to be effective on July 1, 1983, or do not announce other changes in the current schedule by that date, the current limits will continue in effect with the adjustment factor increased by .00633 (corresponding to .633 percent) per month, until a new schedule of limits or other provision is issued. (For convenience, adjustment factors are computed and displayed in Table IV for July 1, 1983 to January 1, 1984.) The adjustment factor of .00633 is based on a projected market basket inflation rate of 7.6 percent for 1984.

Part IV

Interstate Commerce Commission

Implementation of the Bus Regulatory Reform Act of 1982

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. MC-163]

Procedures for Providing Notice of Specified Applications Through an ICC Register in Lieu of "Federal Register" Notice

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Section 28, of the Bus Regulatory Reform Act of 1982, allows the Commission to adopt, after a rulemaking, a special procedure for providing interested persons reasonable notice of motor and water carrier, freight forwarder and broker entry applications, restriction removal applications and agricultural cooperative notices. Our proposal also includes motor and water carrier temporary operating rights and transfer applications under 49 U.S.C. 10926. In this proceeding the Commission announces its intent to expand the Daily Press Release Summary which has been offered to subscribers since April, 1982, to include such notices and to rename the expanded publication the *Interstate Commerce Commission Register (ICC Register).* The Commission publication will provide all interested persons the same information currently provided through notice in the **Federal Register** at a significant cost savings to the Federal Government.

The *ICC Register* will also include notices of exemption of motor carriers of property from merger, consolidation, and acquisition of control provisions of 49 U.S.C. 11343, 11344 and 11345a, which is a new procedure proposed in Ex Parte No. 400 (Sub-1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343,* which is being published concurrently with this notice.

DATE: Comments should be submitted by October 29, 1982.

ADDRESS: An original and, if possible, 15 copies of comments should be sent to: Ex Parte MC-163, Room 2203, Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Kathleen M. King, 202-275-0956; or Darlene Proctor, 202-275-7233.

SUPPLEMENTARY INFORMATION: Under the Administrative Procedure Act (APA), adjudicatory proceedings, including permanent authority applications, must be conducted "on the record." This means that notice to interested persons must be given, but the APA does not prescribe any particular form of notice. Therefore, there was no statutory requirement that notice of applications be published specifically in the **Federal Register**. The Motor Carrier Act of 1980, however, specifically called for publication in the **Federal Register**. Section 28, of the Bus Regulatory Act of 1982, Public Law No. 97-261 amends 49 U.S.C. 10322(b)(3) by eliminating the specific requirement that notice of motor and water carrier, freight forwarder and broker applications be published in the **Federal Register**. This legislative change allows the Commission, after a rulemaking proceeding, to establish special procedures for providing interested persons reasonable notice of applications to provide transportation as a motor or water contract carrier, freight forwarder, or broker, or applications to remove operating restrictions.[1]

The Commission has had a long standing practice of publishing notices in the **Federal Register**. Originally, **Federal Register** publication was the most cost effective way to provide notice of application to the public. Now agencies publishing notices in the **Federal Register** must pay, from their appropriated funds, the cost of publication. Those costs have recently been increased to $408 per published page. The Commission is the largest single user of the **Federal Register**, consuming about 6.5 percent of its printed pages annually. The Commission has estimated that the cost of **Federal Register** publication for motor carrier applications will be over $1 million in fiscal year 1982. At present, more than 75 percent of all motor carrier applications published in the **Federal Register** are unopposed, which indicates that they are of no interest to any person other than the applicant.

The Commission believes that it can provide the same information currently provided through notice in the **Federal Register** to all interested persons at a significant cost savings to the Federal government by printing an in-house daily publication and mailing it to subscribers. We estimate that more than $1 million will be saved in fiscal year 1983, if we adopt this proposal.

Accordingly, the Commission proposes to publish certain application notices in its Daily Press Release Summary which has been offered to subscribers since April 5, 1982. See *Publication of Commission Press Release Summary* (47 FR 12885, March 25, 1982). We propose to expand the current publication by including notice of permanent motor and water common and contract, freight forwarder and broker applications; temporary motor and water carrier common and contract applications; agricultural cooperative notices; restriction removal applications and applications to transfer certificates and permits under 49 U.S.C. 10926 in the expanded Commission publication. The expanded publication will be renamed the Interstate Commerce Commission Register *(ICC Register)*. The same application caption summary which now appears in the **Federal Register** will be published instead in the *ICC Register.*

In addition we propose to include in the *ICC Register* notices of exemption of motor carriers of property from merger, consolidation, and acquisition of control provisions of 49 U.S.C. 11343, 11344, and 11345a, which is a new procedure proposed in Ex Parte No. 400 (Sub-1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343,* which is being published concurrently with this notice.

We believe that our publication will meet notice requirements of the APA and the Constitutional due process requirement. Notice which is adequate, *i.e.,* which satisfies the requirements of due process, must be such that the parties are informed that proceedings have been instituted and the notice must contain information sufficient to allow preparation and presentation of objections. *Mullane* v. *Central Hanover Bank & Trust Co.,* 339 U.S. 306, 314 (1950). See also *Memphis Light, Gas & Water Division* v. *Craft,* 436 U.S. 1, 13-15 (1978); *North Alambama Express, Inc.* v. *United States,* 585 F.2d 783, 786-87, 789 (5th Cir. 1978). Under the APA, 5 U.S.C. 554(b), notice must be timely, inform the parties of the time, place, and nature of the hearing, inform the parties of the legal authority and jurisdiction under which the hearing is to be held, and the matters of fact and law to be asserted. Adequate notice depends on the circumstances of each particular

[1] The text of the new subsection 49 U.S.C. 10328(b)(2) reads as follows: The Commission may adopt, after a rulemaking proceeding in accordance with the provisions of section 553 of title 5, a special procedure for providing interested parties reasonable notice of applications to provide transportation as motor or water common or contract carrier or freight forwarder, or to be a broker for transportation, under sections 10922, 10923, 10924, and 10928 of this title, or applications for removal of operating restrictions under section 10922 of this title. The special procedure may consist of printing and distributing to subscribers an independent publication to provide notice of such applications, if the Commission finds, as a result of its rulemaking proceeding, that such method providing notice would not be unduy burdensome to the public.

situation. *Mullane, supra,* 339 U.S. at 314.

It should also be noted that the cost the ICC has incurred in **Federal Register** notices of applications is a factor to be considered. The Supreme Court has observed in *Mathews* v. *Eldridge,* 424 U.S. 319, 348 (1976):

> Financial cost alone is not a controlling weight in determining whether due process requires a particular procedural safeguard prior to some administrative decision. But the Government's interest, and hence that of the public, in conserving scarce fiscal and administrative resources is a factor that must be weighed.

The notices which will appear in the *ICC Register* will contain exactly the same information as the current **Federal Register** notices. We believe our proposal will provide legally sufficient notice to all interested persons.

We also believe it would be more convenient for the public if several other motor carrier applications also appear in the *ICC Register.* Specifically, we are planning to include temporary motor carrier and water carrier operating authority applications under 49 U.S.C. 10928 and 10929. These applications are not governed by the APA. Notices of transfers under 49 U.S.C. 10926 will also be included. Most of these applications are unopposed and of interest only to the seller and purchaser involved.

At this time, our proposal only affects the types of applications for entry, transfer, exemption, or restriction removal described above. All other notices of applications such as rail merger and railroad abandonment notices, which can impact states, local communities and shippers, will continue to apear in the **Federal Register. Federal Register** publication of notices of intercorporate hauling is statutorily mandated and these notices will still be published in the **Federal Register** on Fridays. Our proposal will have no effect on our notices of proposed and final rulemakings. Those documents will continue to be published in the **Federal Register.** However, we would like the public to suggest additional types of non-rail cases or applications which could be published in the proposed *ICC Register* rather that the **Federal Register.** Also we would like to receive comments from the public as to whether there are rail filings for which there is no statutory **Federal Register** publication requirement, which could be included in the proposed *ICC Register.*

It is now necessary for interested persons to subscribe to the **Federal Register,** if they want to obtain notice of pending applications. The current cost of a **Federal Register** subscription is $300 per year. The subscription price for the Commission's Press Release Summary is $160 for a one year's subscription. The actual cost for producing a year's subscription to the expanded *ICC Register* is estimated to be $245. Accordingly, the annual subscription price should be no more than $245. We would like the public to comment on what they believe is an appropriate subscription fee. The public should consider whether an annual fee of $245 would be unduly burdensome. They should also consider whether the user should bear the full cost of production, or whether the ICC should subsidize the publication so that a lower subscription fee will be charged.

The Commission will mail copies of the new Register to all subscribers daily. Subscribers who want to pick up their copies at the Commission, as some current subscribers now do, will be able to do so.

We will make the *ICC Register* available to non-subscribers for inspection by maintaining file copies of the publication at the Commission's Washington, DC headquarters. Inspection copies of the *ICC Register* will be distributed to our ICC regional offices in Boston, Philadelphia, Atlanta, Chicago, Fort Worth, and San Francisco and all our field offices. This should make our publication easily accessible to non-subscribers. Individual issues can be obtained from the Commission's Washington Headquarters.

The Press Release Summary now lists all decisions that the Commission issues on a daily basis. Interested persons can review the *ICC Register* and order individual copies of decisions from the Commission. The same information respecting decisions and rulemakings now published in the **Federal Register** will be available by an alternative means.

Consequently, we do not believe that this proposed method of providing notices to interested persons will be unduly burdensome on the public. It will provide all the same information to the public as the **Federal Register** does now at less cost to the subscriber and the public. Since the ICC publication lists all decisions the Commission issues, the public can order the full text of any particular rulemaking notice or decision desired from the ICC. It will not be necessary for an individual who is interested only in motor carrier applications to subscribe to both publications.

If this proposal is adopted, we will make the necessary reference changes to involved regulations which refer to the **Federal Register.**

We anticipate that the *ICC Register* will be available probably in November 1982. The Commission will announce in a future notice the actual subscription price and when subscriptions will be taken for the *ICC Register.*

In summary, we believe that this proposed method of providing notice to the parties will not be unduly burdensome to the public and it will satisfy the notice provisions of the APA. In addition to the cost savings involved, the elimination of **Federal Register** publication of motor carrier application notices could lessen considerably the time required to decide such cases and make it easier for us to meet statutory deadlines. We estimate that the elimination of notice in the **Federal Register** will save at least a week in processing some application proceedings. This decrease in processing time will benefit all applicants.

We have analyzed our proposal under the criteria of the Regulatory Flexibility Act. We believe that the Commission publication will be as easily accessible to small entities as the **Federal Register.** The change involves only motor carrier, water carrier, freight forwarder and broker entry applications, agricultural cooperative notices, and restriction removal applications. Other proceedings of interest to small entities will continue to appear in the **Federal Register.** Consequently, the Commission certifies that this procedure, when implemented will not have a significant economic impact on a substantial number of small entities.

This action will not significantly affect either the quality of the human environment or conservation of energy resources.

List of Subjects in 49 CFR Chapter X

Administrative practice and procedures, Motor carriers.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

(49 U.S.C. 10328(b) and 5 U.S.C. 553)

Decided: September 9, 1982.

49 CFR Part 1331

[Ex Parte No. 297 (Sub-6)]

Bus Rate Bureau Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Section 10 of the Bus Regulatory Reform Act of 1982

establishes new guidelines for bus industry rate bureaus. In general, section 10 applies 49 U.S.C. 10706(b), formerly applicable only to motor common carriers of property, to the passenger bus industry. In addition, certain specific new provisions are applicable only to motor carriers of passengers. It adds three new subsections defining the scope of antitrust immunity for passenger motor carriers. In this proceeding the Commission will interpret and implement these provisions. The new statutory provisions will be effective 60 days from the date of enactment. New or amended agreements must be filed within 120 days of the effective date of this legislation. Existing agreements may remain in effect during the transition period, but the new legislative reforms must be complied with during the transition period, except where the statute provides other time limits. Comments on the interpretations and proposed conditions are invited. Final standards will then be set.

DATES: Comments are due October 29, 1982.

ADDRESS: Send an original and, if possible, 15 copies of comments to: Ex Parte No. 297 (Sub-6), Office of Proceedings, Room 5340, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:
Douglas Galloway (202) 275–7278; or Tom Smerdon (202) 275–7277.

SUPPLEMENTARY INFORMATION: The Bus Regulatory Reform Act of 1982 (Bus Act), establishes new guidelines for bus industry rate bureaus [1] and limits the scope of antitrust immunity. Prior to the Act, passenger bus carriers were authorized under a Commission approved agreement [2] jointly to discuss, initiate, and maintain rates for transportation of passengers and express. Thus, the antitrust laws did not apply to bus carriers when acting in conformity with their collective ratemaking agreement. 49 U.S.C. 10706(c). This immunity will be permitted to continue in a limited manner under the revised guidelines enacted in the Motor Carrier Act of 1980 (Pub. L. 96–296) and now extended to passenger carriers by section 10 of the Bus Act. The instant proceeding will adopt binding norms to implement the statutory provisions. To the extent existing rate bureau regulations (49 CFR Part 1331) remain relevant, their application to bus bureaus will be continued.

Under the new statute, bus industry rate bureaus may be granted antitrust immunity for collective determination of rates, rules, and practices provided that the agreements under which they function have been approved by the Commission. Approval of an agreement is contingent upon compliance with statutory requirements and the standards adopted by the Commission. Section 10(f) requires that new or amended agreements must be submitted to the Commission for approval within 120 days of the effective date of the statute (i.e., 180 days from enactment). A transition period is provided during which existing rate bureau agreements may remain in effect until new agreements are finally disposed of by the Commission. During this transition period when the new or amended agreement is being prepared, submitted to, and considered by the Commission, the Bureau must comply with the new legislation, as well as any standards we promulgate.

Section 10 of the Bus Act applies 49 U.S.C. 10706(b) to the bus industry. In addition, certain specific new provisions are set forth which are applicable solely to buses.[3]

Section 10706(b) is largely derived from the Motor Carrier Act, *supra*. Section 14 of the Motor Carrier Act imposed specific restrictions to limit the permissible scope of collective ratemaking. Congress restricted voting on collective proposals to those carriers that have authority to participate in the transportation, totally barred bureau protests of any motor carrier rate proposal, limited discussion of general rate increases to industry average costs, imposed strict limits on bureau handling of independent action proposals, required open bureau meetings, and prohibited any discussion of or voting on single-line rates after January 1, 1984. Rules implementing section 14 were adopted in Ex Parte No. 297 (Sub-No. 5), *Motor Carrier Rate Bureaus—Implementation of Pub. L. 96–296.*[4]

As noted above, section 10 of the Bus Act largely applies the rate bureau requirements of the Motor Carrier Act to passenger carriers and was intended to limit the scope of antitrust immunity accordingly. S. Rep. 97–411, *supra* at 21. Given this factor as well as the extensive record developed in implementing the rate bureau section of the Motor Carrier Act (see f.n. 4, *supra*), we are proposing the standards and procedures developed in Ex Parte No. 297 (Sub-5) where the statutory provisions are the same for both motor carriers of property and passengers. Of course, where the specific provisions of the Bus Act differ (see f.n. 3, *supra*), we are proposing new standards.

Our conclusions in this respect are only tentative. Differences between the motor carrier of property and motor carrier of passenger industries, or any other persuasive reasons, may warrant departure from these standards. We welcome specific comments on these matters.

The major findings in Ex Parte No. 297 (Sub-5), and the corresponding subsections of 49 U.S.C. 10706 and our rate bureau decisions are indicated below. See 364 I.C.C. at 467–501 for a full discussion of the standards we are proposing and the reasons for them.[5]

1. Rate bureau agreements must provide each carrier the absolute right of independent action. This must include the right to decide whether or when an independent action, or rate within the zone of freedom, will be docketed.[6] In the absence of explicit instructions from the independent actor, the bureau may not docket the item until the proposal has been filed with the Commission. There may be no bureau discussion of

---

[1] One distinguishing charactristic of the Nation's intercity bus industry is that there is only one industry rate bureau, the National Bus Traffic Association, Inc. (NBTA). S. Rep. No. 97–411, 97th Cong., 2d Sess. 5 (1982).

[2] The original agreement was approved in Section 5a Application No. 9, *National Bus Traffic Assn.—Agreement*, 278 I.C.C. 147 (1950). A subsequent investigation of the agreement was terminated in Ex Parte No. 297 (Sub-No. 4), *Modified Terms and Conditions For Approval of Collective Rate Agreements Under 49 U.S.C. 10706 (b)*, served August 21, 1980. Presently pending for approval are certain amendments submitted in compliance with the decision in Ex Parte No. 297, *Rate Bureau Investigation*, 349 I.C.C. 811 (1975) and 351 I.C.C. 437 (1976). Our consideration of these matters has been rendered moot by the new legislation. Bureaus must file their new or amended agreements in conformity with the Bus Act within 120 days of the effective date of the Act.

[3] These specific provisions are found at 49 U.S.C. 10706(b)(3)(E), (b)(3)(F) and (b)(5).

[4] This proceeding was instituted on August 1, 1980 (45 FR 55734, August 21, 1980). The Commission's final decision setting standards for motor carrier rate bureau activity was issued December 19, 1980, 364 I.C.C. 464 (45 FR 252, December 31, 1980). A decision granting reconsideration in part, with certain clarifications was issued April 29, 1981, 364 I.C.C. 921. The final rules are presently in effect pending judicial review by the United States Court of Appeals for the Fifth Circuit in No. 80–7674, *American Trucking Association, Inc.*, v. *I.C.C.*

[5] See also the Commission's decison at 364 I.C.C. 921, 933 granting reconsideration in part and offering certain clarifications. For example, the 30-percent quorum requirement was made applicable for committee as well as general meetings.

[6] Docketing is the ministerial procedure of entering in writing a proposed action in the files of the bureau and providing notice of it to all interested persons upon its receipt by the bureau and prior to its filing with the Commission. *Id.* at 480.

the independent action prior to the effective date of the tariff item. General increases and decreases and broad tariff restructuring are not subject to these notice and consent requirements. The Bureau may cancel or change a rate established by independent action only for the purposes of tariff simplification, removal of discrimination, or elimination of obsolete items. The bureau must have the written permission of the independent actor to do so. (49 U.S.C. 10706 (b)(B)(3)(ii), (b)(3)(C)). See 364 I.C.C. at 467–78.

2. Rate bureau employees and employee committees are restricted from initiating a tariff proposal or determining whether to adopt, reject, or otherwise dispose of proposals. Upon request, they may provide the proponent of a rate change with expert analysis and technical assistance. Any advice concerning an independent action proposal shall remain confidential. (49 U.S.C. 10706 (b)(3)(B)(iv) and (b)(3)(E).) *Id.* at 478–81.

3. Upon request, bureaus will promptly divulge the name of the proponent of a tariff matter and the vote cast by any member on any proposal. Bureaus will provide detailed and timely public notice of meetings and their agenda. Discussion or voting on rate-related matters will not be permitted unless the meeting is reasonably noticed. Any person requesting admittance to a meeting at which rates or rules are being discussed shall be admitted immediately. Note taking and sound recording by attendees are permissible, provided the conduct of the meeting is not disrupted. If mail voting and telephonic communications are employed, they cannot be used to circumvent rate bureau restrictions. If there are abuses, we will investigate the matter. (49 U.S.C. 10706(b)(3)(B)(v).) *Id.* at 481–3.

4. Any carrier voting for another must possess a written proxy. The proxy must be dated and contain the grantor's signature, the specific items for which the vote is released, directions on voting, and certification of authority. A copy of the proxy and the written certification of authority executed by the proxy holder for the grantor will be made part of the voting record and ballot. Proxies may not be accepted for the purpose of certifying permission to cancel any item established by independent action which the carrier represented by proxy either initiated or joined. A proxy may be revoked at any time, either by subsequent written verification or by the member carrier appearing at a meeting and voting on its own behalf. (49 U.S.C. 10706 (b)(3)(B)(vi).) *Id.* at 484–5.

5. The quorum for holding meetings of the organization or a committee is 30 percent of the membership. (49 U.S.C. 10706(b)(3)(F).)[7] *Id.* at 923. We solicit comments on whether a quorum of the committee may vote on rates applicable to the full bureau membership. Further, would it be impractical to require that a given percentage of the full bureau be required to vote on rate changes subject to antitrust immunity? Our concern stems from the fact that there is only one bureau for the entire industry and the rate committee could be dominated by the two largest carriers. We also request comments on how our concerns about mail voting will be affected by these matters.

6. The bureaus are required to maintain detailed minutes of all meetings where tariff items are discussed. The bureaus will be subject to withdrawal of their immunity for serious continuing violations of Commission standards, and individual tariff publications will be subject to rejection, suspension, or investigation for improprieties in the rate bureau process. (49 U.S.C. 10706(b)(3)(E)[8] and 49 CFR 1253.20.) *Id.* at 481–83.

7. The identification and description requirements for member carriers must be complied with. (49 U.S.C. 10706(b)(3)(A).) *Id.* at 467.

8. Rate bureaus shall not file a protest or complaint with the Commission. (49 U.S.C. 10706(b)(3)(B)(iii).) *Id.* at 478.

9. Rate bureaus shall make a final disposition of a rate or rule by the 120th day after the proposal is docketed, except that if unusual circumstances require, the organization may extend such period, subject to review by the Commission. If the 120th day falls on a Saturday, Sunday, or public holiday, the final day for disposition will be the next working day. (49 U.S.C. 10706 (b)(3)(B)(vii).) *Id.* at 486.

10. There can be no discussion of or voting on rates proposed under the zone of rate freedom. (49 U.S.C. 10706(b)(3)(C).) *Id.* at 494.

As noted above, section 10 adds three new subsections further defining the scope of antitrust immunity for the bus industry. For the most part, they are self-executing and should be reflected in amended agreements. To the extent interpretation is necessary, the following discussion sets forth our proposals.

Under new 49 U.S.C. 10706(b)(3)(E), except for areas discussed below,[9] no collective ratemaking agreement approved for motor carriers of passengers may provide for discussion of or voting on single-line rates on or after January 1, 1983. The definition of a "single-line rate" provided in 49 U.S.C. 10706(b)(1), as amended by the Bus Act, is a "rate, charge, or allowance proposed by a single motor common carrier that is applicable over its line and for which the transportation can be provided by that carrier." As in the case of single-line rates and independent actions for motor carriers of property, bus rate bureaus must give each passenger carrier the absolute right to decide whether or when a single-line rate will be docketed. Our reasons are the same as discussed with regard to motor carriers of property. See 364 I.C.C. at 488–491.

This procedure enforces the Bus and Motor Carrier Acts' absolute protection of the right of bureau members to establish rates independently, without bureau interference. It also affirms the Commission's long-standing prohibition of mandatory bureau procedures for advance notice of single-line rates and independent actions. Clearly, advance docket notice to competitors of single-line rate changes should not be allowed to circumvent the statutory ban on collective action. Therefore, the bus bureau agreement with regard to single-line rates shall be modified to permit carriers to prohibit docketing in advance of filing or to direct the timing of the docketing. Discussion of and voting on these proposals are prohibted after January 1, 1983, and the agreement shall also prohibit inclusion of single-line and joint-line rates in one proposal after January 1, 1983.

The statute also requires that, with the same exceptions, on or after January 1, 1984, no agreement approved for motor carriers of passengers may provide for discussion of or voting on any joint rate. 49 U.S.C. 10706(b)(3)(E). We note that the Senate Report [10] states that the Department of Justice, in its comments on the proposed legislation, emphasized that no antitrust immunity is needed for the discussions between direct connectors and that this is true "even when carriers that offer competing single-line services between the same two points also establish a joint-line rate for service between those same points * * *." On that basis, the Senate Committee concluded it was not necessary to exempt from operation of

[7] Redesignated as (b)(3)(H) under the new legislation.
[8] Redesignated as (b)(3)(G) under the new legislation.
[9] See 49 U.S.C. 10706(b)(3)(E) (i) and (ii).
[10] S. Rep. 97–411, *supra* at 22 (1982).

the antitrust laws collective action on joint-rates where all the carriers involved form a part of a particular route.

Excepted from these prohibitions against collective consideration of single-line and joint-line rates are the following activities: (a) General rate increases and decreases, (b) broad changes in tariff structure; (c) changes in promotional or innovative fares (49 U.S.C. 10706(b)(3)(E)(i)); (d) the ministerial functions of publishing tariffs, filing independent actions, and providing support services for members; and (e) changes in rules or regulations which are of at least substantially general application throughout the area in which the changes will apply (49 U.S.C. 10706(b)(3)(E)(ii)). *See* also 364 I.C.C. at 497.

In considering general increases and decreases, carriers are specifically prohibited from discussing individual markets or particular single-line or joint-line rates. Permissible discussion under this subsection is limited to industry average carrier costs and intermodal competitive factors. For example, carriers could discuss Amtrak pricing practices, airline rates, and the cost of private automotive travel. S. Rep. 97–411, *supra* at 22. We emphasize that these exceptions may not be used to circumvent other statutory restrictions, particularly the protection for independent action and the ban on collective setting of single-line and joint-line rates effective in 1983 and 1984, respectively.

The statute also directs the Commission to define general rate increases, and decreases, broad changes in tariff structure, and promotional or innovative fares.

General rate increases and decreases: The definition of a general rate increase used in Ex Parte No. 297 (Sub-5), 364 I.C.C. at 491 is "a proposed general adjustment of substantially all the rates published in a rate bureau's tariff or tariffs." This is the standard we propose to apply in this proceeding, as well. However, we note that in Ex Parte No. MC–82 (Sub-1), *Procedures in Motor Carrier Revenue Proceedings—Intercity Bus Industry*, 357 I.C.C. 35 (1977), bus industry general increases were characterized as proposed changes in fares and charges where the proposal would result in an increase of $1 million or more in the annual operating revenues on the traffic affected by the proposal. This definition is presently codified at 49 CFR 1104.20(a). Comments on this or other alternatives are welcome.

We view our proposed definition of a general increase as appropriate for interstate rates. However, a separate definition of general increase may be necessary to implement Section 17 of the Bus Act which adds a new subsection (e) to 49 U.S.C. 11501 to provide procedures for preempting State decisions involving rates and related practices, including interstate and intrastate general rate procedures. Because States cannot grant antitrust immunity, intrastate increases are rarely proposed by more than one carrier. A separate rulemaking pertaining to section 17, Ex Parte No. MC–160, *Procedures for Review of Intrastate Bus Rates*, addresses the issue of intrastate general rate increases.

Broad changes in tariff structures: Ex Parte No. 297 (Sub-5), 364 I.C.C. at 493–4, cited a colloquy in the Congressional Record which discussed changes in tariff structure and is applicable in principle to this proceeding. The discussion indicates that a change in tariff structure covered by the exception to termination of antitrust immunity must be broad in scope and nature; may affect both single- and joint-line rates over a large geographical area; may involve multiple commodities, rates, rate scales, origins and destinations; and may include both increases and reductions in rates. See 126 Cong. Rec. H5411 (daily ed. June 19, 1980) (remarks of Rep. Boner).

In certain instances, there may be some overlap between a general rate increase or decrease and a broad change in tariff structure. A general rate increase or decrease is an "across-the-board" increase or decrease of a given percentage proposed by a group of carriers, affecting all or substantially all their rates, while a rate restructuring changes some fares relative to others. Thus, a proposal that affects most of a carrier's (or group of carriers') rates, but in a non-uniform way (*i.e.*, it increases or decreases some rates more than others) may be both a general rate increase or decrease and a rate restructuring, and would retain antitrust immunity. As emphasized earlier, these exceptions may not be used to evade other statutory restrictions.

Promotional or innovative fare change: Continued antitrust immunity for such rates is intended by Congress to stimulate the introduction of new fares that will increase or encourage ridership. The distinction between these two types of fare changes is not always clear, since both involve departures from standard tariff rates. The Senate Report notes only that innovative and promotional fares "are below standard fares, benefit the traveling public, and should be encouraged." S. Rep. at 22.

We propose to define "innovative fare" as any type of fare or fare level that has never been previously offered. See 364 I.C.C. at 473. This also conforms to the common dictionary definition that characterizes innovative as "new" or "novel."

Promotional fares generally have three characteristics: (1) Limited duration, (2) attractive price or level of service quality, and (3) some added feature in addition to those normally offered. Some promotions, for example unlimited mileage fares or senior citizen discounts, could have unlimited duration. Thus, the first condition may not be required in all instances. Comments are requested on whether an expiration date serves the public interest. Further, criteria (2) and (3) may overlap. Comments are requested on these proposals, as well.

As noted above, it appears that Congress anticipated that antitrust immunity would be used to lower fares or encourage service levels that would increase bus ridership. Accordingly, we propose that any action increasing fares, without concomitant services enhancement, not be considered "innovative" or "promotional," and antitrust immunity would not, thus, be available. We request comments on this proposal.

Subsection (b)(3)(E)(i) specifically subjects the three exceptions to the end of antitrust immunity just discussed to "such notice requirements as the Commission may specify by regulation * * *." In implementing the Motor Carrier Act we interpreted a similar requirement to mean advance notification to shipper subscribers via a notice in the bureau's docket bulletin. We required that the notice be issued at least 15 days before the proposal is filed with the Commission, in order to facilitate shipper comment on pending rate proposals. We propose to adopt the same requirements here.

Finally, new subsection (b)(3)(F) eliminates antitrust immunity for collective ratemaking for rates applicable to charter and to special operations. The restriction against joint consideration of rates applicable to charter and special operations apparently resulted from Congressional recognition that most of these operations involve few, if any, interline movements. The provision is self-executing, and should pose the industry little difficulty since NBTA has not collectively considered rates for charter or special service for several years.[11]

[11] *Deregulation of the Intercity Bus Industry: Hearing on H.R. 3663 Before the Sub-comm. on*

Section 10(f) of the Bus Act grants rate bureaus which received pre-Bus Act approval for their agreements interim antitrust immunity. These agreements may continue in effect until new or amended agreements are finally disposed of by the Commission *if*: (1) New or amended agreements are submitted to the Commission for approval within 120 days of the effective date of the Act and (2) the bureaus comply with 49 U.S.C. 10706 and the standards and requirements ultimately issued in this proceeding during the period new or amended agreements are being prepared, submitted to, and considered by the Commission. If these conditions are met, existing antitrust immunity will continue until the Commission reaches a final decision on the amended agreements.

The Commission will reach a decision in this proceeding within a short time after comments are received. The new or amended agreements must be submitted to the Commission within 120 days of the effective date of the Bus Act, and delay in issuing our final standards could adversely affect preparation of the new agreements.

The provisions of 5 U.S.C. 603 require that the Commission also examine the impact of proposed standards on small businesses and small organizations. Our proposed standards may benefit these smaller entities by granting them greater freedom to set rates independently. Moreover, the Bus Act allows carriers to use the rate bureau process to establish innovative or promotional fares. Both of these provisions will benefit individuals, and groups of, passengers, as well as carriers. On the other hand, we recognize that these procedures can also be employed by larger carriers to the detriment of smaller ones. Nevertheless, this is a statutorily-mandated proceeding, and the overall purpose of the Bus Act is to establish a new regulatory scheme that will assure a viable intercity bus industry and benefit both small and large carriers, as well as passengers. In framing these standards, we have attempted to minimize the burdens on small entities consistent with Congressional intent. Otherwise, we anticipate no significant economic impact on small entities as a result of these proposed standards.

This proposal should not significantly affect the quality of the human environment or conservation of energy resources.

Comments may be filed on any of the matters discussed above, including environment or energy considerations, and regulatory impact issues. Many of our proposed standards are the same as the final standards adopted for motor carriers. We reiterate our call for comments delineating differences between the motor carrier of property and of passenger industries. Should the differences, or any other factors so justify, we shall make the appropriate changes in the final standards and procedures. Although actual proposed rules are not set forth here, we intend to issue rules under 49 CFR Part 1331 following consideration of the comments.

Surface Transportation of the Senate Comm. on Commerce, Science and Transportation, 97th Cong., 2d Sess. 135, 144 (1982).

49 CFR Part 1137

[Ex Parte No. MC-142 (Sub-3)]

Removal of Restrictions From Authorities of Motor Carriers of Passengers, Intermediate Points

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Section 7 of the Bus Regulatory Reform Act of 1982, which amends 49 U.S.C. 10922(h), requires the Commission to process expeditiously applications of passenger carriers seeking to remove restrictions in outstanding certificates that limit interstate service to intermediate points along certificated routes. The proposed procedures must be effective on (60 days from the date of enactment of the Bus Regulatory Reform Act of 1982.) Adoption of the proposed rules is expected to promote competition, result in fuel and cost savings and improved operating efficiency, and aid in providing and maintaining passenger service to small communities.

DATE: Comments are due October 19, 1982.

ADDRESS: The original and, if possible, 15 copies of comments should be sent to: Ex Parte No. MC-142 (Sub-3), Room 2139, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Elaine Dobbins (202) 275-6272, or Howell I. Sporn (202) 275-7691

SUPPLEMENTARY INFORMATION:

The Congressional Mandate

Section 7 of the Bus Regulatory Reform Act of 1982 (the Act), amends Subtitle IV of Title 49, United States Code 10922(h),[1] by adding new paragraphs 10922 (i)(3) and (i)(4) which read as follows:

(i)(3) On the effective date of the Bus Regulatory Reform Act of 1982, a certificate to provide interstate transportation of passengers issued under this section shall be deemed to authroize (but not require)—

(A) Round-trip operations where only one-way authority exists; and

(B) Special and charter transportation from all points in a political subdivision of a State in any case in which special and charter transportation authority is limited to one or more points of origin in such political subdivision.

(4) Upon request of the holder of a certificate, the Commission shall within 90 days remove any operating restriction imposed on the certificate in order to authorize interstate transportation or service to intermediate points on any route covered by the certificate unless the Commission finds, on the basis of evidence presented by a person objecting to the removal of such an operating restriction, that the resulting interstate transportation directly competes with a commuter bus operation and it will have a significant adverse effect on commuter bus service in the area in which the competing service will be performed.

The Act directs the Commission to reduce regulation and to promote competition in the bus industry. It also affords bus companies new tools to compete vigorously among themselves and with other common carrier modes, and eliminates regulatory restraints on the effective use of those tools. Sections 10922(i) (3) and (4) are among those new tools. As in the motor freight industry, Congress found that motor carriers of passengers are unduly burdened with route restrictions that hamper their ability to serve the public interest. The removal of burdensome restrictions from bus certificates would also enable several of the goals of the National Transportation Policy (as set forth in Section 5 of the Act) to be better realized. Report of the Senate Committee on Commerce, Science and

[1] Section 10922(h) is redesignated section 10922(i) by Section 6(b) of the Act.

Transportation on H.R. 3663, S. Rept. No. 97–411, 97th Cong., 2nd Sess. 20 (1982) (Senate Report).

Express package authority is not expressly mentioned in Section 7. However, the Act grants carriers holding operating certificates permissive authority to transport express packages (newspapers, express mail, passengers baggage, etc.,) in the same vehicle with passengers. Senate Report, p. 19. Accordingly, previous limitations against the transportation of express packages in interstate commerce to service points authorized in existing interstate certificates are, upon the effective date of the Act, automatically eliminated. The authority thus granted is, however, permissive.

49 U.S.C. 10922(i)(3) is self-executing, and automatically converts existing restricted authorities to permit round-trip operations and expanded special and charter operations. Section 10922(i)(4) requires the Commission to implement procedures for the removal of intermediate point restrictions from authorities of motor carriers of passengers, and Congress gave the Commission significant discretion in developing such procedures. The procedures implementing a similar section (Section 6) of the Motor Carrier Act of 1980, as promulgated in Ex Parte No. MC–142 (Sub-1), *Removal of Restrictions from Authorities of Motor Carriers of Property*, 132 M.C.C. 374 (1980), (45 FR 86747, December 31, 1980), were, in our view, widely accepted and successfully used enabling the Commission to handle expeditiously over 5,000 applications. Consequently, we propose to implement Section 10922(i)(4) by amending the earlier adopted restriction removal rules, contained at 49 CFR Part 1137, to include motor carriers of passengers.

Comments from interested parties are invited on every aspect of the proposed rules. As required by the Act, the Commission intends to conclude this rulemaking and adopt final rules within 60 days. This necessitates making the rules effective on less than 30 days notice. Further, we are providing a 20-day comment period, rather than the usual 30 days, in order to allow as much time as practicable, in keeping with the requirements of due process, to consider fully the positions of all interested parties before adopting final rules. We do not contemplate extending the time for filing comments.

Proposed Procedures for Processing Applications

Section 10922 (i)(4) gives the Commission 90 days to remove intermediate point restrictions from certificates of motor carriers of passengers. Congress intended Section 7 to create simple, expedited procedures for removing operating restrictions from existing bus certificates.

Generally, allowing 10 days for Federal Register publication or other official means of publication of applications the Commission may institute by rulemaking under Section 28 of the Bus Regulatory Reform Act of 1982, 25 days for comments, and 55 days for Commission disposition will be sufficient time for adequate treatment of such applications. We also propose that review on appeal will be discretionary (as opposed to an appeal the Commission's general appeal regulations contained at 49 CFR 1100.98, and appeal procedures applicable to restriction removal rules (49 CFR 1137.14(c))).

We propose that applications follow the caption summary format set forth at 49 CFR 1137.10(b)(6). It is essential that applicants include an accurate explanation of the routes over which transportation of passengers is authorized by an interstate certificate, and the restrictions against service to intermediate points they seek removed. For example, a caption summary could state that, "The application seeks to modify Sub-Nos. 1–5 by eliminating the intermediate point restrictions to authorize service at intermediate points on interstate routes A, B, and C authorizing service between Miami, FL, and New York, NY." Due to the length of many regular route certificates, it is particularly important that applicants prepare a proposed draft of the authority with the restrictions removed as required by 49 CFR 1137.10(b)(4).

We also intend to permit and encourage passenger carriers to reform a number of outstanding certificates in one application proceeding. This practice saved the motor freight industry millions of dollars in filing fees, and enabled the Commission to reduce its regulatory role sooner than expected. We note that § 1137.10(d) of the restriction removal rules promulgated in Ex Parte No. MC–142 (Sub-1), *supra*, requires applicants to combine "reasonably related" requests for modification. In the final rules, we intend to provide guidance as to what type of requests will be considered "reasonably related" in the passenger area. Comments on this issue would be particularly helpful.

The Rules Proposed

The proposed procedures do not require extensive changes in the restriction removal rules. Many existing rules have general applicability and can be readily applied to section 10922(i)(4) applications. However, some rule changes are needed. We invite comments on whether a need exists for additional changes.

Each application will be determined individually on the basis of comments received. The Act provides certain criteria that motor carriers of passengers must meet in order to protest a request to remove an operating restriction under section 10922(i)(4) of the Act.[2] The burden of proof is on the protestant to show that the proposed interstate transportation service would directly compete with a commuter bus operation and that it would have a significant adverse effect on commuter bus service in the area in which the competing service will be performed.[3] Weighing the competing factors in evaluating "significant adverse effect" is difficult. Comments on this issue are welcome.

In sum, we propose: (1) To add a paragraph to 49 CFR 1137.1 of Subpart A making the restriction removal procedures available to motor carriers of passengers to the extent they seek interstate intermediate point authority; (2) to amend § 1137.2 to limit the applicability of rules to passenger authorities issued pursuant to applications filed before the effective date of the Act; (3) to amend §§ 1137.3 and 1137.12 to define who may protest, and on what basis, a section 10922(i)(4) application; and (4) to add a new Subpart D containing guidelines applicable to section 10922(i)(4) applications.[4]

---

[2] Section 10922(c)(7) provides that no motor common carrier of passengers may protest an application to provide transportation filed under this subsection or a request to remove an operating restriction under section 10922(i)(4) of this title unless—

(A)(i) It possesses authority to handle, in whole or in part, the traffic for which authority is applied;

(ii) It is willing and able to provide service that meets the reasonable needs of the traveling public; and

(iii) It has performed service within the scope of the application during the previous 12-month period or has, actively in good faith, solicited service within the scope of the application during such period;

(B) It has pending before the Commission an application filed prior in time to the application being considered for substantially the same traffic; or

(C) The Commission grants leave to intervene upon a showing of other interests that are not contrary to the transportation policy set forth in section 10101(a) of this title.

[3] The Senate Report (at 16) notes that a carrier can be found to compete directly with a commuter bus operation even if the service to be authorized does not have all the characteristics of commuter bus operations.

[4] We also note that proposed changes are set forth in the appendix of 49 CFR 1137 and in § 1137.20 of Subpart C to reflect recent Commission action bringing freight forwarders within the ambit

Environmental and Energy Considerations

It does not appear that adoption of the proposed rules, amending 49 CFR Part 1137, will have any significant impact on the quality of the human environment. However, we anticipate that they will improve carrier operating efficiency and promote competition, with a resulting beneficial impact on the bus industry and the public. Comments on these issues are welcome.

Regulatory Flexibility Analysis

The proposed rules provide expedited procedures to enable motor passenger carriers to remove operating restrictions from their interstate certificates in order to provide interstate transportation or service to intermediate points. They will not have a significant economic impact upon a substantial number of small entities, but they could have a modest, beneficial, economic impact upon an unascertainable number of carriers, counties, townships, towns, and villages. Small carriers, by serving intermediate points, will be able to improve their operating efficiency. They also should find it easier to experiment with new services, and as many of them specialize in serving small communities, this, in turn, should lead to an increase in the amount of service offered to such communities. At the same time, the rules recognize the legislative concerns for protecting commuter bus services, by providing opportunity for consideration of the competitive impact of restriction removal on such services. We welcome comments on this matter.

Buses, Motor carriers, Freight forwarders, Restrictions, Restriction removal proceedures.

Summary

We propose to amend title 49, Part 1137, of the Code of Federal Regulations as described in the appendix to this notice.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

Decided: August 31, 1982.

(49 U.S.C. 10321 and 10922(i) and 5 U.S.C. 553)

Agatha L. Mergenovich,
Secretary.

Appendix—Proposed Revisions to 49 CFR Part 1137

Title 49 CFR Part 1137 would be revised to read as follows:

---

of the restriction removal rules. Ex Parte No. MC-142 (Sub-2), *Freight Forwarder Restrictions*, published at 47 FR 31281 (July 19, 1982).

1. The heading of Part 1137 would be revised to read as follows:

PART 1137—REMOVAL OF RESTRICTIONS FROM AUTHORITIES OF MOTOR CARRIERS OF PROPERTY, MOTOR CARRIERS OF PASSENGERS AND FREIGHT FORWARDERS

2. Section 1137.1 of Subpart A would be amended by designating the introductory text as paragraph (a), by redesignating paragraphs (a)–(e) as subparagraphs (1)–(5), and by adding a new paragraph (b) to read as follows:

§ 1137.1 Purpose.

* * * * *

(b) These regulations govern applications filed by motor carriers of passengers seeking to remove operating restrictions from their certificates in order to authorize interstate transportation or service to intermediate points on any route covered by the certificate. These regulations implement 49 U.S.C. 10922(h)(1)(B), 10922(h)(2), 10922(h)(i)(3), and 10922(h)(i)(4).

* * * * *

3. Section 1137.2 of Subpart A would be revised to read as follows:

§ 1137.2 Applicability of rules.

Applications may be filed under these rules to remove restrictions or to broaden authority in certificates and permits issued pursuant to applications filed before December 28, 1980. Motor carriers of passengers may file applications under these rules to remove intermediate point restrictions in certificates issued pursuant to applications filed before (the effective date of the Bus Regulatory Reform Act of 1982).

4. Section 1137.3 of Subpart A would be amended by adding a new paragraph (c), to read as follows:

§ 1137.3 Definitions.

* * * * *

(c) *Commuter Bus Operations.* "Commuter bus operations" means short-haul regularly scheduled passenger service provided by motor vehicle in metropolitan and suburban areas, whether within or across the geographical boundaries of a State, and utilized primarily by passengers using reduced fare, multiple-ride, or commutation tickets during morning and evening peak period operations.

5. Paragraph (c) of § 1137.10 would be amended by revising the heading to read as follows:

§ 1137.10 Form and content of application.

* * * * *

(c) *Information that shall accompany the application of a motor carrier of property or freight forwarder.* * * *

* * * * *

6. Section 1137.12 would be revised to read as follows:

§ 1137.12 Participation of interested persons.

Comments (an original and one copy) shall be filed with the Commission within 25 days of the date of publication in the **Federal Register** or other official means of publication by rulemaking under Section 28 of the Bus Regulatory Reform Act of 1982. The envelope containing the comments and the comments shall be clearly marked "RESTRICTION REMOVAL COMMENTS."

(a) Comments on applications filed by motor carriers of property and freight forwarders. Any interested person may comment on the applicant's proposal. Comments shall be directed to either:

(1) The merits of the particular proposal, or

(2) Whether the proposal should properly be considered under these rules.

(b) No motor common carrier of passengers may protest an application to remove an operating restriction under 49 U.S.C. 10922(i)(4) unless:

(1)(i) It possesses authority to handle, in whole or in part, the traffic for which authority is applied;

(ii) It is willing and able to provide service that meets the reasonable needs of the traveling public; and

(iii) It has performed service within the scope of the application during the previous 12-month period or has, actively in good faith, solicited service within the scope of the application during such period;

(2) It has pending before the Commission an application filed prior in time to the application being considered for substantially the same traffic; or

(3) The Commission grants leave to intervene upon a showing of other interests that are not contrary to the transportation policy set forth in section 10101(a) of this title.

(c) Protests for motor carriers of passengers shall be directed to:

(1) Whether the proposed interstate transportation directly competes with a commuter bus operation; and

(2) Whether the resulting interstate transportation would have a significant adverse effect on commuter bus service in the area in which the competing service will be performed.

7. The first sentence of § 1137.20 of Subpart C would be revised to read as follows:

§ 1137.20 Scope of this subpart.

This subpart contains guidelines designed to assist applicants in filing applications for the removal of operating restrictions in authorities of motor carriers of property and freight forwarders. * * *

8. Part 1137 would be amended by adding a new Subpart D to read as follows:

Subpart D—Guidelines for Determination of Applications—Passenger Carriers

§ 1137.30 Scope of this subpart.

This subpart describes guidelines to be used by motor carriers of passengers seeking to remove intermediate point restrictions.

§ 1137.31 Intermediate point service.

Certificates which authorize interstate regular route passenger service and preculde interstate service at intermediate points on the carrier's service routes, either by way of a specific restriction against performing such service or by limiting intermediate point service at specific points, are considered unduly restrictive. Use of these procedures is appropriate for seeking authority to perform interstate service at all intermediate points along a motor carrier of passenger's existing interstate regular routes. Applications for such authority will be denied only if the Commission finds that the resulting interstate transportation directly competes with a commuter bus operation and will have a significant adverse effect on commuter bus service in the area in which the competing service will be performed.

9. The table of contents to Part 1137 would be amended to include a new Subpart D and to revise the authority citation to read as follows:

Subpart D—Guidelines for Determining Applications—Passenger Carriers

Sec.
1137.30 Scope of this subpart.
1137.31 Intermediate point service.

Authority: 49 U.S.C. 10321 and 10922[h](l); 5 U.S.C. 553.

49 CFR Part 1100

[Ex Parte No. MC-160]

Procedures for Review of Intrastate Bus Rates

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rules.

SUMMARY: Section 17 of the Bus Regulatory Reform Act of 1982 directs the Commission to establish procedures for processing petitions which seek review of State regulation of intrastate rates. The proposed regulations implement this mandate.

DATES: Comments are due October 19, 1982. Because of the time constraints in the Bus Act, no extensions shall be granted. Final rules may be made effective on less than 30 days' notice.

ADDRESSES: Send an original and, if possible, 15 copies of comments to: Ex Parte No. MC-160, Room 5340, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275-7278; or Tom Smerdon (202) 275-7277

SUPPLEMENTARY INFORMATION: Section 17 of the Bus Regulatory Reform Act of 1982 (Bus Act) amended 49 U.S.C. 11501 by adding, among other things, a new subsection (e) which vests the Commission with jurisdiction to prescribe increased rates, as well as rules or practices (rate) applicable to intrastate transportation (including freight such as package express) provided by a motor carrier of passengers (bus) subject to our regulation. Before we can assert jurisdiction, however, two conditions must be satisfied. First, a carrier must initially request permission to establish a rate from the relevant State authority responsible for regulating intrastate rates, and the State authority must either deny the request, in whole or in part, or not act finally, on the request in whole or in part, within 120 days.[1] Second, the Commission must find that the assailed intrastate rate causes unreasonable discrimination against, or imposes an unreasonable burden on, interstate commerce.

The Bus Act delineates four situations in which an intrastate rate is rebuttably presumed to impose an unreasonable burden on interstate commerce: (1) The rate is less than the rate levied by the carrier for comparable interstate bus transportation; (2) it does not exceed the variable costs [2] of providing the service; (3) it was not subject to final action by the State authority within 120 days; or (4) the most recent intrastate bus general rate increase is less than the most recent interstate general rate increase.[3] 49 U.S.C. 11501(e)(2) (A) and (B). With regard to the last presumption, we may look to any reasonable period of time to find a disparity. See S. Rep. No. 97-411, 97th Cong., 2d Sess. 28 (1982).

Under new 49 U.S.C. 11501(e)(3)(A), a carrier may seek Commission review of a State's denial of, or inaction on, a request to increase rates. A proceeding is begun by the carrier filing an application for precription of a rate. At that time, the carrier must certify that it has notified the State authority having jurisdiction over the rate, the State governor, as well as any other interested persons which the Commission, by regulation, may specify. We must take final action no later than 60 days after the application is filed.

There are two exceptions to the Commission's preemptive jurisdiction over intrastate rates. First, States retain full authority over carriers owned or controlled by the State or a local government. Second, States have exclusive ratemaking jurisdiction over solely intrastate carriers. Senate Report, *supra* at 27-28. *See* also 49 U.S.C. 11501 (e)(4) and (e)(1).

Section 11501(e)(3)(B) requires the Commission to establish, by regulation, procedures for processing the petitions of carriers who have been unable to establish desired intrastate rate levels because of State action or inaction. This proceeding is instituted to establish those procedures.

The legislative history of Section 17 in the Senate Report, *supra* at 28, reveals that Congress envisions that the States would continue to be primary regulators of increases proposed for intrastate rates,[4] and the Commission would serve

---

[1] The Commission will not assert jurisdiction over any case pending before the relevant State authority before the effective date of the Bus Act, because there does not appear to be a clear legislative intent for the new law to apply.

[2] We will not attempt to define variable costs or to develop a cost methdology in this proceeding. These are not required by statute and would require a lengthy and controversial process without commensurate returns. Carriers will submit their calculations of revenue/variable cost ratios with a full explanation of how the calculations were derived (including supporting documentation), what assumptions were made, what and how common costs are allocated, and so on. Anyone filing a protest may challenge the figures, assumptions, allocations, or other aspect of the carrier's calculation, as not complying with generally accepted accountings (or costing) principles, or on any other relevant ground.

[3] Intrastate general increases, unlike interstate ones, are usually not taken collectively by all involved carriers. Instead, for State purposes, a general increase often involves an individual carrier adjusting substantially all its rates. Comments are invited on this matter, and specific examples would be helpful to assist us in developing the most appropriate rule to implement this presumption.

[4] The States no longer regulate reductions of intrastate rates applicable over authorized interstate routes. Senate Report, *supra*, at 29, 49 U.S.C. 11501(e)(5). The only vestigial regulation of these reductions is that the Commission may remedy through the complaint process situations where a reduction constitutes a predatory practice. 49 U.S.C. 11501(e)(6).

primarily as an appellate reviewer of State regulation.[5] Through the rebuttable presumptions discussed above, Congress established certain specific standards to guide our review of State action (or inaction) once our jurisdiction attaches. There is no basis for us to conclude that the specific presumptions are exclusive. We have full authority to implement Congressional intent through other presumptions or standards. In this regard, for example, Congress gave the Commission wide discretion in the procedural implementation of the new preemption provisions. This seems to manifest an intent that, where necessary, we would fill in the broad legislative outline in a manner which would best implement the statute. As indicated below, there may be areas where presumptions which are substantive in effect but procedural in actuality are necessary. In addition, by virtue of its imposition of a 60-day time limit, Congress mandated that our work be completed expeditiously. Finally, Congress shaped the scope of review by statutory language making "a full hearing" unnecessary. Instead, the Act specifically provides only that we decide these cases in accordance with the procedures we are directed to establish. 49 U.S.C. 11501(f)(2).

Since this process is appellate in nature, subject to short deadlines, and to be accomplished with less than a full hearing, Congress apparently did not intend that our review would be *de novo*. Obviously the starting point of our analysis should be the State record. However, there may be instances where that record is incomplete or other reasons exist for accepting new evidence.

The aggrieved carrier may apply for prescription of rates by filing a petition for review. It will be required to submit its entire case at this time. This should include a copy of the entire State record.

Only the Governor, the State, and any parties of record who participated at the State level may, as a matter of right, participate as respondents to a carrier's petition for review. The participation of these parties will ensure a complete and accurate record.

All others must seek leave to intervene on a showing of good cause why an appearance was not entered in the State proceeding, but is appropriate in this proceeding. Petitions to intervene must also contain all argument on which petitioners rely. We also seek comments on the feasibility of allowing interested individuals to file informal comments. Written arguments of the parties should specify, on the one hand, why a State decision or inaction unreasonably burdens interstate commerce, or, on the other hand, why a State decision or inaction is reasonable.

Within the framework outlined above, it is clear that, for a carrier to represent its interests effectively, it must make every effort to include necessary evidentiary showings at the State level required by any of the statutory presumptions on which it may rely at the Federal level. In short, it must build a proper record for review. This will ensure that the State's authority is not being improperly circumvented. It is possible, however, that existing State standards and procedures may preclude carriers from establishing fully the evidentiary showing necessary for that carrier to sustain to its burden on review (with regard to presumptions 1, 2, and 4).[6] One option, as discussed above, is to allow, as much as possible, presentation of any relevant new evidence. another remedy we may consider for the final rules would be to presume that the assailed rate constitutes an unreasonable burden on interstate commerce, since it was established pursuant to standards and procedures, which are inconsistent with the Bus Act. The statutory presumptions could be interpreted as constituting the minima which the States must follow in regulating intrastate rates, and thus a failure to accommodate these procedurally could be construed as a refusal to regulate in harmony with the Bus Act. In this regard, Section 5 of the Bus Act amended the national transportation policy in certain respects which are particularly relevant here. New 49 U.S.C. 10101(a)(3) states, as pertinent, that it is national policy in regulating bus transportation:

> (B) To provide Federal procedures which ensure that intrastate regulation is exercised in accordance with this subtitle; and (C) to ensure that Federal reform initiatives * * * are not nullified by State regulatory actions.

In discussing these new provisions, the Senate Report, *supra* at 14, states:

> Further, the consideration of State regulatory actions and procedures recognizes the significant burdens on regulatory actions and procedures resulting from numerous regulatory decisions. The inclusion of specific policy goals for motor carriers of passengers in the transportation policy and the specific preemption of burdensome State regulation contained in other sections of this act are clearly intended as a recognition that the other goals of the national transportation policy with respect to motor carriers of passengers can only be achieved by a rational and less burdensome system of governmental regulation.

We particularly invite comment on the need for and the propriety of these procedural presumptions.

Where a State has failed to act on a carrier's request for permission to establish a rate within 120 days, the carrier must submit a verified statement to this efect in its petition for review. In this instance, a State could successfully rebut the carrier's allegations through submission of a certified copy of a decision issued before the expiration of the 120 days.

The decisional deadline in the legislation dictates the adoption of procedures geared towards swift accumulation of the required materials. Response time subtracts from the 60 days allowed for review. Consequently, we propose that replies be filed 15 days after the filing of the carrier's petition. Rebuttal by the carrier seems unnecessary and contrary to normal appellate procedures. However, we seek comments on this issue. Rebuttal to petitions to intervene will be allowed, as stated earlier, since the carrier would not have had the opportunity to reply to the positions of these parties in the State proceeding.

Under 49 U.S.C. 11501(e)(3)(A), the carrier must notify the Governor, the State agency, and "such other interested persons as the Commission may specify by regulation." Besides the Governor and the State agency, we propose that the carrier be responsible for notification and service of its petition for review (but not a copy of the record before the State agency) upon all parties of record who participated at the State level. Parties of record include only those who made a formal appearance before the State agency.

PART 1100—GENERAL RULES OF PRACTICE

We propose to add a new § 1100.220 to Title 49, Part 1100 to read as follows:

§ 1100.220 Processing of petitions for review of intrastate bus rate regulation filed under 49 U.S.C. 11501.

(a) *Petitions governed by these rules.* These rules govern the handling of petitions which seek review under 49 U.S.C. 11501 of State rate regulation of

[5] In actuality, the process outlined by Congress is broader in scope than traditional appellate review by courts. The Commission is directed to prescribe an intrastate rate, rule, or practice to remedy unreasonable discrimination against, or undue burden on, interstate commerce. Remand to the State agency to correct its decision is apparently beyond the intent of Congress.

[6] The problem could be particularly acute in two instances. First, where the issue is cost related, States may not include the same elements in variable costs that we do. Second, where the issue is comparable interstate transportation, States may not make comparisons with interstate rates in their cases. In these instances, State procedures might not permit the development of a proper record.

interstate bus carriers providing intrastate service.

(b) *Commission jurisdiction.* If an interstate bus carrier has requested a proper State authority for permission to establish an increased intrastate rate, rule, or parctice and the request has been denied (in whole or in part) or the State authority has not taken final action (in whole or in part) on the request by the 120th day after the request is made, then that carrier may apply by petition to the Commission for review of the State action (or inaction).

(c) *Information to be submitted by petitioner.* A carrier's petition for review shall include: (1) A cover sheet indicating the statutory authority (49 U.S.C. 11501) under which the filing is authorized and that a decision shall be made within 60 days; (2) a copy of the entire State record, if available, and other evidence the carrier deems relevant to the petition (and, if the basis for the carrier's petition is State inaction, the carrier shall also submit a statement of counsel or a verified statement by a competent witness indicating that the State has not acted by the 120th day following receipt of the carrier's request); (3) written argument detailing the reasons that the State action (or inaction) should be reviewed: (4) certification that the State Governor, State authority which denied, or failed to take action on, the carrier's request, and all parties of record in the State proceeding have been served with a copy of the petition; and (5) the name(s) and address(es) of petitioner's representative(s) on whom service of a reply and of the Commission's decision can be made.

(d) *Notification Procedures.* No later than the date on which a carrier files its petition for review, it shall serve copies of its entire petition on the State Governor, the State authority which denied, or failed to act on, the carrier's request, and on all parties of record in the proceeding at the State level. See, in addition, 49 CFR 1100.20.

(e) *Where pleadings are sent; copies.* The original and 12 copies of the petition and reply shall be sent to the Interstate Commerce Commission, Office of the Secretary, Washington, D.C. 20423. Only two copies of the State record need be furnished for the Commission's use. Copies of the State record need not be furnished to the Governor, State agency, or other parties of record.

(f) *Who may oppose a petition; deadlines.* A reply to a petition may be filed as a matter of right by the Governor, the State authority which denied, or failed to act on, the carrier's request, or by any party of record in the State proceeding. These parties shall have 15 days from the filing of the carrier's petition in which to file a response with the Commission. All others wishing to participate shall file a petition for leave to intervene. The petition shall be filed within 15 days from the filing of the carrier's petition. See, in addition, 49 CFR 1100.20.

(g) *Contents of the reply.* Replies and petitions to intervene shall include: (1) Written argument detailing the reasons the State's action was reasonable; (2) certification that a copy has been served on the petitioner's representatives(s). Replies and petitions may contain evidence submitted in response to carrier's submission of new evidence. Petitions to intervene shall also include a statement of good cause why an appearance was not entered in the State proceeding and why an appearance is appropriate in this proceeding.

(h) *Rebuttal by the carrier.* The carrier shall not file rebuttal, except in response to a petition to intervene. Rebuttal to intervention petitions shall be filed within 10 days of the filing of the petitions.

Conclusions

The Commission will reach a decision in this proceeding within a short time after comments are received. Final rules may be made effective on less than the normal 30 day's notice. 5 U.S.C. 553(d). The statute becomes effective 60 days after enactment, and any delay in making final rules effective could deprive carriers of taking full advantage of the rules at the earliest possible date. Good cause exists for making final rules effective concurrently with **Federal Register** publication or on abbreviated notice. 5 U.S.C. 553(d)(3).

This action does not appear to affect significantly the quality of the human environment or conservation of energy resources. The provisions of 5 U.S.C. 603 also require that the Commission examine the impact of proposed rulemakings on small business and small organizations. The effects on small entities who are carriers of passengers would be largely positive, since the new law gives them additional recourse in attempting to increase revenues. To a small extent, the effect of our rules could be adverse because of the minor litigation expenses associated with the evidentiary and service requirements. Nevertheless, this is a statutorily-mandated procedure, and the overall purpose of the statute is to improve the financial condition of the industry, including both small and large companies. In framing these rules, we have attempted to minimize the burdens on small entities consistent with Congressional intent. Otherwise, we anticipate no significant economic impact of small entities as a result of these proposed regulations.

Comments may be filed on any matters discussed above, including making the final rules effective on publication or on abbreviated notice, environmental or energy considerations, and regulatory impact issues.

49 CFR Part 1043

[Ex Parte No. MC-5 (Sub-4)]

Passenger Broker Surety Bonds or Insurance

AGENCY: Interstate Commerce Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Bus Regulatory Reform Act of 1982 exempted brokers of passenger transportation by motor vehicle from Commission regulation. The Commission retains, however, discretion to impose requirements for bonds and/or insurance if it determines that security requirements are needed to protect passengers and carriers dealing with brokers. The Commission requests comments on whether a need for passenger and motor carrier protection exists, and whether, if such a need exists, it can be met by an exercise of the discretionary bonding/insurance authority.

Since an exercise of the discretionary authority may affect small entities, their participation in this proceeding is particularly solicited.

DATES: Comments must be received on or before October 29, 1982.

ADDRESS: Comments should be addressed to: Ex Parte No. MC-5 (Sub-4), Office of Compliance and Consumer Assistance, Room 7115, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Ray G. Atherton, Jr. (202) 275-7844; Patricia M. Schulze (202) 275-7841.

SUPPLEMENTARY INFORMATION: Before the enactment of the Bus Regulatory Reform Act of 1982, passenger brokers were required to file a security of the type prescribed by the Commission, and the Commission could only issue a broker license if the prescribed security had been filed. The stated purpose of the security filing under the statute was "to ensure that the transportation for which a broker arranges is provided" (49 U.S.C. 10927(b)). The Commission originally adopted a bonding requirement in the amount of $5,000. The amount was increased to $10,000 in 1979 [1] but the regulation was stayed and did not become effective.[2]

The Bus Act of 1982 exempted passsenger brokers from regulation but conferred on the Commission discretion to impose requirements for bonds or insurance or both as the Commission determines are needed to protect passengers and carriers dealing with such brokers (49 U.S.C. 10924(f)).

The amended statute vests jurisdiction in the Commission to adopt bonding and/or insurance requirements to protect passengers and carriers. While there is no express limitation of authority to the transportation aspect of the broker's activities like the statute prior to its amendment, the legislative history is clear that *less* regulation of brokers is intended.[3] Accordingly, should we decide that bonding and/or insurance requirements are warranted, such requirements will be limited, as in the past, to the transportation aspects of the broker's activities.

The Bus Act reflects an intent to minimize Federal regulation in this area. To determine whether the Commission's authority to impose a security requirement should be exercised, it is necessary to identify the potential harm which passengers and carriers could experience absent such a requirement. Proponents of security requirements should present evidence addressing abuses they believe are likely to occur, and why they see a need for the requirement.

We are obligated to balance the costs and benefits of a security requirement. We must determine whether passengers and carriers can protect themselves adequately without our intervention, and whether a form of security will be continued voluntarily, as a matter of business practice. We are concerned, and seek comment on whether the cost of bonding or insurance would pose an entry barrier to prospective brokers.

Furthermore, a decision to continue a security requirement should be based on a finding that it will, in fact, remedy identified problems. In this regard, we question the level of security that would be necessary. Raising the dollar amount above that now required would appear to be inconsistent with minimizing regulation.

We also seek comments on the relative attributes and cost of bond vis-a-vis insurance, and whether filing at the Commission of proof of security (if found necessary) should be required.

Congress had provided a 60-day delay of the effective date of this change in the law. Should an insurance or bonding requirement not be adopted within this period, the existing rule (49 CFR 1043.4(b)) will be void as a matter of law. Accordingly, if the Commission decides to implement a security requirement, interim rules may be necessary.

Regulatory Flexibility

Since no regulations are proposed at this time, it is premature to conduct an Initial Regulatory Flexibility Analysis as contemplated by the Regulatory Flexibility Act (5 U.S.C. 601). The Commission does, however, seek information to determine whether and to what extent small entities would experience a significant economic impact as a consequence of exercising jurisdiction over passenger brokers.

Lists of Subjects in 49 CFR Part 1043

Insurance, Motor carriers, Surety bonds, Passenger bonds.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

49 CFR Parts 1130 and 1002

[Ex Parte No. MC-161]

Preemption of State Regulation of Regular-Route Exit; Motor Passenger Carriers

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Section 16 of the Bus Regulatory Reform Act of 1982, codified at 49 U.S.C. 10935, provides statutory authority for the Commission to preempt State regulation of exist from regular-route passenger services in certain circumstances. The rules proposed here would establish procedures for the expeditious processing and consideration of petitions filed under section 10935, The new procedures must be effective on (60 days from enactment of the Act). The proposed rules are expected to allow motor passenger carriers to operate more efficiently by allowing discontinuance of unprofitable services.

DATE: Comments are due October 19, 1982.

ADDRESSES: The original and, if possible, 15 copies of comments should be sent to: Ex Parte No. MC-161, Room 2139, Office of Proceedings, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: James L. Brown (202) 275-7898; or Howell I. Sporn (202) 275-7691.

SUPPLEMENTARY INFORMATION: .

The New Legislation

Section 16 of the Bus Regulatory Reform Act of 1982 (the Act) added a new Section 10935 to Chapter 109 of Title 49 of the United States Code. In addition, the National Transportation Policy at (49 U.S.C. 10101(a)(3)) was amended to declare it to be Government policy:

(3) in regulating transportation by motor carriers of passengers (A) to cooperate with the States on transportation matters for the purpose of encouraging the States to exercise intrastate regulatory jurisdiction in accordance with the objectives of this subtitle; (B) to provide Federal procedures which ensure that intrastate regulation is exercised in accordance with this subtitle; and (C) to ensure that Federal reform initiatives enacted by the Bus Regulatory Reform Act of 1982 are not nullified by State regulatory actions.

Enactment of 10935 reflected Congress' determination that State regulation of exit from regular-route motor passenger

services (where both interstate and intrastate services are provided over the same routes) has created, in many instances, a burden on interstate commerce. Report of the Senate Committee on Commerce, Science and Transportation on H.R. 3663, May 20, 1982 (S. Rep. No. 97–411, 97th Cong., 2nd Sess.) (Senate Report) p. 25.

Section 10935 applies to any motor passenger carrier transportation between two points along a carrier's interstate route within a state regardless of the origin or destination of the bus. As long as the two points form some part of a carrier's existing ICC regular route interstate operating authority, intrastate service between those points falls within the Commission's jurisdiction under this Section of the new Act.

Section 10935 sets forth conditions which must be met before the Commission may exercise this preemption power: (1) The carrier must hold both interstate and intrastate authority to provide the service involved; (2) the carrier must be seeking either to discontinue all service over the route involved or to reduce the level of that service to less than one trip per weekday; (3) the carrier must already have requested permission to discontinue or reduce this service from the appropriate State regulatory body; (4) the State body must have either denied all or part of this request or failed to act on the request within 120 days; (5) if the request involves discontinuance of the service, the carrier must also seek revocation of its pertinent interstate authority; and (6) the carrier may not be owned or controlled by a State or local government.[1]

Many of the procedural aspects of processing discontinuance petitions are also spelled out in the law. For example, the law requires notification of certain State and local governmental bodies; the petition must be granted if no objections are filed within 20 days; a response by the carrier is required within 15 days after any objection is filed; and the Commission must complete processing of the petition and enter a final decision within 90 days after the petition is filed. Indeed, this 90-day statutory deadline is a significant constraint on these regulations, and most of the features of the rules we are proposing are designed to ensure that a final decision can be entered within that time limit, yet still allow full notice to interested persons and a fair opportunity to be heard and to present evidence.

As a substantive matter, the bill provides one set of standards for permitting discontinuance in protested cases involving authority granted before August 1, 1982, and another set of standards for cases involving bona fide new authority granted thereafter.

In cases which involve routes for which the interstate authority was granted on or before August 1, 1982, opponents of the discontinuance bear the burden of proving that the discontinuance or reduction is not consistent with the public interest or that continuing the transportation will not constitute an unreasonable burden on interstate commerce. In making a finding in such proceedings, the Commission must accord great weight to the extent to which revenues on the route are less than the variable costs of the service, and the carrier has the burden of proving the amount of the revenues and the variable costs.

On the other hand, where new interstate authority was granted after August 1, 1982, opponents of the discontinuance bear the burden of proving that continuing the transportation will not constitute an unreasonable burden on interstate commerce. This standard, however, is defined by the statute as meaning that the discontinuance or reduction is not consistent with the public interest and the revenues from the service are not less than the variable costs of providing the service. The net effect of these two standards is that the discontinuance of service over bona fide new routes will be easier than over old routes.

The Act requires the Commission to conclude this rulemaking and adopt final rules within 60 days. This necessitates making the rules effective on less than 30 days' notice. Further, we are providing a 20-day comment period, rather than the usual 30 days, in order to allow as much time as practicable, in keeping with the requirements of due process, to consider fully the positions of all interested parties before adopting final rules. We do not contemplate extending the time for filing comments.

Background

The concept of regulation of exit from regular-route motor passenger services is comparatively new to this Commission. The Commission does not now have any procedural rules governing the discontinuance of interstate services, except for the requirement of 49 CFR 1063.6(b) that notice be given of regular-route schedule changes. The Commission never required carriers to obtain permission to discontinue regular-route services, and the certificates held by most regular-route motor passenger carriers include numerous "dormant routes" (that is, authorized routes over which no scheduled services are actually provided). Thus, while the Commission has exercised very little regulatory control over discontinuance, the States generally exercised relatively strict control. Typically, a carrier's regular-route operations serve both interstate and intrastate passengers at the same time. This meant that a passenger carrier seeking to abandon an unprofitable interstate route could still be forced to serve the similarly unprofitable intrastate portion of the route if the State denied the carrier's request for discontinuance of the route. Faced with this situation, a carrier might be forced to maintain service over the interstate route to minimize overall losses even though it would place a burden on the carrier's interstate service as a whole. See H. Rep. 97–334, 97th Cong. 1st Sess. p. 42. The new exit provisions are intended to resolve this problem.

Accordingly, section 10935(e)(3) requires a carrier to apply for and receive authority to discontinue its *interstate* transportation over the invovled routes in order to be granted permission to discontinue *intrastate* transportation. The proposed rules, therefore, require a carrier seeking permission to discontinue intrastate service to include in its petition a corresponding request for revocation of the pertinent portions of its interstate certificates.

As briefly described above, section 10935 directs the Commission to approve carriers' requests to discontinue or substantially reduce such intrastate services, unless objecting parties carry one of two specified burdens of proof. This burden of proof will depend upon whether the interstate authority corresponding to the intrastate service in question was granted before or after August 1, 1982. As noted earlier, Congress has established a situation where the discontinuance of service over new routes is to be easier than over old routes. We propose to calculate the date that authority for a route is granted as the date on which the carrier's interstate certificate of public convenience and necessity was issued.

The statute requires us to consider the "variable costs" of operating the services involved, regardless of the date authority to operate was granted. We do not propose to define "variable costs." Rather, the proposed rules require the parties to present calculations of the

[1] In addition, section 10935(h) prohibits State regulation of the discontinuance of services begun under the "fitness only" standard of 49 U.S.C. 10922(c)(4). These services, accordingly, do not fall under the rules proposed here.

variable costs of operating these services, together with an explanation of how the costs were calculated, including assumptions underlying the calculations. Likewise, we will not define "reasonable pricing practices," but will require carriers to offer a description of the pricing practices applicable on the affected route. This will allow these terms to be more specifically defined on a case-by-case basis, with parties opposing the discontinuance submitting evidence supporting any allegation that the carrier's pricing practices are not reasonable. We believe these proposals to be consistent with the congressional intent to provide for easier discontinuance, less regulation generally, and faster procedures, and with Congress' decision to generally place the burden on parties opposing discontinuance. We recognize that opponents may not possess specific information about a carrier's costs or pricing practices. Therefore, we will grant reasonable discovery requests (pursuant to our rules at 49 CFR 1100.55), so long as such requests are made within 5 days of the filing of the petition, and ask for information relevant only to the affected route. Carriers must respond in a timely fashion. If they fail to do so, we may assume that the cost and pricing allegations of the opponents are correct. We request comments from the parties on these proposals.

Section 10935(g) spells out precisely the other factors we must consider in each case: the national transportation policy, the availability of operating subsidies or financial assistance, and the availability of alternate transportation services. No extended discussion of these factors is necessary at this time. However, in considering the availability of operating subsidies or financial assistance to provide the transportation to be discontinued or reduced, there is an implicit relationship to the authority given to the Commission to order continuation of the service for as long as 165 days after the filing of the petition. The Senate Report indicates (at p. 27) that the purpose of this provision is to allow time in which arrangements for operating subsidies or financial assistance can be worked out or for reasonable alternatives services to be arranged. We propose to order continuation of service only if we are notified that a subsidy or assistance offer has been made, and it appears to be both responsible and reasonably likely to induce the carrier to continue the service voluntarily, or if the evidence shows that this time period is needed to allow another carrier to take over the operation of the involved service. The mere offer of an operating subsidy or financial assistance—no matter how responsible or substantial—does not automatically change the decision on the petition. If the party opposing the discontinuance does not sustain the burden of proof established in the statute, we must grant the petition to discontinue or reduce the service: we can, if the circumstances warrant, delay the effective date of the discontinuance until 165 days after the filing of the petition, but continuation of service beyond that is strictly voluntary for the carrier.

As to the procedural aspects of the proposed rules, the 90 day time limit for deciding these cases necessitates rather strict procedural burdens for all parties. Obviously, it does not allow time for oral hearings or for protracted responsive pleadings. Accordingly, we have included in the rules statements of the primary issues each party should address in pleadings filed in these cases. Our purpose in doing this is two-fold: It will help to ensure that appropriate evidence will be available to allow a reasoned decision on the merits of each case; and it will provide assistance to those parties who may not be familiar with procedures before the Commission in understanding the issues and circumstances surrounding each petition.

In many respects, these rules parallel procedures already employed for removal of restrictions from the operating authorities of motor carriers of property. (See 49 CFR Part 1137, as promulgated in Ex Parte No. MC–142 (Sub-1), *Removal of Restrictions, Motor Car. of Property*, 132 M.C.C. 374 (1980)). In *Removal of Restrictions, Motor Car. of Property*, 132 M.C.C. 114, at 116–117 (1980), we had concluded that the applicable statutory provisions (49 U.S.C. 10922(h)(2)) did not require that an opportunity be provided for oral hearings, or for a conventional adversary licensing proceeding. A similar conclusion is mandated in this situation. These rules provide appropriate, simplified, and expedited procedures, under which interested parties and carriers have a reasonable opportunity to present their positions, and through which the Commission can reach reasoned decisions within the mandated time limit.

The Proposed Rules

The proposed rules allow us to process petitions within the statutory deadline. We have considered proposing a procedure whereby the Commission's consideration of these petitions would be essentially an appellate process, based on the record made before the State body. We note, however, that the statute does not contemplate this procedure and, indeed, speaks instead of "evidence" to be presented by parties objecting to the petition before this Commission. Further, we are concerned that difficulties would arise if the record in the State proceeding were not complete by the 120-day deadline for State action, either through deficiencies in State procedures, or through the recalcitrance of a carrier which might prefer to await the invocation of the preemptive Federal jurisdiction. Our rules permit the States to have a full and fair opportunity to participate in these cases, through their own proceedings before petitions are filed with us, and through the opportunity to challenge and to respond to any additional evidence petitioning carriers may submit to us.

The statute clearly intends that States be permitted a meaningful opportunity to consider these issues in the first instance. Although the procedures we propose provide for presentation of evidence before this Commission by interested parties, we view this as a means to ensure the completeness of the record and full notice to opposing parties of the issues involved.

We see no need to publish notices of these petitions in the **Federal Register**. Each petition will cover operations in only one State, and thus will not be of nationwide impact. Also, the statute specifically provides for notice to pertinent State and local officials and governmental bodies, and this appears to be the most appropriate means of assuring effective notice to potentially interested persons. We propose that the only additional persons who should be notified by the petitioning carrier, are those who were parties of record in the State proceeding. In those few past instances where the Commission has considered requests for revocation of regular-route passenger authority, it has been our practice (on a case-by-case basis) to require the posting of notices in affected stations and on buses serving affected routes, as well as publication of notices in local newspapers. We are not of the opinion now that these requirements would be helpful. Since local governments will receive notice directly, State procedures are liable to have caused interested parties to have received actual notice already, and the statutory time limits make the more cumbersome process of posting and publication inappropriate. We request comments on this issue.

We propose that the form of the notice be a complete copy of the petition itself. The short time available for an objection to be filed does not realistically permit

an interested party to obtain a copy of the petition from the carrier *after* a summary notice is provided. We seek comments on whether a deadline should be imposed on the filing of petitions after the State body issues its final decision.

Petitions and objections must be in the form of verified statements setting forth all of the evidence the party intends to present in the case. There is not time for successive responsive pleadings and additional evidence to be considered fairly by the Commission. Our proposed rules include a statement of the primary issues each party should address in its pleading. This helps the potential parties to participate meaningfully and to know what they are expected to show in order to meet the statutory burden of proof.

The statute requires the carrier to provide each person who files an objection to the petition a copy of the subsidy estimates and financial data which are described in section 10935(e)(4). We anticipate a significant number of the people who may object to these petitions to be individual passengers to whom this information would have little applicability. In some cases, certainly, it is possible that a large number of individuals may submit substantially identical comments through an organized campaign. Clearly, thos could cause a significant burden on the carrier in reproducing and mailing a large number of copies of such information. We invite comments and suggestions as to whether we should create an alternative category of "informal comments" whereby interested persons could submit their views without becoming formal parties to the proceeding. Persons submitting informal comments could thus be relieved of the procedural burdens applicable to formal objections, while still having a forum in which to present their views; and the carriers could be spared the expense of providing extensive material which these persons might not be interested in receiving.

Energy and Environment

It does not appear that the adoption of the proposed rules will have any significant impact on the quality of the human environment. However, we anticipate the rules will enable carriers to improve operating efficiency and reduce mileage for regular-route motor passenger carriers, thus contributing to the conservation of energy resources. We invite comment with respect to these issues.

Regulatory Flexibility Analysis

The proposed rules are intended to provide individuals, small businesses, and local governments the greatest possible help in developing evidence to meet the burden of proof established in the statute. The statute clearly affects both small carriers and the small communities they serve, and it is our intention in proposing these rules to make it possible for them to participate meaningfully in these cases without legal representation, if they so desire. To this end, the proposed rules provide step-by-step instructions for presenting evidence relevant to the proceeding. Further, we believe the rules will have a beneficial impact on many carriers who are now operating routes that are not economically justified. Therefore, we do not expect that the proposed rules will have a significant adverse economic impact upon a substantial number of small entities. We welcome comments on this issue.

List of Subjects

49 CFR Part 1130

Administrative practice and procedure, Buses, Intergovernmental relations.

49 CFR Part 1002

Freedom of information.

We propose:

1. To amend title 49 of the Code of Federal Regulations by the addition of a new Part 1130 as described in the Appendix to this notice.

2. To amend 49 CFR 1002.2(d) to include a provision setting the filing fee for applications filed under the procedures proposed in the appendix at $350.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

(49 U.S.C. 10321 and 10935 and 5 U.S.C. 553)

Decided: September 10, 1982.

Agatha L. Mergenovich,

Secretary.

Appendix

Title 49 of the CFR would be amended by adding a new Part 1130 to read as follows:

PART 1130—RULES GOVERNING DISCONTINUING BUS TRANSPORTATION IN ONE STATE

Subpart A—How To Petition for Permission To Discontinue or Reduce Bus Service in One State

Sec.

1130.1 Requests governed by these rules.
1130.2 General procedure.
1130.3 Starting the petition process.
1130.4 Information to be submitted by petitioning carriers.
1130.5 The petitioning carriers verified statement.
1130.6 Where to send the petition.
1130.7 Rebuttal.
1130.8 Commission review of the petition.
1130.9 Continuation of service.
1130.10 Withdrawal of petition.
1130.11 Administrative finality and appeals.

Subpart B—How To Object To Discontinuation or Reduction of Bus Service in One State

1130.20 Filing an objection.
1130.21 Contents of the objection.
1130.22 Evidence.
1130.23 Where to send the objection.
1130.24 Obtaining a copy of the petition.
1130.25 Offers of subsidies.
1130.26 Withdrawal of objections.

Subpart C—General Rules Governing the Petition Process

1130.30 Contacting another party.
1130.31 Serving copies of pleadings; the certificate of service.
1130.32 Copies.
1130.33 Requests for extensions of time.
1130.34 Verification of statements.

Authority: 49 U.S.C. 10321 and 10935; 5 U.S.C. 553.

Subpart A—How To Petition for Permission To Discontinue or Reduce Bus Service in One State

§ 1130.1 Requests governed by these rules.

(a) These rules govern petitions by motor common carriers for permission to discontinue providing regular-route passenger transportation over any route to any points in a State, or to reduce the level of service over such route to less than one trip per day (excluding Saturdays and Sundays).

(b) To use these rules, the carrier must:

(1) Hold both interstate authority and intrastate authority over the routes involved;

(2) Have requested permission from the appropriate State regulatory body for the proposed discontinuance or reduction in service (and the State body has either failed to take final action on the request within 120 days or has denied all or part of the request); and

(3) Not be owned or controlled by a State or local government.

(c) Each petition may cover services in only one State. If a carrier intends to discontinue or reduce service on a route which crosses one or more State lines, and permission under these rules is needed for two more of these States, then a separate petition must be filed for each State.

§ 1130.2 General procedures.

The Commission must take final action on these petitions within 90 days after they are filed. Accordingly, it is not possible to conduct oral hearings on these petitions. These petitions will be considered on the basis of the written record, consisting of the carrier's petition (and the materials filed with the petition), the objections of interested persons, and the carrier's rebuttal.

§ 1130.3 Starting the petition process.

There is no application form for these petitions. A carrier wishing to use these rules must comply with the notice requirements described in §1130.6 and submit the information described in §§ 1130.4 and 1130.5. The filing fee is $350.

§ 1130.4 Information to be submitted by petitioning carriers.

The petitioning carrier must file the following information:

(a) Beginning on the first page of the petition, the following information must appear:

(1) Identification Caption—(This information must be shown prominently and concisely, because it is the only means of identifying the petition and other pleadings which relate to it):

(i) The carrier's lead ICC docket number;

(ii) The carrier's name;

(iii) The carrier's mailing address;

(iv) The words "Exit Petition:", followed by the name of the State affected by the petition; and

(v) The endpoints of the route or routes over which the carrier proposes to discontinue or reduce service.

Examples:

No. MC–149076, U.S. Bus, Inc., P.O. Box O, Laurel, MD 20810. Exit Petition: Maryland Between Hyattsville and Baltimore, MD.

No. MC–132985, John Doe, d.b.a. Doe Bus Lines, 1776 Main St., Pittsburgh, PA 15222. Exit Petition: Ohio Between Conneaut and Cleveland, OH.

(2) Name, address, and telephone number of the carrier's representative.

(3) Identity and qualifications of the carrier's witness, who signs the verified statement.

(b) Request for permission to discontinue or reduce service, including a concise summary of what the carrier is asking permission to do, *and* if the carrier proposes to discontinue service, a written request for the revocation of the pertinent portions of the carrier's interstate Certificate(s) of Public Convenience and Necessity;

(c) Certification that the petitioning carrier is not owned or controlled by a State or local government;

(d) Verified statement giving the information described in § 1130.5;

(e) A copy of the pertinent portions (including the date of issuance) of the carrier's interstate Certificate(s) of Public Convenience and Necessity, which authorize the regular-route passenger services which the carrier proposes to discontinue or reduce;

(f) A copy of the pertinent portions of the authority issued by the appropriate State body, which authorize the same services;

(g) A copy of the decision or decisions (if any) by the appropriate State body denying the proposed discontinuance or reduction in service; and

(h) Certification that copies of the petition and all the accompanying materials described in this paragraph have been served on (1) the Governor of the State in which the transportation is provided, (2) the State body having jurisdiction over granting discontinuances of transportation and reductions in levels of service by motor common carriers of passengers, (3) local governments (both counties and municipalities) having jurisdiction over areas which would be affected if such petition is granted, and (4) each party of record to any State proceedings involving the proposed discontinuance or reduction in service.

§ 1130.5 The petitioning carrier's verified statement.

The carrier's verified statement must contain all of the evidence it intends to submit concerning at least the following issues:

(a) Description of the carrier's pertinent present operations and the way the proposed discontinuance or reduction in service will change these operations;

(b) Identification of the date on which the request was made to the appropriate State body for permission to discontinue or reduce the involved service and the dates of any actions the State body may have taken on that request, and any description of the proceedings conducted by the State body which the carrier believes to be relevant to the petition;

(c) Calculation of the interstate and intrastate passenger and package express revenues (specifying the time period involved) which accrue directly from the services which would be discontinued or reduced (but *not* including revenues which the carrier expects to retain in connection with other services which it will still operate), with an explanation of how the revenues were calculated and of any assumptions underlying the calculations;

(d) Description of the rates and pricing practices applicable to the affected service;

(e) Calculation of the variable cost of operating the affected service, with an explanation of how the costs were calculated, and of any assumptions underlying the calculation;

(f) Description of any present operating subsidies or financial assistance applicable to the affected service, and of any proposals or discussions with respect to operating subsidies or financial assistance which have occurred during the year preceding the filing of the petition;

(g) Description of any other public transportation facilities known by the carrier to be available for passenger service at the points on the route affected by the proposed discontinuance or reduction in service; and

(h) Any additional evidence or legal argument the carrier believes to be relevant to the petition.

§ 1130.6 Where to send the petition.

(a) Copies of the petition and all of the accompanying materials described in § 1130.4, must be sent or delivered to (1) the Governor of the State in which the transportation is provided, (2) the State body having jurisdiction over granting discontinuances of transportation and reductions in levels of service by motor common carriers of passengers, (3) local governments (both counties and municipalities) having jurisdiction over areas which would be affected if the petition is granted, (4) each party of record to any State proceedings involving the proposed discontinuance or reduction in service, and (5) the Principal Attorney, Section of Operating Rights, Room 2343, Interstate Commerce Commission, Washington, DC 20423. This delivery must be undertaken concurrently with that to the Commission.

(b) The original and one copy of the petition and accompanying materials shall be sent to the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

§ 1130.7 Rebuttal.

(a) Within 20 days after the petition is filed with the Commission, interested persons may file objections to the petition, and must send a copy of these objections to the carrier. Within 15 days after the filing of any objection, the carrier must furnish to the Commission and to each person who has filed an objection,

(A) an estimate of the annual subsidy required, if any, to continue the involved service, and (B) traffic, revenue, and other data necessary to determine the amount of annual financial assistance, if any, which would be required to continue the service.

(b) At the same time, the carrier may file a rebuttal to the objections. Copies of any rebuttal must be sent or delivered to each person who has filed an objection at the same time as the information described in paragraph (a) of this section.

§ 1130.8 Commission review of the petition.

(a) If a petition is incomplete, or if the carrier has not substantially complied with these rules, the Commission may reject or dismiss the petition at any time before the statutory deadline for final action.

(b) If no objections are received by the Commission within 20 days after the petition is filed, and if it is determined that the petition is complete and properly filed in accordance wth these rules, the Commission will grant the permission sought and revoke the pertinent portions (if any) of the carrier's interstate Certificate of Public Convenience and Necessity. The decision taking this action will be entered at the end of the 20-day period but will not be served until clerical processing is completed. The effective date of the revocation will be 30 days after the decision is served.

(c) If timely formal objections are filed, the Commission will consider the evidence on the basis of the written record, consisting of the petition (including the accompanying materials), the objections, and the rebuttal.

§ 1130.9 Continuation of service.

The Commission may order the carrier to continue the operation of the affected service for 165 days after the petition is filed, even if the permission to discontinue or reduce the service is otherwise granted, but before it has become effective, if an offer of subsidy or financial assistance has been made, which appears to be both responsible and reasonably likely to induce the carrier to continue the service voluntarily, or if the evidence shows that this time period is needed to allow another carrier to take over the operation of the service.

§ 1130.10 Withdrawal of petition.

If the carrier wishes to withdraw its petition, it may do so by requesting in writing that the petition be dismissed. The request shall be directed to the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423, and shall include the identification caption described in paragraph (a) of § 1130.5.

§ 1130.11 Administrative finality and appeals.

(a) A decision disposing of a petition is a final action of the Commission. Appeal is discretionary and will be granted only upon a showing of extraordinary circumstances. The appellate procedure to be followed is that set forth at 49 CFR 1100.98. Any party seeking review should specify the "extraordinary circumstances" warranting review which are involved in the proceeding.

(b) In the event of a procedural defect (such as the loss of a properly filed objection or the failure of the carrier to serve its petition on all the required persons), the Commission will entertain a petition to vacate a decision which grants the permission sought on the grounds that no objection has been filed.

Subpart B—How To Object to Discontinuation or Reduction of Bus Service in One State

§ 1130.20 Filing an objection.

(a) An objection must be filed (received by the Commission) within 20 days after the carrier files its petition. A copy of the objection must also be sent or delivered to the petitioning carrier.

(b) If an objection is not filed within this time limit, the right to participate in the proceeding is waived.

§ 1130.21 Contents of the objection.

(a) Beginning on the first page of the objection, the following information must appear:

(1) In order to identify properly the petition toward which the objection is directed, copy the identification caption set forth at the beginning of the carrier's petition (as described in paragraph (a) of § 1130.4).

(2) Name and address of the person filing the objection, and the name and address of the legal representative (if any) of the party in this proceeding.

(3) Name and address of the witness signing the objection (if different from paragraph (a)(2) of this section) and an explanation of why the witness is qualified to speak on behalf of the objecting party.

(b) An objection must be verified.

(c) An objection may be rejected if it is not in substantial compliance with these rules.

§ 1130.22 Evidence.

The objection should contain all of the evidence upon which the objecting party intends to rely, including at least the following issues:

(a) Description of any relevant operating subsidies or financial assistance known to have been offered to the petitioning carrier to support the service involved, including the amount of the subsidy or assistance that is available and the financial qualifications of the person making the offer of subsidy or assistance;

(b) Description of the adverse impact the proposed discontinuance or reduction in service would have on the public interest, including passengers traveling to or from the affected points or over the affected routes, or on the communities served, or on others;

(c) Analysis of the interstate and intrastate revenues derived from the service, the pricing practices applied to the service, and the variable costs of operating the service; and

(d) Any additional evidence or legal argument relevant to the petition.

§ 1130.23 Where to send the objection.

(a) An original and one copy of the objection must be sent to the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423. An additional copy of the objection must be sent to the Principal Attorney, Section of Operating Rights, Room 2343, Interstate Commerce Commission, Washington, D.C. 20423.

(b) At the same time that the objection is filed with the Commission, a copy must be sent or delivered to the petitioning carrier (and to its representative, if one is listed), in the same (or a more expeditious) manner that the objection is sent or delivered to the Commission.

§ 1130.24 Obtaining a copy of the petition.

A copy of the petition will be available for inspection at the Commission's offices in Washington, D.C. In addition, the carrier is required to serve a copy of the petition on the affected State and local governments, and copies of the petition may be available from them.

§ 1130.25 Offers of subsidies.

Any financially responsible person who intends to offer an operating subsidy or financial assistance to the carrier to enable it to continue providing the service which is proposed to be discontinued or reduced, must notify the Commission and the carrier within 50 days after the petition is filed. This notification must indicate the amount of the subsidy or assistance being offered and demonstrate the financial responsibility of the person making the

offer. An offer of operating subsidy or financial assistance does not require the Commission to deny the discontinuance or reduction of service, but it will form the basis for the Commission's decision whether or not to order continuation of the service until 165 days after the filing of the petition.

§ 1130.28 Withdrawal of objections.

If a party wishes to withdraw its objection, it shall inform the Commission and the carrier in writing.

Subpart C—General Rules Governing the Petition Process

§ 1130.30 Contacting another party.

When a person wishes to contact another party or serve a pleading on that party, it shall do so through the party's representative (if any).

§ 1130.31 Serving copies of pleadings; the certificate of service.

(a) Because of the short statutory time limits applicable to these petitions, service of pleadings on other parties must be done as expeditiously as possible. Therefore, where these rules require service of a pleading on another party, every effort must be made to ensure that the other party receives that pleading no later than the day it is due to be filed with the Commission.

(b) Each pleading shall contain a statement (certificate of service) that the pleading has been mailed or delivered to the other party in accordance with the requirements of paragraph (a) of this section.

(c) All pleadings mailed to the Commission in Washington, D.C., should be addressed to the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

§ 1130.32 Copies.

All pleadings filed with the Commission shall include an originial and one copy. An additional copy of each pleading shall be sent to the Principal Attorney, Section of Operating Rights, Room 2343, Interstate Commerce Commission, Washington, D.C. 20423.

§ 1130.33 Request for extensions of time.

The time limits applicable to these case are established by statute. Therefore, granting requests for extension of time is not contemplated.

§ 1130.34 Verification of statements.

All statements must be verified by the person signing the statement, as follows:

I, ————————, verify under penalty of perjury under the laws of the United States of America, that the information in this statement is true and correct. Further, I certify that I am qualified and authorized to file this statement. (See 18 U.S.C. 1001 and 18 U.S.C. 1621 for penalties.)

(Signature and Date)

PART 1002—FEES

[Ex Parte No. MC-82 (Sub-1)]

Provisions for Foreseeable Future Costs

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Section 9 of the Bus Regulatory Reform Act of 1982 authorized procedures allowing for the recovery of estimated or foreseeable future costs. The Commission is proposing it permit the intercity bus industry to recover foreseeable future costs in their general increase filings. Under the proposed procedures foreseeable and estimated future costs will be allowed to be recovered in six (6) month intervals. In addition, comments are requested on procedures to include future costs in individual carrier rate filings.

DATES: Comments on the proposal are due October 19, 1982. Due to time constraints, the final rules adopted in this proceeding may be made effective on less than thirty days notice.

ADDRESS: An original and 15 copies of comments should be submitted to: Bureau of Accounts, Section of Cost Development, Room 3311, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

William T. Bono (202) 275–7354, Bureau of Accounts; or

Paul R. Meder (202) 275–7457, Bureau of Accounts.

SUPPLEMENTARY INFORMATION:

Foreseeable Future Costs

Prior to the passage of the Bus Regulatory Reform Act of 1982 (Act), the Commission's rules governing general rate increases permitted motor carriers of passengers (bus industry) to recoup only provable increased costs that were incurred previously and/or anticipated on the date of a particular filing. See 49 CFR 1104.20–1104.26, and Schedules A through G detailing information to be submitted in general revenue proceedings. The Act allows the bus industry to "* * * cover the costs of inflation by taking into consideration estimated or foreseeable future costs."[1] However, the Act does not designate the time periods for projecting estimated or foreseeable future costs.

In compliance with the provisions of the Act, we propose to permit the bus industry to recover additional and reasonable estimated or foreseeable future cost increases that will be experienced during a six (6) month period following the effective date of any general increase filing. For example, general fare and rate increase proposals set to become effective on July 1 can include, along with previously incurred cost increases, reasonable estimated or foreseeable future cost increases for the period July 1 through December 31. This provision will have the advantage of reducing regulatory lag and is consistent with the future time period adopted for the motor carriers of property resulting from the 1980 Motor Carrier Act. See Future Costs and Requirements for Additional Data, 365 ICC 410 (1981), as modified by decision served March 11, 1982.

Additionally, if the proponent of a general increase includes in its request future cost increases covering the future time period, and then files another general increase during the six month projection period, proponent will be required to establish that the second increase sought has not been previously recovered in the first general increase filing.

Methodology

Future costs will be divided into two categories, namely: (1) Wage and wage related increases and (2) non-labor expense increases. Wage and wage related cost increases are generally scheduled with some occurring simultaneously with the effective date of a general increase filing and others occurring at various times subsequent to the effective date. Non-labor cost changes are incurred on an irregular and unscheduled basis. Therefore, future cost estimates will be separated between these two categories. Moreover, fuel and fuel tax expense

[1] S. Rept. 97–411, 97th Cong., 2d sess., 21 (1982).

increases will be treated in the non-labor unscheduled expense category.

A. Scheduled Wage and Wage Related Increases

To be consistent with the proposed six (6) month future cost time period, the full impact of those wage and wage related expenses which coincide or start simultaneously with the effective date of the general increase will be allowed in the projected pro-forma future expense level. The impact from wage contracts which become effective subsequent to the effecteve date of the proposed general increase and within the six (6) month period will be treated on an "as incurred" basis. Since these wage and wage related costs may increase be varying amounts on varying dates it will be necessary for the bus industry to determine the impact wage increases will have on total expenses. The bus industry will be permitted to rely on any reasonable forecasting methodology.

Table 1 below provides a simple illustration of how the computation of the total impact of the wage increases can be applied. This illustration assumes that there will be six separate contracts or increases. Each contactual wage increase amounts to 10 percent. Each contract covers employee groups which bear a differing expense relationship to total expenses and occur on different dates between July 1 and December 31. The impact of the wage and wage related expense increase may be calculated as follows:

TABLE 1

[In percent]

Effective date of Wage Inc.	Rate of increase	×	Portion of total expenses	=	Impact to total expense	×	Portion of 6 month period in affect	=	Impact on total expense
July 1	10		15		1.5		100		1.50
Aug. 1	10		10		1.0		⅚ or 83.3		.83
Sept. 1	10		5		.5		⅔ or 66.7		.33
Oct. 1	10		10		1.0		½ or 50.0		.50
Nov. 1	10		15		1.5		⅓ or 33.3		.50
Dec. 1	10		10		1.0		⅙ or 16.6		.17
									3.83

Total (6 individual wage increases applicable to 65 percent of total expenses = 3.83% future expense increase labor).

The application of the wage and wage related increases need not be developed in the manner indicated above but the resulting impact from the methodology used cannot exceed the impact developed on the basis of the methodology used in the example.

B. Unscheduled Non-labor Expense Increases

Unscheduled Non-labor cost increases will be allowed on the basis of one-half of the estimated increase in expenses at the end of the 6 month future period. For example, if the estimated future unscheduled cost increase for the period is 10 percent, a cost increase of 5 percent will be allowed over the 6 month period. Materialization of the remaining increase can be recovered in the next general increase filing. This approach will permit a reasonable recovery of short-run non-scheduled expense increases and assumes a single cost increase over the entire six month future period equivalent to the steadily rising costs in unscheduled non-labor expense increases. This approach will also minimize the impact resulting from over projections by allowing advance passthroughs of anticipated unscheduled costs.

C. Expense Forecasting

The Commission will accept estimates based on any reasonable methodology used to provide future labor and non-labor expense increases. However, the burden of proof as to the reasonableness of the methodology or methodologies rests with the proponent and must be adequately supported.

D. Additional Reporting Requirements

Chapter X of Title 49 Part 1104 Subpart B (Revenue Need) Schedule C Parts I, II and III will be expanded to include, for all carriers, revenue/expense comparisons for all future cost estimates. The impact of these changes shall be shown separately for system and issue traffic and shall be in addition to the presently required revenue/expense comparisons. Data reflecting future cost estimates shall be identified as such.

Section 10701(e) allows for the inclusion of future costs in individual rate filings as well as industry-wide general rate increases. Since the standards for consideration of the reasonableness of individual carrier rates now includes consideration of future costs, we request comments on how the Commission can most efficiently implement and encourage the use of this provision.

List of Subjects in 49 CFR Part 1104

Buses, Freight, Motor carriers.

Adoption of these provisions will not significantly affect the quality of the human environment or energy consumption. Pursuant to 5 U.S.C. 605(b), we certify that these procedures will not have a significant economic impact on a substantial number of small entities. However, comments applicable to these mater are also invited.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

(Sec. 9, Bus Regulatory Reform Act of 1982)

Dated: September 10, 1982.

Agatha L. Mergenovich,

Secretary.

[Ex Parte No. 55 (Sub-56)]

Applications for Operating Authority; Motor Passenger Carriers

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rules.

SUMMARY: Sections 6 and 13 of the Bus Regulatory Reform Act of 1982 ("the Act") which amend, respectively, 49 U.S.C. 10922 and 10923, allow applicants to obtain motor common or contract passenger operating authority from the Commission upon satisfying a "fit, willing, and able" test. The legislation also introduces a new "public interest" entry test. Section 6 further amends the Act to allow preemption of State regulations which prevent a motor common carrier of passengers from performing operations entirely in one State over regular routes authorized in interstate transportation. This rulemaking proceeding (1) discusses the entry provisions of the Act, and (2) proposes rules for applying for new passenger authority and for opposing applications. The new procedures must be effective 60 days from enactment of the Act.

DATE: Comments are due October 19, 1982.

ADDRESS: An original and 15 copies, if possible, should be sent to: Ex Parte No. 55 (Sub-56), Room 2139, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20433.

FOR FURTHER INFORMATION CONTACT:
Marc Lerner (Interstate entry), 202–275–7150;
Barbara Reideler (Intrastate entry), 202–275–7992; or
Howell I. Sporn, 202–275–7691.

SUPPLEMENTARY INFORMATION:

Background

Congress enacted the Bus Regulatory Reform act of 1982 ("the Act") to reduce government regulation of the bus industry, promote competition, and, at the same time, make available more responsive service to the traveling and shipping public.

Congress stated that the purpose of the liberalized entry provisions of the bill is "* * * to significantly reduce entry barriers for all forms of intercity bus service and to permit existing bus companies to expand their services and to provide more efficient interstate and intrastate services." Report of the Senate Committee on Commerce, Science, and Transportation on H.R. 3663, S. Rep. No. 411, 97th Cong., 2nd Sess., at 15 (1982) (Senate Report). Congress concluded that the new legislation will lead to increased carrier flexibility, experimentation with new services, opportunities for expansion, reduced paperwork and costs, improved equipment use and operational and energy efficiency, a greater variety of service and price options, and better service to the traveling and shipping public. *Id.* at 10–20. Congress determined that to achieve the broad reforms mandated by the Act, regulatory restraints at both the Federal and State levels must be removed to afford bus companies the opportunity to compete vigorously.

Comments are requested on the proposed rules and the issues discussed in this notice. As the Act requires that final rules be in place within 60 days, these rules must be effective on less than 30 days notice. Because of this, we are able to provide only a 20-day comment period, rather than the usual 30 days, to allow as much time as practicable to consider all the comments before adopting final rules. We do not contemplate extending the time for filing comments.

Interstate Authority

Statutory Highlights

Section 6 of the Act adds a new subsection (c) to section 10922 of Title 49, United Stated States Code, to govern applications for authority to operate as motor common carriers of passengers. Applications for interstate authority are governed by subsection (c)(1), which reads as follows:

(A) A certificate shall be issued by the Commission to a person authorizing that person to provide regular-route transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers and a certificate shall be issued to a recipient of governmental financial assistance for the purchase or operation of buses, or to an operator for such a recipient, authorizing that person to provide transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers, if the Commission finds that the person is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission unless the Commission finds, on the basis of evidence presented by any person objecting to the issuance of the certificate, that the transportation to be authorized is not consistent with the public interest.

(B) For all applications for authority except those under clause (A) of this paragraph, the Commission shall issue a certificate to a person authorizing that person to provide transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers if the Commission finds that the person is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission.

Three types of service are exceptions to requests under (c)(1)(A) and are statutorily determined to be in the public interest. Section 10922(c)(4) eliminates the requirement that the Commission make public interest findings for the following "fitness only" proposals:

(A) Interstate transportation service to any community not regularly served by a motor common carrier of passengers * * *

(B) Interstate transportation service which will be a substitute for discontinued rail or commercial-air passenger service to a community if such discontinuance results in such community not having any rail and commercial-air passenger service and if such application is filed within 180 days after such discontinuance becomes effective; and

(C) Interstate transportation service to any community with respect to which the only motor common carrier of passengers providing interstate transportation service to such community applies for authority to discontinue providing such interstate service under section 10925(b) of this subchapter or applies for permission to reduce its level of intrastate service to such community under section 10935 of this subchapter.

Section 13 of the Act amends 49 U.S.C. 10923(b)(2) to make "fit, willing, and able" the sole entry test for passenger contracts carriers as well.

Section 14 of the Act amends 49 U.S.C. 10924 to exempt passenger brokers from licensing regulation. New subsection (f) gives the Commission permissive authority to impose requirements for bonds or insurance or both to the extent it determines such requirements are needed to protect passengers and carriers dealing with brokers. The Commission is considering this issue in Ex Parte No. MC–5 (Sub-4), *Passenger Broker Surety Bond.* All interested persons are encouraged to participate in that proceeding.

Applicant's burden of proof

An applicant's evidentiary burden is significantly reduced by the Act and grants of authority are presumed to be consistent with the public interest. Every applicant for motor common or contract authority has the burden of demonstrating only that it is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with pertinent statutory requirements and Commission regulations. "Fit, willing, and able" is specifically defined in sections 10922(c)(6) and 10923(b)(2) as safety fitness and proof of insurance pursuant to the minimum financial responsibility requirements of section 18 of the Act. Pursuant to that section, the Secretary of Transportation is directed to establish minimal levels of public liability and property damage insurance; regulations will be forthcoming. In defining the phrase "fit, willing, and able," the Senate Report stresses that safety and insurance are "* * * the only factors appropriate for the government to evaluate in making fitness determinations" and that it "* * * does not intend for the ICC to place additional barriers to entry by a restrictive interpretation of fitness requirements and applicant's abilities to meet them, or to attempt to substitute regulatory processes and bureaucratic judgement for normal business judgments * * *" *Id.* at 18.

Protestant's burden of proof

Under the new legislation, a protestant's evidentiary burden differs according to, and is defined by, the type of passenger service proposed by the applicant. Where an applicant seeks regular-route authority or is subsidized by the government (or is an operator for a recipient of government financial assistance), section 10922(c)(1)(A) requires opposing carriers, once an applicant has satisfied its burden, to provide sufficient evidence to negate the presumption that the proposal is consistent with the public interest (public interest applications).

The "public interest" test represents a quantum step in eliminating obstacles to applicant motor passenger carriers obtaining desired operating authority. Indeed, even the House Report, *supra* at 29, which envisioned slightly more regulation than either the Senate Report, *supra*, or the Conference Report (See Cong. Rec. H6691–692 (August 19, 1982)), recognized that the new entry standard is more relaxed than the standard of entry for carriers of property under the Motor Carrier Act of 1980. The House Report states:

> It should also be noted that under this bill entry will be easier than it is for motor common carriers of property under the Motor Carrier Act of 1980. Unlike applicants for authority to transport property, those who seek to transport passengers will not be required to come forward with any evidence of public need or demand for the proposed service by prospective users. The Committee is convinced that grants of operating authority should not be governed by how adept applicants and their attorneys are in collecting signatures from the public. Thus, the new entry standard, in effect, assumes that a proposed new bus service will be used by the traveling public. Applicants would not be prohibited, however, from submitting evidence of persons who would use the service proposed but this would no longer be required.

Section 10922(c)(3) directs the Commission to consider certain factors, to the extent applicable, in reaching its "public interest" determination. They are:

> (A) The transportation policy of section 10101(a) of this title;
>
> (B) The value of competition to the traveling and shipping public;
>
> (C) The effect of issuance of the certificate on motor carrier of passenger service to small communities; and
>
> (D) Whether issuance of the certificate would impair the ability of any other motor common carrier of passengers to provide a substantial portion of the regular-route passenger service which such carrier provides over its entire regular-route system. Diversion of revenue or traffic from a motor common carrier of passengers in and of itself shall not be sufficient to support a finding that issuance of the certificate would impair the ability of the carrier to provide a substantial portion of the regular-route passenger service which the carrier provides over its entire regular route scheduled system.

Regarding the fourth factor, (D), the Senate Report, observes that to meet this impairment test a protestant would be required to establish that granting the application would jeopardize its ability to continue operating over a substantial portion of its "entire regular route system" (defined to include the routes of the company's subsidiaries and affiliates). *Id.* at 17.

In addition to these four statutory factors, the Commission is directed by Congress to consider whether there has been a reduction in service along the route proposed to be served by the applicant, and to accord substantial weight to evidence of a significant reduction in service. *Id.* Congress also emphasizes that the paramount consideration in reaching a public interest determination is the benefit to be derived by the public and not the protection of existing carriers. *Id.* at 16.

Persons opposing "fitness-only" applications filed under sections 10922(c)(1)(B) and 10922(c)(4) can do so only on grounds that the applicant is not fit or does not fall within the fitness only category. Applications for contract carrier passenger authority under section 10923(b)(2) also may be opposed only on these limited grounds.

Application Procedures

Introduction

All applications for interstate authority fall under the statutorily mandated time limits of 49 U.S.C. 10322. The new legislative provisions do not require major revision of the Commission regulations at 49 CFR 1100.251 and 1100.252 under which all applications for property and passenger motor carrier authority are currently filed and processed. However, for a number of reasons, we propose to adopt new and separate rules to implement the provisions of the Act rather than make use of the current rules.

Separate rules for motor passenger and motor property applicants will emphasize that the rules are products of two separate acts. A separate set of rules for motor passenger applications will facilitate the administrative burden of handling these matters. The proposed new regulations are set forth in Appendix B and are designated 49 CFR 1100.253 and 1100.254.

Almost all motor passenger applications will continue to be handled under the modified procedure, although oral hearing provisions are included. An applicant is to continue to submit its entire application package upon filing. Appellate procedures will continue to be governed by the provisions at 49 CFR 1100.98.

How To Apply for Operating Authority

Application Form OP–1. All passenger applicants will continue to submit a completed OP–1 application form. That form will be altered slightly, however, as a consequence of the new legislation. To reflect the new types of applications for interstate operating authority created by the Act, new headings "(b). Passenger Fitness-Only Applications" and "(c). Passenger Public Interest Applications" will be added to the form under current Part III. The current fitness-only section will be redesignated "(a). Property Fitness-Only Applications". As with the current fitness-only applications, applicants will be required to check the box(es) corresponding to their particular proposal. The revised form is set forth in Appendix D.

Service proposal and caption summary. All applicants will continue to submit a caption summary describing the authority sought. The Commission authorizes motor common carrier transportation of passengers only over a regular route and between specified places, except to the extent the carrier is authorized to provide special or charter transportation. The Act adds new subsections 10922(j)(2) (A) and (C) to allow an interstate carrier to transport special or charter passengers and regular-route passengers in the same vehicle if (1) it holds separate authority to provide each type of service, and (2) the mixing will not interfere with the common carrier obligation. New section 10922(j)(3) permits a carrier with charter rights to transport more than one charter group in the same vehicle at the same time, subject to Commission regulation.

Section 10922(e)(4) requires that certificates to transport passengers be deemed to include permissive authority to handle newspapers, baggage, express packages, or mail in the same motor vehicle with passengers, or baggage of passengers in a separate vehicle. Accordingly, common carrier applicants will no longer have to request specific commodity authority. A request for authority to transport "passengers" will meet all of applicant's authority needs. Contract carrier applications are not affected by these provisions and requests will remain in their current form.

Specific provisions of the legislation address the problem of burdensome operating restrictions on existing certificates. Section 10922(i)(3) states that a certificate to transport passengrs "* * * shall be deemed to authorize (but not require)—(A) round-trip operations where only one-way authority exists. * * *" Section 10922(i)(3) also provides at (B) that certifiates shall be deemed to authorize, but not require, special and charter transportation from all points in a political subdivision of a State in any case where the authority provided for in this section is limited to one or more points of origin. Section 10922(c)(9) states that authority to provide special or charter transportation includes

authority to provide such transportation as round-trip service. These provisions are self-executing and require neither initiation by carriers, nor administrative action by the Commission. Further, these statutory provisions plainly indicate a legislative intention that we no longer should issue certificates with such restrictions. Consequently, unless there is good reason shown for not doing so, we will require applicants to request round-trip authority and special or charter authority from all points in a political subdivision of a State rather than from specific points.

Section 10922(i)(4) directs the Commission, upon a carrier's request, to remove intermediate point restrictions from existing regular-route certificates to authorize interstate transportation service to all intermediate pints on any route covered by the certificate. This will be implemented in Ex Parte No. MC–142 (Sub-3), *Restriction Removal Procedures—Motor Passenger Carriers—Intermediate Points,* published concurrently with this notice. To prevent future authorities from being subject to the same restrictions, we propose to prohibit intermediate point restrictions in regular-route authorities. Service over regular-routes is to be authorized to all intermediate points, as well as to those off-route points specifically sought by applicants. Finally, the entry provisions of this legislation reflect an intent to relax regulation and eliminate unnecessary barriers to competition. Towards this end, we encourage applicants to frame their requests for authority (both "fitness-only" and "public intrest") in broad terms, as opposed to the fragmented, limited applications common in the past.

The House Report (H. Rep. No. 97–334, 97th Cong., 1st Sess. at 32) directs that we consider the possiblility of inserting intermediate point restrictions in fitness only grants of regular route interstate operating authority for rural communities pursuant to 49 U.S.C. 10922(c)(4)(A) in order to prevent applicants from using this application procedure as a ruse to obtain regular route authority to serve major cities as intermediate points. We have considered the use of such restrictions and we believe that such restrictions would be inappropriate.[1] First, they would be contrary to the spirit of the Act which is to allow motor passenger carriers freely to provide service and to stimulate the market place through increased competition. Second, it would discriminate against new entrants which would rceive permanently restricted authority while similarly situated existing carriers would be eligible to have restrictions removed from their certificates. Third, it is unnecessary to prevent misuse of the fitness only provisions, because we have the power to dismiss any application under this provision not made in good faith. Finally, it would be destructive of the goal of the fitness only provision itself, which is to encourage carriers to provide service to isolated rural communities.

If the intermediate point restrictions were imposed, it is doubtful that many carriers would be interested in serving rural communities if they could not also supplement their revenues with fares from the larger intermediate points. For these reasons, we intend not to place any intermediate point restrictions in "fitness only" grants to serve rural communities pursuant to 49 U.S.C. 10922(c)(4)(A).

Applicant's verified statement. Because a motor passenger applicant need only establish that it is fit, willing, and able to acquire authority, its verified statement will now be shorter. To satisfy its burden of proof, we propose that the applicant certify that it is in compliance with DOT safety regulations or, if a new entrant, certify that it has access to, is familiar with, and will comply with, relevant DOT safety regulations. Before beginning operations, an applicant will be required, as now, to comply with relevant statutory insurance requirements to satisfy the insurance aspect of the new fitness standard.

Applications to perform any of the three categories of service under section 10922(c)(4) must contain specific information to qualify for the type of service proposed in a manner similar to that required under § 1100.251(h) of our rules for motor property applicants.

Applicants will be required to include a brief description of the service they will perform if the application is granted to demonstrate that the proposed service is properly described and conforms with the definition for the service.

Notice. We propose that each applicant continue to submit a caption summary with its application which contains a concise, accurate, and complete description of the scope of its proposed operations suitable for publication in the **Federal Register.** Section 28 of the Act allows the Commission to adopt, after a rulemaking, a special procedure for providing interested parties reasonable notice of entry applications, rather than requiring use of the **Federal Register.** Accordingly, any reference to publication in the **Federal Register** in this notice and proposed rules should also be read to include any other means of publication of applications the Commission may adopt pursuant to section 28. Section 10328(b)(1) has been modified to eliminate the statutory requirement that notice of filing of new applications be provided to state regulatory commissions of the States in which the applicant proposes to operate.

Reply. If the application is opposed, the applicant may want to file a reply statement. In fitness-only applications, the reply should only rebut a protestant's claims that applicant is unfit to perform the service or that it does not qualify for fitness-only treatment. In public interest applications, however, where protestants can also argue that the proposal is not consistent with the public interest, the applicant may also want to address that issue.

How to oppose requests for authority

A carrier opposing a request for motor passenger authority must first establish that it meets the protest standards in section 10922(c)(7). Intervention is also allowed under subparagraph (C) on the ground of safety fitness. Motor contract carriers of passengers are prohibited under section 10922(c)(8) from protesting applications of motor common carriers of passengers.

As previously discussed, protestants in "fitness only" applications may only introduce evidence establishing that the applicant is unfit or cannot qualify for the type of service proposed; public interest protestants may also argue that the proposal is not consistent with the public interest.

Intrastate Authority

Statutory Highlights

Section 6 of the Act provides at subsection (c)(2) of 49 U.S.C. 10922, as follows:

(2)(A) The Commission shall issue a certificate to a person authorizing that person to provide regular-route transportation entirely in one State as a motor common carrier of passengers if such intrastate transportation is to be provided on a route over which the carrier has authority on the effective date of the Bus Regulatory Reform Act of 1982 to provide interstate transportation of passengers if the

[1] We do not believe we are obligated to impose restrictions by virtue of the essentially hortatory language of the House Report which has not reiterated in either the Senate Report or the Report of the Committee on Conference. As indicated, we have considered the use of such restrictions and have rejected resort to imposition of intermediate point restrictions for the reasons set forth.

Commission finds that the person is fit, willing, and able to provide the intrastate transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission, unless the Commission finds, on the basis of evidence presented by any person objecting to the issuance of the certificate, that the transportation to be authorized would directly compete with a commuter bus operation and it would have a significant adverse effect on commuter bus service in the area in which the competing service will be performed.

(B) The Commission shall issue a certificate to a person authorizing that person to provide regular-route transportation entirely in one State as a motor common carrier of passengers if such intrastate transportation is to be provided on a route over which the carrier has been granted authority or will be granted authority after the effective date of the Bus Regulatory Reform Act of 1982 to provide interstate transportation of passengers if the Commission finds that the person is fit, willing, and able to provide the intrastate transportation to be authorized by the certificate and to comply with this subtitle and regulations of the Commission, unless the Commission finds, on the basis of evidence presented by any person objecting to the issuance of the certificate, that the transportation to be authorized is not consistent with the public interest.

Congress determined that restrictive State entry policies which deny carriers performing operations under interstate rights the authority to pick up and discharge passengers traveling between intrastate points over the interstate routes result in an unreasonable burden on interstate commerce. *Id.* at 9. As a result, these provisions govern, for the first time, applications for intrastate operating rights by motor common carriers for authority to provide transportation entirely in one State. Amendments to section 10101(a)(3) recognize that the national transportation policy with respect to passenger carriers can be achieved by a rational and less burdensome system of State regulation. The Commission is directed to: cooperate with the States on transportation matters for the purpose of encouraging the States to exercise intrastate regulatory jurisdiction in accordance with the objectives of this subtitle; provide Federal procedures which ensure that intrastate regulation is exercised in accordance with this subtitle; and ensure that Federal reform initiatives contained in this Act are not nullified by State regulatory actions.

Sections 10922(c)(2) (A) and (B) allow the Commission to issue certificates for regular-route transportation of passengers performed entirely in one State by a motor common carrier also on the basis of a "fitness-only" showing by the applicant, unless protestants satisfy their respective burdens of proof. Sections 10922(c)(2) (A) and (B) applies to any motor passenger carrier transportation between two points along a carrier's interstate route within a state regardless of the origin or destination of the bus. As long as the two points form some part of a carrier's existing ICC regular route interstate operating authority, intrastate service between those points falls within the Commission's jurisdiction under this Section of the new Act. Section 10922(c)(2)(H) specifies that these provisions do not apply to regular-route transportation of passengers provided entirely in one State which is in the nature of special operations. The mixing of regular route passengers and charter or special operations passengers in the same vehicle, which is permitted interstate carriers under section 10922(j)(2)(A), is disallowed in intrastate transportation by subsection (j)(2)(B), unless the carrier has the appropriate State authority and the State permits such mixing.

Finally, section 10922(c)(2)(C) prohibits the regulation by local, State, or Federal authorities of the pickup and delivery of express packages, newspapers, or mail within the commerical zone of a city by a carrier authorized by this Commission to serve that city in regular-route service service as a common carrier of passengers, if the shipment has had or will have a prior or subsequent movement by bus in intrastate commerce. The provision allows immediate entry for interstate carriers to provide pick-up and delivery express service within the commercial zone of each city they serve. *Id.* at 10.

Application Procedures

Introduction

Section 10922(c)(2)(G) requires the Commission to take final action on applications filed under section 10922(c)(2)(A) within 90 days. The 90-day time limit for acting on such applications requires that they be processed under a simple and expedited procedure. The proposed procedure is set forth at 49 CFR 1130a in Appendix C. Applications filed under the provisions of subsection (c)(2)(B), however, are subject to the normal deadlines for Commission action in licensing proceedings and will be governed by the procedures proposed at 49 CFR 1100.253 and 1100.254 set forth in Appendix B.

Form of request. Decisions on applications under sections 10922(c)(2) (A) and (B) will be made on case-by-case basis. We propose that all requests for intrastate authority be submitted on application Form OP-1. The proposed revisions to Form OP-1, which are described in Appendix D, include provisions for intrastate passenger applications.

Service proposal and docketing procedure. No intrastate operating right can be authorized by the Commission except over regular routes that the applicant is authorized to serve in interstate commerce. An applicant seeking authority to provide intrastate service must describe the desired authority in terms of the regular service routes described in the underlying interstate authority. The authority to be granted should be described together with the underlying interstate service authorization. Issuance of a separate certificate is impractical and creates ambiguities in interpreting a carrier's regular-route operating rights. An application for intrastate authority shall be assigned the next available sub-number under applicant's docket. Any underlying interstate authority upon which the applicant may be relying in that proceeding would be superseded by the certificate to be issued upon a grant of the application. That certificate would embrace the newly authorized intrastate rights and any underlying interstate authority. Comments on any practical difficulties with this approach are encouraged.

Consolidation of authorities. We propose to permit the consolidation of more than one authority in a single application if the underlying authorities are "reasonably related." We invite comments on which authorities should be considered reasonably related.

Service description. Intrastate authority will be issued on the service routes over which an applicant is authorized to provide interstate transportation of passengers and may not exceed the underlying routes upon which the application is based. An applicant may propose intrastate authority over the interstate route without regard to its ability to conduct intrastate operations over any portion of the route under State authority or an applicant may propose merely to fill gaps in existing State operating authority. Intrastate operations will be authorized to include service at all intermediate points on the underlying route, or any portion of the route, upon which the application is base. An applicant's service request should correspond to the entire route described in the underlying interstate authority, or to a portion of the route, without intermediate point restrictions. This comports with the statute and congressional concern that the Commission assure opportunities for

new service and promote competition and maximum equipment use.

Applicant's verified statement. In addition to establishing its fitness, an applicant must show either that it possesses authority to provide interstate regular-route transportation over the routes on which it proposes to perform intrastate regular-route service or that it has been, or will be, granted that authority. Whether an applicant holds the underlying interstate authority on the effective date of the Act determines the statutory provision under which the application is to be filed and the information to be submitted. Intrastate authority can be granted only if applicant holds or has been granted the underlying interstate authority. An applicant should also submit a proposed redraft of the underlying authorities. The draft certificate would include the service description contained in each of the underlying interstate authorities and the modifications to reflect the proposed intrastate operations.

Notice. Each applicant would be required to submit with its application a caption summary suitable for publication in the **Federal Register**, which contains a summary of the underlying interstate authority or authorities and a description of the proposed operations. As with interstate applications, we do not intend to require applicants to notify State regulatory commissions of their applications because of the change to section 10328.

Applications for Intrastate Authority under 10922(c)(2)(B)

Proposed procedure. Applicants filing intrastate authority requests under these provisions will be granted authority if they establish their fitness and that they have been granted the underlying interstate authority after the effective date of the Act, unless a protestant establishes that the transportation to be authorized is not consistent with the public interest. The "public interest" standard is the same test required of protestants of interstate regular route applications filed under section 10922(b)(1)(A), except in those "fitness-only" interstate applications at section 10922(c)(4). We propose that intrastate applications be governed by the procedures proposed for handling interstate regular-route applications to ensure equitable and uniform disposition.

A uniform application procedure will allow applicant to seek both interstate and intrastate authority in the same application. To establish that it is requesting intrastate authority on a route over which interstate authority has been granted after the effective date of the Act, an applicant would have to submit a copy of an appropriate existing interstate right upon which it is relying, a description of an appropriate pending interstate application, or a request for the underlying interstate rights simultaneously in the same application in which it seeks the intrastate rights. A denial of a pending or concurrently filed request for interstate authority would result in the denial of the intrastate request. Applications in which an applicant requests both the interstate regular-route authority and the corresponding intrastate authority will provide the applicant with the ability to compete effectively and efficiently in accordance with the Congressional mandate. We propose to adopt the rules in Appendix B to implement the provisions of subsection (c)(2)(B).

Proposed rules. Applicants including those applying concurrently for the underlying interstate regular-route authority, will submit a request on application Form OP-1 by checking the appropriate boxes reserved for applications filed under this subsection. These applications are listed in Form OP-1 under the heading at part (c) for passenger "public interest" applications.

The rules proposed in Appendix B at 49 CFR 1100.253 and 1100.254 to govern all applications for interstate authority as motor carriers of passengers include applications under subsection (c)(2)(B). In addition to providing certain standard information in the verified statement, and applicant is to submit information specifically described at 49 CFR 1100.253(f)(9). Qualifying protestants are to submit the factual evidence required of "public interest" protestants under 49 CFR 1100.254(f).

Applications for Intrastate Authority Under 10922(c)(2)(A)

Proposed Procedure. A qualifying applicant who files under these provisions will be granted authority unless a protestant demonstrates that the intrastate service would directly compete with a commuter bus operation and would have a significant adverse effect on commuter bus service in the area in which the competing service will be performed. The entry provisions under subsection (c)(2)(A) and the restriction removal provisions at section 10922(i)(4) of the Act provide for the removal of regulatory restrictions from an existing regular route over which a carrier has been performing operations on or before the effective date of the Act to allow full use of an entire route. The "commuter bus operations" test imposed on protestants is the same evidentiary burden as that imposed on opponents to restriction removal requests under section 10922(i)(4). Also, the Commission is required to take final action within 90 days after the filing of a request in both areas.

Accordingly, we propose to adopt a procedure similar to that proposed in Ex Parte No. MC-142 (Sub-3), *Supra*, (which modifies the earlier adopted rule contained at 49 CFR 1137) to handle restriction removal requests under the new Act. The restriction removal procedure has been used successfully by the Commission to process many requests under the Motor Carrier Act of 1980. The proposed rules at 49 CFR 1130a set forth in Appendix C modify the procedure to conform with the statutory requirements applicable to applications filed under section 10922(c)(2)(A). Carriers seeking intrastate authority under (c)(2)(A) are likely also to be seeking removal of intermediate point restrictions from their existing certificates. A uniform process for these actions would ease the financial and administrative burdens of the parties and greatly ease the processing of these requests.

The 90-day time limit make it impossible for the Commission to provide for a full-scale adversary proceeding. We propose to issue a decision accompanied by a certificate authorizing the operations granted. This will allow commencement of intrastate service upon the effective date of a decision and upon compliance with certain insurance and other requirements, unless the decision is stayed by the Commission. Such a decision will be considered a final action of the Commission, subject to review at the Commission's discretion (as opposed to an "appeal of right"). Appeals would be governed by the "exceptional circumstances" standard and otherwise by 49 CFR 100.98.

Proposed rules. Applicant would be required to submit a request for authority under section 10922(c)(2)(A) on Form OP-1, which is further revised at Appendix D to include these applications. Applicants are to check the service box under the heading at part (d) entitled "90-Day Intrastate Application" and also mark the envelope accordingly to ensure prompt attention. A separate verified statement must contain the information listed at 49 CFR 1130a.3(b).

Given the 90-day time limitation, we propose that the Commission generally publish notice of the application in the **Federal Register** within 10 days of its filing. It is particulary important that the caption summary submitted by an applicant concisely and accurately describe the full scope of the proposed intrastate operations in a form suitable

for publication. The time limits do not allow for supplementation or correction of the caption summary, so an application which does not contain an appropriately described summary would be rejected.

If an applicant establishes a prima facie showing and meets the evidentiary burden required under section 10922(c)(2)(A), a certificate will be issued unles a qualifying protestant satisfies the "commuter bus operations" test. The burden of proof is on the protestant to demonstrate that the intrastate service proposed would directly compete with a commuter bus operation and would have a significant adverse effect on all commuter bus service in the area in which the competing service will be performed. Comments are encouraged on weighing the competing factors in evaluating "significant adverse effect."

Issuance and Authority

In order to mesh procedures for administrative review with the procedures governing the issuance of certificates or permits under the Act, authority will be issued (a) only after the 20-day filing period for petitions for discretionary review to the full Commission has expired and no such petition is filed, or (b) if a petition is timely filed, only after the full Commission issues its decision. These procedures are employed by the Commission to govern the issuance of operating rights under the Motor Carrier Act of 1980.

Energy and Environmental Considerations

This proposed action does not appear to affect significantly the quality of the human environment or conservation of energy resources. However, we anticipate that their adoption will improve carrier operating efficiency and reduce mileage, with a resulting beneficial impact on the conservation of energy resources. Comments on these issues are welcome.

Regulatory Flexibility Statement

The proposed application rules will provide an expedited procedure to enable moter passenger carriers to obtain interstate and intrastate operating authority. They will not have a significant economic impact upon a substantial number of small entities. The rules could also have a modest, though beneficial, economic impact upon an unascertainable number of carriers, counties, townships, towns, and villages.

Small carriers will be able to enter new routes or service areas. Eased entry, concurrent with the Act's liberalized exit policies and increased freedom to adjust schedules, fares, and rates, will make it easier for small carriers who do not have extensive financial resources to experiment with new services and in new markets without undertaking long-term commitments at substantial cost and economic risk. By being able to acquire intrastate authority to complement interstate service, these carriers will have an additional means available to improve operational and energy efficiency. The increased competition that should result from eased entry ultimately will benefit small communities and the public by making available efficient service at the lowest rates consistent with the quality of service that consumers prefer.

List of Subjects

49 CFR Part 1045B

Administrative practice and procedure, Motor passenger carrier intrastate licensing.

Summary

We propose to adopt the rules set forth in Appendix A, to amend Title 49, Parts, 1045B, 1046, 1100 and to add Part 1130a of the Code of Federal Regulations and the proposed changes in Application Form OP–1 listed in Appendix B.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

(49 U.S.C. 10321 and 10922, and 5 U.S.C. 553)

Decided: September 10, 1982.

Agatha L. Mergenovich,

Secretary.

Appendix A

Title 49, Code of Federal Regulations Parts 1045B, 1046, and 1100 are proposed to be amended as follows:

PART 1045B—PASSENGER BROKER LICENSING [REMOVED]

1. Part 1045B, Passenger Broker Licensing, would be removed.

PART 1046—BROKERS OF PASSENGER TRANSPORTATION [REMOVED]

2. Part 1046, Brokers of Passenger Transportation, would be removed.

PART 1100—GENERAL RULES OF PRACTICE

3. The heading of § 1100.251 would be revised to read as follows:

§ 1100.251 How to apply for operating authority (except motor passenger).

4. In paragraph (a)(1), the words "passengers or" would be removed.

5. In paragraph (c)(2), the reference to "§ 1100.253i" would be revised to read "1100.255(i)."

6. In the Key for Regular Applications in paragraph (f), items (2), (4), and (5) would be removed and item (3) would be redesignated as item (2) and items (6)–(9) would be redesignated as items (3)–(6).

7. In Information To Be Submitted in paragraph (f) the reference to "except 5" in item (5) would be removed, item (9) would be removed and items (10)–(12) would be redesignated as items (9)–(11).

8. In paragraph (h), item (1) under Key for Fitness Only Applications would be revised to read as follows:

* * * * *

(h) * * *

(1) Motor carrier of property applications.

* * * * *

9. Paragraph (s)(3) would be removed and paragraphs (s)(4)–(6) would be redesignated as (s)(3)–(5).

10. The heading of §1100.252 would be revised to read as follows:

§ 1100.252 How to oppose request for authority (except motor passenger).

§ 1100.253 [Redesignated as § 1100.255 and amended]

11. In paragraph (g), the reference to "§ 1100.253(i)" would be revised to read "§ 1100.255(i)."

12. Section 1100.253 would be redesignated at § 1100.255.

13. In paragraph (e)(3), the reference "and § 1100.253(k)" would be added to follow the reference to "§ 1100.253(m)."

14. In paragraph (i), the reference "and § 1100.253" would be added to follow the reference to § 1100.251.

Appendix B

1. A new §1100.253 would be added to read as follows:

Title 49 Code of Federal Regulations, Part 1100 is proposed to be amended as follows:

§ 1100.253 How to apply for operating authority—motor passenger.

(a) *Applications governed by these rules.* These rules govern the handling of applications for permanent operating authority of the following types:

(1) Applications for certificates and permits to operate as a motor common or contract carrier of passengers in interstate or foreign commerce.

(2) Applications for certificates under 49 U.S.C. 10922(c)(2)(B) to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant has been granted or will be granted interstate authority after the effective date of the Bus Regulatory Reform Act of 1982 ("the Act").

Note.— Applications for certificates under 49 U.S.C. 10922(c)(2)(A) to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant already holds interstate authority as of the effective date of the Act are governed by the provisions at 49 CFR 1130a.

(b) *Types of proof required for applications for operating authority to perform motor carrier transportation of passengers.* All types of authority to transport passengers by motor vehicle can be obtained by an applicant showing only that it is fit, willing, and able to provide the transportation to be authorized and to comply with the law and Commission regulations. Fit, willing, and able means safety fitness and proof of insurance pursuant to the minimum financial responsibility requirements of section 18 of the Act.

(1) "Fitness-only" applications. Certain types of applications require only the finding that the applicant is fit, willing, and able. These applications can be opposed only on the grounds that applicant is not fit or does not fall into a fitness-only category of service under the Act. These applications are:

(i) Motor common carrier of passengers charter transportation.

(ii) Motor common carrier of passengers special transportation.

(iii) Motor common carrier of passengers authority to serve any community not regularly served by a certificated motor common carrier of passengers.

(iv) Motor common carrier of passengers authority to provide service as direct substitute for complete abandonment or discontinuance of all rail or commercial-air passenger service in a community.

(v) Motor common carrier of passengers transportation to any community where the only interstate motor common carrier of passengers has applied to discontinue such interstate service or to reduce intrastate service to less than one trip per day (excluding Saturdays and Sundays).

(vi) Motor contract carrier of passengers transportation.

(2) "Public interest" applications. Certain types of applications require the finding that applicant is fit, willing, and able, and when protested that the transportation to be authorized is consistent with the public interest. In addition to the grounds listed in (b)(1) above, a protestant may oppose the application on the grounds that a grant of the application will not be consistent with the public interest. These applications are:

(i) Motor common carrier of passengers transportation provided by an applicant receiving governmental financial assistance for the purchase or operation of buses, or by an applicant that is an operator for such a recipient, except to perform a service described in paragraphs (b)(1), (iii), (iv), or (v) of this section.

(ii) Motor common carrier transportation of passengers over regular routes in interstate or foreign commerce, except to perform a service described in paragraphs (b)(1), (iii), (iv), or (v) of this section.

(iii) Motor common carrier transportation of passengers over regular routes in intrastate commerce filed under 49 U.S.C. 10922(c)(2)(B).

(c) *Procedures used generally*—(1) Modified procedure. Almost all cases are handled under the modified procedure. The applicant and protestants send statements made under oath (verified statements) to each other and to the ICC. There are no personal appearances or formal hearings.

(2) Oral hearings. Oral hearings are used infrequently. Either an applicant or a protestant may request oral hearing at any time during the proceeding. The rules governing requests for oral hearings are set forth at § 1100.255(i).

(d) *Starting the application process:* Form OP–1.

(1) All applicants shall use Form OP–1.

(2) Obtain the form at Commission regional and field offices, or call any of the following headquarters offices: Publications (202–275–7833), Ombudsman (202–275–7863), or Small Business Assistance (202–275–7597).

(e) *Information to be submitted by applicants.*

(1) A completed OP–1 form, except for the appendix.

(2) A caption summary describing the authority sought.

(3) A separate verified statement from the applicant, as described in paragraph (f) of this section.

(f) *Applicant's verified statement.* Applicant shall file the information described in this paragraph. The information shall be provided in separately numbered paragraphs.

(1) Legal name and domicile of applicant.

(2) Name of witness presenting evidence and why this person is qualified to speak for applicant (*e.g.*, position with applicant and experience).

(3) Authority requested in this application (caption summary description).

(4) A brief description of the service that will be provided if this application is granted.

(5) Safety evidence: Motor passenger carriers holding ICC authority shall indicate that they are in compliance with DOT safety regulations. New entrants shall state the following:

I certify that I have access to and am familiar with all applicable regulations of the U.S. Dept. of Transportation relating to the safe operation of commercial vehicles and the safe transportation of hazardous materials, and I will comply with these regulations.

Note to applicants.—These regulations are found in Title 49 of the Code of Federal Regulations, Parts 171 to 179 and Parts 390 to 399. Information concerning safety and hazardous materials regulations may be obtained by calling 202–426–1700 or 202–426–1726.

(6) Application under § 1100.253(b)(1)(iii): If the application is to serve a "community not regularly served," describe the location of the community and the Interstate or other major highways which serve the community. If known, state the last date of service from other carriers and their identity, and the subsequent dates when service was requested from these carriers.

(7) Application under § 1100.253(b)(1)(iv): If the application is for transportation services as a substitute for discontinued rail or commercial-air passenger service, give the location of the points sought to be served; certify that rail or commercial-air service, or both, was offered at the points for which authority is sought; and certify that all rail and commercial-air service has been discontinued, and give the effective date of the latest discontinuance. The application must be filed within 180 days after the latest discontinuance becomes effective.

(8) Application under § 1100.253(b)(1)(v): If the application is to provide transportation to any community where the only interstate motor common carrier of passengers seeks to discontinue such interstate

service or to reduce intrastate service to less than one trip per day (excluding Saturdays and Sundays), certify that the community has only one interstate appropriate reference to, existing carrier's application to the Commission for discontinuance or reduction.

(9) Application under § 1100.253(b)(2)(iii): If the application is for a certificate to provide regular-route transportation entirely in one State under the provisions of 49 U.S.C. 10922(c)(2)(B), submit a copy of each of the authorities granted after the effective date of the Act which authorizes the transportation of passengers in interstate commerce on the regular routes over which the proposed intrastate transportation is to be provided, or refer to pending applications for such authority, and submit a proposed redraft of the certificate to be issued upon a grant of the application.

Note.—The proposed redraft should include the regular-route service description contained in each of the underlying interstate authorities, numbered separately by sub-number, and a description of the intrastate operations to be authorized. Applicant should submit sufficient information under paragraph (4) of this paragraph for the Commission to determine readily the precise portions of the existing service routes over which applicant proposes to obtain intrastate authority. Applicant must request the underlying interstate transportation in the same application as the request for intrastate authority if applicant has not already been granted interstate authority and does not have pending an application for interstate authority. No draft of a proposed certificate would be submitted with such applications. A denial or rejection of the underlying interstate proposal would require the rejection of the request to provide intrastate transportation.

(10) Any oral hearing request (optional). Verification: Separate verification of this statement is not necessary. Applicant understands that the oath in the application form applies to this statement.

(g) *Where to send the application.* (1) The original and one copy shall be sent to the Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423, with the proper application fee. Make checks payable to the Interstate Commerce Commission.

(2) One copy of the application shall be sent to the ICC regional office in which applicant is domiciled.

(h) *Commission review of the application.* (1) ICC staff will review the application for correctness, completeness, and for adequacy of the evidence.

(i) Minor errors will be corrected without notification to the applicant.

(ii) Materially incomplete applications will be rejected without prejudice to refiling. Applications that are in substantial compliance with these rules will be accepted.

(iii) An employee review board will decide whether there is adequate evidence so that the full scope of the authority applicant seeks may be published in the **Federal Register**. If there is not, the application will be rejected in a letter. An applicant may appeal rejections made under paragraphs (h)(1)(ii) and (h)(1)(iii) of this section. See § 1100.253(r). If an applicant chooses to resubmit the application, it shall refer to its prior application by docket number and give the ICC fee number stamped on the canceled check so as to avoid a second fee being assessed. If no appeal or resubmittal is made, the fee will not be refunded. The date of refiling will be considered the date of the application.

(2) The caption summary will be published in the **Federal Register** to give notice to the public in case anyone wishes to oppose the application. The application will be published in the form of a grant of authority.

(3) If the **Federal Register** publication does not properly describe the authority being sought because of ministerial error, applicant shall inform the ICC's Section of Operating Rights as soon as possible. Where notification is received within 10 days of the publication, ministerial errors will be corrected and the notice will be republished. Notification after 10 days will result in republication only at the Commission's discretion, and may result in an application being rejected without prejudice to refiling.

(i) *Changing the request for authority or filing supplementary evidence after the application is filed.* (1) An applicant may not supplement evidence once the application is filed (unless directed to do so by the Commission).

(2) Amendments to the application are not permitted.

(j) *After publication in the Federal Register.* (1) Interested persons have 45 days to file protests. See § 1100.254.

(2) If no one opposes the application, the grant published in the **Federal Register** will become effective.

(3) If no one opposes an application for an extension of authority, the grant published in the **Federal Register** will be made effective by issuance of a certificate or permit that will be effective when applicant meets compliance requirements outlined in the certificate or permit. If no one opposes an application for initial authority, the grant published in the **Federal Register** will be made effective by a Commission notice outlining compliance requirements which must be met before applicant can receive a certificate or permit and commence the proposed service.

(k) *Furnishing a copy of the application package to interested persons.* Applicant is required to furnish a copy of the application package to interested persons after publication. A request for the package must be made in writing to applicant and must contain a check or money order for $10, payable to applicant. Applicant need not supply copies to any person not sending the appropriate payment. Applicant is required to mail the copy within 3 days of the receipt of the request being received. Non-compliance with this rule may result in dismissal of the application.

(l) *Opposed applications.* If the application is opposed, opposing parties are required to send a copy of their protest to the applicant.

(m) *Filing a reply statement.* (1) If the application is opposed, applicant may file a reply statement. This statement is due at the Commission within 60 days of the **Federal Register** publication.

(2) The reply statement need not be notarized or verified. Applicant understands that the oath in the application form applies to all evidence submitted in the application. Separate legal argument by counsel need not be notarized or verified.

(n) *After all statements are submitted.* (1) When the proceeding is handled under modified procedure, the next notification to the parties will be the service of the initial decision.

(2) If the proceeding is handled by oral hearing, parties will receive a notice to this effect.

(o) *Application withdrawal.* If applicant wishes to withdraw an application, it shall request dismissal in writing.

(p) *Caption summary.* (1) The caption summary, which shall accompany all applications, shall be in the form prescribed by the Commission. Commission field and regional offices and the Small Business Assistance Office (202–275–7597) offer assistance in preparing correct caption summaries, or examples may be found in the daily **Federal Register**.

(2) Applications for motor common carrier transportation of passengers over regular routes in intrastate commerce filed under 49 U.S.C. 10922(c)(2)(B). Where an applicant holds an underlying, interstate regular-route grant of authority to provide transportation on routes over which applicant proposes to provide intrastate transportation, or has

pending an application for such authority, the caption summary should provide a brief summary of the authorized or pending interstate authority and a description of the intrastate transportation to be authorized. Where applicant is relying upon more than one underlying interstate grant of authority, each authority or pending application shall be summarized, and the proposed intrastate service shall be described, in separately numbered paragraphs, by specific sub-number.

(q) *Compliance.* An applicant must comply with the following requirements before beginning operations under a certificate or permit: 49 CFRA Part 1043 (Insurance), Part 1044 (Designation of Process Agent), and Part 1306 (Tariffs).

(r) *Appeals.* (1) If a review board or other decisional body rejects an application, applicant has a right of appeal. The appeal must be filed at the Commission within 10 days of the date of the letter of rejection.

(2) If the appeal is successful and the filing is found to be proper, the application shall be deemed to have been properly filed as of the decision date on the appeal.

2. A new § 1100.254 would be added to read as follows:

§ 1100.254 How to oppose requests for authority—motor passenger.

(a) *Definitions.* A person wishing to oppose an application governed by the procedures in 49 CFR 1100.253 for permanent authority to operate as a motor carrier of passengers may file a protest. A person filing a valid protest becomes a protestant.

(b) *Time for filing.* A protest shall be filed (received at the Commission) within 45 days after notice of the application appears in the **Federal Register.** A copy of the protest shall be sent to applicant at the same time. Failure to timely file a protest waives further participation in the proceeding.

(c) *Contents of the protest.* (1) All information upon which the protestant plans to rely must be put into the protest.

(2) A protest must be verified, as follows:

I, ————, verify under penalty of perjury under the laws of the United States of America, that the information above is true and correct. Further, I certify that I am qualified and authorized to file this protest. (*See* 18 U.S.C. 1001 and 18 U.S.C. 1621 for penalties.)

———————————

(Signature and date).

(3) A protest not in substantial compliance with these rules will be rejected.

(4) A protestant files two separate types of evidence. Protestants shall submit qualifications evidence in the format in paragraph (d) of this section and factual evidence, according to the guidelines in paragraph (e) or (f) of this section.

(d) *Qualifications format.* This information shall be submitted in separately numbered paragraphs:

(1) Docket number of application being opposed.

(2) Name and domicile of protestant, including lead docket number, if any.

(3) Name and address of protestant's representative.

(4) Name and address of witness presenting the evidence, and why qualified to speak for protesting party.

(5) Description of the extent to which the person seeking to protest possesses authority to handle the traffic for which authority is applied, is willing and able to provide service that meets the reasonable needs of the traveling public, and has either performed service within the scope of the application during the 12-month period before the application was filed or has actively in good faith solicited service within the scope of the application during that period, or

(6) Description of any application which the protestant has pending before the Commission which was filed before applicant's application and which covers substantially the same traffic, or

(7) Description of any other legitimate interest not contrary to the transportation policy set forth in 49 U.S.C. 10101(a), or of any right to intervene under a statute. A person seeking to qualify under this paragraph shall describe in detail the circumstances which warrant its participation and how they are consistent with 49 U.S.C. 10101(a). The Commission may permit such person to intervene if it shows that a proceeding is novel or of first impression, is of industry-wide importance, or has significant economic impact beyond the impact on protestant itself. Any carrier may protest under this paragraph on the grounds of safety fitness.

Note.—A motor contract carrier of passengers may not protest an application to provide transportation as a motor common carrier of passengers.

(e) *Factual evidence format for fitness-only applications:* Scope. The types of applications listed in § 1100.253(b)(1) may be protested only on the grounds listed here.

(1) Evidence that applicant cannot meet the statutory fitness criteria.

(2) Evidence that the application does not properly fall within one of the statutorily described categories.

Note.—If the Commission finds that the application does not properly fall within one of the categories, the application shall be dismissed without prejudice to the filing of an application for authority under other criteria.

(3) Legal argument (optional).

(4) Verification.

(5) Certificate of service.

(6) Request for oral hearing (optional).

(f) *Factual evidence format for public interest applications:* Scope. The types of applications listed in § 1100.253(b)(2) may be protested only on the grounds listed here.

(1) Evidence that a grant of the application would not be consistent with the public interest. Four factors are to be considered, to the extent applicable, in determining whether authorization would be consistent with the public interest.

(i) The transportation policy of section 10101(a) of this title,

(ii) The value of competition to the traveling and shipping public,

(iii) The effect of issuance of the certificate on motor carrier of passenger service to small communities; and

(iv) Whether issuance of the certificate would impair the ability of any other motor common carrier of passengers to provide a substantial portion of the regular-route passenger service which such carrier provides over its entire regular-route system. Diversion of revenue or traffic from a motor common carrier of passengers in and of itself shall not be sufficient to support a finding that issuance of the certificate would impair the ability of the carrier to provide a substantial portion of the regular-route passenger service which the carrier provides over its entire regular-route scheduled system. The routes and services of affiliates and subsidiaries of protestant shall be considered part of a protestant's system.

(2) Evidence that applicant cannot meet the statutory fitness criteria.

(3) Legal argument (optional).

(4) Verification.

(5) Certificate of service.

(6) Request for oral hearing (optional).

(g) *Requests for oral hearing by a protestant.* The Commission will handle application proceedings under § 1100.253 using the modified procedure, if possible. *See* § 1100.255(i). Protestants shall file requests for oral hearing with their protests.

(h) *To whom the protest is sent.* (1) An original and one copy of the protest shall be sent to the Office of the Secretary, ICC, Washington, DC 20423. The docket number of the proceeding shall be placed conspicuously on the top of the first page of the protest.

(2) Concurrent with the filing in paragraph (h)(1) of this section, a copy shall be sent to applicant.

(i) *Obtaining a copy of the application.* (1) A copy of the application is available for inspection at the Commission's offices in Washington, DC, or the regional office of applicant's domicile. (2) In addition, applicant is required to send a copy to interested persons upon payment of a $10.00 charge. *See* § 1100.253(k).

(j) *Withdrawal.* A protestant wishing to withdraw from a proceeding shall inform the Commission and the applicant in writing.

Appendix C

Title 49 of Code of Federal Regulations is proposed to be amended as follows:

A new part 1130a would be added to read as follows:

PART 1130a—RULES GOVERNING THE ISSUANCE OF A CERTIFICATE TO PROVIDE REGULAR-ROUTE TRANSPORTATION OF PASSENGERS ENTIRELY IN ONE STATE UNDER 49 U.S.C. 10922(c)(2)(A)

Sec.

1130a.1 Controlling legislation.
1130a.2 Definitions.
1130a.3 Filing of applications.
1130a.4 Processing of applications.
1130a.5 Decision.
1130a.6 Compliance.

Authority: 49 U.S.C. 10321 and 10922; 5 U.S.C. 553.

§ 1130a.1 Controlling legislation.

(a) *Applicability of rules.* A motor common carrier of passengers establishing that it has authority on the effective date of the Bus Regulatory Reform Act of 1982 ("the Act") to provide interstate transportation of passengers on a route over which the carrier now proposes to provide regular-route transportation entirely in one state will be granted a certificate to provide the intrastate transportation if the Commission finds that the carrier is fit, willing, and able to provide the intrastate transportation and to comply with Commission rules and regulations, unless the Commission finds, on the basis of evidence presented by a person objecting to the issuance of the certificate, that the transportation to be authorized would directly compete with a commuter bus operation and would have a significant adverse effect on commuter bus service in the area in which the competing service will be performed.

Note.—Applications for certificates under 49 U.S.C. 10922(c)(2)(B) to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant is granted interstate authority after the effective date of the Act are governed by the provisions at 49 CFR 1100.253 and 1100.254.

(b) *Time limits.* The Commission will take final action upon an application filed under 49 U.S.C. 10922(c)(2)(A) for authority to provide transportation entirely in one State not later than 90 days after the date the application is filed with the Commission.

§ 1130a.2 Definitions.

Commuter bus service or operation means short-haul, regularly scheduled passenger service provided by motor vehicle in metropolitan and suburban areas, whether within or across the geographical boundaries of a State, and used primarily by passengers using reduced fare, multiple-ride, or commutation tickets during morning and evening peak periods of operation.

§ 1130a.3 Filing of applications.

(a) *Form and filing.* (1) An applicant is to file a completed application Form OP–1. Applicant is to check the service box provided under the heading at part (d) entitled "90-DAY INTRASTATE APPLICATION."

(2) The form may be obtained at Commission regional and field offices, or by calling the Office of the Secretary at 202–275–7833.

(3) The signed original and one copy of the application and all required documents described in paragraphs (b), (c), (d), and (e) of this section shall be sent to the Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423, with the proper application fee to be submitted with the Form OP–1. Make checks payable to the Interstate Commerce Commission.

(4) One copy of the application shall be sent to the ICC regional office in which applicant is domiciled.

(b) *Verified statement.* Applicant shall file the information described below in a separate statement attached to the application and in separately numbered paragraphs:

(1) Legal name and domicile of applicant, and the docket number assigned by the Commission to the applicant's authorities.

(2) Name of witness presenting evidence and why this person is qualified to speak for applicant.

(3) Brief description of the proposed redraft of the certificate to assist the Commission in determining the portions of the existing service routes over which applicant proposes to obtain intrastate authority.

(4) Safety evidence. Applicants should state that they are in compliance with DOT safety regulations.

Note to Applicants.— These regulations are found in Title 49, Code of Federal Regulations, Parts 171 to 179 and Parts 390 to 399. Information concerning safety and hazardous materials regulations may be obtained by calling this toll-free number: 800–424–0158.

(c) A copy of the interstate authority or authorities issued on or before the effective date of the Act authorizing the regular routes over which applicant seeks to obtain intrastate authority.

(d) A proposed redraft of the authority or authorities upon which the application is based showing broadened authority including the proposed intrastate service. The redraft shall be in the same format as the original authority. It should include the regular route service description contained in each underlying authority, numbered separately by sub-number, and modifications indicating the intrastate operating rights to be authorized. Applicant should submit sufficient information under subpart (3) of the application for the Commission to determine readily the precise portions of the existing service routes over which applicant proposes to obtain intrastate authority.

(e) A caption summary (an original and one copy) of the intrastate authority requested, suitable for publication in the **Federal Register.** The caption summary shall include an accurate summary of the intrastate, regular-route authority that applicant seeks to obtain and of the underlying service routes described in the existing interstate certificate. The summary should indicate existing authorities, by sub-numbers, which would be superseded by issuance of a certificate upon a grant of the application.

(f) Consolidation of authorities. Applicants may combine requests for intrastate authority in a single application relying on more than one interstate authority if the underlying authorities are reasonably related. In applications based on more than one authority, the requests shall be clearly marked and segregated according to each certificate, and each request shall comply with the requirements set forth in § 1130a.3. Failure to comply may result in a rejection of the application.

(g) Repeat applications. A certificate can be modified under these rules more than one time. However, an application shall not be filed under these rules before a preceding application to obtain the same intrastate authority has been processed by the Commission.

§ 1130a.4 Processing of applications.

(a) Notice to interested persons. (1) Notice to the public of the filing of an application under these rules will be given by the Commission through publication of a caption summary in the **Federal Register.**

(2) A copy of the application is available for inspection at the Office of the Secretary, ICC, Washington, DC 20423, and the regional office of applicant's domicile.

(b) Filing of protests. A person wishing to oppose an application may file a protest. The protest must contain the information required by this paragraph. Protests shall be filed (received at the Commission) within 25 days after notice of the application appears in the **Federal Register.** An original and one copy of the protest shall be sent to the Office of the Secretary, ICC, Washington, DC 20423. The docket number of the proceeding shall be placed on the top of the first page. A copy of the protest shall be sent to applicant at the same time. Failure to timely file a protest waives further participation in the proceeding.

(c) Furnishing a copy of the application package to interested persons. Applicant is required to furnish a copy of the application package to interested persons after publication. The request must be in writing and must contain a check or money order for $10, payable to applicant. Applicant need not supply copies to any person not sending the appropriate payment. Applicant is required to mail the copy within 3 days of receipt of the request. Non-compliance with this section by applicant may result in dismissal of the application.

(d) Contents of the protest. All information upon which the protestant plans to rely should be put into the protest. The comments and the envelope shall be clearly marked in a corner as follows: "90-Day Intrastate Application." A protest not in substantial compliance with these rules will be rejected. A motor contract carrier of passengers may not protest an application to provide transportation as a motor common carrier of property. A protestant shall submit qualifications evidence and factual evidence, as described below.

(1) Docket number of application being opposed.

(2) Name and domicile of protestant, including lead docket number, if any.

(3) Name and address of protestant's representative.

(4) Name and address of witness presenting the evidence, and why qualified to speak for protesting party.

(5) Qualifications evidence. (i) Description of the extent to which the person seeking to protest possesses authority to handle the traffic for which authority is applied, is willing and able to provide service that meets the reasonable needs of the traveling public, and has either performed service within the scope of the application during the 12-month period before the application was filed or has actively in good faith solicited service within the scope of the application during that period; or

(ii) Description of any application which the prospective protestant has pending before the Commission which was filed before applicant's application and which covers substantially the same traffic; or

(iii) Description of any other legitimate interest not contrary to the transportation policy set forth in 49 U.S.C. 10101(a), or of any right to intervene under a statute. A person seeking to qualify under this paragraph shall describe in detail the circumstances which warrant its participation and how they are consistent with 49 U.S.C. 10101(a). Under this subparagraph, any carrier may protest on the grounds of safety fitness.

(6) Factual evidence to establish that the intrastate service would directly compete with a commuter bus operation, and that the direct competition would have a significant adverse effect on commuter bus service in the area in which the competing service will be performed.

(i) A summary, description, or copy of the specific commuter authorities in conflict with that sought in the application, if pertinent.

(ii) Information to demonstrate: that the proposed service is directly competitive with a commuter bus service, that the proposed service will adversely affect commuter bus service in a significant manner, and the degree to which all commuter bus services in the area where the competing service would be performed would be adversely effected.

(7) Factual evidence that applicant is not fit, willing, or able under the statutory fitness criteria.

(8) Legal argument (optional).

(9) Verification, as follows:

I, ——— ——— verify under penalty of perjury under the laws of the United States of America, that the information above is true and correct. Further, I certify that I am qualified and authorized to file this protest. (*See* 18 U.S.C. 10101 and 18 U.S.C. 1621 for penalties.)

———————————

(Signature and date).

§ 1130a.5 Decision.

(a) Basis. Applications will be decided solely on the basis of the application and the protests that are received. There will not be an opportunity for oral hearing nor for submission of any other evidence under modified procedure.

(b) The Commission's decision. (1) Notice of applications will be published in the **Federal Register** in the form of tentative decisions granting the authority requested. If no protests are filed, the application will stand granted, without any further public notice, at the conclusion of the 25-day protest period, unless the Commission, prior to that time, stays the effectiveness of the tentative decision.

(2) If protests are filed, a final decision will be reached by the Commission before the expiration of the 90-day time period for final action.

(c) Administrative finality and appeals. A decision disposing of an application subject to these rules is a final action of the Commission. Any party seeking review should specify the "extraordinary circumstances" involved in the proceeding which would require the Commission to reopen the proceeding. Review of such an action on appeal is discretionary and is otherwise governed by the Commission's appeal regulations at 49 CFR 1100.98.

§ 1130a.6 Compliance.

(a) A reformed certificate will be issued upon a grant of an application. Prior to the beginning operations under the newly issued authority, compliance must be made with the following statutory and regulatory requirements: 49 CFR Parts 1043, 1044, and 1306.

Appendix D

Application Form OP–1 is revised as follows:

At page 2, move three lines below heading "Fitness-Only Applications" to top of page.

Change heading to "(a). Property Fitness-Only Applications" and insert entire section below the top three lines.

Number each of the types of service under (a). as (1) through (7).

After section (a). add:

(b). Passenger Fitness-Only Applications

[ ] (1) Motor common carrier of passengers charter transportation.

[ ] (2) Motor common carrier of passengers special transportation.

[ ] (3) Motor common carrier of passengers authority to serve any community not regularly served by a certificated motor common carrier of passengers.

[ ] (4) Motor common carrier of passengers authority to provide service as a direct substitute for the complete abandonment or discontinuance of all rail or commercial-air passenger service in a community.

[ ] (5) Motor common carrier of passengers transportation to any community where the only interstate motor common carrier of passengers has applied to discontinue such interstate service or to reduce intrastate service to less than one trip per day (excluding Saturdays and Sundays).

[ ] (6) Motor contract carrier of passengers transportation.

(c) Passenger Public Interest Applications

[ ] (1) Motor common carrier of passengers transportation provided by an applicant receiving governmental financial assistance for the purchase or operation of buses, or by an applicant that is an operator for such a recipient, except to perform a service described in (b)(3), (4), or (5) above.

[ ] (2) Motor common carrier transportation of passengers over regular routes in interstate or foreign commerce, except to perform a service described in (b)(3), (4), or (5) above.

[ ] (3) Motor common carrier transportation of passengers over regular routes in intrastate commerce filed under 49 U.S.C. 10922(c)(2)(B) on a route over which applicant has been granted authority or will be granted authority in interstate commerce after the effective date of the Bus Regulatory Reform Act of 1982.

Note.—An applicant which has not been granted or does not have pending an application for the underlying interstate, regular-route authority over which the intrastate operations are to be performed may file a request for such intrastate authority only if the underlying interstate, regular-route transportation is requested also in this application.

(d) 90-Day Intrastate Passenger Application

[ ] Motor common carrier transportation of passengers over regular routes in intrastate commerce filed under 49 U.S.C. 10922(c)(2)(A) on a route over which applicant already has authority as of the effective date of the Bus Regulatory Reform Act of 1982.

Note.—Applicant shall clearly mark the envelope containing the application and the upper right-hand corner of the front page of this application: "90-Day Intrastate Passenger Application."

[FR Doc. 82-26704 Filed 9-28-82; 8:45 am]
BILLING CODE 7035-01-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 400 (Sub-1)]

Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed procedures.

SUMMARY: The Commission is proposing procedures for handling individual petitions for exemption filed by motor carriers of property under 49 U.S.C. 11343, in light of the Bus Regulatory Reform Act of 1982, Pub. L. 97–261, enacted September 20, 1982. This legislation amends 49 U.S.C. 11343 to provide that the Commission may exempt motor carriers of property from the merger, consolidation, and acquisition of control provisions of sections 11343, 11344, and 11345a if the transaction meets criteria like those applied to all rail carriers in 49 U.S.C. 10505. Under the proposed procedures, the Commission will generally issue a final decision based solely on the petition.

DATES: Comments must be submitted by October 19, 1982.

ADDRESSES: Send comments (an original plus 10 copies) to: Interstate Commerce Commission, Section of Finance, Room 5349, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275–7245, or Gloria E. Blazsik (202) 275–0948.

SUPPLEMENTARY INFORMATION: Section 21(b) of the Bus Regulatory Reform Act of 1982, Pub. L. 97–261, enacted September 20, 1982 (Bus Act), authorizes the Commission to exempt merger, consolidation, and acquisition of control transactions involving motor carriers of property from the pertinent provisions of 49 U.S.C. 11343, 11344, and 11345a. The Commission may exempt a person, class of persons, transaction, or class of transactions if we find that examination of the transaction is not necessary to carry out the national transportation policy of 49 U.S.C. 10101 and either that the transaction is of limited scope or that examination is not needed to protect shippers from the abuse of market power. The Commission may revoke an exemption if we find that review of the transaction is necessary to carry out the national transportation policy of section 10101, or if it is necessary to review and address the effects on adversely affected employees. Section 21(b) also requires that at least 60 days before any exempt transaction may take effect, a carrier intending to participate in the transaction must file with the Commission a notice of its intention to do so. We must prescribe the information to be included in the notice, and ensure that the public is given notice of the transaction.[1]

The Staggers Rail Act of 1980 (Pub. L. No. 96–448, 94 Stat. 1895, October 14, 1980) (Staggers Act) amended 49 U.S.C. 10505 by granting the Commission broad authority to exempt rail transactions of all kinds from regulation, and by eliminating the requirement that a proceeding be held in all rail exemption matters. The legislative history of the Staggers Act indicated that Congress, in eliminating this requirement, intended to give the Commission wide-ranging flexibility in rail exemption matters. In Ex Parte No 400, Modification of Procedure For Handling Exemptions Filed Under 49 U.S.C. Section 10505 (not printed), served December 29, 1980 (45 FR 85180 December 24, 1980), we announced new procedures for handling petitions for exemption under section 10505 in light of the Staggers Act. There, we adopted rules under which the Commission would make an initial decision to grant the exemption as long as the petition did not indicate that the proposed exemption could potentially have a significant adverse impact or the impact was not readily ascertainable from the petition. We also eliminated notice and comment procedures and provided that a final decision, based solely on the petition for exemption, be issued. In our opinion, Congress intends to give the Commission similar flexibility in the motor exemption area. Accordingly, the procedures proposed here generally follow those established in Ex Parte No. 400, *supra*.

As we did in Ex Parte No. 400, we will not require initial notice and comment in most cases. Pursuant to section 21(b) of the Bus Act, the petition seeking an exemption under 49 U.S.C. 11343(e)(1) will be considered a notice of intent. The petition shall contain at least the following: (1) The names of all the parties involved; (2) the nature and scope of the transaction; and (3) the representatives of the parties to be contacted concerning the proposal. Upon receipt of the petition, we will publish a notice of the transaction in the *ICC Register*, a new Commission publication announced in Ex Parte MC–163 *Procedures For Providing Notice of Specified Applications Through an ICC Register in Lieu of Federal Register Notice*, which is being served currently with this decision. An initial determination will then be made as to whether the transaction requires regulation: if the Commission finds that prior Commission approval of the transaction is (1) not necessary to carry out the transportation policy of section 10101 and (2) either (A) the transaction is of limited scope or (B) regulation is not needed to protect shippers from the abuse of market power, notice of a final decision on the exemption proposal will be published in the *ICC Register* which is proposed to be established in Ex Parte No. MC–163, published concurrently with this notice. This will generally be effective 30 days from publication, as long as this date is no sooner than 60 days after the petition seeking exemption was filed.

This procedure provides an opportunity for anyone, including employees objecting to the decision, to file petitions seeking reconsideration. These petitions must be filed within 20 days of the date of publication. The filing of the petition will not automatically stay the effectiveness of the decision. Nonetheless, the Commission may, on its own motion or on petition, stay the effective date while considering any petitions. Petitions to stay must be filed within 10 days of the date of publication. These are similar to the time frames established in Ex Parte No. 400. We will process all petitions for exemption expeditiously to meet statutory requirements.

In extraordinary circumstances, the Commission may determine that a decision on a particular exemption petition should become effective either immediately upon *ICC Register* publication or in less than 30 days after publication, but this effective date will not be less than the required 60 day period. In such circumstances, the decision will specify the time period for filing petitions to reopen.

In cases where the impact of the proposed exemption is not readily ascertainable from the petition, or where it appears that employees may be adversely affected, we may exercise our discretion to seek notice and comment instead of making an initial determination.

These procedures will enable us to expedite decisions in the motor exemption area without depriving interested persons of an opportunity to state their views. While our procedures do not involve the issuance of new regulations, comments from the public on these procedures will be useful.

[1] Should additional rules be required for exemption of a class of persons or a class of transactions, the matter will be addressed in a separate proceeding. In any event, as specified in the statute, no exempt transaction may take effect on less than 60 days' notice.

This action will not affect significantly the quality of the human environment or conservation of energy resources.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison. Commissioner Simmons was absent and did not participate.

(49 U.S.C. 11343 and 5 U.S.C. 553)

Decided: September 15, 1982.

Agatha L. Mergenovich,

Secretary.

Appendix

Procedures For Filing Exemptions Pursuant To 49 U.S.C. 11343(e)

A motor carrier of property intending to file a petition seeking exemption from the requirements of 49 U.S.C. 11343 regarding a merger, consolidation, and acquisition of control transaction must file with the Commission an exemption petition. The petition shall contain at least the following: (1) The name of all the parties involved; (2) the nature and scope of the transaction; and (3) the representatives of the parties to be contacted concerning the proposal. When the petition is filed, notice of it will be published in the *ICC Register*, and processed by the Commission. An initial determination will then be made as to whether regulation of the transaction is (1) necessary to carry out the transportation policy of 49 U.S.C. 10101; and (2) either (A) whether the transaction or service is of limited scope, or (B) whether regulation is needed to protect shippers from the abuse of market power.

If the determination is made that regulation is not necessary, a summary of the final decision will be published in the *ICC Register*, generally to be made effective 30 days from the date of publication, but in no instance less than 60 days after the petition was filed.

[FR Doc. 82-26713 Filed 9-28-82; 8:45 am]

BILLING CODE 7035-01-M

[Ex Parte No. 55 (Sub-43D)]

Certification of Canadian or Mexican Ownership or Control of Applicants for Motor Common or Contract Carrier Authority

AGENCY: Interstate Commerce Commission.

ACTION: Temporary procedure.

SUMMARY: The Commission is temporarily modifying its procedures for applying for motor carrier operating authority to comply with the congressional prohibition against issuing operating authority to certain applicants set forth in the Bus Regulatory Reform Act of 1982. As long as the moratorium is in effect all applicants in motor carrier operating rights, finance, and restriction removal proceedings must make certifications with respect to domicile in Canada or Mexico, or ownership or control by persons of Canada or Mexico as part of verified statements accompanying their applications. Failure to make a required certification will result in rejection of the application.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Joseph B. O'Malley, Jr. (202) 275-7928, or Howell I. Sporn (202) 275-7691.

SUPPLEMENTARY INFORMATION: Section 6 of the Bus Regulatory Reform Act of 1982 prohibits the Commission from issuing a certificate to a motor common carrier, or a permit to any motor contract carrrier domiciled in any contiguous foreign country or owned or controlled by persons of any contiguous foreign country for a period of 2 years after the effective date of the Act. The President may extend this moratorium if a contiguous foreign country or any political subdivision thereof substantially prohibits grants of authority to persons from the United States to provide for-hire transportation therein. The President may also end or modify the terms of the moratorium if he should determine that it would be in the national interest to do so. The legislative history indicates that the purview of the measure extends to all operating right finance, and restriction removal proceedings.

In accordance with the terms of the moratorium the President has determined that a partial suspension thereof with respect to Canada is in the national interest. Effective September 21, 1982, applications by Canadian domiciled, owned, or controlled motor carriers for motor carrier merger, consolidation, acquisition of control, temporary authority, emergency temporary authority, or for permanent authority involving the interstate transportation of traffic moving entirely within the United States (that is not in foreign commerce), are excepted, at least temporarily, from the coverage of the moratorium. The Commission may also grant other types of authority in accordance with appropriate statutory provisions after giving great weight to the national transportation policy (particularly the mandates to promote "economical and efficient transportation" and "to encourage sound economic conditions among carriers"). The President also determined that no modification of the moratorium is warranted with respect to Mexico.

Our present procedures do not require applicant motor carriers to identify the nationality of those persons who own or control these carriers. In some cases domicile identification likewise may not be required. Accordingly, to comply with the requirements of the new Act we must modify our procedures temporarily.

After consideration of various options, we have decided on a method that we believe places the least burden on motor carrier applicants, but at the same time insures that the Commission will receive the information necessary to comply with the moratorium. All motor carrier applicants will be required, as part of verified statements accompanying their applications, to make certain certifications regarding their domicile, ownership, or control. One of two alternative certifications set forth below must be employed, the choice depending on the circumstances applicable to a particular carrier.

The first form should be used by applicants having no domiciliary, ownership, or control relationship with either Mexico or Canada, and should be in the following form:

> I certify that the applicant in this proceeding is not domiciled in any country contiguous to the United States. Moreover, the applicant is not owned by or controlled by persons of any such country.

The alternative form should be used by applicants unable to make the above-described certification. These carriers must also certify that they have neither Mexican domicile, ownership, nor control. In addition, they must certify the nature of any such domicile, ownership, or control relationship involving Canada. Details need not be furnished at this stage. The certification must be in the following form:

> I certify that the applicant in this proceeding is not domiciled in Mexico. Moreover, the applicant is not owned by, or controlled by persons of that Country. Applicant is domiciled in Canada (or controlled by or owned by persons of that country).

One of these two forms of certification must appear on the first page of the verified statement immediately following the name and address of the applicant. Failure to include the certification will result in rejection of the application. The Commission will determine the applicability of the moratorium to the authority sought. A person desiring to challenge an applicant's representation of domicile, ownership, or control may do so as part of a pleading filed in accordance with the provisions of 49 CFR 1100.241 or 1100.252, 49 CFR Part 1132, or 49 CFR Part 1137.

Because this temporary procedural change is merely a change in agency procedure or practice, we believe that notice to the public and opportunity to comment prior to adoption of the

temporary procedure is not required. 5 U.S.C. 553(b)(3)(A). In addition, notice and comment would be both impracticable and unnecessary. 5 U.S.C. 553(b)(3)(B). The moratorium becomes effective upon enactment and it is necessary that the Commission take immediate steps toward implementation. The mandate of the new statutory provision is clear and leaves no discretion in the Commission. In our procedures we have attempted to track its language and intent as closely as possible without placing an undue burden on motor carrier applicants. The uncertain duration of the moratorium also militates against any lengthy consideration of public input into our decision. For the above reasons, we find that there is good cause to dispense with notice and comment procedures. Similarly, there is good cause under 5 U.S.C. 553(d)(3) for making the procedure effective on less than 30 days notice. Congress has determined that the moratorium should become immediately effective and thus the public interest requires the agency to act immediately or the intent of Congress will be frustrated.

This action will not have any significant impact on the quality of the human environment or conservation of energy resources.

The provisions of 5 U.S.C. 603 require that the Commission examine the impact of our action on small businesses and small organizations. We can perceive no significant economic impact on small entities as a result of this temporary procedure.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

(49 U.S.C. 10321, and 10922 (1), and 5 U.S.C. 553)

Decided: September 27, 1982.

Agatha L. Mergenovich,

Secretary.

Office of Management and Budget

Budget Deferral

OFFICE OF MANAGEMENT AND BUDGET

Budget Deferral

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report a new deferral of $6,500,000 for the Department of Commerce and a revision to an existing deferral increasing the amount deferred by $1,250,000 for the United States Information Agency (formerly the International Communication Agency).

The details of the deferrals are contained in the attached reports.

Ronald Reagan.

The White House,
September 23, 1982.

BILLING CODE 3110-01-M

COMMUNICATION FROM THE PRESIDENT OF THE UNITED STATES
(In thousands of dollars)

Deferral No: D82-253

CONTENTS OF SPECIAL MESSAGE
(in thousands of dollars)

Deferral #	Item	Budget Authority
	Department of Commerce	
	Science and Technical Research	
D82-253	Scientific and technical research and services	6,500
	Other Independent Agencies	
	United States Information Agency	
D82-249A	Salaries and expenses (special foreign currency program)	1,950
	Total, deferrals	8,450

SUMMARY OF SPECIAL MESSAGES
FOR FY 1982
(in thousands of dollars)

	Rescissions	Deferrals
Eighteenth special message		
New items	---	6,500
Change to amount previously submitted	---	1,250
Effect of eighteenth special message	---	7,750
Previous special messages	7,734,461	8,207,547
Total amount proposed in special messages	7,734,461	8,215,297 1/

1/ This amount represents budget authority except for $20,922 thousand in one general revenue sharing deferral of outlays only (D82-23A).

Deferral No: D82-253

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Commerce	New budget authority (P.L. 97-161): $117,922,000
Bureau: Science and Technical Research	Other budgetary resources: 5,835,585
Appropriation title & symbol: Scientific and Technical Research and Services 13X0500	Total budgetary resources: 123,657,585
	Amount to be deferred: Part of year: ___ Entire year: 6,500,000
OMB identification code: 13-0500-0-1-376	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other ___
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ___ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ___

Justification: This deferral action reflects the Department of Commerce's decision to do a comprehensive study on the feasibility of establishing a Department-wide scientific computer center to provide for a large-scale scientifically oriented computer capability. This computer facility, recommended in GAO Report #GAO/CED 82-81, would improve service at lower costs to its users. The study is planned for completion by December 31, 1982. This deferral action preserves $6.5 million for the balance of FY 1982 and is taken under the provisions of the Antideficiency Act (31 U.S.C. 665).

Estimated Effects: This action will delay the purchase of the National Bureau of Standards (NBS) computer. However, if the planned study results in a central computer facility for the Department of Commerce, the savings resulting from the consolidation will more than offset the time delay in procuring the NBS computer.

Outlay Effect: This deferral action will have no effect on FY 1982 outlays.

D82-249A

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of Publication 93-344

This report revises Deferral No. D82-249, transmitted to the Congress on June 2, 1982.

The amount deferred for the Salaries and expenses (special foreign currency program) account is $1,950,000, an increase of $1,250,000 over the amount previously reported as deferred. This increase is a result of additional budgetary resources realized from recoveries of prior year obligations, additional reimbursements, and savings resulting from foreign exchange rate changes.

[FR Doc. 82-26816 Filed 9-28-82; 8:45 am]
BILLING CODE 3110-01-C

Deferral No: D82-249A

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: United States Information Agency *1/	New budget authority (P.L. 97-161) $ 9,800,000
Bureau:	Other budgetary resources 2,769,243*
Appropriation title & symbol: Salaries and expenses, (special foreign currency program) 67X0205	Total budgetary resources 12,569,243*
	Amount to be deferred: Part of year ____ Entire year 1,950,000*
OMB identification code: 67-0205-0-1-154	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other ____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification:* The United States Information Agency (USIA) is authorized to carry out international communication, cultural and education exchange programs. The "Salaries and expenses (Special Foreign Currency Program)" account is used to pay USIA local program expenses in U.S.-owned foreign currencies in those countries where the Department of Treasury determines that the supply of local currency is in excess of the normal requirement of the U.S. Government. In fiscal year 1982, the "excess currency" countries are Burma, Guinea, India, and Pakistan.

The amounts available under this appropriation exceed 1982 program requirements due to a higher unobligated balance carryover than originally estimated. Also, additional budgetary resources have been realized from recoveries of prior year obligations, increased reimbursements, and savings resulting from exchange rate changes. The excess funds are being reserved for contingencies under provisions of the Antideficiency Act (31 U.S.C. 665) and will be used for program needs in succeeding years.

Estimated Effects: None. The amount deferred could not be obligated before fiscal year 1983.

Outlay Effect: There is no outlay effect from this deferral, because the funds would not be obligated if made available.

* Revised from previous report.
1/ Formerly the International Communication Agency.

Part VI

Environmental Protection Agency

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Policy Statement on Revocation of Tolerances for Cancelled Pesticides

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP-00145; PH-FRL 2157-3]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Policy Statement on Revocation of Tolerances for Cancelled Pesticides

AGENCY: Environmental Protection Agency (EPA).

ACTION: Rule related notice.

SUMMARY: The purpose of this policy is to describe when and how tolerances will be revoked and action levels substituted for certain pesticide chemicals for which registered uses have been cancelled or which may be cancelled in the future, and what factors will be considered in setting action levels.

FOR FURTHER INFORMATION CONTACT: Mary Waller, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 716E, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-7700).

SUPPLEMENTARY INFORMATION: This notice sets forth a policy regarding the revocation of formal tolerances for cancelled pesticides and, where necessary, the establishment of action levels for these pesticides. The Food and Drug Administration (FDA), and the Agricultural Marketing Service (AMS) and Food Safety and Inspection Service (FSIS) of the U.S. Department of Agriculture have reviewed and agreed with the policy statement.

The purpose of this policy is to provide a mechanism for establishing action levels in the place of formal tolerances for persistent pesticides which may be cancelled in the future, as well as a mechanism for replacing formal tolerances with action levels for residues of certain persistent pesticides which were subject to past EPA cancellation actions.

Pesticides which were cancelled under FIFRA without the revocation of the corresponding tolerances include: DDT and TDE in 1972 (37 FR 13369), aldrin/dieldrin in 1975 (39 FR 37246) and BHC in 1978 (43 FR 31432). The tolerances were not revoked because the pesticides in question were persistent in the environment, and hence residues were expected to be present in raw agricultural commodities, processed foods and feeds for a significant time period.

The mechanism announced in this notice will allow the replacement of formal tolerances with action levels for persistent pesticides which degrade very slowly in the environment and thus may continue to occur in the food for many years after the legal application of the pesticide has ceased. The agencies are concerned that having formal tolerances remaining in effect for cancelled pesticides may serve to condone use of these pesticides in this country and/or in or on commodities imported from foreign countries. The agencies believe that steps should be taken to replace such tolerances with action levels that cover only unavoidable residue levels of cancelled pesticides in or on raw agricultural commodities, and processed foods and feeds.

This notice discusses the rationale for replacing formal tolerances with action levels for certain cancelled pesticides. This notice also details the criteria that will normally be used in determining appropriate action levels and the mechanisms which will be utilized to replace such tolerances with action levels, both for pesticides which were previously cancelled and for pesticides which will be the subject of future cancellation actions.

I. Pesticide Regulation Under FIFRA

The Environmental Protection Agency has the authority under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (FIFRA), 7 U.S.C. 136, *et seq.*, to regulate the use of pesticide chemicals in the United States. The Act requires that all pesticides which are sold and distributed in the United States must be registered in accordance with the statutory standard for registration set forth in FIFRA. That standard requires, among other things, that the pesticide perform its intended function without causing "unreasonable adverse effects on the environment" (FIFRA, section 3(c)(5)). Under section 6 of FIFRA, the Administrator may cancel the registration of a use of a pesticide or modify the terms and conditions of registration whenever she determines that the use of the pesticide no longer satisfies the statutory standard for registration.

II. Establishment of Tolerances for Use Under FFDCA

For a pesticide to be sold and used in the production of a crop or an animal, generally the pesticide must not only be registered for the particular use under FIFRA, but also must have a tolerance (maximum allowable limit of pesticide residue) or an exemption from a tolerance under the Federal Food, Drug, and Cosmetic Act (FFDCA) (21 U.S.C. 301, *et seq.*) for each individual crop or for the meat of animals on which it will be used or may be present because of another approved use. The FFDCA authorizes the establishment of tolerances and exemptions from tolerances for residues of pesticide chemicals in or on raw agricultural commodities, and the promulgation of food additive regulations for pesticide residues in processed food.

Under section 408 of the FFDCA, a registrant or applicant can file a petition proposing issuance of a formal tolerance or an exemption from such a tolerance for residues of a pesticide chemical in or on raw agricultural commodities or the agency can initiate a tolerance regulation on its own or at the request of any interested person. An agency proposal is published in the **Federal Register** with a complete discussion of the residue and toxicology data which were reviewed by the agency. For a registrant-proposed tolerance, a very brief notice of filing is published in the **Federal Register** within 30 days of filing, and the data base which was reviewed is detailed in the final tolerance rule. A 30-day comment period is provided during which a request for an advisory committee review of the proposed tolerance may be submitted. If the agency does not receive a request for an advisory committee review within the 30-day comment period, the final tolerance regulation can be published at the end of the comment period. Where a request for an advisory committee review is submitted, the agency can publish a final regulation after receipt of the advisory committee review. A hearing on a final tolerance rule can be requested within 30 days of publication of the final rule. Section 409 provides similar procedures for the establishment of tolerances for residues of pesticide chemicals in or on processed foods at the request of any person or by agency action.

In 1970, pursuant to Reorganization Plan No. 3 of 1970, 84 Stat. 3086, the authority for establishing pesticide chemical tolerances and exemptions from tolerances under the FFDCA was transferred from the Food and Drug Administration to the Administrator of EPA. The FDA, however, retained the authority to enforce these tolerances, and to implement seizure actions and regulatory sanctions against raw agricultural commodities or processed foods, other than meat, poultry and products thereof, and egg products in certain circumstances, which are found to be in violation of the adulteration provisions of the FFDCA. In the exercise of this enforcement authority, FDA

conducts a nationwide monitoring program in which representative food samples are analyzed for residues of pesticide chemicals. The surveillance of meat, poultry, and products thereof, for pesticide residues is carried out by the Food Safety and Inspection Service and the surveillance of egg products for pesticide residues is carried out by the Agricultural Marketing Service under the authority granted by the Federal Meat Inspection Act (21 U.S.C. 601, *et seq.*), the Poultry Products Inspection Act (21 U.S.C. 451, *et seq.*), and the Egg Products Inspection Act (21 U.S.C. 1031, *et seq.*). The FSIS, and AMS are authorized to take enforcement action against meat, poultry, products thereof, and egg products which are found to be adulterated in contravention of the provisions of the above-mentioned Acts.

III. Establishment of Action Levels

Food sometimes contains pesticide chemical residues not because of purposeful, direct application, but rather because the pesticide persists in the environment and subsequently contaminates the food. Thus, the presence of the residue in the food cannot be prevented or removed by good agricultural or manufacturing practice. Consequently, residues of pesticides may be present long after cancellation has occurred. In the absence of a tolerance, FDA, FSIS, and AMS rely on an action level recommended by the EPA in determining whether the pesticide chemical is present at levels which make it unsafe and whether regulatory action should be taken. This level is then applied by the FDA, FSIS, and AMS in their regulatory programs.

In determining what action level should be used, the criteria of section 406 of the FFDCA are followed; that is, the level must be sufficient to protect the public health, while also taking into account the extent to which the contaminant is unavoidable. These criteria and the procedures for setting action levels are set forth in FDA's regulations for poisonous or deleterious substances in food (21 CFR Part 109), which were published in the **Federal Register** of Friday, September 30, 1977 (42 FR 52814).

IV. Rationale for Replacing Tolerances With Action Levels

When a pesticide's registration for a food or feed use is cancelled because of concern about the safety of the pesticide, the associated tolerance for use or food additive regulation is no longer justified and logically should be revoked. The tolerance revocation should discourage misuse, i.e., the illegal application of a cancelled pesticide, as well as discourage persons in other countries from exporting to the United States food bearing residues of pesticides which can no longer be legally used in the United States because of safety reasons. For pesticides which degrade rapidly in the environment, particularly in the soil, revoking the tolerance should cause no problem because any pesticide residues remaining from applications prior to the cancellation action would not be expected to be present at detectable levels. However, for pesticides which persist in the environment, i.e., which take long periods of time to degrade, crops may contain detectable residues of these pesticides, perhaps even at or near the tolerance levels, for many years after the application of the cancelled pesticide has ceased. Similarly, the meat of animals fed crops containing such residues may also contain such residues. If the formal tolerances for persistent pesticides were revoked and no other action were taken, land to which the cancelled pesticides have been applied could be unavailable for crop use for many years to come. Therefore, in order to avoid unfairly penalizing food producers whose commodities may still contain unavoidable residues of persistent pesticides which can no longer be legally applied, the agencies have agreed to establish action levels to replace formal tolerances that will be revoked. The action levels will be reviewed periodically and lowered as the chemicals dissipate from the environment.

V. Factors Considered in Setting Acton Levels

EPA has developed certain factors which will be considered during its deliberations on recommending action levels. These same factors will be used to lower the action levels as subsequent data, reviewed periodically, indicate that these chemicals are still present in foods at declining levels. The factors to be considered during action level review are as follows:

1. *Limit of action level.* Action levels will be set limiting the quantity of a pesticide in or on food commodities to the extent necessary to protect the public health. In determining the quantity of pesticide that can be tolerated in or on food or feed commodities, consideration will be given to the extent to which the pesticide cannot be avoided in the production of such commodities. Consideration will also be given to other ways in which the consumer may be affected by the same pesticide or other poisonous or deleterious substances.

2. *Review of surveillance data.* Surveillance data on pesticide residues collected by (a) FDA for food or feed crops, dairy products, and eggs, (b) FSIS for meat and poultry, and (c) AMS for egg products or any other monitoring data available will be reviewed by EPA to determine the current anticipated unavoidable residue levels for a cancelled pesticide. EPA will also review available toxicology data to determine if these residue levels would be unsafe. It is conceivable that, for a given pesticide, no residue level would be acceptable because of the health risk and the agency would be obliged to conclude that the tolerance should be revoked with the concurrent establishment of an action level no higher than the accepted chemical limit of detection.

3. *Crop grouping assessments.* Action levels will be set on crop groups rather than on individual crops, whenever possible, in accordance with the crop groupings listed in 40 CFR 180.34 and the proposed crop grouping scheme as published in the **Federal Register** of May 13, 1982 (47 FR 20635).

4. *Codex review.* Consideration will be given to harmonizing EPA-recommended action levels with those pesticide residue limits recommended by the Codex Alimentarious Commission (Codex). Codex is an international organization set up under the auspices of the Food and Agricultural Organization of the United Nations and the World Health Organization. One of Codex's functions is to develop and recommend tolerances on an international basis. A Codex maximum residue limit (MRL) corresponds in basis and effect to EPA tolerance levels and a Codex extraneous residue limit (ERL) usually corresponds in basis and effect to action levels used by FDA, FSIS, and AMS for unavoidable residues in foods.

VI. Procedure for Converting Tolerances to Action Levels for Pesticides Which Were Previously Cancelled

A **Federal Register** notice will be published setting forth a proposal by EPA to revoke the tolerance involved and stating the reasons for this action. The procedures which must be followed for issuing a regulation repealing a tolerance are set forth in section 408(d), (e), (f), and (g) of the FFDCA for raw agricultural commodities and section 409(d), (e), (f), and (g) of that Act for processed foods. Procedural regulations pertaining to these provisions of the FFDCA are found in 40 CFR 180.7, *et seq.* Once a tolerance revocation becomes effective, an action level will,

where appropriate, be used by FDA, FSIS, and AMS.

VII. Procedure for Converting Tolerances to Action Levels for Pesticides Which Will Be Cancelled in the Future

In the future, when a notice of intent to cancel the pesticide is published, a proposed tolerance revocation notice issued by EPA will be published and simultaneously, if possible, a notice proposing the establishment of an action level will also be published. EPA may request surveillance information from FDA, FSIS, and AMS about pesticide residue levels in food or feed crops, dairy products, eggs and egg products, meat, and poultry in the following situations: (1) Prior to a final cancellation action when concerns have been raised that the use of the pesticide may produce unreasonable adverse effects on the environment; or (2) after the final cancellation action, as applicable. EPA will evaluate these data in light of the toxicological concerns, and recommend to FDA, FSIS, and/or AMS as soon as possible, appropriate action levels to replace the current formal tolerances in accordance with the criteria and procedures set forth in this notice. This mechanism will allow any affected parties to request advisory committee review of the proposed tolerance revocation action during the same 30-day time period provided for hearing requests on the cancellation action.

In the event that a request for submission of the proposed tolerance revocation to an advisory committee is submitted for a tolerance established under section 408 of FFDCA, the advisory committee review will take place prior to the completion of administrative hearings on the cancellation action. By statute, the advisory committee must submit its report and recommendations within 90 days of receipt of the referral; thus, in all likelihood, the advisory committee review will be completed before the beginning of the testimony phase of the cancellation hearing. Whether or not an advisory committee referral is requested, a final tolerance revocation notice will not be published in the **Federal Register** until the administrative conclusion of a cancellation action. The regulation revoking the tolerance is effective upon publication and until such time as it is modified, e.g., by a subsequent regulation issued after a public hearing. In a situation where the cancellation action allows the sale and/or use of existing stocks for a finite time period, the final tolerance revocation notice will not be issued until the expiration of the time period during which these existing stocks could be legally sold and/or used or until the time when residues will not result from the legal use of the pesticide.

In addition to the determination at the end of a cancellation hearing under FIFRA, section 6(b)(1) or 6(b)(2), that some or all the uses of a pesticide are cancelled, a cancellation action can be concluded by the voluntary cancellation of a pesticide by a registrant or failure to request a hearing following the issuance of a notice of intent to cancel under section 6(b)(1). It is anticipated that in the case of cancellation actions that do not follow an administrative hearing, a request for advisory committee review will occur rarely and that, in most cases, the final tolerance revocation notice will be issued shortly after the expiration of the 60-day comment period on the proposed notice of revocation.

For the revocation of food additive regulations under section 409 of the FFDCA, the proposed revocation notice will be published at the same time the notice of intent to cancel the pesticide is published. A notice proposing the establishment of an action level will be published simultaneously, if possible, with the revocation notice. Since section 409 of the FFDCA does not provide a procedure for submission to an advisory committee of proposed food or feed regulation revocations, a final order may be published if no objections are received within 60 days after the publication of the proposed order. The EPA will not promulgate a final revocation notice for publication until the administrative conclusion of a cancellation action. A 30-day period is provided for hearing requests on the final revocation order.

This revocation is effective upon publication in the **Federal Register**; the Administrator may, however, stay the effectiveness of the order if a hearing request is received in response to the revocation notice.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agriculture commodities, Pesticides and pests.

Dated: April 12, 1982.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 47, No. 190
Thursday, September 30, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 27, 28, and 61

Cotton and Cottonseed; Revision in Fees

AGENCY: Agricultural Marketing Service.

ACTION: Final rulemaking.

SUMMARY: The proposed rulemaking of July 16, 1982 (47 FR 30995), to revise fees due to the increased costs of providing cotton classing, cotton linters grading and related services, and supervision of cottonseed grading, is made final.

EFFECTIVE DATE: October 1, 1982.

FOR FURTHER INFORMATION CONTACT: Loyd R. Frazier, Chief, Marketing Services Branch, Cotton Division, AMS, USDA, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: This action has been reviewed under the USDA procedure established in accordance with Executive Order 12291 of February 17, 1981 and has been classified "non-major" as it does not meet the criteria contained therein for major regulatory actions. William T. Manley, Deputy Administrator for Marketing Programs Operations, has determined that this action will not have a significant impact on a substantial number of small business entities because (i) use of the services is voluntary; and (ii) further, if there is any impact, the Secretary is required by statute to make the services available and to recover the costs of the services from the users of the services. This final rule becomes effective on October 1, 1982, less than 30 days after the publication date, because current revenue does not cover the cost of providing the service at this time and since all of these services are directly related to the marketing of cotton, it is desirable that all fee increases have a uniform effective date of October 1, 1982, the beginning of Fiscal Year 1983. Accordingly, under the administrative provisions of 5 U.S.C. 533, good cause is shown for making this action effective October 1, 1982.

The United States Cotton Standards Act (7 U.S.C. 51–65), United States Cotton Futures Act (7 U.S.C. 15b), and Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627) authorize the Secretary of Agriculture to provide cotton classing, cotton linters grading and related services and supervision of cottonseed grading to the public on a fee basis. The Secretary is further directed to set such fees for these services as will allow USDA to recover the costs of providing the services.

The services provided include cotton classing, cotton linters grading and cottonseed grading supervision. Due to increases of USDDA costs in providing these services since the last adjustment in fees on October 1, 1981 (46 FR 48111–48113), an average increase in fees of about 5 percent was published in a notice of proposed rulemaking on July 16, 1982 (47 FR 30995). No comments were received during the 60-day comment period and the proposed amendments are adopted without change.

Many factors are considered in calculating the cost of providing services. Increases in personnel costs have had the most significant impact on these costs. Federal salaries have increased 4.8 percent since October 1, 1981. Some increases in expenditures for rent, utilities, and communications have also occurred during that period.

These increases, along with increased costs for supplies and materials, are responsible for an overall increase in the costs of providing services of approximately 5 percent.

List of Subjects

7 CFR Part 27

Classification, Cotton, Micronaire, Samples.

7 CFR Part 28

Cotton linters, Grades, Staples.

7 CFR Part 61

Cottonseed, Chemists, and Grades.

Therefore the following regulatory sections are amended as follows:

PART 27—COTTON CLASSIFICATION UNDER COTTON FUTURES LEGISLATION

1. Section 27.80 is amended by revising paragraphs (a), (b), (d), (e), (f), (g), and (h) to read as follows:

§ 27.80 Fees; classification, micronaire, and supervision.

For services rendered by the Cotton Division pursuant to this subpart, whether the cotton involved is tenderable or not, the person requesting the services shall pay fees as follows:

(a) Initial classification and certification—95 cents per bale.

(b) Review classification and certification—$1.15 per bale.

* * * * * *

(d) Combination service—$2.10 per bale. (Initial classification, review classification, and Micronaire determination covered by the same request and only the review classification and Micronaire determination results certified on cotton class certificates.)

(e) Supervision, by a supervisor of cotton inspection, of the inspection, weighing, or sampling of cotton when any two or more of these operations are performed together—$1.15 per bale.

(f) Supervision, by a supervisor of cotton inspection, of the inspection, weighing, or sampling of cotton when any one of these operations is performed individually—$1.15 per bale.

(g) Supervision, by a supervisor of cotton inspection, of transfers of cotton to a different delivery point, including issuance of new cotton class certificates in substitution for prior certificates)—$2.20 per bale.

(h) Supervision, by a supervisor of cotton inspection, of transfers of cotton to a different warehouse at the same delivery point, including issuance of new cotton class certificates in substitution for prior certificates)—$1.50 per bale.

(90 Stat. 1841–1846; (7 U.S.C. 15b))

PART 28—COTTON CLASSING, TESTING, AND STANDARDS

2. Section 28.116 is amended by revising paragraph (a) to read as follows:

§ 28.116 Amounts of fees for classification; exemption.

(a) For the classification of any cotton or samples, the person requesting the services shall pay a fee, as follows, subject to the additional fee provided in paragraph (c) of this Section:

(1) Grade, staple, and micronaire reading—$1.05 per sample.

(2) Grade and staple only—90 cents per sample.

(3) Grade only or staple only—65 cents per sample.

(4) Micronaire reading only—20 cents per sample.

* * * * *

3. Sections 28.117, 28.120, 28.122, 28.148, and 28.149 are revised to read as follows:

§ 28.117 Fee for new memorandum or certificate.

For each new memorandum or certificate issued in substitution for a prior memorandum or certificate at the request of the holder, thereof, on account of the breaking or splitting of the lot of cotton covered thereby or otherwise for his business convenience, the person requesting such substitution shall pay a fee of $1.90 per sheet.

§ 28.120 Expenses to be borne by party requesting classification.

For any samples submitted for Form A or Form D determinations, the expenses of inspection and sampling, the preparation of the samples, and the delivery of such samples to the classification room or other place specifically designated for the purpose by the Director shall be borne by the party requesting the classification. For samples submitted for Form C determinations, the party requesting the classification shall pay the fees prescribed in this subpart and, in addition, a fee of $14.65 per hour, or each portion thereof, plus the necessary traveling expenses and subsistence, or per diem in lieu of subsistence, incurred on account of such request, in accordance with the fiscal regulations of the Department applicable to the Division employee supervising the sampling.

§ 28.122 Fee for practical classing examination.

The fee for the complete practical classing examination for cotton or cotton linters shall be $95. Any applicant who passes both parts of the examination may be issued a certificate indicating this accomplishment. Any person who passes one part of the examination, either grade or staple, and fails to pass the other part, may be reexamined for that part that was failed. The fee for this partial reexamination is $52.

§ 28.148 Fees and costs; classification: reviews; other.

The fee for the classification, comparison, or review of linters with respect to grade, staple, and character or any of these qualities shall be at the rate of 95 cents for each bale or sample involved. The provisions of §§ 28.115 through 28.126 relating to other fees and costs shall, so far as applicable apply to services performed with respect to linters.

§ 28.149 Fees and costs; Form C determination.

For samples submitted for Form C determination, the party requesting the classification shall pay the fees prescribed in this subpart and, in addition, a fee of $14.65 per hour, or each portion thereof, plus the necessary traveling expenses and subsistence, or per diem in lieu of subsistence, incurred on account of such request, in accordance with the fiscal regulations of the Department applicable to the Division employee supervising the sampling.

(Sec. 10, 42 Stat. 1519; 7 U.S.C. 61, unless otherwise noted)

4. Section 28.184 is revised to read as follows:

§ 28.184 Cotton linters; general.

Requests for the classification or comparison of cotton linters pursuant to this subpart and the samples involved shall be submitted to the Cotton Division. All samples classed shall be on the basis of the official cotton linters standards of the United States. The fee for classification or comparison and the issuance of a memorandum showing the results of such classification or comparison shall be 95 cents per sample.

(Sec. 205, 60 stat. 1090, as amended; 7 U.S.C. 1624)

PART 61—COTTONSEED SOLD OR OFFERED FOR SALE FOR CRUSHING PURPOSES (INSPECTION SAMPLING AND CERTIFICATION)

5. Sections 61.43, 61.44, 61.45, and 61.46 are revised to read as follows:

§ 61.43 Fee for sampler's license.

In the examination of an applicant for a license to sample and certificate official samples of cottonseed the fee shall be $15, but no additional charge shall be made for the issuance of a license. For each renewal of a sampler's license the fee shall be $13.

§ 61.44 Fee for chemist's license.

For the examination of an applicant for a license as a chemist to analyze and certificate the grade of cottonseed the fee shall be $300, but no additional charge shall be made for the issuance of a license. For each renewal of a chemist's license the fee shall be $100.

§ 61.45 Fee for certificates to be paid by licensee to Service.

To cover in part the cost of administering the regulations in this part each licensed cottonseed chemist shall pay to the Service $1.15 for each certificate of the grade of cottonseed issued by him. Upon receipt of a statement from the Service each month showing the number of certificates issued by the licensee, such licensee will forward the appropriate remittance in the form of a check, draft, or money order payable to the "Agricultural Marketing Service, USDA."

§ 61.46 Fees for the review of grading of cottonseed.

For the review of the grading of any lot of cottonseed, the fee shall be $39. Remittance to cover such fee, in the form of a check, draft, or money order payable to the "Agricultural Marketing Service, USDA" shall accompany each application for review. Of each such fee collected, $13 shall be disbursed to each of the two licensed chemists designated to make reanalysis of such seed.

(Secs. 203 and 205, 60 Stat. 1087 and 1090, as amended; 7 U.S.C. 1622–1624)

Dated: September 27, 1982.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

BILLING CODE 3410-02-M

---

7 CFR Part 981

Handling of Almonds Grown in California; Salable, Reserve, and Export Percentages for the 1982–83 Crop Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule establishes salable, reserve, and export percentages of 98 percent, 2 percent, and 0 percent, respectively, for marketable California almonds received by handlers during the 1982–83 crop year, which began July 1, 1982. This action is taken under the marketing order for almonds grown in California and is designed to encourage the development of almond butter and

school lunch outlets as viable long-term markets for almonds.

EFFECTIVE DATES: July 1, 1982, through June 30, 1983.

FOR FURTHER INFORMATION CONTACT: J. S. Miller, Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified a "nonmajor" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because it will result in only minimal costs being incurred by the regulated 29 handlers.

It is found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553). The marketing order for California almonds requires that the salable, reserve, and export percentages established for a particular crop year apply to all marketable almonds received by handlers from the beginning of that year. The 1982–83 crop year began July 1, 1982, and handlers are now receiving new crop almonds.

Notice of this action was published in the August 27, 1982, issue of the **Federal Register** (47 FR 37911), and interested persons were afforded an opportunity to submit written comments. One comment was received.

The authority to establish salable, reserve, and export percentages is pursuant to § 981.47 of the marketing agreement and Order No. 981, both as amended (7 CFR Part 981), regulating the handling of almonds grown in California and hereinafter referred to collectively as the "order". The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The percentages were unanimously recommended by the Almond Board of California, hereinafter referred to as the "Board", which works with the USDA in administering the order.

Pursuant to §§ 981.47 and 981.49 of the order, the Board based its recommendation for salable, reserve, and export percentages of 98 percent, 2 percent, and 0 percent, respectively, on estimates of marketable supply and combined domestic and export trade demand for the current crop year. The Board's marketable supply estimate of 340 million pounds is based upon its 1982 crop estimate of 365 million pounds minus and estimated weight loss of 25 million pounds. The weight loss is expected from the removal of inedible kernels by handlers and losses during manufacturing.

Trade demand is estimated at 360 million pounds—140 million pounds for domestic needs and 220 million pounds for export needs. An inventory adjustment is made to account for supplies of almonds carried in from the 1981–82 marketing year and for supplies deemed desirable to be carried out on June 30, 1983, for early season shipments during the 1983–84 crop year until the 1983 crop is available for market. After adjusting for inventory, the salable supply is calculated at 333.2 million pounds, the quantity of almonds from the 1982 estimated marketable production necessary for trade demand needs. The salable percentage of 98 percent is established to meet those needs.

The remaining two percent (6.8 million pounds) of the 1982 marketable production must be withheld by handlers to meet their reserve obligations. These almonds will be available to develop outlets noncompetitive with normal domestic and export outlets. The development of such outlets is a long-term necessity for the industry because of anticipated larger crops. The Board plans to use the reserve to develop a market for almond butter and has presented an industry-wide project. The Board's objective is to develop a permanent consumer demand for almond butter and related products that, in time, will absorb a large quantity of almonds. To insure success with this project, the Board believes that initially it is necessary to keep almond butter competitive with peanut butter, which currently dominates the market. In addition, the Board plans to promote the use of almonds in school lunch programs with the objective of encouraging school authorities to buy almonds for those programs on a regular basis. Reserve almonds could also be disposed of in other eligible noncompetitive outlets authorized by the order.

The order permits the Board to include normal export requirements with domestic requirements in its estimate of trade demand when recommending the establishment of salable, reserve, and export percentages for any crop year. For the 1982–83 crop year, estimated exports are included in trade demand, thereby making export a salable outlet rather than a reserve outlet. Because of this action, no portion of the reserve will be eligible for export to normal outlets. Thus, an export percentage of 0 is established.

A complete tabulation of the estimates and calculations used by the Board in arriving at its recommendation is as follows:

MARKETING POLICY ESTIMATES—1982 CROP

[Kernel weight basis]

	Million pounds	Percent
Estimated production:		
1. 1982 crop	365.0	
2. Loss and exempt—6.85%	25.0	
3. Marketable supply	340.0	
Estimated trade shipments:		
4. Domestic	140.0	
5. Export	220.0	
6. Total	360.0	
Inventory adjustment:		
7. Carryin July 1, 1982	161.0	
8. Estimated carryover June 30, 1983	134.2	
9. Adjustment	(26.8)	
Salable/reserve:		
10. Salable supply (6 plus 9)	333.2	
11. Reserve supply (3 minus 10)	6.8	
12. Salable percent (10÷3×100)		98.0
13. Reserve percent (100% minus 12)		2.0

The commenter expressed opposition to the establishment of a reserve percentage, stating that the reserve would limit almond sales to normal markets and, thereby, increase the price of almonds to consumers. The commenter further stated that the increase in price would, in turn, encourage an inefficient expansion of almond acreage. The comment is denied for the reasons contained in the succeeding paragraph.

While the two percent reserve will limit the supply of almonds available to normal markets to a small extent, it is not expected to have any effect on grower and consumer prices in 1982–83. Moreover, there appears to be no correlation between the establishment of reserve percentages and the rapid increase in almond acreage in recent years. During the 1973–74 crop year through 1981–82 crop year period, reserve percentages were established for only two years: A 3.2 percent reserve in 1976–77 and a 25 percent reserve in 1981–82. Both of these reserves were subsequently revoked because market needs dictated this. Nonetheless, total bearing and non-bearing almond acreage increased from 281,528 acres to 407,706 acres during that period.

List of Subjects in 7 CFR Part 981

Marketing agreements and orders, Almonds, California.

Therefore, after consideration of all relevant matter presented, including that in the notice, the Board's recommendation, the comment received, and other available information, it is further found that the establishment of salable, reserve, and export

percentages, as hereinafter set forth, will tend to effectuate the declared policy of the act.

The marketing percentages are as follows: (This subpart will not appear in the Code of Federal Regulations).

PART 981—ALMONDS GROWN IN CALIFORNIA

Subpart—Salable, Reserve, and Export Percentages

Section 981.231 is added as follows:

§ 981.231 Salable, reserve, and export percentages for almonds during the crop year beginning July 1, 1982.

The salable, reserve, and export percentages during the crop year beginning July 1, 1982, shall be 98 percent, 2 percent, and 0 percent, respectively.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: September 24, 1982.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division.

7 CFR Part 1004

Milk in the Middle Atlantic Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action suspends for October and November 1982 provisions of the Middle Atlantic order which relate to the percentage of milk not needed for fluid (bottling) use which may be moved directly from farms to manufacturing plants and still be priced under the order. The suspension makes inoperative the 30 percent limit on the percentage of a handler's producer milk which may be diverted to nonpool plants during the months of September through February. The suspension is in response to a request for emergency action made at a public hearing held on August 24, 1982, in Philadelphia, Pennsylvania, to consider proposed amendments that would increase diversion allowances under the order. This action would enable producers who have been regularly associated with the fluid milk market to continue to have their milk pooled and priced under the order pending completion of proceedings on the proposed order amendments that were considered at the hearing.

EFFECTIVE DATE: September 30, 1982.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–6273.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Hearing: Issued August 4, 1982; published August 10, 1982 (47 FR 34573).

This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

This action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers who supply milk for the area will have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Middle Atlantic marketing area.

It is hereby found and determined that for the months of October and November 1982 the following provision of the order does not tend to effectuate the declared policy of the Act:

In § 1004.12, all of paragraph (d) except the introductory text.

Statement of Consideration

This action, based on evidence received at a public hearing held on August 24, 1982, at Philadelphia, Pennsylvania, is requested by Inter-State Milk Producers' Cooperative, a cooperative association which is a handler under the order. It suspends for October and November 1982 the limit on the amount of producer milk which a handler may divert directly from farms to nonpool plants. Currently, a handler may divert to nonpool plants not more than 18 days' production of each producer or, in the alternative, 30 percent of the volume of the handler's total producer milk receipts during the months of September through February.

At the hearing, a proposed amendment was considered that would increase from 30 percent to 40 percent the allowable percentage of a handler's producer milk receipts that may be diverted to nonpool plants. The proponent cooperative, which markets the milk of a substantial number of producers pooled on the Middle Atlantic market, testified that the amendment is necessary to maintain the pool status of its members, who historically have been associated with the market. Proponent requested that the present diversion limits be suspended pending completion of the hearing proceeding.

The basis for the cooperative's request for suspension and proposed amendment is a change from pool status to nonpool status, because of a change in ownership, of a reserve milk processing plant which has been associated with the market for a long time. The plant is located at Belleville, Pennsylvania, and has been a regular outlet for a significant proportion of the market's reserve milk supply handled by proponent cooperative. The cooperative spokesman testified that the change in pool status of the Belleville plant will require that deliveries to the plant be received on a diverted basis in order that producer milk long associated with the market v ill remain pooled. The witness also pointed to continuing trends of increased milk production and declining Class I use as conditions which increase the necessity of diverting Order 4 producer milk to nonpool plants. The additional volume of diversions of producer milk to nonpool plants which Inter-State projected would be required as a result of this combination of factors would be in excess of the 30 percent limit under the order. According to data submitted by proponent at the hearing, actual deliveries by Inter-State to nonpool plants and to the Belleville plant during the months of September through November 1981 exceeded 30 percent of the total producer milk handled by the cooperative.

Representatives of two other cooperative associations marketing milk pooled under the Middle Atlantic order expressed support for the proposed amendments and for the requested suspension. No opposition to either proposal was expressed at the hearing or in post-hearing briefs. The only post-hearing brief received on this issue was filed by proponent, and supported their position taken at the hearing.

Without emergency suspension action, the proponent cooperative would find it necessary to engage in inefficient and costly movements of surplus milk first to pool plants and then to nonpool plants solely for purposes of qualifying producers who otherwise would be excluded from the marketwide pool. Whether or not diversion limits should be increased on a permanent basis by amendment is a matter to be determined after the hearing record and posthearing briefs have been fully reviewed. In the interim, suspension through November is warranted, as it will tend to assure orderly marketing pending the outcome of the hearing proceeding.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that substantial quantities of milk of producers who regularly supply the market otherwise could be excluded from the marketwide pool, thereby causing a disruption in the orderly marketing of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) The marketing problems that provide the basis for this suspension action were fully reviewed at a public hearing held on August 24, 1982, where all interested parties had the opportunity to be heard on proposals to increase the limits on diversions of producer milk to nonpool plants and to suspend those limits pending the outcome of the hearing proceeding.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register.**

List of Subjects in 7 CFR Part 1004

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions of the order (§ 1004.12, all of paragraph (d) except the introductory text) are hereby suspended for the months of October and November 1982.

Effective date: September 30, 1982.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Signed at Washington, D.C. on September 27, 1982.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

SUMMARY: This action establishes a new procedure for announcing Class II prices under the milk orders involved in this proceeding. A tentative Class II price for a particular month would be announced by the 15th day of the preceding month. The final Class II price would be announced by the 5th day after the month and would reflect, if applicable, the use of the Class II (or Minnesota-Wisconsin) price for that month as a "floor" under the Class II price. The amendments are based on industry proposals considered at a public hearing held on February 3, 1982.

EFFECTIVE DATE: November 1, 1982.

FOR FURTHER INFORMATION CONTACT: Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, 202–447–7311.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

Prior documents in this proceeding:

Notice of Hearing: Issued January 4, 1982, published January 7, 1982 (47 FR 814).

Recommended Decision: Issued June 18, 1982 published June 24, 1982 (47 FR 27342)

Final Decision: Issued August 17, 1982, published August 25, 1982 (47 FR 37178).

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are made with respect to each of the aforesaid orders:

(a) *Findings upon the basis of the hearing record.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the aforesaid marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

B. *Determinations:* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within each of the specified marketing areas, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending each of the specified orders, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the respective orders as hereby amended;

(3) The issuance of the order, amending the orders (except the order regulating the handling of milk in the Eastern Ohio-Western Pennsylvania marketing area), is approved or favored by at least two-thirds of the producers, as defined under the terms of each of the orders, who during the determined representative period were engaged in the production of milk for sale within the respective areas; and

(4) The issuance of the order, amending the order, regulating the handling of milk in the Eastern Ohio-Western Pennsylvania marketing area is approved or favored by at least two-thirds of the producers, as defined under the terms of the order, who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the Eastern Ohio-Western Pennsylvania marketing area.

List of Subjects in 7 CFR Parts 1006, 1012, 1013, 1033, 1036, 1040, 1124, 1125, 1133, 1135, and 1139

Milk marketing orders, Milk, Dairy products.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of each of the orders, as amended, and as hereby amended, as follows:

PART 1006—MILK IN THE UPPER FLORIDA MARKETING AREA

1. A new § 1006.19 is added to read as follows:

§ 1006.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1006.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1006.50(b) is revised to read as follows:

§ 1006.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1006.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the basic formula price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 15 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1006.51 and add 15 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1006.51a.

3. A new § 1006.51a is added to read as follows:

§ 1006.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1006.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1006.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighing factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1006.53 is revised to read as follows:

§ 1006.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1006.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1012—MILK IN THE TAMPA BAY MARKETING AREA

1. A new § 1012.19 is added to read as follows:

§ 1012.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1012.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpont of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1012.50(b) is revised to read as follows:

§ 1012.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1012.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the basic formula price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 15 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1012.51 and add 15 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1012.51a.

3. A new § 1012.51a is added to read as follows:

§ 1012.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1012.50 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1012.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Progam for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1012.53 is revised to read as follows:

§ 1012.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1012.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1013—MILK IN THE SOUTHEASTERN FLORIDA MARKETING AREA

1. A new § 1013.19 is added to read as follows:

§ 1013.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1013.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each

Monday through Friday except national holidays.

2. Section 1013.50(b) is revised to read as follows:

§ 1013.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1013.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the basic formula price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 15 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1013.51 and add 15 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1013.51a.

* * * * *

3. A new § 1013.51a is added to read as follows:

§ 1013.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1013.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1013.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1013.53 is revised to read as follows:

§ 1013.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month, and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1013.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1033—MILK IN THE OHIO VALLEY MARKETING AREA

1. A new § 1033.21 is added to read as follows:

§ 1033.21 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1033.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average,

for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday, except national holidays.

2. Section 1033.27(k) is revised to read as follows:

§ 1033.27 Additional duties of the market administrator.

* * * * *

(k) Publicly announce on or before:

(1) The 5th day of each month:

(i) The Class I price for the following month;

(ii) The final Class II price for the preceding month, except that the Class II price announced for the first month during which this paragraph is effective shall be the price specified in the proviso in § 1033.51(b);

(iii) The Class III price for the preceding month; and

(iv) The butterfat differential for the preceding month;

(2) The 12th day of each month, the uniform price for the preceding month; and

(3) The 15th day of each month, the tentative Class II price for the following month.

* * * * *

3. Section 1033.51(b) is revised to read as follows:

§ 1033.51 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the proceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1033.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 10 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1033.50 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1033.51a.

* * * * *

4. A new § 1033.51a is added to read as follows:

§ 1033.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1033.50 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1033.21 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

PART 1036—MILK IN THE EASTERN OHIO-WESTERN PENNSYLVANIA MARKETING AREA

1. A new § 1036.20 is added to read as follows:

§ 1036.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1036.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1036.50(b) is revised to read as follows:

§ 1036.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1036.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 10 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1036.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1036.51a.

* * * * *

3. A new § 1036.51a is added to read as follows:

§ 1036.51a Basic Class II formula price.

The "Basic Class II formula price" for the month shall be the basic formula price determined pursuant to paragraph (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1036.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factors used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the

yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1036.53 is revised to read as follows:

§ 1036.53 Announcement of class prices.

The market administrator shall announces publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1036.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1040—MILK IN THE SOUTHERN MICHIGAN MARKETING AREA

1. A new § 1040.21 is added to read as follows:

§ 1040.21 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1040.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1040.50(b) is revised to read as follows:

§ 1040.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1040.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the Class III price for the month plus 15 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to §1040.51 and add 15 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1040.51a.

* * * * *

3. A new § 1040.51a is added to read as follows:

§ 1040.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1040.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed using price data determined pursuant to § 1040.21 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the

butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1040.53 is revised to read as follows:

§ 1040.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1040.50(b): And on or before the 15th day of each month the tentative Class II price for the following month.

PART 1124—MILK IN THE OREGON-WASHINGTON MARKETING AREA

1. A new § 1124.20 is added to read as follows:

§ 1124.20 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1124.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previoulsy reported. A work-day is each Monday through Friday except national holidays.

2. Section 1124.22(i) is revised to read as follows:

§ 1124.22 Additional duties of the market administrator.

* * * * *

(i) Publicly announce on or before:

(1) The 5th day of each month:

(i) The Class I price for the following month;

(ii) The Class I butterfat differential for the current month;

(iii) The Class III price for the preceding month;

(iv) The Class II and Class III butterfat differentials for the preceding month; and

(v) The final Class II price for the preceding month, except that the Class II price announced for the first month during which this paragraph is effective shall be the price specified in the proviso in § 1124.51(b);

(2) The 14th day of each month, the uniform prices and the producer butterfat differential, both for the preceding month; and

(3) The 15th day of each month, the tentative Class II price for the following month;

* * * * *

3. Section 1124.51(b) is revised to read as follows:

§ 1124.51 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1124.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price. If the Class III price for the month is computed pursuant to paragraph (c) (1) through (3) of this section, the final Class II price shall be reduced by the amount that the Class III price is less than the basic formula price to the extent such reduction does not cause the Class II price to be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the Class III price for the month plus 25 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1124.50 and add 25 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1124.51a.

* * * * *

4. A new § 1124.51a is added to read as follows:

§ 1124.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1124.50 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross value per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1124.20 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month, and separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

PART 1125—MILK IN THE PUGET SOUND, WASHINGTON MARKETING AREA

1. A new § 1125.19 is added to read as follows:

§ 1125.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1125.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1125.50(b) is revised to read as follows:

§ 1125.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price. If the Class III price for the month is computed pursuant to paragraph (c)(1) through (3) of this section, the final Class II price shall be reduced by the amount that the Class III price is less than the basic formula price to the extent such reduction does not cause the Class II price to be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the Class III price for the month plus 25 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1125.51 and add 25 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1125.51a.

* * * * *

3. A new § 1125.51a is added to read as follows:

§ 1125.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1125.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1125.19 and field factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese:

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section § 1125.53 is revised to read as follows:

§ 1125.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1125.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1133—MILK IN THE INLAND EMPIRE MARKETING AREA

1. A new § 1133.19 is added to read as follows:

§ 1133.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1133.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1133.50(b) is revised to read as follows:

§ 1133.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price. If the Class III price for the month is computed pursuant to paragraph (c) (1) through (3) of this section, the final Class II price shall be reduced by the amount that the Class III price is less than the basic formula price to the extent such reduction does not cause the Class II price to be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the Class III price for the month plus 25 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1133.51 and add 25 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1133.51a.

* * * * *

3. A new § 1133.51a is added to read as follows:

§ 1133.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1133.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1133.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to

determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1133.53 is revised to read as follows:

§ 1133.53 Announcement of class prices and handler butterfat differentials.

The market administrator shall announce publicly on or before:

(a) The 5th day of each month:

(1) The Class I price for the following month;

(2) The Class I butterfat differential for the current month;

(3) The Class III price for the preceding month;

(4) The Class II and Class III butterfat differential for the preceding month; and

(5) The final Class II price for the preceding month, except that the Class II price announced for the first month during which this paragraph is effective shall be the price specified in the proviso in § 1133.50(b);

(b) The 15th day of each month, the tentative Class II price for the following month.

PART 1135—MILK IN THE SOUTHWESTERN IDAHO-EASTERN OREGON MARKETING AREA

1. A new § 1135.19 is added to read as follows:

§ 1135.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1135.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1135.50(b) is revised to read as follows:

§ 1135.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1135.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 10 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1135.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1135.51a.

* * * * *

3. A new § 1135.51a is added to read as follows:

§ 1135.51a Basic Class II formula price.

The "Basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1135.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1135.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c)(1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1135.53 is revised to read as follows:

§ 1135.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1135.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

PART 1139—MILK IN THE LAKE MEAD MARKETING AREA

1. A new § 1139.19 is added to read as follows:

§ 1139.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1139.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) or high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

2. Section 1139.50(b) is revised to read as follows:

§ 1139.50 Class prices.

* * * * *

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1139.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price: *Provided,* That for the first

month this paragraph is effective the Class II price shall be the basic formula price for the month plus 15 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1139.51 and add 15 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1139.51a.

* * * * *

3. A new § 1139.51a is added to read as follows:

§ 1139.51a Basic Class II formula price.

The "basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1139.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1139.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

4. Section 1139.53 is revised to read as follows:

§ 1139.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month; except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1139.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

(Secs 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective Date: November 1, 1982.

Signed at Washington, D.C. on: September 27, 1982.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

[Docket Nos. AO-326-A21, AO-301-A17, AO-309-A23, AO-326-A21-RO1, AO-301-A17-RO1 and AO-309-A23-RO1]

Milk in the Eastern Colorado, Western Colorado and Great Basin Marketing Areas; Order Amending Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action adopts in each of the three milk marketing orders the uniform classification and order format provisions that were incorporated in a large number of other milk orders in 1974, including a 10-cent Class II differential and the use of a single butterfat differential. It also establishes a new procedure for announcing Class II prices in each of the 3 orders. In the Eastern Colorado milk order only, it would permit a handler to consider all his distributing plants as a single unit for purposes of meeting the pooling standards. The amendments are based on industry proposals considered at a public hearing held on February 2, 1982.

EFFECTIVE DATE: November 1, 1982.

FOR FURTHER INFORMATION CONTACT: Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–7311.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

Prior documents in this proceeding:

Notices of Hearing: Issued January 4, 1982; published January 7, 1982 (47 FR 778 and 814).

Recommended Decisions: Issued June 18, 1982; published June 24, 1982 (47 FR 27299 and 27342).

Final Decisions: Issued August 17, 1982; published August 25, 1982 (47 FR 37178 and 37203).

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of

the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are made with respect to each of the aforesaid orders:

(a) *Findings upon the basis of the hearing record.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the aforesaid marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

B. *Determinations:* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Section 8c (9) of the Act) of more than 50 percent of the milk, which is marketed within each of the specified marketing areas, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending each of the specified orders, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the respective orders as hereby amended; and

(3) The issuance of the order, amending the orders, is approved or favored by at least two-thirds of the producers, as defined under the terms of each of the orders, who during the determined representative period were engaged in the production of milk for sale within the respective marketing areas.

List of Subjects in 7 CFR Parts 1137, 1134 and 1136

Milk marketing orders, Milk, Dairy products.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in each of the aforesaid marketing areas shall be in conformity to and in compliance with the terms and conditions of each of the orders, as amended, and as hereby amended, as follows:

In Title 7 of the Code of the Federal Regulations, Parts 1137, 1134 and 1136 are revised to read as follows:

PART 1137—MILK IN THE EASTERN COLORADO MARKETING AREA

Subpart—Order Regulating Handling

General Provisions

Sec.
1137.1 General provisions.

Definitions

1137.2 Eastern Colorado marketing area.
1137.3 Route disposition.

1137.44 Classification of producers milk.
1137.45 Market administrator's reports and announcements concerning classification.

Class Prices

1137.50 Class prices.
1137.51 Basic formula price.
1137.51a Basic Class II formula price.
1137.52 Plant location adjustments for handlers.
1137.53 Announcement of class prices.
1137.54 Equivalent price.

Uniform Price

1137.60 Handlers value of milk for computing uniform price.
1137.61 Computation of uniform price.
1137.62 Announcement of uniform price and butterfat differential.

Payments for Milk

1137.70 Producer-settlement fund.
1137.71 Payments to the producer-settlement fund.
1137.72 Payments from the producer-settlement fund.
1137.73 Payments to producers and to cooperative associations.
1137.74 Butterfat differential.
1137.75 Plant location adjustments for producers and on nonpool milk.
1137.76 Payments by a handler operating a partially regulated distributing plant.
1137.77 Adjustment of accounts.
1137.78 Charges on overdue accounts.

Administrative Assessment and Marketing Service Deduction

1137.85 Assessment for order administration.
1137.86 Deduction for marketing services.

Authority: Secs 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).

General Provisions

§ 1137.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

Definitions

§ 1137.2 Eastern Colorado marketing area.

"Eastern Colorado marketing area" hereinafter called the "marketing area" means all the territory within the perimetric boundaries of the counties listed below, including all territory (municipal, State, or Federal) installations, institutions and other establishments:

Colorado Counties

Adams, Arapahoe, Boulder, Cheyenne, Clear Creek, Crowley, Custer, Denver, Douglas, Elbert, El Paso, Gilpin, Huerfano, Jefferson, Kiowa, Kit Carson, Las Animas, Larimer, Lincoln, Logan, Morgan, Otero, Park, Phillips, Pueblo, Sedgwick, Teller, Washington, Weld, Yuma.

Kansas Counties

Cheyenne, Logan, Sherman, Wallace.

§ 1137.3 Route disposition.

"Route disposition" means any delivery to retail or wholesale outlets (including a delivery by a vendor or a sale from a plant or plant store) of any

fluid milk product classified as Class I milk, other than a delivery to a pool plant or a nonpool plant: *Provided,* That packaged fluid milk products, except filled milk, that are transferred to a distributing plant from a plant with route disposition in the marketing area, and which are classified as Class I under § 1137.40(a), shall be considered as a route disposition from the transferor plant, rather than from the transferee plant, for the single purpose of qualifying it as a pool distributing plant under § 1137.7(a)(1).

§§ 1137.4—1137.6 [Reserved]

§ 1137.7 Pool plant.

Except as provided in paragraph (c) of this section, "pool plant" means:

(a) Any plant, hereinafter referred to as a "distributing pool plant", in which during the month fluid milk products are processed or packaged and from which:

(1) An amount equal to 50 percent or more of the total receipts of Grade A milk (except receipts from distributing pool plants) is disposed of as route disposition, except filled milk. A unit consisting of two or more distributing plants operated by a handler shall be considered as one distrubuting plant for the purpose of meeting the requirements of this subparagraph if each plant separately meets the requirements of paragraph (a)(2) of this section and the handler notifies the market administrator in writing before the first day of the month that the plants should be considered as a unit. The unit shall continue from month to month thereafter without further notification. If, however, there is any change in the composition of the unit, the handler shall notify the market administrator in writing on or before the first day of the month such change is to be made; and

(2) Ten percent or more of such receipts, or 12,000 pounds per day, whichever is less, are disposed of as route disposition, except filled milk, in the marketing area.

(b) Any plant, hereinafter referred to as a "supply pool plant" from which during the month 50 percent of its dairy farm supply of Grade A milk is moved to distributing pool plant(s) as fluid milk products, except filled milk. Any supply plant which has qualified as a pool plant in each of the months of September through February shall be a pool plant in each of the following months of March through August unless written request for nonpool status for any such month(s) is furnished in advance to the market administrator. A plant withdrawn from supply pool plant status may not be reinstated for any subsequent month of March through August unless it fulfills the shipping requirements of this paragraph for such month.

(c) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A plant meeting the requirements of paragraph (a) of this section which also meets the pooling requirements of another Federal order and from which, the Secretary determines, there is a greater quantity of route disposition, except filled milk, during the month in such other Federal order marketing area than in this marketing area, except that if such plant was subject to all the provisions of this part in the immediately preceding month, it shall continue to be subject to all the provisions of this part until the third consecutive month in which a greater proportion of its route disposition, except filled milk, is made in such other marketing area unless, notwithstanding the provisions of this paragraph, it is regulated under such other order;

(3) A plant meeting the requirements of paragraph (a) of this section which also meets the pooling requirements of another Federal order on the basis of route disposition in such other marketing area and from which, the Secretary determines, there is a greater quantity of route disposition, except filled milk, during the month in this marketing area than in such other marketing area but which plant is, nevertheless, fully regulated under such other Federal order; and

(4) Any distributing plant from which there is less than an average of 300 pounds of route disposition per day, except filled milk, in the marketing area during the month.

§ 1137.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant which is neither an other order plant nor a producer-handler plant from which fluid milk products are moved during the month to a pool plant.

§ 1137.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) A cooperative association with respect to the milk of its member producers which it causes to be diverted for its account pursuant to § 1137.12;

(c) A cooperative association with respect to the milk of its member producers which is received from the farm for delivery to the pool plant of another handler in a tank truck owned and operated by or under contract to such cooperative association, if the cooperative association notifies the market administrator and the operator of the pool plant to whom the milk is delivered, in writing prior to the first day of the month in which the milk is delivered, that it elects to be the handler for all such milk. Such milk shall be deemed to have been received by such cooperative association at the location of the pool plant to which delivered;

(d) Any person who operates a partially regulated distributing plant;

(e) A producer-handler; and

(f) Any person who operates an other order plant described in § 1137.7(c).

§ 1137.10 Producer-handler.

(a) "Producer-handler" means any person who operates a dairy farm and a milk processing plant from which there is route disposition in the marketing area and who:

(1) Receives no fluid milk products during the month from dairy farmers;

(2) Receives no fluid milk products during the month from any other source except by transfer from a pool plant; and

(3) Receives no other source milk for reconstitution into fluid milk products.

(b) Such person must provide proof satisfactory to the market administrator that the care and management of all the dairy animals and other resources necessary to produce the volume of fluid milk products (excluding transfers from pool plants) and the operation of the processing and distribution business is the personal enterprise of and at the personal risk of such person.

§ 1137.11 [Reserved]

§ 1137.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk eligible for distribution as Grade A milk in compliance with the fluid milk product requirements of a duly constituted health authority, whose milk is received

at a pool plant or diverted to a nonpool plant that is not a producer-handler plant within the limits set forth in paragraph (a)(1) and (2) of this section:

(1) A cooperative association may divert for its account the milk of any member-producer from whom at least three deliveries of milk are received during the month at a distributing pool plant. The total quantity of milk so diverted may not exceed 30 percent in the months of March, April, May, June, July, and December and 20 percent in other months of its member producer milk received at distributing pool plants during the month. Diversions in excess of such percentages shall not be considered producer milk, and the diverting cooperative shall specify the dairy farmers whose milk is ineligible as producer milk. Two or more cooperative associations may have their allowable diversions computed on the basis of the combined deliveries of milk by their member producers if each association has filed such a request in writing with the market administrator on or before the first day of the month the agreement is effective. This request shall specify the basis for assigning over-diverted milk to the producer members of each cooperative according to a method approved by the market administrator.

(2) A handler in his capacity as the operator of a distributing pool plant may divert for his account the milk of any producer, other than a member of a cooperative association which has diverted milk pursuant to paragraph (a)(1) of this section, from whom at least three deliveries of milk are received during the month at his distributing pool plant. The total quantity of milk so diverted may not exceed 30 percent in the months of March, April, May, June, July, and December and 20 percent in other months of the milk received at such distributing pool plant during the month from producers who are not members of a cooperative association which has diverted milk pursuant to paragraph (a)(1) of this section. Diversions in excess of such percentages shall not be considered producer milk, and the diverting handler shall specify the dairy farmers whose milk is ineligible as producer milk.

(3) For the purposes of the requirements of § 1137.7, milk diverted for the account of the operator of a distributing pool plant, except an operator which is also a cooperative association diverting milk in the same month pursuant to paragraph (a)(1) of this section, shall be included in the receipts of the pool plant from which diverted.

(4) For purposes of location adjustments pursuant to §§ 1137.52 and 1137.75, milk diverted to a nonpool plant shall be considered to have been received at the location of the nonpool plant to which diverted.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1137.44(a)(8)(iii) and the corresponding step of § 1137.44(b); and

(3) Any person with respect to milk produced by him which is reported as diverted to an other order plant if any portion of such person's milk so moved is assigned to Class I under the provisions of such other order.

§ 1137.13 Producer milk.

"Producer milk" means all skim milk and butterfat in milk produced by a producer.

(a) With respect to receipts at a pool plant for which the handler operating such plant is to be responsible pursuant to § 1137.60:

(1) Received directly from such producer; and

(2) Diverted from such pool plant to a nonpool plant for the account of the operator of the pool plant, subject to the limitations and conditions provided in § 1137.12;

(b) With respect to the additional receipts of a cooperative association:

(1) For which the cooperative association is the handler pursuant to § 1137.9(b), subject to the limitations and conditions provided in § 1137.12; and

(2) For which the cooperative association is the handler pursuant to § 1137.9(c).

§ 1137.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1137.40(b)(1) from any source other than producers, handlers described in § 1137.9(c), or pool plants;

(b) Receipts in packaged form from other plants of products specified in § 1137.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1137.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1137.40(b)(1)) for which the handler fails to establish a disposition.

§ 1137.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form: Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

§ 1137.16 Fluid cream product.

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

§ 1137.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

§ 1137.18 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines:

(a) To be qualified under the provisions of the Act of Congress of

February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) To have full authority in the sale of milk of its members; and

(c) To be engaged in making collective sales, or marketing milk or its products for its members.

§ 1137.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1137.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

Handler Reports

§ 1137.30 Reports of receipts and utilization.

On or before the seventh day after the end of each month, each handler shall report for the month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1137.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1137.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1137.9 (b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

§ 1137.31 Payroll reports.

(a) On or before the 23rd day after the end of each month, each handler described in § 1137.9 (a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1137.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

§ 1137.32 Other reports.

(a) On or before the seventh day after the end of each month, each handler described in § 1137.9 (a) and (b) who diverted milk to nonpool plants shall report for the month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(1) The name of the plant to which diverted;

(2) The name of the individual dairy farmers so diverted;

(3) The pounds of skim milk and butterfat from each dairy farmer contained in the milk so diverted; and

(4) The number of days milk of the dairy farmer was received at a pool plant of the diverting order.

(b) In addition to the reports required pursuant to §§ 1137.30 and 1137.31 and paragraph (a) of this section, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

Classification of Milk

§ 1137.40 Classes of utilization.

Except as provided in § 1137.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1137.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form other than that specified in paragraph (c)(1)(iv) of this section;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Any concentrated milk product in bulk, fluid form that is used to produce a Class III product;

(v) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(vi) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1137.15; and

(6) In shrinkage assigned pursuant to § 1137.41(a) to the receipts specified in § 1137.41(a)(2) and in shrinkage specified in § 1137.41 (b) and (c).

§ 1137.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1137.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph in amounts equal to 50 times the maximum amount that may be computed pursuant to paragraph (b) (1) through (6) of this section; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product or a bulk fluid cream product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1137.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b) (1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1137.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank

samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

§ 1137.42 Classification of transfers and diversions.

(a) *Transfers to pool plants.* Except as provided in paragraph (e) of this section, skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless both handlers request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1137.44(a)(12) and the corresponding step of § 1137.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1137.44(a)(7) or the corresponding step of § 1137.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1137.44(a) (11) or (12) or the corresponding steps of § 1137.44(b), the skim milk or butterfat so transferred up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1137.40.

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, tranfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or divertor-handler claims such classification in his report of receipts and utilization filed pursuant to § 1137.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(*c*) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this paragraph.

(e) *Transfers by a cooperative association to pool plants.* Skim milk and butterfat transferred in the form of bulk milk by a handler described in § 1137.9(c) and from a pool plant operated by a cooperative association to another handler's pool plant shall be classified pursuant to § 1137.44 pro rata with producer milk received at the transferee-plant and the value thereof at the class prices shall be included in his value of milk pursuant to § 1137.60.

§ 1137.43 General classification rules.

In determining the classification of producer milk pursuant to § 1137.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1137.30 and shall compute separately for each pool plant, and for each cooperative association with respect to milk for which it is the handler pursuant to § 1137.9 (b) or (c) that was not received at a pool plant, the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1137.40, 1137.41, and 1137.42. The combined pounds of skim milk and butterfat so determined in each class for a handler described in § 1137.9 (b) or (c) shall be such handler's classification of producer milk;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1137.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

§ 1137.44 Classification of producer milk.

For each month the market administrator shall determine for each handler described in § 1137.9(a) for each of his pool plants separately the classification of producer milk and milk subject to the provisions of § 1137.42(e) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1137.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1137.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1137.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This paragraph shall apply only if the pool plant was subject to the provisions of this paragraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1137.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1137.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated top Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not

subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (*c*) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler (excluding any duplication of Class I utilization resulting from reported Class I transfers between pool plants of the handler);

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, milk subject to the provisions of § 1137.42(e), fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(*c*) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from another order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1137.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11) (i) and (ii) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler), with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8) (i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received. For purposes of this subtraction at a pool plant operated by a cooperative association, skim milk in fluid milk products transferred to the pool plant of another handler shall be added to the remaining pounds of skim milk in each class pro rata to the market average utilization announced pursuant to § 1137.45(a):

(*i*) Should the pounds of skim milk to be subtracted from Class II and Class III combined pursuant to this subparagraph exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler] by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(ii) Should the pounds of skim milk to be subtracted from Class I pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount, beginning with the nearest plant at which Class I utilization is available;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12) (ii), (iii), and (iv) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1137.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler). For purposes of such computation at a pool plant of a cooperative association, the pounds remaining shall include any remainder of the quantity added pursuant to paragraph (a)(11) of this section;.

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received;

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12) (i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class II and Class III combined that exceeds the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(iv) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12) (i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class I that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount beginning with the nearest plant at which Class I utilization is available;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to §1137.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk and milk subject to the provisions of § 1137.42(e), subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk and milk subject to the provisions of § 1137.42(e) in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to paragraph (a)(14) of this section and the corresponding step of paragraph (b) of this section.

§ 1137.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1137.44(a)(12) and the corresponding step of § 1137.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from another order plant, the class to which such receipts are allocated pursuant to § 1137.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant, the class to which such shipments were allocated by the market administrator of the other order on the basis of the report of the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 12th day after the end of each month, report to each cooperative association which so requests the amount and class utilization of producer milk delivered by members of such association to each handler receiving such milk. For the purpose of this report, the milk so received shall be prorated to each class in acccordance with the total utilization of producer milk by such handler.

Class Prices

§ 1137.50 Class prices.

Subject to the provisions of § 1137.52, the class prices per hundredweight for the month shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $2.30.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1137.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 10 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1137.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1137.51a.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

§ 1137.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

§ 1137.51a Basic Class II formula price.

The "Basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1137.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1137.19 and yield factors in effect

under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

§ 1137.52 Plant location adjustments for handlers.

(a) For milk received from producers and from handlers described in § 1137.9(c) at a pool plant, or diverted to a nonpool plant, located more than 50 miles by shortest highway distance as measured by the market administrator, from the plant to the nearest County Courthouse located in Denver, Colo.; Pueblo, Colo.; or Colorado Springs, Colo., and classified as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section, the price computed pursuant to § 1137.50(a) shall be reduced by 10 cents if such plant is located more than 50 miles but not more than 75 miles from such courthouse, and by an additional 1.5 cents for each 10 miles or fraction thereof that such distance exceeds 75 miles.

(b) For purposes of calculating such adjustment, transfers between pool plants shall be assigned to Class I disposition at the transferee plant, in excess of the sum of receipts at such plant from producers and handlers described in § 1137.9(c), and the pounds assigned as Class I to receipts from other order plants and unregulated supply plants. Such assignment is to be made first to transferor plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

§ 1137.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1137.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

§ 1137.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

Uniform Price

§ 1137.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1137.9(b) and (c) with respect to milk that was not received at a pool plant as follows:

(a) Multiply the pounds of producer milk and milk subject to the provisions of § 1137.42(e) that were classified in each class pursuant to §§ 1137.43(a) and 1137.44(c) by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1137.44(a)(14) and the corresponding step of § 1137.44(b) by the respective class prices, as adjusted by the butterfat differential specified in 1137.74, that are applicable at the location of the pool plant;

(c) Add the following:

(1) The the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant for the current month by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1137.44(a)(9) and the corresponding step of § 1137.44(b); and

(2) The the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class II price for the current month by the lesser of:

(i) The hundredweight of skim milk and butterfat subtracted from Class II pursuant to § 1137.44(a)(9) and the corresponding step of § 1137.44(b) for the current month; or

(ii) The hundredweight of skim milk and butterfat remaining in Class III after the computations pursuant to § 1137.44(a)(12) and the corresponding step of § 1137.44(b) for the preceding month, less the hundredweight of skim milk and butterfat specified in paragraph (c)(1) of this section;

(d) Add the amount obtained from multiplying the difference between the

Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1137.44(a)(7)(i) through (iv) and the corresponding step of § 1137.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1137.44(a)(7)(v) and (vi) and the corresponding step of § 1137.44(b);

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1137.44(a)(11) and the corresponding step of § 1137.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(g) For the first month that this paragraph is effective, subtract the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price, both for the preceding month, by the hundredweight of skim milk and butterfat in any fluid milk product or product specified in § 1137.40(b) that was in the plant's inventory at the end of the preceding month and classified as Class I milk.

§ 1137.61 Computation of uniform price.

For each month the market administrator shall compute the uniform price per hundredweight for milk of 3.5 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 1137.60 for all handlers who filed the reports prescribed by § 1137.30 for the month and who made the payments pursuant to §§ 1137.71 and 1137.73 for the preceding month;

(b) Add an amount equal to the sum of the deductions to be made for location adjustments pursuant to § 1137.75;

(c) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1137.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" per hundredweight of producer milk of 3.5 percent butterfat content delivered to plants at which no location adjustment is applicable.

§ 1137.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

Payments for Milk

§ 1137.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1137.71, 1137.76, and 1137.77, subject to the provision of § 1137.78 and out of which he shall make all payments pursuant to §§ 1137.72 and 1137.77: *Provided,* That any payments due to any handler shall be offset by any payments due from such handler.

§ 1137.71 Payments to the producer-settlement fund.

(a) On or before the 14th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the total amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1137.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1137.75, of such handler's receipts of producer milk and milk subject to the provisions of § 1137.42(e). In the case of a cooperative association which is a handler, less the amount due from other handlers pursuant to § 1137.73(c), exclusive of differential butterfat values; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1137.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more marketwide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

§ 1137.72 Payments from the producer-settlement fund.

On or before the 15th day after the end of each month, the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1137.71(a)(2) exceeds the amount computed pursuant to § 1137.71(a)(1). If, at such time, the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the funds are available.

§ 1137.73 Payments to producers and to cooperative associations.

Except as provided in paragraphs (b) and (c) of this section, each handler except a cooperative association shall make payment as specified in paragraph (a) of this section to each producer from whom milk is received:

(a)(1) On or before the last day of each month, to each producer who had not discontinued shipping milk to such handler before the 18th day of the month, a partial payment with respect to milk received during the first 15 days of the month at the Class III price for the preceding month.

(2) On or before the 18th day after the end of each month, for milk received during such month, an amount computed at not less than the uniform price per

hundredweight pursuant to § 1137.61, as adjusted by the butterfat differential specified in § 1137.74 and location adjustments specified in § 1137.75, plus or minus adjustments for errors made in previous payments to such producers and less:

(i) Payments made pursuant to paragraph (a)(1) of this section;

(ii) Deductions for marketing services pursuant to § 1137.86; and

(iii) Proper deductions authorized in writing by such producer: *Provided,* That if by such date such handler has not received full payment for such delivery period pursuant to § 1137.72 he may reduce his total payment to all producers uniformly by not more than the amount of reduction in payment from the market administrator; the handler shall, however, complete such payments not later than the date for making such payments pursuant to this paragraph next following receipt of the balance from the market administrator.

(b) (1) Upon receipt of a written request from a cooperative association which the market administrator determines is authorized by its members to collect payment for their milk and receipt of a written promise to reimburse the handler the amount of any actual loss incurred by him because of any improper claim on the part of the cooperative association each handler shall pay to the cooperative association on or before the second day prior to the date of payment to producers in lieu of payments pursuant to paragraph (a) of this section an amount equal to the sum of the individual payments otherwise payable to such producers. The foregoing payment shall be made with respect to milk of each producer whom the cooperative association certifies is a member effective on and after the first day of the calendar month next following receipt of such certification through the last day of the month next preceding receipt of notice from the cooperative association of a termination of membership or until the original request is rescinded in writing by the cooperative association; and

(2) A copy of each such request, promise to reimburse and certified list of members shall be filed simultaneously with the market administrator by the cooperative association and shall be subject to verification at his discretion through audit of the records of the cooperative association pertaining thereto. Exceptions, if any, to the accuracy of such certification by a producer claimed to be a member, or by a handler, shall be made by written notice to the market administrator and shall be subject to his determination.

(c) For milk received from a pool plant operated by a cooperative association or from a cooperative association that is a handler pursuant to § 1137.9(c), each handler shall on or before the second day prior to the date payments are due individual producers, pay such cooperative association for such milk as follows:

(1) A partial payment for milk received during the first 15 days of the month at not less than the Class III price for the preceding month; and

(2) A final settlement equal to the value of such milk at the uniform price pursuant to § 1137.61, as adjusted pursuant to §§ 1137.74 and 1137.75, less payment made pursuant to paragraph (c)(1) of this section.

(d) In making the payments to producers pursuant to paragraphs (a)(2) and (b) of this section, each handler shall furnish each producer or cooperative association from whom he has received milk with a supporting statement which shall show for each month:

(1) The month and identity of the handler and of the producer;

(2) The total pounds and the average butterfat content of milk received from such producer;

(3) The minimum rate or rates at which payment to such producer is required pursuant to this part;

(4) The rate which is used in making the payment if such rate is other than the applicable minimum rate;

(5) The amount, or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer.

§ 1137.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1137.75 Plant location adjustments for producers and on nonpool milk.

(a) The uniform price to be paid for milk received at a pool plant from producers, in bulk from pool plants operated by cooperative associations, and from handlers described in § 1137.9(c) may be reduced by the amount of the location adjustment applicable at the location of the pool plant at which such milk was first physically received from producers, and the uniform price for producer milk diverted to a nonpool plant shall be reduced according to the location of such nonpool plant, each at the rates set forth in § 1137.52; and

(b) For the purposes of computations pursuant to §§ 1137.71 and 1173.72 the uniform price shall be adjusted at the rates set forth in § 1137.52 applicable at the location of the nonpool plant from which the milk was received (but not to be less than the Class III price).

§ 1137.76 Payments by the handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to § 1137.30(b) and 1137.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not another order plant to the extent that the equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (except that the Class I price and the uniform price shall not be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3)

of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1137.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1137.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee-plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1137.60 for such handler shall include, in lieu of the value of other source milk specified in § 1137.60(f) less the value of such other source milk specified in § 1137.71(a)(2)(ii), a value of milk determined pursuant to § 1137.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1137.7(b) subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with its reports filed pursuant to §§ 1137.30(b) and 1137.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(*c*) The value of milk determined pursuant to § 1137.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1137.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1137.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

§ 1137.77 Adjustment of accounts.

Whenever audit by the market administrator of any handler's reports, books, records, or accounts, or other verification discloses errors resulting in moneys due a producer, a cooperative association, or the market administrator from such handler or due such handler from the market administrator, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments as set forth in the provisions under which such error occurred.

§ 1137.78 Charges on overdue accounts.

Any unpaid obligation of a handler pursuant to §§ 1137.71 or 1137.77 relative to payments to the producer settlement fund shall be increased one-half of 1 percent on the first day of the month next following the due date of such obligation and on the first day of each month thereafter until such obligation is paid.

Administrative Assessment and Marketing Service Deduction

§ 1137.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 14th day after the end of the month 4 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to:

(a) Producer milk (including milk subject to the provisions of § 1137.42(e) but excluding such milk in the case of a cooperative association which is a handler of milk subject to the provisions of § 1137.42(e)) and such handler's own production;

(b) Other source milk allocated to Class I pursuant to § 1137.44(a) (7) and (11) and the corresponding steps of § 1137.44(b), except such other source milk that is excluded from the computations pursuant to § 1137.60 (d) and (f); and

(c) Route disposition in the marketing area from a partially regulated distributing plant during the month that exceeds the skim milk and butterfat subtracted pursuant to § 1137.76(a)(2).

§ 1137.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to producers for milk (other than milk of his own production) pursuant to § 1137.73, shall deduct 6 cents per hundredweight, or such lesser amount as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 14th day after the end of the month. Such money shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such services from a cooperative association.

(b) In the case of producers who are members of a cooperative association which the Secretary has determined is actually performing the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the

deduction specified in paragraph (a) of this section, such deductions from the payments to be made to producers as may be authorized by the membership agreement or marketing contract between the cooperative association and its members, and on or before the 16th day after the end of each month, the handler shall pay the aggregate amount of such deductions to the cooperative association, furnishing a statement showing the amount of the deductions and the quantity of milk on which the deduction was computed from each producer.

PART 1134—MILK IN THE WESTERN COLORADO MARKETING AREA

Subpart—Order Regulating Handling

General Provisions

General Provisions

§ 1134.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

Definitions

§ 1134.2 Western Colorado marketing area.

"Western Colorado marketing area", hereinafter called the "marketing area", means all the territory within the outer boundaries of the following counties in the State of Colorado:

Delta, Garfield, Mesa, Montrose.

§ 1134.3 Route disposition.

"Route disposition" means any delivery to retail or wholesale outlets (including a delivery by a vendor or a sale from a plant or plant store) of any fluid milk product classified as Class I milk, other than a delivery to a pool plant or a delivery in bulk to a nonpool plant.

§ 1134.4 [Reserved].

§ 1134.5 Distributing plant.

"Distributing plant" means any plant at which fluid milk products are pasteurized or packaged and from which there is route disposition of Grade A fluid milk products in the marketing area.

§ 1134.6 Supply plant.

"Supply plant" means any plant at which Grade A milk is received from dairy farmers and from which fluid milk products are moved to a pool distributing plant.

§ 1134.7 Pool plant.

Except as provided in paragraph (c) of this section, "pool plant" means:

(a) Any plant, hereinafter referred to as a "distributing pool plant", in which during the month fluid milk products are processed or packaged and from which:

(1) An amount equal to 50 percent or more of the total receipts of Grade A milk (except receipts from distributing pool plants) is disposed of as route disposition, except filled milk; and

(2) Ten percent or more of such receipts, or 2,000 pounds per day, whichever is less, are disposed of as route disposition, except filled milk, in the marketing area.

(b) Any plant, hereinafter referred to as a "supply pool plant" from which during the month 50 percent of its dairy farm supply of Grade A milk is moved in the form of fluid milk products, except filled milk, to distributing pool plants. Any supply plant which has qualified as a pool plant in each of the months of September through February shall be a pool plant in each of the following months of March through August, unless written request for nonpool status for any such month(s) is furnished in advance to the market administrator. A plant withdrawn from supply pool plant status may not be reinstated for any of the following months of March through August unless it fulfills the shipping requirements of this paragraph for such month(s).

(c) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) Any distributing plant which would be subject to the classification and pricing provisions of another order issued pursuant to the Act, unless such plant is qualified as a pool plant pursuant to paragraph (a) of this section and there is more route disposition (except filled milk) in this marketing area than in the marketing area defined under such other order;

(3) Any plant qualified pursuant to paragraph (b) of this section for any portion of March through August, inclusive, that the milk at such plant is subject to the classification and pricing provisions of another order issued pursuant to the Act; and

(4) Any distributing plant from which there is less than an average of 200 pounds of route disposition per day, except filled milk, in the marketing area during the month.

§ 1134.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing or processing plant other than a pool plant.

The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant from which fluid milk products are moved during the month to a pool plant.

§ 1134.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) A cooperative association with respect to the milk of its member producers which it causes to be diverted for its account pursuant to § 1134.12;

(c) A cooperative association with respect to milk of its member producers which is delivered from the farm to the pool plant of another handler in a tank truck owned and operated by the association or by a hauler under contract to the association;

(d) Any person who operates a partially regulated distributing plant;

(e) A producer-handler;

(f) Any person who operates an other order plant described in § 1134.7(c); and

(g) A vendor (any person who does not operate a plant described in paragraph (a), (d), (e) or (f) of this section but who engages in the business of receiving fluid milk products for resale and distributes to retail and wholesale outlets, via a mobile delivery vehicle, packaged fluid milk products received from such a plant).

§ 1134.10 Producer-handler.

"Producer-handler" means any person who is an individual, partnership or corporation and who meets all the following conditions:

(a) Operates a dairy farm(s) from which the milk produced thereon is supplied to a plant operated by him in accordance with the conditions set forth in paragraph (b) of this section, and provides proof satisfactory to the market administrator that:

(1) The full maintenance of milk-producing cows on such farm(s) is his sole risk and under his complete and exclusive management and control;

(2) Each such farm is owned or operated by him, at his sole risk, and under his complete and exclusive management and control; and

(3) Only he and no other person (except a member of his immediate family, or a stockholder in the case of a corporate farm) employed on such farm(s) own, fully or partially, either the cows producing the milk on the farm or the farm on which it is produced;

(b) Operates a plant in which milk approved by a duly constituted health authority for fluid consumption is processed or packaged and from which thee is route disposition during the month in the marketing area: *Provided,* That:

(1) No fluid milk products are received at such plant or by him at any other location except:

(i) From dairy farm(s) as specified in paragraph (a) of this section; and

(ii) From pool plants or other order plants in an amount that is not in excess of the lesser of 5,000 pounds or 5 percent of his Class I sales during the month;

(2) Such plant is operated under his complete and exclusive management and control and at his sole risk, and is not used during the month to process, package, receive or otherwise handle fluid milk products for any other person; and

(3) For the purpose of this section, all fluid milk products disposed of as route disposition or at stores operated by him or by any person (including the operator of a plant, or a vendor) who controls or is controlled by him (e.g., as an interlocking stockholder) or in which he (including, in the case of a corporation, any stockholder therein) has a financial interest, shall be considered as having been received at his plant; and the utilization for such plant shall include all such route and store dispositions; and

(c) Disposes of no other source milk (except that represented by nonfat solids used in the fortification of fluid milk products) as Class I milk.

§ 1134.11 [Reserved]

§ 1134.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the inspection requirements for fluid consumption of a duly constituted health authority, whose milk is received at a pool plant or diverted to a nonpool plant that is not a producer-handler plant within the limits set forth in paragraph (a)(1) and (2) of this section:

(1) A cooperative association may divert for its account the milk of any member-producer from whom not less than 3 days' production was received during the month at a distributing pool plant. The total quantity of milk so diverted may not exceed 60 percent in the months of March, April, May, June, July, and August and 30 percent in other months of its member-producer milk received at pool plants during the month. Diversions in excess of such percentages shall not be considered producer milk, and the diverting cooperative shall specify the dairy farmers whose milk is ineligible as producer milk. Two or more cooperative associations may have their allowable diversions computed on the basis of the combined deliveries of milk by their member producers if each association has filed a request in writing with the market administrator on or before the first day of the month the agreement is effective. Such request shall specify the basis for assigning overdiverted milk to the producer-members of each cooperative association, at a time and in a manner approved by the market administrator.

(2) A handler may divert for his account the milk of any producer, other than a member of a cooperative association which has diverted milk pursuant to paragraph (a)(1) of this section, from whom not less than 3 days' production was received during the month at the pool plant. The total quantity of milk so diverted may not exceed 60 percent in the months of March, April, May, June, July, and August and 30 percent in other months of the milk received at such distributing pool plant during the month from producers who are not members of a cooperative association which has diverted milk pursuant to paragraph (a)(1) of this section. Diversions in excess of such percentages shall not be considered producer milk, and the diverting handler, at a time and in a manner approved by the market administrator, shall specify the dairy farmers whose milk is ineligible as producer milk.

(3) For the purpose of the requirements of § 1134.7, milk diverted for the account of the operator of a distributing pool plant, except an operator who is also a cooperative association diverting milk in the same month pursuant to paragraph (a)(1) of this section, shall be included in the receipts of the pool plant from which diverted.

(4) For purpose of location adjustments pursuant to §§ 1134.52 and 1134.75, milk diverted to a nonpool plant shall be considered to have been

received at the location of the pool plant from which diverted.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1134.44(a)(8)(iii) and the corresponding step of § 1134.44(b); and

(3) Any person with respect to milk produced by him which is reported as diverted to an other order plant if any portion of such person's milk so moved is assigned to Class I under the provisions of such other order.

§ 1134.13 Producer milk.

"Producer milk" means all skim milk and butterfat in milk produced by a producer.

(a) With respect to receipts at a pool plant for which the handler operating such plant is to be responsible pursuant to § 1134.60:

(1) Received directly from such producer; and

(2) Diverted from such pool plant to a nonpool plant for the account of the operator of the pool plant, subject to the limitations and conditions provided in § 1134.12;

(b) With respect to the additional receipts of a cooperative association:

(1) For which the cooperative association is the handler pursuant to § 1134.9(b), subject to the limitations and conditions provided in § 1134.12; and

(2) For which the cooperative association is the handler pursuant to § 1134.9(c). If the milk received at a pool plant from a handler described in § 1134.9(c) is purchased on a basis other than farm weights, the amount by which the total farm weights of such milk exceed the weights on which the pool plant's purchases are based shall be producer milk received by the handler described in § 1134.9(c) at the location of the pool plant.

§ 1134.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1134.40(b)(1) from any source other than producers, handlers described in § 1134.9(c), or pool plants;

(b) Receipts in packaged form from other plants of products specified in § 1134.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1134.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1134.40(b)(1)) for which the handler fails to establish a disposition.

§ 1134.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form: Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

§ 1134.16 Fluid cream product.'

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent of more butterfat, with or without the addition of other ingredients.

§ 1134.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

§ 1134.18 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales of, or marketing milk or its products for its members; and (c) Has its entire activities under the control of its members.

§ 1134.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1134.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed

by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, detemine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Divisions, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

Handler Reports

§ 1134.30 Reports of receipts and utilization.

On or before the seventh day after the end of each month, each handler shall report for the month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1134.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1134.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1134.9(b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

§ 1134.31 Payroll reports.

(a) On or before the 23rd day after the end of each month, each handler described in § 1134.9(a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1134.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

§ 1134.32 Other reports.

(a) On or before the seventh day after the end of each month, each handler described in § 1134.9(a) and (b) who diverted milk to nonpool plants shall report for the month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(1) The name of the plant to which diverted;

(2) The name of the individual dairy farmers so diverted;

(3) The pounds of skim milk and butterfat from each dairy farmer contained in the milk so diverted; and

(4) The number of days milk of the dairy farmer was received at a pool plant of the diverting order.

(b) In addition to the reports required pursuant to §§ 1134.30 and 1134.31 and paragraph (a) of this section, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

Classification of Milk

§ 1134.40 Classes of utilization.

Except as provided in § 1134.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1134.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form other than that specified in paragraph (c)(1)(iv) of this section;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Any concentrated milk product in bulk, fluid form that is used to produce a Class III product;

(v) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(vi) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1134.15; and

(6) In shrinkage assigned pursuant to § 1134.41(a) to the receipts specified in § 1134.41(a)(2) and in shrinkage specified in § 1134.41 (b) and (c).

§ 1134.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1134.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section, the maximum pounds computed pursuant to such paragraph divided by 0.02; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product or a bulk fluid cream product;

(b) The shrinkage of skim milk and butterfat, respectively, that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1134.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the slim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the slim milk and butterfat, respectively, in bulk fluid milk products transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b) (1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1134.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determine from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

§ 1134.42 Classification of transfers and diversions.

(a) *Transfers to pool plants.* Except as provided in paragraph (e) of this section, skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless both handlers request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The slim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1134.44(a)(12) and the corresponding step of § 1134.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1134.44(a)(7) or the corresponding step of § 1134.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1134.44(a) (11) or (12) or the corresponding steps of § 1134.44(b), the skim milk or butterfat so transferred up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in

the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1134.40.

(c) *Transfers to producer-handlers.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant or a producer-handler plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or divertor-handler claims such classification in his report of receipts and utilization filed pursuant to § 1134.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(*c*) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this paragraph.

(e) *Transfers by a cooperative association to pool plants.* Skim milk and butterfat transferred in the form of bulk milk by a handler described in § 1134.9(c) and from a pool plant operated by a cooperative association to another handler's pool plant shall be classified pursuant to § 1134.44 pro rata with producer milk received at the transferee-plant and the value thereof at the class prices shall be included in his value of milk pursuant to § 1134.60.

§ 1134.43 General classification rules.

In determining the classification of producer milk pursuant to § 1134.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1134.30 and shall compute separately for each pool plant, and for each cooperative association with respect to milk for which it is the handler pursuant to § 1134.9 (b) or (c) that was not received at a pool plant, the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1134.40, 1134.41, and 1134.42. The combined pounds of skim milk and butterfat so determined in each class for a handler described in § 1134.9 (b) or (c) shall be such handler's classification of producer milk;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1134.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

§ 1134.44 Classification of producer milk.

For each month the market administrator shall determine for each handler described in § 1134.9(a) for each of his pool plants separately the classification of producer milk and milk subject to the provisions of § 1134.42(e) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1134.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1134.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1134.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This paragraph shall apply only if the pool plant was subject to the provisions of this paragraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1134.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1134.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii)(*a*) through (*c*) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler (excluding any duplication of Class I utilization resulting from reported Class I transfers between pool plants of the handler);

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, milk subject to the provisions of § 1134.42(e), fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(*c*) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from another order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1134.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) and (ii) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler), with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8)(i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from Class II and Class III combined pursuant to this subparagraph exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(ii) Should the pounds of skim milk to be subtracted from Class I pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount, beginning with the nearest plant at which Class I utilization is available;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12)(ii), (iii), and (iv) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1134.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler);

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received;

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraphs (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class II and Class III combined that exceeds the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(iv) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class I that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount beginning with the nearest plant at which Class I utilization is available;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1134.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk and milk subject to the provisions of § 1134.42(e), subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk and milk subject to the provisions of § 1134.42(e) in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to paragraph

(a)(14) of this section and the corresponding step of paragraph (b) of this section.

§ 1134.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1134.44(a)(12) and the corresponding step of § 1134.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1134.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant, the class to which such shipments were allocated by the market administrator of the other order on the basis of the report of the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 12th day after the end of each month, report to each cooperative association which so requests the amount and class utilization of producer milk delivered by members of such association to each handler receiving such milk. For the purpose of this report, the milk so received shall be prorated to each class in accordance with the total utilization of producer milk by such handler.

Class Prices

§ 1134.50 Class prices.

Subject to the provisions of § 1134.52, the class prices per hundredweight for the month shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $2.00.

(b) *Class II price.* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1134.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 10 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1134.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1134.51a.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

§ 1134.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

§ 1134.51a Basic Class II formula price.

The "Basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1134.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section:

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1134.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

§ 1134.52 Plant location adjustments for handlers.

(a) For milk received from producers and from handlers described in § 1134.9(c) at a pool plant, located more than 100 miles by shortest highway distance as measured by the market administrator, from the courthouse in Grand Junction, Colorado, and which is classified as Class I milk or assigned Class I location adjustment credit under paragraph (b) of this section, the price computed pursuant to § 1134.50(a) shall be reduced by 15 cents if such plant is located more than 100 miles but not more than 110 miles from such courthouse, and by an additional 1.5 cents for each 10 miles or fraction thereof that such distance exceeds 110 miles.

(b) For purposes of calculating such adjustment, transfers between pool plants shall be assigned to Class I disposition at the transferee plant, in excess of the sum of receipts at such plant from producers and handlers described in § 1134.9(c), and the pounds assigned as Class I to receipts from other order plants and unregulated supply plants. Such assignment is to be made first to transferor plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

§ 1134.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1134.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

§ 1134.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

Uniform Price

§ 1134.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1134.9 (b) and (c) with respect to milk that was not received at a pool plant as follows:

(a) Multiply the pounds of producer milk and milk subject to the provisions of § 1134.42(e) that were classified in each class pursuant to §§ 1134.43(a) and 1134.44(c) by the applicable class prices, and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1134.44(a)(14) and the corresponding step of § 1134.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1134.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1134.44(a)(9) and the corresponding step of § 1134.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1134.44(a)(7) (i) through (iv) and the corresponding step of § 1134.44(b), excluding receipts of bulk fluid cream products from another order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1134.44(a)(7) (v) and (vi) and the corresponding step of § 1134.44(b);

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated suppy plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1134.44(a)(11) and the corresponding step of § 1134.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(g) For the first month that this paragraph is effective, subtract the amount obtained from mulitplying the difference between the Class I price applicable at the location of the pool plant and the Class III price, both for the preceding month, by the hundredweight of skim milk and butterfat in any fluid milk product or product specified in § 1134.40(b) that was in the plant's inventory at the end of the preceding month and classified as Class I milk.

§ 1134.61 Computation of uniform price.

For each month the market administrator shall compute the uniform price per hundredweight for milk of 3.5 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 1134.60 for all handlers who filed the reports prescribed in § 1134.30 for the month and who made the payments pursuant to §§ 1134.71 and 1134.73 for the preceding month;

(b) Add an amount equal to the sum of the deductions to be made for location adjustments pursuant to § 1134.75;

(c) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1134.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" for milk received from producers.

§ 1134.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

Payments for Milk

§ 1134.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1134.71, 1134.76, and 1134.77, subject to the provision of § 1134.78 and out of which he shall make all payments pursuant to §§ 1134.72 and 1134.77: *Provided,* That any payments due to any handler shall be offset by any payments due from such handler.

§ 1134.71 Payments to the producer-settlement fund.

(a) On or before the 13th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the total amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1134.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1134.75, of such handler's receipts of producer milk and milk subject to the provisions of § 1134.42(e). In the case of a cooperative association which is a handler, less the amount due from other handlers pursuant to § 1134.73(a), exclusive of differential butterfat values; and

(ii) The value at the uniform price applicable at the location of the plant from which received (not to be less than the Class III price) of other source milk for which a value is computed pursuant to § 1134.60(f).

(b) On or before the 25th day after the end of the month each person who operated an order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more marketwide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable to the location of the other order plant (but not to be less than the Class III price) and the Class III price.

(c) Each vendor shall pay the market administrator on or before the 25th day after the end of the month at the difference between the value of the skim milk and butterfat in fluid milk products received from a producer-handler during the month at the Class I price applicable at the location of the producer-handler's plant (but not less than the Class III price) and its value at the Class III price subject to the following conditions:

(1) The quantities of skim and butterfat milk products on which payment shall be made pursuant to this section shall not exceed the vendor's Class I disposition in the marketing during the month; and

(2) This section shall not apply to a vendor whose total Class I disposition is obtained from a producer-handler, or whose total receipts and disposition of fluid milk products are considered as a part of the receipts and disposition of the producer-handler pursuant to § 1134.10(b)(3).

§ 1134.72 Payments from the producer-settlement fund.

On or before the 14th day after the end of each month, the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1134.71(a)(2) exceeds the amount computed pursuant to § 1134.71(a)(1). If, at such time, the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as funds are available.

§ 1134.73 Payments to producers and to cooperative associations.

Except as provided in paragraph (c) of this section, each handler shall make payment to each producer from whom milk is received as follows:

(a) Not later than the last day of the month, to each producer from whom he received milk during the first 18 days of the month, a partial payment for the milk received during the first 15 days of the month, at the Class III price for the preceding month.

(b) Not later than the 16th day of the month, for milk received during the preceding month, an amount computed at not less than the uniform price, per hundredweight, pursuant to § 1134.61, as adjusted by the butterfat differential specified in § 1134.74, location adjustment specified in § 1134.75 and adjustments for errors made in previous payments minus:

(1) Payments made pursuant to paragraph (a) of this section;

(2) Deductions for marketing services pursuant to § 1134.86; and

(3) Deductions approved by the market administrator and authorized in writing by the producer. If the handler has not received full payment for the delivery period from the market administrator pursuant to § 1134.72, he may reduce his total payments to all producers uniformly by the amount owing to him by the market administrator. The handler shall, however, complete all payments not later than the 16th day of the month following receipt of the balance from the market administrator.

(c)(1) Upon receipt of a written request from a cooperative association which the market administrator determines is authorized by its members to collect payment for their milk, and receipt of a written promise to reimburse the handler the amount of any actual loss incurred by him because of any improper claim by the cooperative association, each handler shall pay to the cooperative association on or before the second day preceding the dates set out in paragraphs (a) and (b) of this section an amount equal to the sum of the individual payments otherwise payable to the producer members of such organization. This payment shall be made for all milk of such producer certified by the cooperative association as a member, beginning the first day of the month following receipt of the certification and ending the last day of the month next preceding the date on which a written notice from the cooperative association terminating the membership was received.

(2) A copy of the request for payment, promise to reimburse, and certified list of members, shall be filed simultaneously with the market administrator. He may verify the information by auditing the records of the cooperative association. Exceptions to the accuracy of the membership certification, by a producer or by a handler, shall be made in writing to the market administrator for his determination.

(d) In making the payments to producers under paragraphs (b) and (c) of this section, each handler shall furnish each producer or cooperative association from whom he has received milk, a supporting statement which shall show for each month:

(1) The month and the identity of the handler and of the producer;

(2) The total pounds and the average butterfat content of milk received from such producer;

(3) The minimum rate or rates at which payment to such producer is required under this part;

(4) The rate which is used in making the payment if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer.

(e) For milk received from a pool plant operated by a cooperative association or from a handler described in § 1134.9(c), each handler shall on or before the second day prior to the date payments are due individual producers, pay such cooperative association for milk as follows:

(1) A partial payment for milk received during the first 15 days of the month at not less than the Class III price for the preceding month; and

(2) A final settlement equal to the value of such milk at the uniform price, as adjusted pursuant to §§ 1134.74 and 1134.75, less payment made pursuant to paragraph (e)(1) of this section.

§ 1134.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1134.75 Plant location adjustments for producers and on nonpool milk.

(a) The uniform price to be paid for milk received at a pool plant from producers, in bulk from a pool plant operated by a cooperative association, and from a handler described in § 1134.9(c) may be reduced by the amount of the location adjustment applicable at the location of the pool plant at which such milk was first physically received from producers, and the uniform price for producer milk diverted to a nonpool plant shall be reduced according to the location of the pool plant from which diverted, each at the rates set forth in § 1134.52; and

(b) For purposes of computations pursuant to §§ 1134.71 and 1134.72 the uniform price shall be adjusted at the rates set forth in § 1134.52 applicable at the location of the nonpool plant from which the milk was received (but not to be less than the Class III price).

§ 1134.76 Payments by a handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to § 1134.30(b) and § 1134.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (except that the Class I price and the uniform price shall not be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1134.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1134.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee-plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1134.60 for such handler shall include, in lieu of the value of other source milk specified in § 1134.60(f) less the value of such other source milk specified in § 1134.71(a)(2)(ii), a value of milk determined pursuant to § 1134.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1134.7(b) subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with its reports filed pursuant to §§ 1134.30(b) and 1134.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all

skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1134.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1134.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1134.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

§ 1134.77 Adjustment of accounts.

Whenever audit by the market administrator of any handler's reports, books, records, or accounts, or other verification discloses errors resulting in moneys due a producer or the market administrator from such handler or due such handler from the market administrator, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments as set forth in the provisions under which such error occurred.

§ 1134.78 Charges on overdue accounts.

The unpaid obligation of a handler pursuant to §§ 1134.71, 1134.76, 1134.77, 1134.85 and 1134.86 shall be increased 1 percent for each month or portion thereof beginning with the third day following the date by which such obligation was payable: *Provided,* That:

(a) The amounts payable pursuant to this section shall be computed monthly on each unpaid obligation, which shall include any unpaid interest charges previously made pursuant to this section; and

(b) For the purpose of this section, any obligation that was determined at a date later than that prescribed by the order because of a handler's failure to submit a report to the market administrator when due shall be considered to have been payable by the date it would have been due if the report had been filed when due.

Administrative Assessment and Marketing Service Deduction

§ 1134.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 13th day after the end of the month 5 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to:

(a) Producer milk (including milk subject to the provisions of § 1134.42(e) but excluding such milk in the case of a cooperative association which is a handler of milk subject to the provisions of § 1134.42(e)) and such handler's own production;

(b) Other source milk allocated to Class I pursuant to § 1134.44(a) (7) and (11) and the corresponding steps of § 1134.44(b), except such other source milk that is excluded from the computations pursuant to § 1134.60 (d) and (f); and

(c) Route disposition in the marketing area from a partially regulated distributing plant during the month that exceeds the skim milk and butterfat subtracted pursuant to § 1134.76(a)(2).

§ 1134.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to producers for milk (other than milk of his own production) pursuant to § 1134.73, shall deduct 6 cents per hundredweight, or such lesser amount as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 13th day after the end of the month. Such money shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such services from a cooperative association.

(b) For producers who are members of a cooperative association which the Secretary has determined is actually performing the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deduction specified in paragraph (a) of this section, such deductions from the payments to be made to producers as may be authorized by the membership agreement or marketing contract between the cooperative association and its members, and on or before the 14th day after the end of each month, the handler shall pay the aggregate amount of such deductions to the cooperative association, furnishing a statement showing the amount of the deductions and the quantity of milk on which the deductions from each producer was computed.

PART 1136—MILK IN THE GREAT BASIN MARKETING AREA

Subpart—Order Regulating Handling

General Provisions

Sec.

1136.1 General provisions.

Definitions

1136.2 Great Basin marketing area.
1136.3 Route disposition.
1136.4 [Reserved]
1136.5 Fluid milk plant.
1136.6 [Reserved]
1136.7 Pool plant.
1136.8 Nonpool plant.
1136.9 Handler.
1136.10 Producer-handler.
1136.11 [Reserved]
1136.12 Producer.
1136.13 Producer milk.
1136.14 Other source milk.
1136.15 Fluid milk product.
1136.16 Fluid cream product.
1136.17 Filled milk.
1136.18 Cooperative association.
1136.19 Product prices.

Handler Reports

1136.30 Reports of receipts and utilization.
1136.31 Payroll reports.
1136.32 Other reports.

Classification of Milk

1136.40 Classes of utilization.
1136.41 Shrinkage.
1136.42 Classification of transfers and diversions.
1136.43 General classification rules.
1136.44 Classification of producer milk.
1136.45 Market administrator's reports and announcements concerning classification.

Class Prices

1136.50 Class prices.
1136.51 Basic formula price.
1136.51a Basic Class II formula price.
1136.52 Plant location adjustments for handlers.
1136.53 Announcement of class prices.
1136.54 Equivalent price.

Uniform Price

1136.60 Handler's value of milk for computing uniform price.
1136.61 Computation of uniform price.

Sec.
1136.62 Announcement of uniform price and butterfat differential.

Payments for Milk

1136.70 Producer-settlement fund.
1136.71 Payments to the producer-settlement fund.
1136.72 Payments from the producer-settlement fund.
1136.73 Payments to producers and to cooperative associations.
1136.74 Butterfat differential.
1136.75 Plant location adjustments for producers and on nonpool milk.
1136.76 Payments by a handler operating a partially regulated distributing plant.
1136.77 Adjustment of accounts.
1136.78 Charges on overdue accounts.

Administrative Assessment and Marketing Service Deduction

1136.85 Assessment for order administration.
1136.86 Deduction for marketing services.

Authority.—Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).

General Provisions

§ 1136.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made part of this order.

Definitions

§ 1136.2 Great Basin marketing area.

"Great Basin marketing area" hereinafter called the "marketing area" means all the territory, including all government reservations and installations and all municipalities, within the places listed below:

Utah Counties

Box Elder, Cache (city of Logan only), Carbon, Daggett, Davis, Duchesne, Emery, Grand, Juab, Millard, Morgan, Salt Lake, Sanpete, Sevier, Summit, Tooele, Uintah, Utah, Wasatch, Weber.

Nevada Counties

Elko, White Pine.

Wyoming Counties

Uinta (town of Evanston only).

Idaho Counties

Bannock, Bear Lake, Bingham, Bonneville, Franklin, Jefferson, Madison.

§ 1136.3 Route disposition.

"Route disposition" means any disposition of fluid milk products (including through a vendor or disposition from a plant or plant store) classified as Class I milk, except in bulk form to fluid milk plants and except Class II and Class III milk disposition to plants which are not fluid milk plants.

§ 1136.4 [Reserved]

§ 1136.5 Fluid milk plant.

"Fluid milk plant" means a plant:

(a) In which milk or milk products (including filled milk) are processed or packaged and from which there is route disposition during the month in the marketing area, or

(b) In which milk is received or processed and from which milk or skim milk is shipped during the month to a plant described in paragraph (a) of this section.

§ 1136.6 [Reserved]

§ 1136.7 Pool plant.

Except as provided in paragraph (c) of this section, "pool plant" means:

(a) A fluid milk plant from which not less than 50 percent in any month of September through February, not less than 45 percent in any month of March and April, and not less than 40 percent in any month of May through August of the fluid milk products, except filled milk, approved by a duly constituted health authority for fluid consumption that are physically received at such plant (excluding milk received at such plant from other order plants or dairy farms which is classified in Class III under this order and which is subject to the pricing and pooling provisions of another order issued pursuant to the Act) or diverted therefrom as producer milk to a nonpool plant pursuant to § 1136.13 are disposed of as route disposition, and not less than 15 percent of such receipts are disposed of as route disposition in the marketing area.

(1) For the purpose of determining the qualification pursuant to this paragraph of a fluid milk plant pursuant to § 1136.5(a) operated by a cooperative association, producer milk which such cooperative association causes to be delivered to the pool plant of another handler or diverted therefrom shall be included with receipts of producer milk at such cooperative's plant and the quantity of such milk assigned to Class I pursuant to § 1136.45(d) shall be included as route disposition from such cooperative's plant;

(i) If such a cooperative association operates more than one fluid milk plant as defined in § 1136.5(a), such producer milk and Class I milk shall be included in the computation for whichever plant the cooperative association requests in writing to the market administrator; and

(ii) If no such written request is made, such producer milk and Class I milk shall be prorated among the plants; and

(2) If a handler operates more than one fluid milk plant, the combined receipts and fluid milk products disposition, except filled milk, of any such plants may be used as the basis for qualifying the respective plants pursuant to the preceding computations specified in this paragraph if a handler in writing so requests the market administrator.

(b) A fluid milk plant from which during the month fluid milk products, except filled milk, equal to not less than 50 percent of the total of receipts at the plant from dairy farmers meeting the inspection requirements described in § 1136.12, milk diverted pursuant to § 1136.13 by the handler operating the plant and other fluid milk products, except filled milk, qualified for distribution for fluid consumption received at the plant are shipped to a plant described in paragraph (a) of this section: *Provided,* That a plant which so qualifies in each of the months of August through January as a pool plant shall be a pool plant in each of the following months of February through July unless the operator requests in written notice to the market administrator that such plant not be a pool plant, such nonpool status to be effective the first month following such notice and thereafter until the plant qualifies as a pool plant on the basis of shipments.

(c) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) An exempt plant; and

(3) Any plant described in paragraph (c)(3) (i) or (ii) of this section shall be exempt from paragraph (a) or (b) of this section, unless the Secretary determines otherwise, if it would be fully regulated subject to the classification and pooling provisions of another order issued pursuant to the Act if not so subject to this part:

(i) Any plant from which there is less route disposition, except filled milk, in the Great Basin marketing area than in the marketing area regulated pursuant to such other order if not so subject to this part; or

(ii) Any plant during the months of February through July which qualifies as a pool plant only pursuant to the proviso of paragraph (b) of this section.

§ 1136.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as

defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a fluid milk plant that is neither an other order plant, a producer-handler plant, nor an exempt plant from which there is route disposition in consumer-type packages or dispenser units (other than to a pool plant) in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant which is neither an other order plant, a producer-handler plant nor an exempt plant from which fluid milk products qualified for fluid consumption are shipped during the month to a pool plant.

(e) "Exempt plant" means a governmental agency, Brigham Young University or any approved plant from which the total route disposition is to individuals or institutions for charitable purposes and is without remuneration from such individuals or institutions.

§ 1136.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) A cooperative association with respect to the milk of its member producers which it causes to be diverted for its account pursuant to § 1136.13;

(c) A cooperative association with respect to the milk of its member producers which is delivered from the farm to the pool plant of another handler in a tank truck owned and operated by, or under contract to, such cooperative association, if the cooperative association notifies the market administrator and the handler to whom the milk is delivered, in writing prior to the first day of the month in which the milk is delivered, that it wishes to be the handler for the milk. In this case the milk is received from producers by the cooperative association;

(d) Any person who operates a partially regulated distributing plant; and

(e) Any other person who operates a fluid milk plant described in § 1136.5(a).

§ 1136.10 Producer-handler.

"Producer-handler" means any person who is an individual, partnership or corporation and who meets all the following conditions:

(a) Operates a dairy farm(s) from which the milk produced thereon is supplied to a plant operated by him in accordance with the conditions set forth in paragraph (b) of this section, and provides proof satisfactory to the market administrator that:

(1) The full maintenance of milk-producing cows on such farm(s) is his sole risk and under his complete and exclusive management and control;

(2) Each such farm is owned or operated by him, at his sole risk, and under his complete and exclusive management and control; and

(3) Only he and no other person (except a member of his immediate family or a stockholder in the case of a corporate farm) employed on such farm(s) own, fully or partially, either the cows producing the milk on the farm or the farm on which it is produced;

(b) Operates a plant in which milk approved by a duly constituted health authority for fluid consumption is processed or packaged and from which there is route disposition during the month in the marketing area: *Provided,* That:

(1) No fluid milk products are received at such plant or by him at any other location except:

(i) From dairy farm(s) as specified in paragraph (a) of this section; and

(ii) From pool plants or other order plants in an amount that is not in excess of the larger of 3,000 pounds, or 5 percent of his Class I sales, during the month;

(2) Such plant is operated under his complete and exclusive management and control and at his sole risk, and is not used during the month to process, package, receive, or otherwise handle fluid milk products for any other person; and

(3) For the purpose of this section, all fluid milk products disposed of as route disposition or at stores operated by him or by any person (including the operator of a plant, or a vendor) who controls or is controlled by him (e.g., as an interlocking stockholder) or in which he (including, in the case of a corporation, any stockholder therein) has a financial interest, shall be considered as having been received at his plant; and the utilization for such plant shall include all such route and store dispositions; and

(c) Disposes of no other source milk (except that represented by nonfat solids used in the fortification of fluid milk products) as Class I milk.

§ 1136.11 [Reserved]

§ 1136.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means a dairy farmer who produces milk in compliance with the inspection requirements of a duly constituted health authority for fluid consumption (as used in this subpart, compliance with inspection requirements shall include production of milk acceptable for fluid consumption of agencies of the United States Government located in the marketing area) which milk is delivered to a pool plant during the month or diverted to a nonpool plant within the limits set forth in § 1136.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a pool plant from an other order plant if the order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1136.44(a)(8)(iii) and the corresponding step of § 1136.44(b); and

(3) Any person with respect to milk produced by him which is reported as diverted to an other order plant if any portion of such person's milk so moved is assigned to Class I under the provisions of such other order.

§ 1136.13 Producer milk.

"Producer milk" means only that skim milk and butterfat contained in milk from producers (in an amount determined by weights and measurements for individual producers, as taken at the farm in the case of milk moved from the farm in a tank truck) which is:

(a) Received from the producers at a pool plant but not including milk received from a handler described in § 1136.9(c);

(b) Received by a handler described in § 1136.9(c); or

(c) Diverted from a pool plant to a nonpool plant that is not a producer-handler plant or an exempt plant, subject to the following conditions:

(1) Such milk shall be deemed to have been received by the diverting handler at the location of the plant to which diverted;

(2) Not less than 6 days' production of the producer whose milk is diverted is physically received at a pool plant;

(3) A cooperative association may divert for its account only the milk of member producers: *Provided,* That the total quantity of milk so diverted that exceeds 25 percent of the milk physically received at all pool plants from member producers in any month of March through August, and that exceeds 20 percent of such receipts in any month of September through February, shall not be producer milk;

(4) The operator of a pool plant other than a cooperative association may divert for his account only the milk of producers who are not members of a cooperative association: *Provided,* That the total quantity of milk so diverted

that exceeds 25 percent of the milk physically received at such plant from producers who are not members of a cooperative association in any month of March through August, and that exceeds 20 percent of such receipts in any month of September through February, shall not be producer milk;

(5) The diverting handler shall designate the dairy farmers whose milk is not producer milk pursuant to paragraph (c) (3) and (4) of this section. If the handler fails to make such designation, no milk diverted by him shall be producer milk; and

(6) Two or more cooperative associations may have their allowable diversions computed on the basis of the combined deliveries of milk by their members if each association has filed such a request in writing with the market administrator on or before the 1st day of the month the agreement is effective. The request shall specify the basis for assigning over-diverted milk to the producer members of each cooperative association according to a method approved by the market administrator.

§ 1136.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(1) Receipts of fluid milk products and bulk products specified in § 1136.40(b)(1) from any source other than producers, handlers described in § 1136.9(c), or pool plants;

(b) Receipts in packaged form from other plants of products specified in § 1136.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1136.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with other product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1136.40(b)(1)) for which the handler fails to establish a disposition.

§ 1136.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form: Milk, skim milk, lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

§ 1136.16 Fluid cream product.

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent of more butterfat, with or without the addition of other ingredients.

§ 1136.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

§ 1136.18 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) To have full authority in the sale of milk of its members and to be engaged in making collective sales, or marketing milk or its products for its members; and

(c) To have its entire activities under the control of its members.

§ 1136.19 Product prices.

The following product prices shall be used in calculating the basic Class II formula price pursuant to § 1136.51a:

(a) *Butter price.* "Butter price" means the simple average, for the first 15 days of the month, of the daily prices per pound of Grade A (92-score) butter. The prices used shall be those of the Chicago Mercantile Exchange as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday, except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(b) *Cheddar cheese price.* "Cheddar cheese price" means the simple average, for the first 15 days of the month, of the daily prices per pound of cheddar cheese in 40-pound blocks. The prices used shall be those of the National Cheese Exchange (Green Bay, WI), as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each following work-day until the next price is reported. A work-day is each Monday through Friday except national holidays. For any week that the Exchange does not meet to establish a price, the price for the following week shall be the last price that was established.

(c) *Nonfat dry milk price.* "Nonfat dry milk price" means the simple average, for the first 15 days of the month, of the daily prices per pound of nonfat dry milk, which average shall be computed by the Director of the Dairy Division as follows:

(1) The prices used shall be the prices (using the midpoint of any price range as one price) of high heat, low heat and Grade A nonfat dry milk, respectively, for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service.

(2) For each week, determine the simple average of the prices reported for the three types of nonfat dry milk. Such average shall be the daily price for the day that such prices are reported and for each preceding work-day until the day such prices were previously reported. A work-day is each Monday through Friday except national holidays.

(3) Add the prices determined in paragraph (c)(2) of this section for the first 15 days of the month and divide by the number of days for which there is a daily price.

(d) *Edible whey price.* "Edible whey price" means the simple average, for the first 15 days of the month, of the daily prices per pound of edible whey powder (nonhygroscopic). The prices used shall be the prices (using the midpoint of any price range as one price) of edible whey

powder for the Central States production area, as reported and published weekly by the Dairy Division, Agricultural Marketing Service. The average shall be computed by the Director of the Dairy Division, using the price reported each week as the daily price for that day and for each preceding work-day until the day such price was previously reported. A work-day is each Monday through Friday except national holidays.

Handler Reports

§ 1136.30 Reports of receipts and utilization.

On or before the seventh day after the end of each month, each handler shall report for the month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1136.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1136.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1136.9 (b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

§ 1136.31 Payroll reports.

(a) On or before the 20th day after the end of each month, each handler described in § 1136.9 (a), (b), and (c) shall report to the market administrator his producer payroll for such month, in the detail prescribed by the market administrator, showing for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) The price per hundredweight, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1136.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

§ 1136.32 Other reports.

In addition to the reports required pursuant to §§ 1136.30 and 1136.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

Classification of Milk

§ 1136.40 Classes of utilization.

Except as provided in § 1136.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1136.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form other than that specified in paragraph (c)(1)(iv) of this section;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Any concentrated milk product in bulk, fluid form that is used to produce a Class III product;

(v) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(vi) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1136.15; and

(6) In shrinkage assigned pursuant to § 1136.41(a) to the receipts specified in § 1136.41(a)(2) and in shrinkage specified in § 1136.41 (b) and (c).

§ 1136.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1136.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b) (1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b) (1) through (6) of this section which was received in the form of a bulk fluid milk product or a bulk fluid cream product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1136.9(c), except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this subparagraph shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b) (1), (2), (4), (5), and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1136.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

§ 1136.42 Classification of transfers and diversions.

(a) *Transfers to pool plants.* Skim milk or butterfat transferred in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless both handlers request the same classification in another class. In either case, the classification of such transfers shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant after the computations pursuant to § 1136.44(a)(12) and the corresponding step of § 1136.44(b);

(2) If the transferor-plant received during the month other source milk to be allocated pursuant to § 1136.44(a)(7) or the corresponding step of § 1136.44(b), the skim milk or butterfat so transferred shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler received during the month other source milk to be allocated pursuant to § 1136.44(a) (11) or (12) or the corresponding steps of § 1136.44(b), the skim milk or butterfat so transferred up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b) (1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1136.40.

(c) *Transfers to producer-handlers and to exempt plants.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order or an exempt plant shall be classified:

(1) As Class I milk, if transferred in the form of a fluid milk product; and

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the transferee's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant, a producer-handler plant or an exempt plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or divertor-handler claims such classification in his report of receipts and utilization filed pursuant to § 1136.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route disposition in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(*c*) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator derterminines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in this paragraph.

(e) *Transfers by a handler described in § 1136.9(c) to pool plants.* Skim milk and butterfat transferred in the form of bulk milk by a handler described in § 1136.9(c) to another handler's pool plant shall be classified pursuant to § 1136.44 pro rata with producer milk received at the transferee-plant and the value thereof at the class prices shall be included in his value of milk pursuant to § 1136.60.

§ 1136.43 General classification rules.

In determining the classification of producer milk pursuant to § 1136.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1136.30 and shall compute separately for each pool plant, and for each cooperative association with respect to milk for which it is the handler pursuant to § 1136.9(b) or (c) that was not received at a pool plant, the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1136.40, 1136.41, and 1136.42. The combined pounds of skim milk and butterfat so determined in each class for a handler described in § 1136.9(b) or (c) shall be such handler's classification of producer milk;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1136.9(b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

§ 1136.44 Classification of producer milk.

For each month the market administrator shall determine for each handler described in § 1136.9(a) for each of his pool plants separately the classification of producer milk and milk received from a handler described in § 1136.9(c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1136.41(b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1136.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1136.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II. This paragraph shall apply only if the pool plant was subject to the provisions of this paragraph or comparable provisions of another Federal milk order in the immediately preceding month;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1136.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1136.40(b)(1) that was not subtracted pursuant to paragraph (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order or from an exempt plant;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (*c*) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount:

(*a*) Multiply by 1.25 the sum of the pounds of skim milk remaining in Class I at this allocation step at all pool plants of the handler (excluding any duplication of Class I utilization resulting from reported Class I transfers between pool plants of the handler);

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, milk from a handler described in § 1136.9(c), fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7(vi) of this section; and

(*c*) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1136.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraphs (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11)(i) and (ii) of this section, subtract from the pounds of skim milk remaining in each class at the plant, pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler), with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2), (7)(v), and (8) (i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from Class II and Class III combined pursuant to this subparagraph

exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(ii) Should the pounds of skim milk to be subtracted from Class I pursuant to this subparagraph exceed the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount, beginning with the nearest plant at which Class I utilization is available;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from another order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) and (8)(iii) of this section:

(i) Subject to the provisions of paragraph (a)(12)(ii), (iii), and (iv) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1136.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler);

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received;

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class II and Class III combined that exceeds the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(iv) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class I that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount beginning with the nearest plant at which Class I utilization is available;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1136.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk and milk received from a handler described in § 1136.9(c), subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk and milk received from a handler described in § 1136.9(c) in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to paragraph (a)(14) of this section and the corresponding step of paragraph (b) of this section.

§ 1136.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1136.44(a)(12) and the corresponding step of § 1136.44(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1136.44 on the basis of such report, and, thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant, the class to which such shipments were allocated by the market administrator of the other order on the basis of the report of the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 12th day after the end of each month, report to each cooperative association which so requests the amount and class utilization of producer milk delivered by members of such association to each handler receiving such milk. For the

purpose of this report, the milk so received shall be prorated to each class in accordance with the total utilization of producer milk by such handler.

Class Prices

§ 1136.50 Class prices.

Subject to the provisions of § 1136.52, the class prices per hundredweight for the month shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.90.

(b) *Class II price* A tentative Class II price shall be computed by the Director of the Dairy Division and transmitted to the market administrator on or before the 15th day of the preceding month. The tentative Class II price shall be the basic Class II formula price computed pursuant to § 1136.51a for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, except that in no event shall the final Class II price be less than the Class III price: *Provided,* That for the first month this paragraph is effective the Class II price shall be the basic formula price for the month plus 10 cents.

(1) Determine for the most recent 12-month period the simple average (rounded to the nearest cent) of the basic formula prices computed pursuant to § 1136.51 and add 10 cents; and

(2) Determine for the same 12-month period as specified in paragraph (b)(1) of this section the simple average (rounded to the nearest cent) of the basic Class II formula prices computed pursuant to § 1136.51a.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

§ 1136.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

§ 1136.51a Basic Class II formula price.

The "Basic Class II formula price" for the month shall be the basic formula price determined pursuant to § 1136.51 for the second preceding month plus or minus the amount computed pursuant to paragraphs (a) through (d) of this section.

(a) The gross values per hundredweight of milk used to manufacture cheddar cheese and butter-nonfat dry milk shall be computed, using price data determined pursuant to § 1136.19 and yield factors in effect under the Dairy Price Support Program authorized by the Agricultural Act of 1949, as amended, for the first 15 days of the preceding month and, separately, for the first 15 days of the second preceding month as follows:

(1) The gross value of milk used to manufacture cheddar cheese shall be the sum of the following computations:

(i) Multiply the cheddar cheese price by the yield factor used under the Price Support Program for cheddar cheese;

(ii) Multiply the butter price by the yield factor used under the Price Support Program for determining the butterfat component of the whey value in the cheese price computation; and

(iii) Subtract from the edible whey price the processing cost used under the Price Support Program for edible whey and multiply any positive difference by the yield factor used under the Price Support Program for edible whey.

(2) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the butter price by the yield factor used under the Price Support Program for butter; and

(ii) Multiply the nonfat dry milk price by the yield factor used under the Price Support Program for nonfat dry milk.

(b) Determine the amounts by which the gross value per hundredweight of milk used to manufacture cheddar cheese and the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk for the first 15 days of the preceding month exceed or are less than the respective gross values for the first 15 days of the second preceding month.

(c) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (b) of this section by determining the relative proportion that the data included in each of the following subparagraphs is of the total of the data represented in paragraph (c) (1) and (2) of this section:

(1) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for cheddar cheese to determine the quantity of milk used in the production of American cheddar cheese; and

(2) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Statistical Reporting Service of the Department for the most recent preceding period, and divide by the yield factor used under the Price Support Program for nonfat dry milk to determine the quantity of milk used in the production of butter-nonfat dry milk.

(d) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (b) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (c) of this section.

§ 1136.52 Plant location adjustments for handlers.

(a) For milk which is received from producers at a pool plant, or is diverted therefrom, or is delivered by a handler described in § 1136.9(c) to a pool plant and which is assigned to Class I milk, subject to the limitations pursuant to paragraph (b) of this section, the price computed pursuant to § 1136.50(a) shall be reduced as follows:

Distance (miles)	Rate per hundred-weight (cents)
150 but not more than 160	22.0
For each additional 10 miles or fraction thereof in excess of 160	1.5

Such distance to be the shortest hard-surfaced highway distance as determined by the market administrator from the plant to the County Courthouse of Salt Lake County, Utah;

(b) In applying such credits to transfers of fluid milk products between pool plants, a Class I location adjustment credit for the transferor-plant shall be determined by the market administrator for skim milk and butterfat, respectively, as follows:

(1) From the pounds of skim milk remaining in Class I at the transferee-plant after the computations are made pursuant to § 1136.44(a)(12) subtract the pounds of skim milk in receipts of milk at the transferee-plant from producers and handlers described in § 1136.9(c);

(2) Assign any remaining pounds of skim milk in Class I at the transferee-plant to the skim milk in receipts of fluid

milk products from other pool plants, first to the transferor-plants at which no location adjustment applies and then in sequence beginning with the plant at which the least location adjustment applies;

(3) Compute the total amount of location adjustment credits to be assigned to transferor-plant pursuant to paragraph (b)(2) of this section by the applicable adjustment rate for each such plant, and add the resulting amounts;

(4) Assign the total amount of location adjustment credits computed pursuant to paragraph (b)(3) of this section to those transferor-plants that transferred fluid milk products containing skim milk classified as Class I milk pursuant to § 1136.42(a), in sequence beginning with the plant at which the least location adjustment applies. Subject to the availability of such credits, the credit assigned to each plant shall be equal to the hundredweight of such Class I skim milk multiplied by the applicable location adjustment rate for such plant. If the aggregate of this computation for all plants having the same location adjustment rate exceeds the credits that are available to those plants, such credits shall be prorated to the volume of skim milk in Class I transfers received from such plants; and

(5) Class I location adjustment credit for butterfat shall be determined in accordance with the procedure outlined for skim milk in paragraph (b)(1) through (4) of this section.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of this section, except that the adjusted Class I price shall not be less than the Class III price.

§ 1136.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III price for the preceding month and the final Class II price for the preceding month, except that the Class II price announced for the first month during which this section is effective shall be the price specified in the proviso in § 1136.50(b); and on or before the 15th day of each month the tentative Class II price for the following month.

§ 1136.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

Uniform Price

§ 1136.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1136.9 (b) and (c) with respect to milk that was not received at a pool plant as follows:

(a) Multiply the pounds of producer milk and milk received from a handler described in § 1136.9(c) that were classified in each class pursuant to §§ 1136.43(a) and 1136.44(c) by the applicable class prices, and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1136.44(a)(14) and the corresponding step of § 1136.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1136.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1136.44(a)(9) and the corresponding step of § 1136.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1136.44(a)(7) (i) through (iv) and the corresponding step of § 1136.44(b), excluding receipts of bulk fluid cream products from an other order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1136.44(a)(7) (v) and (vi) and the corresponding step of § 1136.44(b);

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1136.44(a)(11) and the corresponding step of § 1136.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(g) For the first month that this paragraph is effective, subtract the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price, both for the preceding month, by the hundredweight of skim milk and butterfat in any fluid milk product or product specified in § 1136.40(b) that was in the plant's inventory at the end of the preceding month and classified as Class I milk.

§ 1136.61 Computation of uniform price.

For each month the market administrator shall compute the uniform price per hundredweight for milk of 3.5 percent butterfat content received from producers as follows:

(a) Combine into one total the values computed pursuant to § 1136.60 for all handlers who filed the reports prescribed by § 1136.30 for the month and who made the payments pursuant to § 1136.71 for the preceding month;

(b) Add an amount equal to the sum of the deductions to be made for location adjustments pursuant to § 1136.75;

(c) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1136.60(f); and

(e) Subtract not less than 5 cents nor more than 6 cents per hundredweight. The result shall be known as the uniform price.

§ 1136.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

Payments for Milk

§ 1136.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1136.71, 1136.76, and 1136.77, subject to the provision of § 1136.78 and out of which he shall make all payments pursuant to §§ 1136.72 and 1136.77: *Provided,* That any payments due to any handler shall be offset by any payments due from such handler.

§ 1136.71 Payments to the producer-settlement fund.

(a) On or before the 14th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the total amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1136.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1136.75, of such handler's receipts of producer milk and milk received from a handler described in § 1136.9(c). In the case of a cooperative association which is a handler, less the amount due from other handlers pursuant to § 1136.73(d), exclusive of differential butterfat values; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1136.60(f).

(b) On or before the 25th day after the end of the month each person who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more marketwide pool orders, the reconstituted skim milk allocated to Class I shall be prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (b)(1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the Class III price) and the Class III price.

§ 1136.72 Payments from the producer-settlement fund.

On or before the 15th day after the end of each month, the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1136.71(a)(2) exceeds the amount computed pursuant to § 1136.71(a)(1). If, at such time, the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the funds are available.

§ 1136.73 Payments to producers and to cooperative associations.

(a) Except as provided in paragraphs (b), (d), or (e) of this section, each handler shall make payment to each producer from whom milk is received as follows:

(1) On or before the last day of each month, for producer milk received during the first 15 days of the month, at not less than 1.2 times the Class III price for the preceding month; and

(2) On or before the 17th day of the following month, for producer milk received during the month, at not less than the uniform price pursuant to § 1136.61 adjusted by the butterfat differential specified in § 1136.74 and location adjustment specified in § 1136.75, subject to the following adjustments:

(i) Less deductions for marketing services pursuant to § 1136.86;

(ii) Less the payment made pursuant to paragraph (a)(1) of this section;

(iii) Plus or minus adjustments for errors made in previous payments to such producer and proper deductions authorized in writing by such producer; and

(iv) If by the date specified, such handler has not received full payment from the market administrator pursuant to § 1136.72 for such month, he may reduce pro rata his payments to producers by not more than the amount of such underpayment. Payments to producers shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following after the receipt of the balance due from the market administrator.

(b) In the case of a cooperative association which is authorized by its members to collect payment for their milk and which has requested such payment from any handler in writing and has so notified the market administrator, payment for milk received during the month by such handler(s) from producer-members of such association shall be accomplished as follows:

(1) On or before the third day prior to the last day of each month such handler shall pay to such cooperative association not less than 1.2 times the Class III price for the preceding month for the hundredweight of such milk received during the first 15 days of the month; and

(2) On or before the 16th day of the following month such handler shall pay to such cooperative association the sum of the payments computed at the appropriate uniform price with respect to deliveries by producer-members of such association to handlers from whom payments have been requested, less the amounts of payments made to such association pursuant to paragraph (b)(1) of this section, and less the amount retained by handlers as authorized deductions.

(c) Each handler who received milk from producers for which payment is to be made to a cooperative association pursuant to paragraph (b) of this section shall report to such cooperative association and to the market administrator on or before the 7th day of the following month, as follows:

(1) The total pounds of milk received during the month, and if requested, the pounds received from each member-producer;

(2) The amount of payment made pursuant to paragraph (b)(1) of this section and the quantity of milk to which such payment applied; and

(3) The amount or rate and nature of any proper deductions authorized to be made from payments.

(d) Each handler shall pay a cooperative association for milk received by him from such cooperative in its capacity as a handler described in § 1136.9(c) as follows:

(1) On or before the second day prior to the last day of each month, for milk received during the first 15 days of the month an amount per hundredweight not less than 1.2 times the Class III price for the preceding month; and

(2) On or before the 15th day of the following month for milk received during the month, not less than the value of such milk at the applicable uniform price, less payment made pursuant to paragraph (d)(1) of this section.

(e) Each handler shall pay a cooperative association for milk

received by him from a pool plant operated by such association as follows:

(1) On or before the second day prior to the end of each month, for milk received during the first 15 days of the month an amount per hundredweight not less then 1.2 times the Class III price for the preceding month; and

(2) On or before the 15th day of the following month for milk received during the month, not less than an amount computed by multiplying the minimum prices for milk in each class subject to the applicable location adjustment provided in § 1136.52 and the butterfat differential provided by § 1136.74, by the hundredweight of milk in each class pursuant to § 1136.44, such amount to be reduced in the amount of the payment made pursuant to paragraph (e)(1) of this section.

§ 1136.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1136.75 Plant location adjustments for producers and on nonpool milk.

(a) The uniform price to be paid for milk received at a pool plant shall be reduced according to the location of the pool plant, at the rates set forth in § 1136.52; and

(b) For purposes of computations pursuant to §§ 1136.71 and 1136.72 the uniform price shall be adjusted at the rates set forth in § 1136.52 applicable at the location of the nonpool plant from which the milk was received (but not to be less than the Class III price).

§ 1136.76 Payments by a handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to § 1136.30(b) and § 1136.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (except that the Class I price and the uniform price shall not be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1136.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant:

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1136.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee-plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective order; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1136.60 for such handler shall include, in lieu of the value of other source milk specified in § 1136.60(f) less the value of such other source milk specified in § 1136.71(a)(2)(ii), a value of milk determined pursuant to § 1136.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1136.7(b) subject to the following conditions:

(*a*) The operator of the partially regulated distributing plant submits with its reports filed pursuant to §§ 1136.30(b) and 1136.31(b) similar reports for each such nonpool supply plant;

(*b*) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(*c*) The value of milk determined pursuant to § 1136.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1136.74, for milk received at the plant during the month that would have been producer

milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1136.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

§ 1136.77 Adjustment of accounts.

Whenever audit by the market administrator of any reports, books, records, or accounts or other verification discloses errors resulting in moneys due (a) the market administrator from a handler; (b) a handler from the market administrator; or (c) any producer or cooperative association from a handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred.

§ 1136.78 Charges on overdue accounts.

The unpaid obligation of a handler pursuant to §§ 1136.71, 1136.76, 1136.77 and 1136.85, shall be increased 1 percent for each month or portion thereof beginning with the third day following the date by which such obligation was payable: *Provided,* That:

(a) The amounts payable pursuant to this section shall be computed monthly on each unpaid obligation, which shall include any unpaid interest charges previously made pursuant to this section; and

(b) For the purpose of this section, any obligation that was determined at a date later than that prescribed by the order because of a handler's failure to submit a report to the market administrator when due shall be considered to have been payable by the date it would have been due if the report had been filed when due.

Administrative Assessment and Marketing Service Deduction

§ 1136.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 14th day after the end of the month 4 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to:

(a) Producer milk (including milk received from a handler described in § 1136.9(c) but excluding in the case of a cooperative association which is a handler pursuant to § 1136.9(c), milk which was received at the pool plant of another handler) and such handler's own production;

(b) Other source milk allocated to Class I pursuant to § 1136.44(a) (7) and (11) and the corresponding steps of § 1136.44(b), except such other source milk that is excluded from the computations pursuant to § 1136.60 (d) and (f); and

(c) Route disposition in the marketing area from a partially regulated distributing plant during the month that exceeds the skim milk and butterfat subtracted pursuant to § 1136.76(a)(2).

§ 1136.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to producers for milk pursuant to § 1136.73, (other than milk of his own production) shall deduct 6 cents per hundredweight, or such lesser amount as may be prescribed by the Secretary, and shall pay such deductions to the market administrator on or before the 14th day after the end of the month. Such money shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such services from a cooperative association.

(b) In the case of producers who are members of a cooperative association which the Secretary has determined is actually performing the services set forth in paragraph (a) of this section, each handler shall make such deductions from the payments to be made to producers as may be authorized by the membership agreement or marketing contract between the cooperative association and its members. On or before the 15th day after the end of each month, the handler shall pay the aggregate amount of such deductions to the cooperative association, furnishing a statement showing the amount of the deductions and the quantity of milk on which the deduction was computed from each producer.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: November 1, 1982.

Signed at Washington, D.C., on September 27, 1982.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-ASW-61; Amdt. 39-4467]

Airworthiness Directives; Boeing Vertol Model 234 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires initial and repetitive inspections and replacement as necessary of the main rotor hubs on Boeing Vertol Model 234 series helicopters. The AD is prompted by a report of a structural fatigue crack in a main rotor hub which could result in failure of the rotor hub and subsequent loss of control of the helicopter.

DATE: Effective: October 15, 1982.

Compliance required within the next 60 hours after the effective date of this AD unless already accomplished for all main rotor hubs with more than 700 hours' time in service.

ADDRESSES: The applicable service information may be obtained from Boeing Airplane Company, Vertol Division, Boeing Center, P.O. Box 16858, Philadelphia, Pennsylvania 19142. These documents may be examined at the office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106, or at the Rules Docket in Room 916, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Joseph R. Chrastil, ANE–172, New York Aircraft Certification Office, Federal Aviation Administration, 181 South Franklin Avenue, Valley Stream, New York 11581, telephone No. 212 995–2842.

SUPPLEMENTARY INFORMATION: There have been reports of structural fatigue cracks in the splined area of two forward main rotor hubs on two Boeing Vertol Model 234 helicopters which could have caused rotor hub failure and subsequent loss of the helicopters. Total time in service for the cracked hubs was

at 1027 and 1429 hours. Since this condition is likely to exist or develop on other helicopters of the same type design, an Airworthiness Directive is being issued which requires inspection of the main rotor hubs for cracks and replacement as necessary on Boeing Vertol Model 234 series helicopters.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

There are no U.S. registered aircraft affected. However, in support of the U.S. Type Certificate, the FAA is issuing this AD.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new Airworthiness Directive:

Boeing Airplane Company, Vertol Division: Applies to Boeing Vertol Model 234 series helicopters certificated in all categories equipped with main rotor hubs, PN's 114R2050–17, –18, –23, and–24. Compliance is required as indicated unless already accomplished.

To inspect the main rotor hubs for cracks, within the next 60 hours' time in service from the effective date of this AD, or before the accumulation of 700 hours' time in service on the main rotor hubs, whichever comes later, accomplish the following:

(a) Remove the hub retaining nut and washer and inspect for a height difference between the top of the shaft spline up to the rotor hub upper surface. The hub upper surface must be a minimum of 0.015 inches above the rotor shaft spline.

(b) Remove the rotor hubs from the aircraft and conduct an eddy current inspection for cracks on the bottom surface of the hub from the splines to a distance one inch out from the splines. Inspect the lower hub surface described above and the splined area from the lower surface upward for 1.75 inches using dye penetrant.

(c) Ensure that the washer between the main rotor shaft nut and main rotor hub is installed and torque the main rotor hub nut to the manufacturer's specifications as shown in the Boeing Vertol 234 Maintenance Manual.

(d) After the initial inspections of paragraphs (a), (b) and (c), repeat the main rotor hub inspections of paragraphs (b) and (c) in intervals not to exceed 125 hours' additional time in service from the last inspection.

(e) Remove from service hubs having cracks and replace with a serviceable part prior to further flight.

(f) Boeing Vertol Service Bulletin Number 234–65–1026 applies to these inspections.

(g) An equivalent method of compliance with this AD may be approved by the Manager, New York Aircraft Certification Office, 181 South Franklin Avenue, Valley Stream, New York 11581.

This amendment becomes effective October 15, 1982.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation that is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final regulatory evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **FOR FURTHER INFORMATION CONTACT.**

This rule is a final order of the Administrator. Under Section 1006(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1486(a)), it is subject to review by the various courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Fort Worth, Texas on September 17, 1982.

F. E. Whitfield,

Acting Director, Southwest Region.

[FR Doc. 82-26973 Filed 9-29-82; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 82-CEF-4-AD; Amendment 39-4458]

Airworthiness Directives; British Aerospace Model HP 137 Jetstream MK 1 and Series 200 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to British Aerospace Model HP 137 Jetstream Mk 1 and Series 200 airplanes which requires visual inspection and non-destructive testing (NDT) of the main landing gear (MLG) attachment fittings and supporting atructure for loose bolts and fatigue cracks. Loose bolts have been found at the MLG hinge fitting attach points and cracks have been detected in the hinge fitting and its support angle. These conditions if not detected and corrected, may reduce the structural integrity of the MLG and allow fuel leakage.

EFFECTIVE DATE: October 7, 1982.

Compliance: As prescribed in the body of the AD.

ADDRESSES: British Aerospace Jetstream Service Bulletins 7/5 dated 31 March 1982 and 7/8 dated 7 May 1982, with Revision 1 dated 20 May 1982, applicable to this AD may be obtained from British Aerospace Public Limited Company, Aircraft Group, Scottish Division, Prestwick Airport, Scotland KA9 2RW. A copy of this information is also contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: C. Christie, Manager, Aircraft Certification Staff, AEU–100, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, Brussels, Belguim, or P. Cormaci, Manager, Foreign FAR 23 Section, ACE–109, Central Region, FAA 601 E. 12th Street, Kansas City, MO 64106, telephone (816) 374–6932.

SUPPLEMENTARY INFORMATION: The Civil Aviation Authority (CAA) of the United Kingdom has notified the FAA of certain adverse service on British Aerospace Model HP 137 Jetstream MK 1 and Series 200 airplanes. Specifically, there have been several occurrences where the bolts which secure the MLG hinge fitting to the mainplane auxiliary and rear spars at wing station 110, have become loose and caused fuel leakage. In extreme cases of looseness, the holes in the hinge fitting and wing structure have become elongated with a consequent reduction in the strength of the attachment of the hinge fitting. In addition, cracks have developed in the company's fatigue test specimen aircraft at the MLG hinge fitting support angle and the MLG hinge fitting at the auxiliary spar web. If either condition is allowed to go unrepaired, it could compromise the structural integrity of the aircraft. Also, the fuel leakage accompanying the loose bolts may create a fire hazard. The manufacturer has made available in its Service Bulletins 7/5 and 7/8 Revision 1, instructions for inspection and if necessary, repair or replacement of the MLG hinge fitting, support angles and attach bolts. The CAA has made these inspections and repair or replacement mandatory by service bulletin.

The FAA has determined that the above described unsafe conditions may exist in other airplanes of the same type design. Accordingly, an AD is being issued requiring inspection and repair of British Aerospace Model HP 137 Jetstream MK 1 and Series 200 airplane MLG hinge fittings and attach points per

British Aerospace Service Bulletins 7/5 and 7/8 Revision 1.

Since an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aircraft, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Section 39.13 of the Federal Aviation Regulations (14 CFR Section 39.13) is amended by adding the following new AD.

British Aerospace: Applies to Model HP 137 Jetstream MK 1 and Series 200 airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent fuel leakage and detect hinge fitting support angle fatigue cracks:

(a) Within the next 50 landings, after the effective date of this AD:

(1) Inspect the MLG hinge fitting and attachment bolts in accordance with British Aerospace Service Bulletin No. 7/5 dated 31 March 1982.

(2) If the inspection accomplished in accordance with paragraph (a)(1) of this AD reveals no unsatisfactory conditions per the criteria in the service bulletin, return the aircraft to service and thereafter repeat the inspections specified in paragraph (a)(1) of this AD at intervals not exceeding 200 landings.

(3) If the inspection accomplished in accordance with paragraph (a)(1) of this AD reveals unsatisfactory conditions in accordance with the criteria in the service bulletin, prior to further flight perform repairs in accordance with instructions contained in the service bulletin and within the next 200 landings incorporate British Aerospace Modification No. 5174.

(4) The inspections required by paragraphs (a)(1) and (a)(2) of this AD may be discontinued upon incorporation of British Aerospace Modification No. 5174.

(b) Prior to the accumulation of 4000 landings or on airplanes already having 4000 landings within the next 50 landings after the effective date of this AD:

(1) Using a strong light and 8 power lens, visually inspect the MLG hinge fitting support angles for cracks in accordance with British Aerospace Bulletin No. 7/8 dated 7 May 1982, as revised by Revision 1 dated 20 May 1982, paragraphs 3.2 and 3.3.

(2) If no cracks are found, return the aircraft to service and thereafter repeat the inspection required by paragraph (b)(1) of this AD at intervals not exceeding 200 landings.

(3) If cracks are found emanating from either end of the support angle, but which have propagated no further than the tooling holes, return the aircraft to service and thereafter repeat the inspection required by paragraph (b)(1) of this AD at intervals not exceeding 200 landings.

(4) If cracks are found extending beyond the tooling hole, prior to further flight, replace the support angle with a serviceable support angle of the same part number.

(5) The inspections required by paragraph (b)(1) of this AD may be discontinued until the replacement angle has accumulated 4000 landings.

(c) Prior to the accumulation of 4000 landings or on airplanes already having 4000 landings, within the next 50 landings after the effective date of this AD:

(1) Using a strong light and 8 power lens, visually inspect the MLG hinge fitting at the auxiliary spar web for cracks in accordance with British Aerospace Service Bulletin No. 7/8 dated 7 May 1982, as revised by Revision 1 dated 20 May 1982, paragraphs 3.2 and 3.7.

(2) If no cracks are found, return the aircraft to service and within the next 25 landings, conduct the inspection required by paragraph (d) of this AD.

(3) If crack indications are found, confirm these indications and if required, prior to further flight replace the MLG hinge fitting in accordance with paragraph (d) of this AD.

(d) Conduct an NDT inspection of the MLG hinge fitting per British Aerospace Service Bulletin No. 7/8 dated 7 May 1982, as revised by Revision 1 dated 20 May 1982, paragraphs 3.10 through 3.12.

(1) If cracks are found, prior to further flight, replace the MLG hinge fitting with a new fitting of the same part number.

(2) If no cracks are found, return the aircraft to service and repeat the NDT inspection at intervals not to exceed 200 landings.

(3) Inspections required by paragraph (c) and (d) of this AD are not required on new fittings until they have accumulated 4000 landings.

(e) If the actual number of landings is unknown for the purpose of complying with this AD, one landing may be substituted for each 1/2 flight hour unless the operator substantiates a different flight hours to landings ratio. This substantiation may be submitted to and approved by an FAA Maintenance Inspector.

(f) A special flight permit may be issued in accordance with FAR 21.197 to operate the airplane to a location where the requirements of this AD may be accomplished.

(g) An equivalent method of compliance with this AD may be used if approved by the Manager, Area Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, Brussles, Belgium.

This amendment becomes effective on October 7, 1982.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(a)); sec. 11.89 of the Federal Aviation Regulations (14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "Addresses" at the location identified.

This is a final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review by only the Courts of Appeals of the United States or the United States Court of Appeals of the District of Columbia.

Issued in Kansas City, Missouri on September 20, 1982.

Murray E. Smith,

Director, Central Region.

[FR Doc. 82-26690 Filed 9-29-82; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Airworthiness Docket No. 82-ASW-57, Amendment 39-4486]

Airworthiness Directives; Societe National Industrielle Aerospatiale Model AS-350 and AS-355 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) requiring initial and repetitive inspection, and removal from service after 1,200 hours' total time in service, of the tail rotor drive shaft bearings on Aerospatiale Model AS-350 and AS-355 series helicopters. The AD is needed to prevent failure of a bearing which has resulted in failure of the drive shaft. Failure of the drive shaft may cause loss of directional control of the helicopter.

DATE: Effective October 15, 1982.

Compliance required as prescribed in the body of the AD.

ADDRESSES: The applicable service bulletins may be obtained from Aerospatiale Helicopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75051, Attention: Customer Support.

Copies of the service bulletins are contained in the rules docket, Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591 and at the Office of the Regional Counsel,

Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTACT: C. Christie, Manager, Aircraft Certification Staff, Europe, Africa, and Middle East Office, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, Telephone: 513–38–30., or Samuel E. Brodie, Aircraft Certification Division, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone: (817) 624–4911, extension 502.

SUPPLEMENTARY INFORMATION: There have been reports of four accidents possibly caused by loss of directional control due to failure or seizure of tail rotor drive shaft bearings and resulting failure of the drive shaft on Aerospatiale Model AS–350 helicopters. Societe Nationale Industrielle Aerospatiale provides corrective measures applicable to both the AS–350 and AS–355, in Service Bulletin Nos. 05.08 and 05.02 respectively, both dated May 27, 1982. The French Airworthiness Authority has also issued French airworthiness directives specifying compliance with both Aerospatiale service bulletins due to the similarity of design and application of the same bearing part numbers on both helicopter models. Since this condition is likely to exist or develop on other helicopters of the same type design, an airworthiness directive is being issued which requires initial and repetitive inspections of the tail rotor drive shaft bearings and removal of the bearings on attaining 1,200 hours' total time in service.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Approximately 344 aircraft could be affected by the requirements of this AD for an estimated impact of approximately $66,000 or $191 per aircraft.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, and Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Societe Nationale Industrielle Aerospatiale: Applies to model AS–350 and model AS–355 series helicopters certified in all categories.

Compliance is required as indicated, unless already accomplished.

To prevent possible failure or seizure of tail rotor drive shaft bearings (part numbers SKF 6007–2RS1MT47CA/AS704A33.651.010.) accomplish the following:

(a) Within the next 50 hours' time in service after the effective date of this AD, inspect the perpendicularity of each bearing relative to the tail rotor drive shaft in accordance with paragraph 1(C)(1)(a) and figure 1 of Societe Nationale Industrielle Aerospatiale Service Bulletin No. 05.08 for the model AS–350 helicopter, and Service Bulletin No. 05.02 for the model AS–355 helicopter, both dated May 27, 1982, (hereinafter referred to as the applicable service bulletin), or an FAA approved equivalent method.

Note.—Except for helicopter model applicability, the provisions of Service Bulletin Nos. 05.08 and 05.02 are identical.

(1) When perpendicularity of the bearing relative to the shaft is within runout indication of less than 0.2 mm (.008 in.), inspect the bearing in accordance with paragraph 1(C)(2) of the applicable service bulletin.

(2) When perpendicularity of the bearing relative to the shaft gives a runout indication of 0.2 mm (.008 in.) or more, and the bearing time in service does not exceed 300 hours, inspect the bearing in accordance with paragraph 1(C)(2) of the applicable service bulletin and replace the rubber sleeve with a serviceable sleeve.

(3) When perpendicularity of the bearing relative to the shaft gives a runout indication of 0.2 mm (.008 in.) or more and the bearing has more than 300 hours' time in service, remove the bearing and rubber sleeve from service and install a serviceable sleeve and bearing.

(b) Accomplish paragraph 1(C)(2) of the applicable service bulletin at intervals not to exceed 300 hours' time in service from the last inspection.

(c) For bearings with less than 1,100 hours' time in service on the effective date of this AD, remove the rubber sleeves and bearings from service and install serviceable sleeves and bearings, before or upon achieving 1,200 hours' time in service.

(d) For bearings with 1,100 hours' or more time in service on the effective date of this AD, remove the rubber sleeves and bearings from service and install serviceable sleeves and bearings within 100 hours' time in service after the effective date of this AD.

(e) When the tail rotor drive shaft rear section is disassembled in accomplishing the requirements of this AD, install the drive shaft in accordance with paragraph 1(C)(3) of the applicable service bulletin. When a bearing is replaced, the bearing perpendicularity relative to the tail rotor drive shaft must provide an out-of-round indication of 0.15 mm (.006 in.) or less when examined in accordance with paragraph 1(C)(1)(a) of the applicable service bulletin.

(f) Equivalent means of compliance must be approved by the Manager, Aircraft Certification Staff, AEU–100, Europe, Africa, and Middle East Office, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, or the Manager, Aircraft Certification Division, ASW–100, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

This amendment becomes effective October 15, 1982.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation that is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final regulatory evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption "For Further Information Contact."

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended (49 U.S.C. 1486(a)), it is subject to review by the various courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Fort Worth, Texas, on September 17, 1982.

F. E. Whitfield,

Acting Director, Southwest Region.

[FR Doc. 82–26659 Filed 9–29–82; 8:45 am]

14 CFR Part 71

[Airspace Docket No. 82–ANE–22]

Amendment to Description of Mansfield, Massachusetts Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends the Mansfield, Massachusetts 700-foot transition area to provide additional controlled airspace to protect aircraft executing the Non-Directional Beacon (NDB) Runway 32 original Standard Instrument Approach Procedure (SIAP) at Mansfield Municipal Airport, Mansfield, Massachusetts.

DATE: October 30, 1982

FOR FURTHER INFORMATION CONTACT: David Hurley, Manager, Operations, Procedures and Airspace Branch, ANE–530, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington,

Massachusetts 01803, Telephone: (617) 273–7285.

SUPPLEMENTARY INFORMATION:

History

On Thursday, June 24, 1982, a Notice of Proposed Rulemaking was published in the **Federal Register** (47 FR 27373) stating the FAA proposed to amend the 700-foot transition area so as to provide airspace protection for aircraft executing the NDB Runway 32 original SIAP at Mansfield Municipal Airport, Mansfield, Massachusetts. Interested persons were invited to participate in this rulemaking process by submitting written comments on the proposal to the FAA. No objections were received.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration amends § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by revising the 700-foot transition area at Mansfield Municipal Airport, Mansfield Massachusetts, as follows:

Mansfield, Massachusetts

Delete: "excluding that portion that coincides with the Boston, Massachusetts transition area."

After "to the VOR" insert: "and within 3 miles each side of the 312° bearing from the Mansfield NDB extending from the 5-mile radius area to 8.5 miles southeast of the Mansfield NDB excluding those portions that coincide with the Boston and Taunton, Massachusetts transition area."

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.61, Federal Aviation Regulations (14 CFR 11.61))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore it is certified that this (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal and; (4) rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Burlington, Massachusetts, on September 20, 1982.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910-13-M

---

14 CFR Part 97

[Docket No. 23344; Amdt. No. 1226]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and effficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO–730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4 and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Approaches, Standard instrument.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. By amending § 97.23 VOR/VOR/DME SIAPs identified as follows:

** * * Effective November 11, 1982*

Monroeville, AL—Monroe County, VOR/DME Rwy 3, Original
Monroeville, AL—Monroe County, VOR Rwy 3, Amdt. 6
Monroeville, AL—Monroe County, VOR/DME Rwy 21, Original
Monroeville, AL—Monroe County, VOR Rwy 21, Amdt. 6
Almyra, AR—Almyra Muni, VOR/DME–A, Amdt. 4
McGehee, AR—McGehee Muni, VOR/DME–A, Amdt. 2
Kalamazoo, MI—Kalamazoo Muni, VOR Rwy 17, Amdt. 13
Kalamazoo, MI—Kalamazoo Muni, VOR Rwy 23, Amdt. 14
Kalamazoo, MI—Kalamazoo Muni, VOR Rwy 35, Amdt. 13
Fishers Island, NY—Elizabeth Field, VOR–A, Amdt. 4
Ithaca, NY—Tompkins County, VOR Rwy 14, Amdt. 11
Bloomsburg, PA—Bloomsburg Muni, VOR Rwy 8, Amdt. 2
Victoria, TX—Victoria Regional, VOR Rwy 12L, Amdt. 9
Victoria, TX—Victoria Regional, VOR/DME Rwy 30R, Amdt. 1
Chincoteague, VA—NASA Wallops Flight Center, VOR/DME or TACAN Rwy 10, Amdt. 1

Note.—The FAA published an amendment in Docket No. 23318, Amdt. No. 1225 to part 97 of the Federal Aviation Regulations (Vol 47, FR No. 182, Page 41354; dated September 20, 1982) under Section 97.29 effective

October 28, 1982, which is hereby amended as follows: San Antonio, TX, San Antonio Intl, ILS Rwy 3, Amdt. 12, ILS Rwy 12R, Amdt. 9; ILS Rwy 30L Amdt. 6 are rescinded.

5. By amending § 97.31 RADAR SIAPs identified as follows:

** * * Effective November 11, 1982*

Tulsa, OK—Richard Lloyd Jones, Jr., RADAR-1, Original

** * * Effective October 28, 1982*

Fargo, ND—Hector Field, RADAR-1, Amdt. 5

6. By amending § 97.33 RNAV SIAPs identified as follows:

** * * Effective October 28, 1982*

Wichita, KS—Wichita Mid-Continent, RNAV Rwy 1L, Amdt. 3
Wichita, KS—Wichita Mid-Continent, RNAV Rwy 19R, Amdt. 3
Fargo, ND—Hector Field, RNAV Rwy 13, Amdt. 4

** * * Effective September 20, 1982*

Reading, PA—Reading Municipal Gen Carl A. Spaatz Field, RNAV Rwy 13, Amdt. 4
Reading, PA—Reading Municipal Gen Carl A. Spaatz Field, RNAV Rwy 18, Amdt. 4

** * * Effective September 14, 1982*

Charlottesville, VA—Charlottesville-Albemarle, RNAV Rwy 3, Amdt. 2

Note.—The FAA published an amendment in Docket No. 23277, Amdt. No. 1224 to Part 97 of the Federal Aviation Regulations (Vol 47, FR No. 173, Page 39147; dated September 7, 1982) under section 97.33 effective October 28, 1982, which is hereby amended as follows: Grand Ledge, MI, Abrams Muni, RNAV Rwy 27, Orig Cancelled.

(Secs. 30, 7 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on December 31, 1980.

Issued in Washington, D.C. on September 24, 1982.

John M. Howard,

Manager, Aircraft Programs Division.

BILLING CODE 4910-13-M

Federal Highway Administration

23 CFR Part 656

Carpool and Vanpool Projects

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The Federal Highway Administration (FHWA) is revising existing carpool and vanpool procedures to reflect changes required by the Surface Transportation Assistance Act of 1978. The revised rule contains the basic criteria for determining whether carpool and vanpool (ridesharing) projects are eligible for Federal-aid funding under 23 U.S.C. 146.

EFFECTIVE DATE: November 8, 1982.

FOR FURTHER INFORMATION CONTACT: Barbara Reichart, Office of Highway Planning, 202-426-0210, or Hugh T. O'Reilly, Office of the Chief Counsel, 202-426-0781, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: This rule amends the FHWA's existing carpool and vanpool regulation (23 CFR 656) as required by section 126 of the Surface Transportation Assistance Act of 1978 (STAA) (Pub. L. 95-599, 92 Stat. 2689). The STAA changes the Federal share for carpool and vanpool projects from 90 percent to 75 percent; permits the use of Federal-aid secondary system funds for such projects; changes these projects from demonstration projects to regular Federal-aid highway projects; and declares that special efforts should be made to promote commuter modes of transportation that conserve energy, reduce pollution and reduce traffic congestion. This rule does not concern grants and loans made pursuant to subsections (e) and (f) of section 126 of the STAA.

A notice of proposed rulemaking (NPRM) was published in the **Federal Register** (44 FR 70753) on December 10, 1979, requesting comments on proposed revisions to the carpool and vanpool regulation.

This rule was previously published on January 8, 1981, at 46 FR 2298. On January 29, 1981, a memorandum was issued by the President which, among other things, directed executive agencies to postpone for 60 days the effective dates of regulations which had been issued but were scheduled to become effective during that 60-day period. The Department of Transportation on February 4, 1981, pursuant to the President's memorandum, postponed the effective dates of all Department of Transportation regulations covered by the President's directive until March 31, 1981. The postponement afforded the government the opportunity to review each of these regulations. Based upon that review, the FHWA withdrew the regulation, 23 CFR 656, Carpool and Vanpool Projects, published at 46 FR 2298, January 8, 1981, to reassess this rule as well as the agency's overall implementation of this program in light of Executive Order 12291, issued by the President on February 17, 1981.

Based upon this review and assessment, the FHWA has determined that the regulatory process is the appropriate mechanism to implement the legislative and executive requirements for administering Federal-aid carpool and vanpool projects. The intent of this action is to provide clarity and uniformity of Federal policy and formal acknowledgement of Federal interest to support State initiatives in this area.

The rule itself is a product of recognized formal participation between FHWA, States, and other interested parties which gives the rule legitimacy and acceptance and establishes program consistency on such key issues as eligibility and project content.

Administering Federal-aid carpool and vanpool projects through this rule will improve cost effectiveness. First, it will save administrative time at all levels from local to Federal Government by clearly defining the basic program outline. Second, by uniformly articulating eligibility and project content, Federal-aid funds will be used more consistently of the legislatively intended purposes. In addition, this rule is a condensation of program experience with previous rules, combining into one shorter rule (four sections versus the previous seven) the basic guidance from previous rules, the changes required by new law, and policies developed from experience to date. Further, this rule is not a major action within the meaning of Executive Order 12291 nor is it a significant action within the meaning of the DOT Regulatory Policies and Procedures. The rule merely implements policies set forth in the STAA; it will not increase spending.

Therefore, having completed the assessment required by Executive Order (E.O.) 12291 and having determined that this rule is a necessary and desirable mechanism by which to administer Federal-aid carpool and vanpool projects, the FHWA has determined to proceed with issuance of this final rule. Inasmuch as this rule is substantially identical to the version which was

previously the subject of public comment, and no legislative changes have occurred in the interim, it is not anticipated that additional notice and opportunity to comment would result in the receipt of useful information.

Discussion of Comments

Thirty-three letters were submitted to the public docket (No. 79–28) in response to the NPRM. The FHWA carefully reviewed all comments received. As many comments as possible have been incorporated into this final rule. The purpose of this preamble is to explain our actions regarding the most significant comments as well as to present our approach and policies regarding the Federal-aid role in ridesharing transportation.

The FHWA recognizes that all ridesharing efforts, regardless of the purpose of the trips involved, help to conserve energy, reduce pollution, and reduce traffic congestion. However, the work or commute trip is the most adaptable trip purpose for ridesharing arrangements, accounting as it does for some 40 percent of all home-based trips taken by automobile. The commute trip is specifically addressed in the national policy statement in the STAA. The FHWA continues this emphasis for ridesharing projects as such projects contribute to better transportation system management, especially during peak travel periods where street and highway physical capacity is often constrained. This policy emphasis is not meant to inhibit State and local officials from implementing Federal-aid ridesharing projects that address other trip purposes where such projects are consistent with local needs and the policy objectives stated in § 656.3 of this rule.

Several comments were received regarding the size of vans which can be purchased with Federal-aid funds. Based on a review of these comments and the assessment made under E.O. 12291, the allowable passenger capacity in § 656.5(c)(3)(i) has been changed from 8 to 15 passengers to 7 to 15 passengers to accommodate smaller sized vans and other vehicles available in the marketplace and to be consistent with certain State motor vehicle code definitions that use the 7 passenger number criterion. Section 656.5(c)(3)(ii) requires that provision be made for repayment of the acquisition cost of the van, but also specifies two situations in which repayment may not be required where the van is used as a marketing device.

Many commenters objected to the lowering of the Federal matching ratio from 90 percent to 75 percent for Federal-aid ridesharing projects. This change was legislatively mandated by Congress in Section 126(b) of the STAA. The STAA repealed the Emergency Highway Energy Conservation Act of 1974 under which ridesharing projects were funded on a demonstration basis with a 90 percent Federal share. The STAA removed the demonstration status and incorporated ridesharing projects into the regular Federal-aid highway program, which limits the Federal share of the project cost to 75 percent (except as provided under Section 120 of Title 23 U.S.C., for certain public land States).

Under the authority of 23 U.S.C. 146(b), the FHWA has determined that arrangements made by the State for contributed essential project-related work by local agencies and private organizations may be included in the total project costs and used as the non-Federal match when approved and authorized in accordance with regular Federal-aid procedures. The cost of such work must be properly valued, supportable and verifiable in order for inclusion as an eligible project cost. Private employers are particularly encouraged to commit their resources as described above in order to contribute to areawide ridesharing efforts. Contributions from vendors who provide supplies or services as a cost to the project should reduce the burden some States or local areas may face in providing the required States' pro-rata share of the project costs. However, in no case can Federal reimbursement exceed the amount of funds actually expended on eligible work by the State or political subdivisions thereof. The foregoing procedure is implemented in a new § 656.7.

Section 656.5(c)(5) indicates that Federal-aid funds will participate in the initial or renewal costs of leasing parking spaces or the acquisition of easements or restrictions to provide preferential parking for carpools. Where a reduction in the overall number of vehicles using the designated portion of a commercial parking facility can be demonstrated, that reduction may be used in computing the lease or acquisition cost for the project. However, the regulation does not permit the cost to be computed on the basis of a reduction of the per-vehicle user charge for parking in the designated area.

Another issue raised involved the use of Federal-aid Interstate (FAI) funds for ridesharing projects. This issue had two general aspects. The first was the comment offered by many that FHWA should allow FAI funds to participate in the costs to construct exclusive (not served by existing or planned transit) carpool and vanpool fringe parking facilities not located within the existing FAI right-of-way. At the present time, FHWA has authority under 23 U.S.C. 146(a) to use Federal-aid urban (FAUS), primary (FAP) and secondary (FAS) system funds for such carpool and vanpool fringe parking facilities. Federal-aid Interstate construction funds can *only* participate in fringe parking facilities that are associated with an approved high occupancy vehicle (HOV) lane(s) for which costs were included in the 1981 Interstate Cost Estimate. Federal-aid Interstate 4R funds can be used to construct fringe parking facilities serving an Interstate route that are not otherwise eligible for Interstate construction funds provided such facilities serve public mass transportation.

It should be emphasized that other regular construction projects such as constructing high occupancy vehicle (HOV) lanes and facilities and multimodal fringe parking facilities can be funded with all categories of Federal-aid funds including FAI funds.

The second aspect of FAI funding involved numerous suggestions that these funds be eligible to participate in the administrative costs of ridesharing programs. Currently, 23 U.S.C. 146(a) specifically authorizes the use of FAUS, FAP, and FAS funds for such purposes. The FHWA believes that these three classes of funds are sufficient to support ridesharing projects and strongly encourages State and local officials to give priority to ridesharing projects in the annual programs of projects prepared by the States.

Another concern raised by commenters is the language in § 656.5(a) that ridesharing projects "must serve a Federal-aid system" and be financed with the appropriate class of eligible funds, "depending on the system served." This is merely a restatement of FHWA policy that Federal-aid funds should be used for projects that will improve the people-moving efficiency of the overall Federal-aid system, and that the class of funds used should depend on the system benefited by the expenditure. In projects involving physical facilities, such as providing a bus and carpool lane, the class of Federal-aid funds to use is usually obvious. With respect to other ridesharing projects such as promotion and matching programs or van acquisition, which by their nature cannot be limited to a specific physical facility, State and local officials must decide which Federal-aid system will receive the primary benefit and use that

class of funds for the project. Splitting or prorating of costs among different system funds for a nonconstruction ridesharing project that serves a geographic area is neither required nor encouraged.

Many commenters suggested that the requirement in § 656.5(b) that Federal-aid carpool and vanpool projects not have "an adverse effect on any mass transportation system" be deleted. This restriction is specifically included in the authorizing legislation (STAA) and therefore cannot be administratively deleted. In considering this legislation, the congressional conferees addressed the "adverse effect" issue in their Conference Report [1] and stated that an adverse effect had to be an "appreciable adverse impact," more than a *de minimis* effect. The FHWA believes that the intent of this requirement is consistent with the policy and practice followed by Federal-aid ridesharing projects since 1974, i.e., ridesharing projects are intended to complement public transportation and accommodate travel demands that transit cannot conveniently accommodate on a cost-effective basis. Carpools and vanpools are viewed as integral parts of a balanced transportation system that complement and enhance the efforts of public and private transit services to broaden the alternatives to the single-occupancy automobile. Ridesharing operations are particularly complementary for low-density and suburb-to-suburb trips not efficiently served by fixed-route, radial transit services and where adequate peak-period transit service is not available. In many cases, carpooling and vanpooling activities help to identify potential transit expansion markets and for many commuters serve as the first step in shared riding, preparing them to become transit riders as service expands.

The FHWA believes that through the State-administered Federal-aid program, institutional processes are in place that ensure coordination of transportation planning and project funding and protection against appreciable adverse impacts. At the local level, the metropolitan planning organization, comprised of local elected officials and with representation of other agencies, including transit operators, provides an additional mechanism to ensure that urban ridesharing projects do not have a substantial adverse effect on urban area transit service. It should be noted that several transit agencies currently use Federal-aid funds to support ridesharing projects to complement their existing transit service. The FHWA welcomes these ridesharing program partners and strongly encourages other transit operators to support ridesharing projects.

[1] H.R. Rep. No. 95-1797, 95th Cong., 2d Sess. 98 [1978].

Other Considerations

The FHWA believes the sponsoring role the Federal Government is taking with respect to ridesharing is creating an organizational commitment within the transportation profession and between leaders in both the public and private sectors to implement and expand ridesharing opportunities. Public officials and private employers are increasingly regarding ridesharing as an effective tool of community and economic development, harnessing the efficient use of private vehicles to serve the public interest.

The FHWA's primary involvement is to provide a safe and adequate physical network of streets and highways, including funding of ridesharing incentives, to hasten the removal of legal and regulatory barriers that inhibit the growth of ridesharing and to provide information, technical assistance, and encouragement to accelerate and enhance ridesharing.

Ridesharing as a practice has grown rapidly beyond its carpool origins and is still evolving as a concept. This rule addresses the use of Federal-aid highway funds to help support and carry out carpool and vanpool projects, the backbone of the ridesharing concept.

The FHWA has determined that this document contains neither a major rule under Exective Order 12291 nor a significant regulation under DOT regulatory policies and procedures.

A regulatory evaluation is available for inspection in the public docket and may be obtained by contacting Barbara Reichart of the program office at the address specified above. For the reasons provided earlier in this preamble, under the criteria of the Regulatory Flexibility Act, it is certified that this rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 23 CFR Part 656

Carpools, Grant programs—transportation, Parking, Ridesharing.

In consideration of the foregoing, Chapter 1 of Title 23, Code of Federal Regulations, Part 656 is revised to read as set forth below.

Issued on: September 22, 1982.

Ray Barnhart,

Federal Highway Administrator, Federal Highway Administration.

PART 656—CARPOOL AND VANPOOL PROJECTS

Sec.
656.1 Purpose.
656.3 Policy.
656.5 Eligibility.
656.7 Determination of an exception.

Authority: 23 U.S.C. 146 and 315; § 126 of the Surface Transportation Assistance Act of 1978, Pub. L. 95-599, 92 Stat. 2689; 49 CFR 1.48(b).

§ 656.1 Purpose.

The purpose of this regulation is to prescribe policies and general procedures for administering a program of ridesharing projects using Federal-aid primary, secondary, and urban system funds.

§ 656.3 Policy.

Section 126(d) of the Surface Transportation Assistance Act of 1978 declares that special effort should be made to promote commuter modes of transportation which conserve energy, reduce pollution, and reduce traffic congestion.

§ 656.5 Eligibility.

(a) Projects which promote ridesharing programs need not be located on but must serve a Federal-aid system to be eligible for Federal-aid primary, secondary, or urban system funds depending on the system served. The Federal share payable will be in accordance with the provisions of 23 U.S.C. 120. Except for paragraph (c)(3) of this section, for all purposes of this regulation the term "carpool" includes "vanpool."

(b) Projects shall not be approved under this regulation if they will have an adverse effect on any mass transportation system.

(c) The following types of projects and work are considered eligible under this program:

(1) Systems, whether manual or computerized, for locating potential participants in carpools and informing them of the oppportunities for participation. Eligible costs for such systems may include costs of use or rental of computer hardware, costs of software, and installation costs (including both labor and other related items).

(2) Specialized procedures to provide carpooling opportunities to elderly or handicapped persons.

(3) The costs of acquiring vanpool vehicles and actual financial losses that occur when the operation of any vanpool is aborted before the scheduled termination date for the reason, concurred in by the State, that its continuation is no longer productive. The cost of acquiring a vanpool vehicle is eligible under the following conditions:

(i) The vanpool vehicle is a four-wheeled vehicle manufactured for use on public highways for transportation of 7–15 passengers (no passenger cars which do not meet the 7–15 criteria and no buses); and

(ii) Provision is made for repayment of the acquisition cost to the project within the passenger-service life of the vehicle. Repayment may be accomplished through the charging of a reasonable user fee based on an estimated number of riders per vehicle and the cost of reasonable vehicle depreciation, operation, and maintenance. Repayment is not required under the following conditions:

(A) When vehicles are purchased as demonstrator vans for use as a marketing device. Vehicles procured for this purpose should be used to promote the vanpool concept among employees, employers, and other groups by allowing potential riders and sponsors to examine commuter vans; or

(B) When vehicles are purchased for use on a trial commuting basis to enable people to experience vanpooling first hand. The trial period must be limited to a maximum of 2 months. That part of the user fee normally collected to cover the capital or ownership cost of the van would be eligible for reimbursement as a promotional cost during the limited trial period. As with established vanpool service, all vehicle operating costs must be borne by the user(s) during the trial period.

(4) Work necessary to designate existing highway lanes as preferential carpool lanes or bus and carpool lanes. Eligible work may include preliminary engineering to determine traffic flow and design criteria, signing, pavement markings, traffic control devices, and minor physical modifications to permit the use of designated lanes as preferential carpool lanes or bus and carpool lanes. Such improvements on any public road may be approved if such projects facilitate more efficient use of any Federal-aid highway. Eligible costs may also include costs of initial inspection or monitoring of use, including special equipment, to ensure that the high occupancy vehicle (HOV) lanes designation is effective and that the project is fully developed and operating properly. While no fixed time limit is being arbitrarily prescribed for the inspection and monitoring period, it is intended that this activity be conducted as soon as possible to evaluate the effectiveness of the project and does not extend indefinitely nor become a part of routine facility operations.

(5) Signing of and modifications to existing facilities to provide preferential parking for carpools inside or outside the central business district. Eligible costs may include trail blazers, on-site signs designating highway interchange areas or other existing publicly or privately owned facilities as preferential parking for carpool participants, and initial or renewal costs for leasing parking space or acquisition or easements or restrictions, as, for example, at shopping centers and public or private parking facilities. The lease or acquisition cost may be computed on the demonstrated reduction in the overall number of vehicles using the designated portion of a commercial facility, but not on a reduction of the per-vehicle user charge for parking.

(6) Construction of carpool parking facilities outside the central business district. Eligible costs may include acquisition of land and normal construction activities, including installation of lighting and fencing, trail blazers, on-site signing, and passenger shelters. Such facilities need not be located in conjunction with any existing or planned mass transportation service, but should be designed so that the facility could accommodate mass transportation in the event such service may be developed. Except for the requirement of the availability of mass/public transportation facilities, fringe parking construction under this section shall be subject to the provisions of 23 CFR 810.106.

(7) Reasonable public information and promotion expenses, including personnel costs, incurred in connection with any of the other eligible items mentioned herein.

§ 656.7 Determination of an exception.

(a) The FHWA has determined under provisions of 23 U.S.C. 146(b) that an exceptional situation exists in regard to the funding of carpools so as to allow the State to contribute as its share of the non-Federal match essential project-related work and services performed by local agencies and private organizations when approved and authorized in accordance with regular Federal-aid procedures. The cost of such work must be properly valued, supportable and verifiable in order for inclusion as an eligible project cost. Examples of such contributed work and services include: public service announcements, computer services, and project-related staff time for administration by employees of public and private organizations.

(b) This determination is based on: (1) The nature of carpool projects to provide a variety of services to the public; (2) the fact that carpool projects are labor intensive and require professional and specialized technical skills; (3) the extensive use of joint public and private endeavors; and (4) the fact that project costs involve the acquisition of capital equipment as opposed to construction of fixed items.

(c) This exception is limited to carpool projects and therefore is not applicable to other Federal-aid projects. The exception does not affect or replace the standard Federal-aid funding procedures or real property acquisition procedures and requirements, Part 712, The Acquisition Function.

BILLING CODE 4910-22-M

DEPARTMENT OF EDUCATION

34 CFR Parts 537, 667, and 764

Removal of Miscellaneous Regulations

AGENCY: Education Department.

ACTION: Final regulations.

SUMMARY: The Secretary amends Title 34 of the Code of Federal Regulations (CFR) by removing certain obsolete parts. These regulations are no longer needed for the reasons described in this document. The Secretary takes this action to eliminate unnecessary regulations.

EFFECTIVE DATE: Part 667 is removed effective October 1, 1982. Parts 537 and 764 are removed effective September 30, 1982.

FOR FURTHER INFORMATION CONTACT: A. Neal Shedd, Director, Division of Regulations Management, 400 Maryland Avenue, SW., (Room 2129, FOB–6), Washington, D.C. 20202. Telephone: (202) 245–7091.

SUPPLEMENTARY INFORMATION: Under Executive Order 12291, effective February 17, 1981, the Department of Education (ED) is reviewing, and, where possible, eliminating unnecessary regulations. After reviewing the ED regulations listed in this document, we have determined that they are now obsolete. The purpose of this document is to remove these regulations from Title 34 of the CFR.

We are removing the following parts:

Part 537—Indochina Refugee Children Assistance Program. These regulations are obsolete because legislation authorizing this program was repealed by the Consolidated Refugee Education Assistance Act, Pub. L. 97–35, Title V, Section 542(2).

Part 667—The International Understanding Program. These regulations are obsolete because legislation authorizing this program was repealed effective October 1, 1982, by the Education Consolidation and Improvement Act of 1981, Pub. L. 97–35, Title V, Section 587(a)(1).

Part 764—Secretary's Discretionary Program. These regulations are obsolete because they have been superseded by the Education Consolidation and Improvement Act of 1981, Pub. L. 97–35, enacted August 13, 1981.

Grants previously awarded by ED under these regulations remain subject to the regulations in effect at the time the grants were made.

The publication of this document as a proposed rule for public comment is unnecessary because it concerns only the removal of obsolete regulations from the CFR.

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 219

National Forest System Land and Resource Management Planning

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: In March 1981, the Presidential Task Force on Regulatory Relief identified as a high priority for review the rule which guides land and resource management planning in the National Forest System. As a result of that review, the Department of Agriculture is issuing final revised regulations. These rules require an integration of planning for National Forests and Grasslands, including the planning for timber, range, fish and wildlife, water, wilderness, and recreation resources, together with resource protection activities, such as fire management, and the use of other resources, such as minerals.

EFFECTIVE DATE: November 1, 1982.

ADDRESSES: Comments or questions on these final rules may be addressed to: Chief, Forest Service, USDA, P.O. Box 2417 (1920), Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Charles R. Hartgraves, Director, Land Management Planning, 202/447–6697.

SUPPLEMENTARY INFORMATION: The Forest and Rangeland Renewable Resources Planning Act of 1974 (RPA) (88 Stat. 476, et seq.), as amended by the National Forest Management Act of 1976 (NFMA) (90 Stat. 2949, et seq.; 16 U.S.C. 1601–1614), specifies that an interdisciplinary approach will be used in land and resource management planning for the National Forest System and that there will be a periodic review of the planning process, followed by any necessary amendments to keep it current with statutory requirements. These statutes also provide for the establishment and revision of national, regional, and local resource goals and objectives based on a periodic assessment of the future supply and demand of renewable resources from public and private forest and range lands. Achievement of these goals and objectives is the purpose of the planning process provided in these regulations. These acts also require public participation in the development, review, and revision of land and resource management plans and the coordination of such plans with State and local units of government and other Federal agencies.

These regulations apply to all land and resource management plans developed hereafter for the National Forest System. By October 1985, plans required by these regulations should be developed for all National Forest System lands.

Introduction

In March 1981, the Presidential Task Force on Regulatory Relief identified as a high priority for review the rule which guides land and resource management planning on the National Forest System. As a result of this review, the Secretary proposed changes in the existing rule to streamline the land management planning process and better direct the process towards the desired result of maximizing net public benefits from National Forest System lands. The proposed rule was published on pages 7678–7696 of the Federal Register of February 22, 1982.

Analysis of Public Comment

The proposed revision of the planning regulations generated substantial public interest. In response, the Department extended the public comment period from April 23, 1982, until July 6, 1982, and announced a meeting of a panel of consultants (consisting of members of the former Committee of Scientists), June 30–July 2, to discuss and consider major topics emerging from comments on the proposed rule (47 FR 24346). The meeting was open to the public. Many of the revisions to the final rule reflect the recommendations of the panel.

A total of 2,020 responses were received on the proposed rules. Of the responses received, 88 percent were from individual citizens; 2 percent from government agencies; 1 percent from industry; and 5 percent from environmental groups. In addition, inquiries from members of Congress were received.

The majority of the comments were general in nature, addressing broad issues. About 8 percent of the responses contained substantive recommendations for particular sections of the regulations.

Most respondents viewed the proposed revisions as much more than "streamlining." When viewed as a whole, the revisions represented to most of those who wrote, an "upsetting" of a carefully developed balance between

environmental and industrial interests. While some respondents acknowledged that the revisions represented some improvements, e.g., organizational changes, most felt that the substantive changes favored commodity output at the expense of multiple-use management. Language that had been deleted as "unnecessary" apparently had great symbolic meaning to many people. The concern, in short, was that, in the Department's desire to expedite planning and shorten the existing regulations, the basic purpose of the Forest and Rangeland Renewable Resources Planning Act and the National Forest Management Act of 1976, may have been compromised.

In addition, numerous reviewers stated that there is presently no basis (such as completed plans) on which to evaluate any possible shortcomings of the existing regulations. Approximately 60 percent of respondents specifically requested that the Forest Service implement the existing regulations and not "change direction in mid-stream."

A few respondents supported the decision to revise the regulation, agreeing that they resulted in improved clarity and procedures. Some felt the proposed changes were necessary and that the Forest Service revisions were consistent with Executive Order 12291.

The greatest interest was expressed in § 219.13 Forest Planning Integration Requirements. The majority of the comments related to the revisions of provisions on departure from the nondeclining yield timber harvest policy and to wildlife. Public participation was also a subject which received a great deal of attention.

All suggestions and comments have been reviewed, analyzed, and considered in preparation of the regulations.

Responses are available for review at the office of Land Management Planning, Forest Service, U.S. Department of Agriculture, 14th and Independence Avenue SW., Room 4021, South Building, Washington, D.C. 20013. The following summarizes the major comments and suggestions received on the proposed revision of 36 CFR Part 219 and the Department's response to these comments in the final rule. Comments are keyed to the section numbers and headings of the proposed rule document.

Section 219.1 Purpose

Summary of Major Comments: Many respondents strongly objected to the deletion of the 14 planning principles on the basis that these are important statements of policy which serve as philosophical guides for managing the National Forest System. There was a general uneasiness that the National Forests would no longer be considered ecosystems. Respondents viewed the principles as emphasizing the intent of the Congress in enacting the 1976 Act—that management of the National Forests consider all resources—both marketable and nonmarketable.

Many felt the newly introduced term, "net public benefits," threatened overemphasis on development of marketable resources. It was argued that "maximization of net public benefits" is a misleading term and open to several interpretations.

There were several respondents who stated that the maximization of net public benefits and economic efficiency should be the driving force behind forest planning. However, even some of these comments called for a more quantitative definition of net public benefits.

Response: In the final rule, the 14 planning principles have been reinstated, and the relationship between achieving multiple-use goals and maximizing net public benefits has been restated more clearly. The meaning and use of the term "net public benefits" was misinterpreted by many reviewers as being largely synonymous with "present net value," even though the definitions in § 219.3 clearly indicate that such is not the case. Net public benefits include all outputs and effects. The concept includes both positive and negative values that cannot be quantitatively valued and therefore require the decisionmaker to subjectively balance such benefits or costs with each other and with those that can be quantified. The goal of "maximizing net public benefits" restates direction given to Gifford Pinchot by the Secretary of Agriculture upon the establishment of the Forest Service. That direction was, in part, "* * * where conflicting interests must be reconciled the question will always be decided from the standpoint of the greatest good of the greatest number in the long run. * * *" This goal, expressed in either form, is fully consistent with the language and intent of the Multiple Use-Sustained Yield Act. The definition of net public benefits in § 219.3 has been changed to more clearly describe the concept intended.

Section 219.2 Scope and Applicability

There were very few comments on this section. For clarification, specific language has been added concerning special area authorities.

Section 219.3 Definitions and Terminology

Summary of Major Comments: Removal of the term "integrated pest management" in the proposed rule was interpreted by many as elimination of the concept itself. The perceived omission of the technical concept of integrated pest management as the operating principle for dealing with insects and other pest problems was seen as an error on the part of the Forest Service.

Some respondents viewed the maximization of net public benefits and economic efficiency as rightfully being the driving force behind forest planning and as central to Forest Service management objectives and planning. However, some felt that the definition lacked substance and was ambiguous. It was requested that the reference to qualitative measures be removed and a more quantitative definition be developed. Some asked for a definition of both qualitative and quantitative criteria. Some recommended a much clearer and precise definition be developed, based on accepted economic principles, which would include specific criteria for using the measure.

As a decision criteria, some said maximizing net public benefits represented replacement of congressional intent with an Executive branch criterion and would, therefore, be inappropriate. Some said the vague definition would make evaluation of alternatives difficult. Some felt that the process proposed for maximizing net public benefits in forest planning violates the multiple use mandate by exalting the values attributable to commodity resources while largely ignoring values of resources not easily priced. Several respondents pointed out that as defined "maximization of net public benefits" is indeterminate and is, therefore, not a good criterion for evaluating alternatives.

The proposed regulations defined "multiple use" as the management of all renewable surface resources in the National Forest System. Therefore, it was recommended that the "multiple use" definition be revised to reflect the one in the Federal Land Policy and Management Act of 1976, which includes both renewable and nonrenewable resources. Some recommended that the definitions in § 219.3 be expanded to include both renewable and nonrenewable resources. It was suggested nonrenewable resources should include crude oil, natural gas, geothermal resources, carbon dioxide, and other nonrenewable minerals.

Several respondents suggested changes in the published definitions of such terms as "cost efficiency," "biological growth potential," "even-

aged system," "silvicultural systems," "present net value," "real dollar value," "receipt shares," "corridor," "diversity," "goods and services." Several others suggested definitions be included for previously undefined terms, such as "management area," "economic impacts," and "demand."

Response: The Department reexamined the "Definitions" section in light of public comment and a number of changes have been incorporated in the final rule.

1. All suggested changes and additions that seemed to clarify the intended meanings were adopted.

2. Definitions were added for "forest land," "planning period," "planning horizon," and "integrated pest managment."

3. The following terms were redefined to improve clarity: "management concern," and "net public benefits." In the final rule, "net public benefits" has been redefined to more clearly reflect the intent to consider both tangible and intangible benefits and costs and to more clearly identify the term as a concept rather than as a quantitative index that can be objectively applied.

4. Minor changes in wording were made to the following terms: "allowable sale quantity," "sale schedule," "timber production."

5. The term "public participation activities" was dropped from the definition section and included with text in § 219.6, because it was not truly a definition but rather a listing of activities included.

6. The terms "even-aged system" and "uneven-aged system" were changed to "even-aged management" and "uneven-aged management," and those terms, as well as "silvicultural system," were redefined to bring them into agreement with the terminology jointly accepted by the Society of American Foresters and the Forest Service.

7. Requests to define additional terms which are used in the sense of their standard dictionary meanings have not been honored in the final rule.

8. The final rule retains the current definition for "multiple use" since it is a direct quote from the Multiple Use-Sustained Yield Act that directs Forest Service management of the National Forest System.

Section 219.4 Planning Levels

Summary of Major Comments: Most of the comments received on this section related to the regional planning level.

Some stated that the existing language in this section is superior to that of the proposed rule, as it requires planning that meets clearly delineated objectives, with provisions for controlled changes in objectives if the planning analysis shows changes are needed. The proposed language, they felt, promoted planning without objectives.

Many of the comments stated that the regional plan should do more than provide guidance for resolving regional issues; it should actively resolve regional public issues and management concerns and give specific direction to National Forests.

Some thought the regional plan should do more than convey direction and information. Since the regional plan is not required by statute, some reviewers stated that the revision process presented an opportunity to more broadly develop the regional plan's purpose.

It was also suggested that regional plans be eliminated and the functions now assigned regional planning be accomplished through another mechanism.

There were numerous comments that the proposed revision promoted "top-down" planning. Some said the proposals violate congressional intent to emphasize planning based on local information. They argued that the existing regulations require an evaluation of national targets, while the proposed regulations would not allow the Forest Supervisor the option to request adjustments based on local supply and demand, community stability, or potential environmental effects.

Response: In revising this section and §§ 219.8 and 219.9 of the final rule, the Forest Service considered the following factors:

1. The flexibility each Region has to match up the forest plans with the firm program targets established for the Region by the RPA Program is quite limited. Regional planning is essentially program planning rather than land management planning.

2. The process outlined by NFMA for forest planning implies a much broader decision base and different types of decisions than is necessary for regional planning. Efforts to use the same process for regional planning show that at best it is an inefficient use of planning resources and risks misleading the public into expecting more from the regional plans than either could or should be delivered. Therefore, the regional planning process was tailored to more closely portray the kinds of decisions and the flow of information pertinent to that level. The changes made in regional planning in the final rule also ensure close integration of the land and resource management planning process with the RPA Program development.

3. The structure and relationships of multi-level planning must recognize the different roles appropriate to each planning level. The Forest Service has started work on the 1985 RPA Program update. The analysis for this update is to be based in part on data generated in the forest planning process, and it will constitute the development phase of the next round of regional planning. This process is an iterative one, both during each round of planning, and between rounds. In this manner each Forest's capabilities and needs are reflected in the National RPA Program. There should be no misunderstanding, however, of the preeminent role of the President's Statement or Policy and the RPA Program upon which the statement is based. That role is firmly established by the Renewable Resources Planning Act.

As a result of comments received, and in consideration of the foregoing factors, the name of the regional planning document has been changed to Regional Guide to more clearly reflect the intent of that document. Statements have been added to both the regional and forest planning subsections that provide for adjustment of the resource objective tentatively assigned to each unit, and the Chief has been identified as having approval responsibility for the Regional Guides. Editorial changes were made to clarify intent and to remove some material that duplicated requirements treated in later sections.

The suggestion that the regional plan be made a more comprehensive document that would resolve all regional issues and concerns has not been incorporated in the final rule. The most urgent need and primary utility of a regional document at this time and in the context of NFMA planning is to facilitate development of forest plans. Direction necessary to resolve regional issues or concerns that do not directly affect forest planning can more properly be addressed through the normal Forest Service directive system.

Section 219.5 Interdisciplinary Approach

Summary of Major Comments: Identification of the interdisciplinary planning team's functions and personal attributes was broadly viewed as necessary to the effectiveness of the team effort.

The proposed regulations were seen as moving away from true interdisciplinary planning because the responsible official would be allowed to use whatever "combination of Forest Service staff" needed to achieve an interdisciplinary approach. In contrast, some felt the regulations should require certain specific disciplines and

qualifications. Concern was also expressed that expertise about subsurface resources should be required in the interdisciplinary process, that, for example, a geologist should be added to the team. Some requested that economists be included on the interdisciplinary team because of increased economic attention. Minority opinion was received that § 219.5 was too specific. This view was based on the belief that planning needs vary among Forests and, therefore, more general direction would be more effective.

Overall, though, it was the general consensus of reviewers that the proposed revisions weakened the regulations and moved away from multiple-use planning.

Response: To respond to the majority of comments, most of the language of the current regulations is being retained in the final regulations. Minor editorial changes were made for clarity.

Section 219.6 Public Participation

Summary of Major Comments: About 45 percent of the respondents addressed this section. The majority opinion held that public participation would become more difficult under the proposed revisions.

The proposed changes in public participation were generally seen as weakening public involvement in the total planning process and resulting in less frequent and less effective public participation.

Also, the proposed regulations were viewed by many as a premise for allowing planners to arbitrarily withhold requested information by claiming the request to be "unreasonably" burdensome.

To many, the cumulative changes in the public participation provision gave the appearance of undermining the public participation process. The specific requirements of the existing regulations had been seen by many reviewers as standards for public participation activities.

General response to the newly proposed 30- and 60-day limitations for public participation activities was favorable. However, the specifics of how the public would be notified of activities (for example, in the **Federal Register**) was requested.

Some people felt the proposed changes in this section were, in general very good.

Response: In the final rule, the Department has honored the majority of requests by reinstating most of the language of the current regulations and eliminating § 219.6(d) of the proposed rule. Subsection 219.6(f) of the current regulations has been deleted because that subsection was essentially redundant. A new subsection § 219.6(k) which was codified at § 219.7(d) of the February 22 proposed rule has been added. This move was made because § 219.7 is focused on coordination of planning efforts of other public agencies as opposed to participation by individuals.

Section 219.7 Coordination With Other Public Planning Efforts

Summary of Major Comments: Some felt the proposed revisions weakened the regulations through vague wording, although they admitted that a coordinated effort fully meeting the intent of the original regulations would still be possible.

Some suggested that the concept of coordination with public agencies and Indian tribes should be carried clearly throughout other sections of the regulations, specifically including States and other affected entities.

Some felt the regulations should specificallly outline the types of information to be included in public announcements. Some felt that other specific requirements, such as the requirement to maintain lists of affected or interested individuals and groups, should be reinstated.

A minority view stated that the revisions and deletions were appropriate in streamlining and simplifying regulations. Those of this view felt no substantive changes in process would result.

Some respondents suggested deleting the qualifying phrase "to the extent practical" and reinstating without qualification the requirement to coordinate planning activities with adjacent and intermingled landowners. Others thought this requirement should be expanded further to include (1) holders of major rights-of-way; (2) all holders of grazing permits; (3) land and mineral owners of property which may be affected; and (4) "lessees" as well as landowners.

In general, most respondents preferred the existing language.

There was concern expressed regarding the Government's trust obligations to protect Indian treaty resources within, or affected by management of, National Forest areas. It was suggested that coordination procedures must comply not only with National Environmental Protection Act (NEPA) provisions but also with the Federal trust responsibility to Indian tribes.

Response: In the final rule, § 219.7(d) was moved to § 219.6(k) as previously indicated and a new § 219.7(d) on meeting with officials of State and Indian tribal governments and other Federal agencies has been added to address many or the concerns expressed by respondents. § 219.8(j) of the current regulations that deals with monitoring and evaluation of effects on and by adjacent public landowners has been retained in the final rule as § 219.7(f).

Section 219.8 Regional Planning Procedure

Summary of Major Comments: The reorganization of this section into two sections (Regional Guide Content and Regional Planning Procedures) seemed to be favorably received.

Several responses indicated that regional planning should provide standards and guidelines for regional issue resolution as required by the existing regulations rather than simply providing guidance for resolution. Some felt this rewording would promote uncoordinated issue resolution and a disregard for the cumulative impacts of the resolution process, and, in general, did not provide enough emphasis on resolving issues at the regional level.

Several suggested that limiting the scope of the Regional Guide Environmental Impact Statement (EIS) to proposed standards and guidelines falls short of NEPA requirements. Under NEPA, an EIS must be prepared for all major federal actions significantly affecting the environment; many of the policy choices made in regional planning,they said, involve such action.

Several requested that the regulations require that EIS's be prepared which incorporate detailed analysis of costs/benefits for a full range of program distribution alternatives as well as an analysis of all standards and guidelines necessary to resolve regional issues an concerns.

The proposed change to make the administrative appeals procedures applicable to regional planning was generally supported. One group stressed that any appeals process written into the regulations should reflect the relative magnitude of impacts caused by appealed plans on the appellants. Another emphasized that the decision to disapprove a plan should also be subject to appeal, as well as other decisions made during the planning process.

There was a recommendation that only those who participated with written comments or other public participation programs and who have an interest which could be adversely affected by a decision be permitted to appeal an administrative decision on plans.

It was also suggested this section give emphasis to the importance of providing

for energy and minerals management in forest planning.

Response: The reasons for limiting the scope of regional guides at this time are set forth in the discussion of § 219.4 Planning Levels. In the final rule, the scope of the EIS has been limited to standards and guidelines because those are the only elements of the regional guides that could significantly affect the environment. The tentative resource target distribution is not binding on the Forests but merely provides one set of targets that must be considered. As shown in § 219.12(f)–(j), a number of other sets of targets must be analyzed, any one of which can be selected. Any other planning guidance not reflected in standards and guidelines would have no predictable effect on the environment, but would simply add additional procedural direction.

The normal appeal process has not been limited as suggested by some respondents because there seems no valid reason for deviating from the standard practice. Disapprovals and process decisions are not appealable because they are not final. Until the plan is approved, all other decisions are tentative.

Minerals management has not been emphasized in these regulations because the parent statute under which they are written deals with renewable resources, and management of those renewable resources is the primary role of the Department of Agriculture. Other Departments have responsibility for minerals management. The Department recognizes the need for coordinating management of the two types of resources, and provision for coordination of minerals management with renewable resources management has been provided in § 219.22.

The principal change made in § 219.8 is the renaming of the document produced as a "guide", rather than a "plan." The description of the guide was modified to more precisely define its role.

The section dealing with responsibilities was rewritten to improve clarity and to add the responsibilities of the interdisciplinary team.

§ 219.8(h) of the proposed rule has been deleted since it added little to the basic public participation requirements of § 219.6.

A few additional editorial changes have been made to achieve brevity and clarity of expression.

Section 219.9 Regional Plan Content

Summary of Major Comments: Although regional planning received less discussion than other sections, several problems were identified by respondents.

For example, the proposed Regional Plan Content revisions (§ 219.9) were noted for the absence of a clear presentation of the purpose for regional planning. In view of some, the deletion of the 17 management concerns from the existing § 219.10 Regional Planning Actions was seen as undesirable and in need of reinstatement.

Some of the more significant concerns expressed were that the existing regulations require a distribution of regional objectives to each National Forest, while the proposed revisions require a display of each forest planning area's tentative resource objectives from the current RPA Program. To some reviewers this change appears to weaken the required ties between the RPA Program and the forest plan.

Again, some reviewers recommended addressing nonrenewable, as well as renewable resources. They proposed including specific language providing for mineral resource exploration, development, and transportation.

It was suggested that the Regional Plan Content be expanded to include an assessment of resource supply and demand and an analysis of community dependence of National Forest resources.

Attention was drawn to the provision for establishing guidelines for setting the maximum size of openings in even-aged management (§ 219.9(a)(4)(ii)). Some stated this provision could be interpreted as authorizing the Regional Forester to establish arbitrary limits on the size of openings. Therefore, it was felt that size limitations should not be prescribed because they are arbitrary and could not be professionally defended.

Some reviewers suggested that the existing section on monitoring (§ 219.9(i)) be retained because it is more specific with respect to monitoring and evaluation of regional planning procedures.

There were several recommendations for specific inclusion of the designation of utility corridors in forest planning. In addition, some thought greater emphasis should be given to future Forest Service access needs as well as to the location of subsequent rights-of-way grants in the corridor designation process.

With respect to content of the regional plan, it was suggested that recognition of the Forest Service responsibility to Indian resources and concerns should be given in this section.

Some of the respondents stated § 219.9 should be rewritten to strengthen planning and coordination processes with the States.

Some suggested that the Regional Plan Content section also be modified to include reference to requirements for surface and drinking water protection under the Clean Water Act and Safe Drinking Water Act.

§ 219.9 was viewed as giving nontimber consumptive use (fish, wildlife, recreation) a minor role, therefore, violating the Multiple Use-Sustained Yield Act. In addition, some stated the proposed regulations do not assure that cultural resources will be adequately and consistently protected on all National Forests.

A number of respondents protested deletion of the requirements to develop regional standards and guidelines for minimum biological potential for suitable lands and standards and guidelines for the state of vegetation when an opening ceases to be an opening.

Response: The final rule does not retain the 17 management concerns presently listed under § 219.10. The Department continues to believe that these are better suited to the Forest Service Manual.

Many of these suggestions are proposals to increase the scope of the regional guides. The discussion in § 219.4 summarizes the reasons for narrowly defining that scope. In brief these are: (1) until forest plans are completed there is little information on which to base regional direction beyond that of the 1980 RPA Program; (2) the forests should not be unnecessarily constrained as they examine a broad range of opportunities; (3) some of the requested additions can and will be covered as part of the ongoing development of the 1985 RPA Program update; and (4) limited available planning resources have dictated that the regional guides concentrate on providing that direction needed by the Forests as they develop their forest plans.

Establishment of guidelines for size limitations for openings is a specific requirement of NFMA, Section 6(g)(3)(F)(iv), which may not be disregarded.

Specific requirements for monitoring have not been added because the narrowed scope of the regional guide makes some of the requirements of the current rule inappropriate and specific requirements are considered to be more appropriate to the Forest Service Manual.

The specifics of utility corridor planning are the proper subject of the standards and guidelines required by § 219.9(4)(iv) and the forest plans. Such

specifics are not considered appropriate for these regulations.

The question of recognition of and coordination with Indian resources and concerns as well as other public agencies is considered to be adequately treated in § 219.7, and, therefore, has not been addressed in § 219.9.

Reference to the requirements of the Clean Water Act and the Safe Drinking Water Act has been included in § 219.23, rather than § 219.9 as suggested.

The concern about over-emphasis on timber stems from the fact that three of the five specifically required standards and guidelines deal with timber. This is a direct reflection of the fact that the NFMA devotes a disproportionate share of its specific requirements to the timber resource. In both cases this is because the timber activities affect all the resources so strongly. The regulations do provide for any other standards and guidelines that are needed.

Regulations covering cultural resources were covered in § 219.13(l) which is redesignated § 219.24 in the final rule. § 219.9(b) as given in the February 22 proposed rule has been incorporated into § 219.8(a). A new § 219.9(b) has been added to emphasize the fact that existing regional standards and guidelines present in the directive system remain in effect until altered. Standards for minimum biological growth potential, and the duration of openings are addressed in §§ 219.14 and 219.17 in the final rule and are discussed at those sections.

A few other editorial changes were made for clarity.

Section 219.10 Forest Planning—General Procedures

Summary of Major Comments: The proposed paragraph (e) on plan implementation was apparently unclear and confusing and, therefore, generated a great deal of comment concerning the authority of the Forest Service to change proposed scheduling according to available funding.

Paragraph (f) was viewed as authorizing amendments without the need for an environmental impact statement unless the Forest Service determines the amendment is "significant." Also, the proposed changes did not state how the public should be notified when insignificant changes in the plan are to be implemented.

Proposed changes in paragraph (g) on revisions would have allowed forest plans to "ordinarily be revised on a 10-year cycle or at least every 15 years." This was interpreted by many as allowing the life of a forest plan to extend up to 15 years without revision, raising several questions, such as how this time period relates to the RPA cycle.

In addition, there were a few comments on appeals of the Regional Forester's decision to approve a forest plan. Several stated that the proposed rules do not provide the same clear procedure for appeals that are in the existing rules.

Response: The implementation section has been rewritten to clarify the original intent and to state, as this section does in the existing rules, when it is necessary to prepare an environmental impact statement.

The final rule on amendments has not been changed because, as previously stated, the NEPA criteria for determining the need for an EIS have not been abrogated. The responsible officer always must make that decision.

The Department added the 15-year revision cycle because it is the time required by the NFMA. It should be noted that 10 years is "ordinarily" when revisions will occur and the 15-year cycle is required by statute (16 U.S.C. 1604(f)(5)). The final rule preserves the requirement for a review every 5 years to determine if revision is appropriate. Therefore, the provision is not changed in the final rules.

The final rule makes no substantive changes in the proposed rule concerning appeals. The new rule is significantly less restrictive than is the current rule and brings forest plans under the provisions of the standard appeals regulations, which are themselves in the process of revision. Specific procedures are spelled out in detail in 36 CFR Part 211, which is as readily accessible as are these regulations.

Section 219.11 Forest Plan Content

Summary of Major Comments: This section received very little comment. However, a few respondents stated that some important informational requirements were deleted such as the issues and management concerns and names and qualifications of the Interdisciplinary Team members.

Response: The issues and concerns are used as part of the NEPA required scoping process and are listed in the environmental impact statement rather than in the forest plan. Similarly, the environmental impact statement requires a list of preparers with their qualifications. Duplication of that information in the plan is unnecessary.

Section 219.12 Forest Planning Process

Summary of Major Comments: Several respondents felt that the proposed regulations in general ignored subsurface resources and, therefore, that reference to subsurface resources should be made throughout this section, e.g., in paragraphs (b) identification of purpose and need; (c) planning criteria; (d) inventory data and information collection; and (g) estimated effects of alternatives.

There were some comments on planning criteria (§ 219.12(c)). The emphasis seemed to be on the need for providing specificity rather than general statements. For instance, some stated that criteria are critical to both guiding the analysis and to openly identifying measures against which alternatives will be evaluated; the regulations should provide specific criteria to be used in the planning process rather than simply stating that criteria will be developed. It was suggested that this would include concise criteria statements designed to assess how well an alternative plan achieves the stated objective of maximizing net public benefits. Criteria, some felt, should be based on sound and accepted economic principles.

Some expressed concern that reference to guidelines for economic analysis is being deleted in the proposed revisions. Two other criteria were suggested to be added to the list in § 219.12(c): The President's Statement of Policy for RPA, and information on supply and demand.

Several urged strengthening the wording in paragraph (c)—"specific criteria may be derived from various sources" by changing "may" to "shall."

The majority of comments centered around the analysis of the management situation (§ 219.12(e)) and the formulation and comparison of alternatives (§ 219.12 (f) and (h)).

Some people suggested that the proposed revisions to Analysis of the Management Situation (AMS) provision should be completely struck in favor of the existing regulations; that the existing regulations correctly require a supply/demand analysis for all resources using the best available techniques to the extent possible.

A respondent suggested that the purpose of the AMS needs amplification. It was suggested that the regulations should state that "the primary purpose of this analysis is to identify resource production potentials, examine present net value opportunity costs of balancing conflicting resources," thereby providing a basis for formulating a range of reasonable alternatives.

Some characterized the revision of the section on formulation of alternatives as eliminating very basic and sound requirements that each alternative be achievable and that each provide for the elimination of reforestation backlogs.

Several respondents stated that the function of developing alternatives is to address the range of public concerns and issues, not to explore different ways of "maximizing" the exploitation of the Forest's resources. In addition, the existing regulations were viewed as more flexible than the proposed regulations.

Several reviewers stated that the starting point for formulating alternatives should not be maximization of present net value; to start only with commodity outputs is to skew the analysis in favor of such outputs. They felt the proposed provisions for evaluating alternatives placed too much stress on dollars and cents values and that the proper criterion is the full range of values.

One group stated that the term "costs" in § 219.12(f)(5) should be more clearly defined to segregate between opportunity costs and fiscal costs.

Some felt that there is insufficient discussion of resource tradeoffs in the proposed regulations and that § 219.12(g) could be used to correct this perceived deficiency.

One group of respondents stated that it is essential that the environmental costs to achieve amenity outputs be displayed and evaluated for determination of present net value. These comments reflected the belief that an alternative that achieves maximum present net value must be displayed as a benchmark providing the basic foundation from which the final plan is determined.

There were many comments that stated the Forest Service would no longer be required to identify a preferred alternative at the draft EIS stage.

In the evaluation of alternatives, one group stated that although forest plans will be required only to compare present net value, they will be required to identify the alternative which comes closest to maximizing net public benefits. They stated that alternatives which maximize both present net value and public net benefits should be identified. Further, it was recommended that all alternatives should be evaluated against the present net value and public net benefits benchmarks with the results prominently displayed in the EIS.

It was recommended that § 219.12(h) be expanded to include several additional factors for evaluating and comparing alternatives—county receipts, community stability, and supply of goods and services relative to local demand.

Another respondent suggested strengthening of paragraph (h) to include the statement from Executive Order 12291, "The alternative involving the least net cost to society shall be chosen."

Others also viewed these revisions as increased emphasis on commodity aspects and, therefore, an unfair analysis.

Still another reviewer saw this section as a well-constructed provision and an excellent approach to determining output potential and maximum net benefits.

Many people felt the proposed revisions weakened the monitoring and evaluation requirements. Several requested that the existing language be retained.

It was stated by some that paragraph (k)(2) on monitoring and evaluation lacks clarity. It should be rewritten to show that the effects of managememt prescriptions are documented in the monitoring process.

Response: References to subsurface resources have not been added because this section covers the general process requirements without specific reference to any resources.

The suggestions for more specificity in defining criteria were carefully considered, but the wide range of issues, concerns, and opportunities that exist across 122 widely dispersed National Forests make specific criteria formulated at the national level extremely difficult to develop and probably inappropriate.

The President's Statement of Policy is considered to be the executive portion of the RPA Program, and hence is included in the generic expression "RPA."

§ 219.12(e), (f) and (h) have been further revised in the final rule to address many of the concerns raised by reviewers and to clarify the intent, which is to insure the most complete analysis of ways to combine opportunities with needs. Members of the original Committee of Scientists were very helpful in suggesting some of these revisions.

One purpose of the analysis of the management situation is to establish the range of feasible alternatives. § 219.12(f) requires that alternatives considered in detail lie within that range. But a requirement that all alternatives must appear to be budgetarily achievable, or that all should provide for elimination of backlogs would mean that the decisionmaker, the public, and the Congress would not be aware of all opportunities or the cost and benefits of eliminating the backlog.

Alternatives are formulated to address the items set forth in the last sentence of § 219.12(b) of both the current and proposed revision of the regulations, i.e., "* * * the major public issues, managememt concerns, and use and development opportunities * * *." Different ways of maximizing the use of forest resources address some management concerns and development opportunities, and in many cases they are also public issues. Therefore, the formulation of alternatives should address maximizing use of various resources, consistent with the protection of other resources and other objectives. However, the goal for formulation of alternatives is not to "maximize" exploitation of the forest's resources, as was inferred by several respondents. Rather, a primary goal is to permit maximization of net public benefits. See the response to comments in § 219.1 for elaboration on this point.

The perceived flexibility of the current regulations is related to imprecise requirements that have led to some confusion on the part of the planning teams. The proposed and final rule attempts to eliminate that confusion.

The final rule preserves in § 219.12(g), a provision that specifically requires estimation of environmental effects, but recognizes that many environmental effects cannot be monetarily evaluated for use in present net value calculations.

The belief that the DEIS would not have to identify a preferred alternative is a misconception that needs addressing. The proposed regulations required this identification in §§ 219.10(b) and 219.12(h). The final regulations continue this requirement in §§ 219.10(b) and 219.12(i).

County receipts, community stability, and supply/demand relationships all represent components of the categories of effects identified in § 219.12(h), and are discussed in more detail in the economic and social analysis guidelines required by current § 219.5(c)(6). These have been issued as Chapter 1970 of the Forest Service Manual.

"Least net cost to society" is simply a negative form of saying "maximize net public benefits."

Section 219.12(k) of the final rule, dealing with monitoring, has been revised and expanded to bring it much closer to the language of the current regulations and to improve the clarity.

Section 219.13 Forest Planning-Resource Integration Requirements

Almost 65 percent of the respondents referred to this section of the proposed rule. In the final rule this section has been recodified and the material previously included in § 219.13 is now found in § 219.13 through § 219.26. This change was made to facilitate references, improve clarity, and make particular subject matter easier to

locate. Because of the volume of comments on this section, they have been grouped by sub-section.

Section 219.13(b) Timber Resource Land Suitability (§ 219.14 in Final Rule)

Summary of Major Comments: The existing regulations were viewed by many as protective of lands that are fragile and less productive by requiring that the biological growth standard used to define commercial timberland be considered on a regional basis. The proposed regulations set the standard nationally at 20 cubic feet/acre/year. Many respondents believe this would result in more timber being harvested on lands where regeneration is less likely to occur. There were comments that lands with a biological growth potential of less than 50 cubic feet/acre/year are not economically or physically suitable for timber management.

Another group stated the use of an arbitrarily set biological growth standard should be deleted and allow all stands of timber to be considered for management based on their contribution to net public benefits.

Many opposed the requirement of § 219.13(b)(1)(ii), that unmanaged natural stands should be used as the basis for growth estimates because this conflicts with what is perceived to be the legislative intent of the National Forest Management Act to consider intensive management in defining capable and suitable land.

The concept of determining which lands are "necessary" for timber production as an element of suitability was strongly objectionable to some.

Some suggested that the evaluation of lands necessary for timber production should be made in terms of meeting the timber objective of the alternative being studied.

The proposed revisions eliminated reference to the delineation of "available, capable, and technically suitable" land. Some reviewers felt that elimination of these three categories of suitable land will "mislead the public into believing that *all* land classified not suitable is erosive, cannot be regenerated, and is unproductive." These reviewers felt that it would be desirable to restore the concept of delineating and identifying for the public the lands that are not available, capable, and technically suitable.

Response: After a great deal of discussion with the members of the original Committee of Scientists as well as within the Department, it was concluded that the economic suitability test called for by the Act could only be made on a site-specific basis, and that 20 cubic feet per acre, per year or any other national, or even regional, standard could not be professionally supported.

Therefore, reference to a particular growth standard was dropped in the final rule. As now stated, the economic suitability test is defined in § 219.14 (c) and (d) and depends upon the objectives of the particular alternative that is selected and approved as the preferred. Each alternative could have a different area of suitable land.

In the final rule, the term "necessary" for timber production has been changed to "appropriate" for timber production, and the cost effectiveness criteria has been changed slightly to clarify its meaning.

The Department sees nothing in the proposed rule that would lead one to assume that all unsuitable land was erosive or unproductive. To avoid the confusion of maintaining three separate categories of land, the final rule keeps only the "suitable" category.

Section 219.13(c) Timber Resource Management Practices (§ 219.15 in Final Rule)

Summary of Major Comments: It was pointed out that this section referred to any vegetation management practice and therefore, was misnamed.

Response: In the final rule, it is retitled "Vegetation Management Practices."

Section 219.13(d) Timber Resource Sale Schedule (§ 219.15 in Final Rule)

Summary of Major Comments: Among the most controversial issues of the proposed revisions were the changes in the section dealing with departure.

The proposed regulations would have deleted the requirement that departures be approved by the Chief; respondents generally perceived this change to mean that departures could become the "rule rather than the exception." However, some agreed that timber sale scheduling including departures, should properly be determined by the Regional Forester, not the Chief; and the proposed deletion was viewed as a commendable change.

Many saw a greater potential for departures under the proposed revisions. As they interpreted the proposed revision, a departure schedule could conceivably be drawn up for *any* forest plan alternative, and departure schedules could be implemented as funding became available, without public review or EIS.

A fourth "trigger" to require examination of departure alternatives was included in the proposed revision (that is, whenever it is reasonable to expect that net public benefits would increase); this proposal generated much response. Many viewed the new departure criteria as a totally unacceptable principle for management of the National Forests. It was seen as a violation of NFMA.

One group recommended that the entire section be rewritten in a manner that does not cast departure alternatives as the "rare" exception. They stated that the nondeclining yield harvest policy is an extremely inflexible constraint in forest management. This group suggested that the regulations be written to require the Forest Supervisor to provide justification for imposing nondeclining yield rather than justification for allowing a departure.

Several respondents supported the proposed revisions related to culmination of mean annual increment (CMAI), stating that the change is appropriate under the statute. Some questioned the limitations to "natural stands."

Conversely, others thought the proposed change represented a radical departure from present policy. These reviewers stated that since intensively managed stands of timber reach culmination many years after natural stands, this would reduce rotation ages by 50–100 percent or more. They interpret NFMA as, therefore, being violated, as it requires that stands, not forest types, reach culmination before harvesting.

Still another view maintained that the rotation age should be determined by financial and multiple use consideration through the planning process rather than being constrained by culmination of mean annual increment. Therefore, it was suggested that this portion be amended to allow the analysis of rotation ages and factors other than CMAI in cases where greater net public benefits may result.

Some stated that the existing regulations provide flexibility to lengthen the rotation for purposes other than timber. In their view, the proposed regulations would provide a minimum legal determination of maturity and would remove the existing flexibility "in favor of greater harvest by calculating a shorter rotation age."

Response: The final rule retains language granting approval authority for all forest plans to the Regional Forester. The concern that a departure schedule could be implemented in response to budget changes reflects a misunderstanding of the sale schedule which actually sets the allowable sale volume by decade. Departures refer only to a decadal decline from the previous decade, while adjustments of sale volumes in response to actual

appropriations are made on an annual basis. These annual adjustments are subject to the requirement of § 219.14(h)(3) of the proposed rule, (§ 219.27(c)(2) of the final rule), that the average annual sale volume for the decade must not exceed the allowable sale quantity. § 219.10(e) has been expanded in the final rule to eliminate the concern expressed.

The proposal to require justification of nondeclining yield would clearly be a violation of NFMA.

In the final rule the Department has responded to the public's concern by deleting the provision that consideration should be given to departing from nondeclining yield whenever it is reasonable to expect that net public benefits would increase. The language of NFMA concerning achieving overall multiple use objectives has been substituted.

In response to concerns over rotation ages, the Department has, in the final rule, changed § 219.13(d)(ii)(C), (§ 219.16(a)(2)(iii) in the final rule), to require that culmination of mean annual increment be based on the management intensity and utilization standards expected to be used. Also, net public benefit was dropped from proposed language in this section and replaced with the terminology "overall multiple use objectives."

Other minor changes are made in this section to conform to changes made concerning the regional guide.

Section 219.13(e) Wilderness (§ 219.17 in Final Rule)

Summary of Major Comments: The proposed revisions would require that only roadless areas of 5,000 acres or more be considered for wilderness designation. Many respondents objected to an acreage limitation for wilderness consideration. Some stated that the restrictions (if in fact the 5,000-acre became required) should not apply to evaluation of areas adjacent to existing wilderness areas and wilderness study areas.

Others expressed concern with a "continuing study" of Forest Service lands for possible wilderness designation; suggestions were made that continued consideration for wilderness should be limited to areas already recommended for wilderness and areas designated for further planning.

Several supported the proposal to limit the size of areas to be evaluated for wilderness.

Many stated that the NFMA does not establish an arbitrary acreage limitation for wilderness, nor does the Wilderness Act justify the proposed change; therefore, the limitation would violate the law.

A few stated if nonwilderness roadless areas were to be reviewed in plan revisions, the current wilderness should also be reviewed.

Exception was taken by several reviewers to inclusion of the word "essentially" in the phrase that such lands will be evaluated if they are "* * * currently essentially roadless." The word "essentially" should be deleted because the process pertains only to roadless areas, and the area can only be either roaded or unroaded.

Still others pointed out that the 5,000-acre limitation is inappropriate for the Eastern United States where only small enclaves of undisturbed land remain.

Response: In response to these comments, reference to a 5,000-acre minimum has been deleted. The requirement to review roadless areas for possible wilderness recommendation represents the Department's response to an important current public issue. While there is nothing to prevent a forest from analyzing the effects of existing wilderness areas on the total forest program (and most forests will do so as part of the analysis of the management situation), alternatives that would require redesignation of existing wilderness are not required. The term "essentially roadless" remains in the final rule because a road is difficult to define at the margin between trail and road.

Section 219.13(f) Wilderness Management (§ 219.18 in Final Rule)

Summary of Major Comments: It was proposed that since limited action or development is permitted within wilderness areas under certain circumstances, these activities should be included in the planning criteria in subsection (f) Wilderness Management.

In addition, some reviewers felt that subsection (f) should clarify the Forest Service's understanding of existing rights of lessees that constitute "valid existing rights" after December 31, 1983.

Further, a few reviewers strongly recommended the inclusion of a new subsection stating that stipulations for oil and gas leases will be developed on a standard of reparable vs. irreparable harm.

Response: Upon careful consideration of these comments, the Department has concluded that the language in the proposed rule which repeats that of the existing regulations is adequate and no changes have been made in the final rule. The additions requested by respondents seem more appropriate for the Forest Service Manual.

Section 219.13(g) Fish and Wildlife Resource (§ 219.19 in Final Rule)

Summary of Major Comments: A great deal of the public comments concerned § 219.13(g), Fish and Wildlife Resource. Only a very few supported the proposed revision. Generally, the proposed revision was viewed as weakening the fish and wildlife section.

The proposed regulation eliminated the requirement that habitat of certain species be "maintained and improved." To many respondents, this deletion would allow substantial reductions in fish and wildlife populations.

In the discussion of desired future condition of fish and wildlife populations and habitat, substitution of the term "where practical" for the original terminology "where technically feasible" was viewed as a lowering of standards.

There was opposition regarding replacing the term "management indicator species" with "selected species." The term "selected species" is seen by some as less scientific.

In contrast, some viewed the revisions relating to indicator species as probably beneficial. This view was based on the fact that the regulations would no longer require just maintenance and improvement of habitat but would allow for flexibility in providing for maintenance of the species or habitat.

Response: In response to these concerns, the panel of consultants asked Dr. William Webb to work with the Forest Service to develop satisfactory language. Language incorporating many of his suggestions has been included in this final rule. The final rule maintains the requirement for species viability, continues the concept of management indicator species, and stipulates that maintenance and improvement goals must be consistent with other resource goals.

Section 219.13(h) Grazing Resource (§ 219.20 in Final Rule)

Summary of Major Comments: Grazing was not addressed very often by the public. However, it was suggested that this subsection convey the fundamental concept that livestock grazing encompasses more than forage for livestock; that it also provides an important source of food and fiber for the Nation. A change was also suggested to reflect livestock grazing as a management tool to help improve habitat for wildlife, reduce fire hazard, improve watersheds, and enhance soil resources.

A few saw the grazing provision as being weakened by the proposed changes.

Response: It is the Department's belief that regulations are not the proper place for justifying programs. The only changes in the final rule are to improve clarity.

Section 219.13(i) Recreation Resource (§ 219.21 in Final Rule)

No comments were received and no significant changes were made in this section. The opening sentence was modified to clarify that the degree of recreation opportunity provided for in a forest plan must be consistent with needs and demands for all major resources. The resource integration requirements in existing § 219.12(i)(1)–(7), (retained in the final rule as § 219.21(a)–(g)) and elsewhere in the regulations dictate this clarification.

Section 219.13(j) Mineral Resource (§ 219.22 in Final Rule)

Summary of Major Comments: Some reviewers expressed disappointment that the proposed rules lacked understanding of mineral occurrence and the importance of minerals to the economy and national security.

Several suggested inclusion of "geology and energy" in titling the subsection to conform to the proposed changes.

It was suggested that the subsection be strengthened to respond to the Administration's emphasis to expedite the orderly development of mineral and energy resources.

Response: See the Department's comments on the treatment of mineral resources under Regional Planning (§ 219.8). There have been no significant changes in the comparable section of the final rule.

Section 219.13(k) Water and Soil Resource (§ 219.23 in Final Rule)

Summary of Major Comments: Some requested that the original existing language in § 219.13(k), Water and Soil Resource, be reinstated.

Others requested a requirement to identify man-made developments planned for the National Forest be added to the rule.

Response: It is not believed necessary to add a water resource developments identification requirement because Forest Service planned installations would have to be included as part of any overall plan, and developments planned by other agencies would be surfaced during compliance with § 219.7 and addressed appropriately in the plan. There are no changes in this section in the final rule.

Section 219.13(l) Cultural Resource (§ 219.24 in Final Rule)

Summary of Major Comments: Several reviewers requested the addition of two items—protection of historic and cultural resources from forest management practices, including timber harvesting, pesticides, and road construction, and protection of the sacredness of native American sacred sites.

Response: Language has been added to the final rule to strengthen protection of cultural resources.

Section 219.13(m) Research Natural Areas (§ 219.25 in Final Rule)

Summary of Major Comments: Several respondents said that they felt that the proposed regulations emphasized a national network as opposed to a regional or State network. They recommended that Research Natural Areas (RNA's) should be selected to be of value regionally as well as filling national needs.

At least one reviewer expressed disappointment that no regulatory provision was made for other kinds of special areas; such as geologic, botanic, and paleontologic. Because they are not specifically provided for, it was felt they are being overlooked.

Several suggested that transportation should be treated as a resource and suggested inclusion of a new provision labeled "natural corridors" or "transmission corridor resource."

Response: A purpose of establishing a national network of RNA's is to prioritize the Nation's allocation of such areas. There should be little question that areas important to the national network would also be important regionally. The final rule preserves the language of the proposed rule.

The Department believes that consideration of other special types of areas can be adequately addressed in the Forest Service Manual.

In the context of NFMA, transportation is a facility rather than a resource and is adequately covered in §§ 219.9(a)(4)(iv) and 219.27(a)(9).

A new § 219.26 consisting of the first part of the section on diversity that was in § 219.14(g) of the proposed rule has been moved to this portion of the regulations because it deals with procedural integration requirements, rather than management requirements.

Section 219.14 Management Requirements

In the final rule, this section is recoded § 219.27, and it has been reorganized to improve clarity.

Summary of Major Comments: With respect to management prescriptions, several reviewers suggested that energy and mineral exploration should be provided for.

Much of the controversy in this section centered around "when timber stand openings cease to be openings." Several said prescribing forest practices nationally is professionally unacceptable. Some stated the decision might best be left to the regional or forest plan, based on the following reasons—visual quality, other multiple-use objections, and production of timber. Others suggested a minimum height should be obtained before classifying a stand as "established," because loose interpretation will allow adjacent clearcutting before soil and water conditions have stabilized.

Some felt defining the standard in regulations is a positive change, but the definition of when openings are no longer considered openings was still ambiguous.

With respect to diversity, some stated the proposed rules dilute the value and intent of the NFMA and that reductions in diversity of plant and animal communities are inappropriate. Many felt that the proposed revisions, although appearing to be minor word changes, represent a change in management philosophy "designed to weaken management controls for resource protection and enhancement."

The proposed § 219.14(h)(2) was viewed by many as easing the way for development of roadless areas. The proposed language was viewed by some as requiring timber sales to be planned on all lands that are considered suitable for timber management, a requirement they feel is clearly in violation of the Multiple Use-Sustained Yield Act of 1960.

The proposed revision requiring that "technology and knowledge exist" to adequately restock within 5 years after final harvest before cutting could occur was viewed by some reviewers as a violation of the original intent of the Congress. The existing language was, therefore, thought preferable.

Others strongly recommended that additional time be allowed for restocking under natural methods which reflects true time requirements on the ground.

Many of the respondents expressed concern over what is perceived as an omission of integrated pest management as an operating principle for dealing with insects and pest problems. Many requested the existing language should be maintained and strengthened to encourage nonchemical solutions to insect problems.

Response: The necessary coordination for energy and mineral exploration is provided for in both the final and proposed rule. See comment on this subject under § 219.4.

The Department's position on duration of openings is that the characteristics needed for an opening depend upon the specific objectives for a given area, and they would vary with such things as wildlife species present, terrain, existing visual characteristics of the area as a whole, watershed conditions, etc. The proposed and final rules establish, *as a minimum,* that an opening remains an opening until a new stand is established, and regional guides establish guidelines for determining variations to this minimum. Additional opening guidelines to satisfy the needs for resources other than timber may be established locally depending upon multiple-use objectives.

To respond to the concern about diversity, the word "only" has been added to the clause "* * * reductions * * * may be prescribed *only* where needed * * *" in § 219.27(g).

While the intent of § 219.14(h)(2) was to plan to harvest a volume equal to the volume of growth on all suitable lands, it was never contemplated that individual sales would actually be located in the forest planning process. The proposed language is not necessary to achieve the desired result, however, and it is deleted in the final rule.

The language change from the existing regulations to the proposed concerning ability to regenerate a stand is simply a more precise wording for the concept conveyed by "* * * can be adequately restocked * * *," i.e., the "* * * technology and knowledge exists to adequately restock. * * *" Because of the increased precision, the final rule retains the language of the proposed rule.

Section 219.27(a)(3) of the final rule has been reworded to respond to suggestions on integrated pest management. Additionally, the definition of integrated pest management has been restored to § 219.3. A third addition in the final rule dealing with pest management is a new § 219.27(c)(7) requiring coordination of silvicultural practices with the needs of pest management.

Section 219.14(i) on monitoring and evaluation has been moved and recodified to § 219.12(k)(5) in the final rule.

Section 219.15 Research

There were no comments on this section. The only change in the final rule is recodification to § 219.28.

Section 219.16 Transition Period

Summary of Major Comments: There was some objection expressed to the provision which would allow a forest plan to become effective before the regional plan (guide) is approved. Permitting forest plans to become effective before the regional plan (guide) is a carryover from the current regulations and is necessary to prevent unacceptable delays in forest planning.

Several suggested the regulations allowing the Mount St. Helens Land Management Plan appeared to preempt congressional action which could provide more thorough protection.

Response: This section was recodified to § 219.29. The provision for Mount St. Helens is necessary to permit the independent development of the Mount St. Helens Land Management Plan. The timing of the development of the plan in relation to imminent congressional action is such as to make it extremely unlikely that any action could occur that would preempt Congress.

Section 219.29(b) has been added to permit phasing in those forest plans and regional guides that have already been completed through the DEIS stage or beyond, so that it is not mandatory during the current round of planning to subject then to new requirements resulting from amendment of these regulations.

Conclusion

The public response to the proposed rule demonstrated a strong interest in management of the National Forests and was very helpful in developing the final rule. The assistance of the members of the former Committee of Scientists was particularly valuable especially in sections on analysis of the management situation and the formulation and evaluation of alternatives. The final rule is responsive to the preponderance of comments, but as is always the case, all suggestions could not be incorporated. The major changes between the final rule and the proposed rule result from decisions to retain much more of the language of the current regulations than originally proposed. Specifically, the final rule:

—Retains the 14 planning principles from the current regulations;

—Clarifies the relationship between multiple use, net public benefits, and present net value;

—Redefines six terms and adds four new ones to improve readability and understanding;

—Retains provisions for adjusting assigned resource objectives;

—Retains most of the language from the current regulations dealing with public participation process and the interdisciplinary team;

—Deletes the proposal to permit denial of public participation if it would be reasonably burdensome;

—Strengthens public planning coordination requirements;

—Renames the regional plan as a regional guide and clarifies the intent of that document;

—Clarifies the authority of the Forest Supervisor to make adjustments in the plan as a result of differences between planned and appropriated budgets and specifies when these differences may require an EIS;

—Extensively revises the sections dealing with analysis of the management situation and formulation and evaluation of alternatives;

—Revises monitoring requirements to bring them closer to the language of the current regulations;

—Removes entirely all reference to a minimum growth standard, leaving to each forest the evaluation of economic suitability;

—Deletes increasing net public benefit as a trigger for consideration of departures from nondeclining yield or harvesting prior to culmination of mean annual increment;

—Changes the determination of culmination of mean annual increment from that for natural stands to that which would occur under the management intensity and utilization standards expected to be used;

—Eliminates the 5,000-acre minimum for wilderness consideration;

—Revises the section on wildlife and fish;

—Strengthens protection of cultural resources;

—Strengthens the requirement for maintaining diversity of plant and animal species;

—Retains the term "integrated pest management" and strengthens the description of that concept and its use;

—Reorganizes and recodifies the section on Resource Intergration Requirements to simplify citations to these sections and to assist readers in more readily locating specific resource requirements; and,

—In general, seeks to improve readability of the regulations through use of simpler terms and improved sentence structure, reorganization and more precise word choice.

In addition to resolving most of the concerns expressed by the respondents, the final rule integrates achievement of the goals of regulatory relief with the goal of refining the National Forest land and resource management planning process to simplify and clarify the

procedures and, thereby, enhance the quality and utility of planning.

Finding of No Significant Environmental Impact

An environmental assessment and report addressing the impacts of the proposed regulation and the need for preparing an environmental impact statement was printed as Appendix A with the proposed rule in the **Federal Register**, Volume 47, No. 35 (February 22, 1982). The changes reflected in the final rule are primarily reinstatement of provisions contained in the existing regulations promulgated on September 17, 1979. The potential effects of these provisions were analyzed and displayed in the environmental impact statement published in the **Federal Register**, Volume 44, No. 181 (September 17, 1979), to which the environmental assessment for the revisions of the regulations is tiered. A review of other changes from the proposed regulations in the final version indicates no potential for significant effect on the physical and biological components of the human environment. The changes are editorial or apply to planning procedure. Any direct and specific impacts on the environment will be analyzed and displayed in environmental impact statements prepared for forest plans and regional guides.

Based on the above reasons and the environmental assessment prepared for the proposed regulations, which is herein incorporated by reference, it is hereby determined that revision of these regulations is not a major federal action significantly affecting the quality of the human environment. Therefore, an environmental impact statement in addition to the one already prepared for the regulations promulgated September 17, 1979, will not be prepared.

Regulatory Impact

The Assistant Secretary for Natural Resources and Environment has determined that the regulations in their present form are considered "major" as defined in Executive Order 12291. However, for the reasons explained in the notice of proposed rulemaking, published in the **Federal Register**, Volume 47, No. 35 (February 22, 1982), the Office of Management and Budget has waived the requirement to carry out a regulatory impact analysis.

The Assistant Secretary for Natural Resources and Environment has determined that this regulation is clearly within authority delegated by law and consistent with congressional intent. This determination is supported by the following Memorandum of Law prepared by the Office of the General Counsel, United States Department of Agriculture:

Memorandum of Law

Legal Authority for Revised National Forest System Land and Resource Management Planning Regulations, 36 CFR Part 219

The revision of the National Forest System Land and Resource Management Planning Regulations, codified in 36 CFR Part 219, is clearly within the authority of the Department of Agriculture, and consistent with congressional intent. Section 6(g) of the Forest and Rangeland Renewable Resources Planning Act, as amended by the National Forest Management Act of 1976 (16 U.S.C. 1604(g)) (hereafter, RPA), explicitly requires the Secretary of Agriculture to issue regulations that set out the process for the development and revision of land management plans for units of the National Forest System, and regulations that establish management planning standards and guidelines described in the Act. Section 15 of the same statute (16 U.S.C. 1613) directs the Secretary to promulgate such regulations as he deems necessary and desirable to carry out the provisions of the Act.

The final regulations to implement the above RPA requirements, presently codified in 36 CFR Part 219, were published in the **Federal Register**, Volume 44, No. 181 on September 17, 1979. All of the regulations are directly related to the land and resource management planning process for National Forest System units, to standards and guidelines for that planning, to national level planning required by Sections 3 and 4 of RPA (16 U.S.C. 1601–1602), or to regional level planning which the Secretary determined to be desirable to coordinate national level and forest level planning. The current revision clarifies and streamlines the planning regulations, without deleting any of the provisions required by Section 6(g) of RPA, or adding requirements not within the promulgating authority given to the Secretary by Section 15 of the statute.

A review of the RPA and its legislative history indicates that Congress, in enacting the statute and amendments thereto, intended to create a flexible framework for environmentally sound, economically efficient, and productive multiple-use and sustained-yield management of the National Forest System. A review of the revised regulations indicates full consistency with this intent.

The Assistant Secretary for Natural Resources and Environment has also determined that the factual conclusions upon which this regulation is based have substantial support in the agency record, viewed as a whole, with full attention to public comments in general, and the comments of persons directly affected by the rule in particular.

Small Entity Impact

The Assistant Secretary for Natural Resources and Environment has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities. The proposed rule imposes no direct or indirect costs on small entities. It requires no paperwork or recordkeeping; it does not affect the competitive position of small entities in relation to large entities; it does not affect the ability of a small entity to stay in the market; and it does not require that small entities obtain professional assistance to meet regulatory requirements.

List of Subjects in 36 CFR Part 219

National forests; Environmental impact statement; Timber; Fish and wildlife; Water resources; Range management; and Recreation.

Therefore, for the reasons set forth in the preamble, Part 219—Planning, Subpart A—National Forest System Land and Resource Management Planning, Title 36 of the Code of Federal Regulations is revised as follows:

1. The Table of Contents for 36 CFR Part 219—Planning, Subpart A—National Forest System Land and Resource Management Planning, is revised to read as follows:

PART 219—PLANNING

Sec.

219.1 Purpose and principles.
219.2 Scope and applicability.
219.3 Definitions and terminology.
219.4 Planning levels.
219.5 Interdisciplinary approach.

2. 36 CFR Part 219, Subpart A—National Forest System Land and Resource Management Planning, is revised to read as follows:

§ 219.1 Purpose and principles.

(a) The regulations in this subpart set forth a process for developing, adopting, and revising land and resource management plans for the National Forest System as required by the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended (hereafter, "RPA"). These regulations prescribe how land and resource management planning is to be conducted on National Forest System lands. The resulting plans shall provide for multiple use and sustained yield of goods and services from the National Forest System in a way that maximizes long term net public benefits in an environmentally sound manner.

(b) Plans guide all natural resource management activities and establish management standards and guidelines for the National Forest System. They determine resource management practices, levels of resource production and management, and the availability and suitability of lands for resource management. Regional and forest planning will be based on the following principles:

(1) Establishment of goals and objectives for multiple-use and sustained-yield management of renewable resources without impairment of the productivity of the land;

(2) Consideration of the relative values of all renewable resources, including the relationship of nonrenewable resources, such as minerals, to renewable resources;

(3) Recognition that the National Forests are ecosystems and their management for goods and services requires an awareness and consideration of the interrelationships among plants, animals, soil, water, air, and other environmental factors within such ecosystems;

(4) Protection and, where appropriate, improvement of the quality of renewable resources;

(5) Preservation of important historic, cultural, and natural aspects of our national heritage;

(6) Protection and preservation of the inherent right of freedom of American Indians to believe, express, and exercise their traditional religions;

(7) Provisions for the safe use and enjoyment of the forest resources by the public;

(8) Protection, through ecologically compatible means, of all forest and rangeland resources from depredations by forest and rangeland pests;

(9) Coordination with the land and resource planning efforts of other Federal agencies, State and local governments, and Indian tribes;

(10) Use of a systematic, interdisciplinary approach to ensure coordination and integration of planning activities for multiple-use management;

(11) Early and frequent public participation;

(12) Establishment of quantitative and qualitative standards and guidelines for land and resource planning and management;

(13) Management of National Forest System lands in a manner that is sensitive to economic efficiency; and

(14) Responsiveness to changing conditions of land and other resources and to changing social and economic demands of the American people.

§ 219.2 Scope and applicability.

The regulations in this subpart apply to the National Forest System, which includes special areas, such as wilderness, wild and scenic rivers, national recreation areas, and national trails. Whenever the special area authorities require additional planning, the planning process under this subpart shall be subject to those authorities.

(a) Unless inconsistent with special area authorities, requirements for additional planning for special areas shall be met through plans required under this subpart.

(b) If, in a particular case, special area authorities require the preparation of a separate special area plan, the direction in any such plan may be incorporated without modification in plans prepared under this subpart.

§ 219.3 Definitions and terminology.

For purposes of this subpart the following terms, respectively, shall mean:

Allowable sale quantity: The quantity of timber that may be sold from the area of suitable land covered by the forest plan for a time period specified by the plan. This quantity is usually expressed on an annual basis as the "average annual allowable sale quantity."

Base sale schedule: A timber sale schedule formulated on the basis that the quantity of timber planned for sale and harvest for any future decade is equal to or greater than the planned sale and harvest for the preceding decade, and this planned sale and harvest for any decade is not greater than the long-term sustained yield capacity.

Biological growth potential: The average net growth attainable in a fully stocked natural forest stand.

Capability: The potential of an area of land to produce resources, supply goods and services, and allow resource uses under an assumed set of management practices and at a given level of management intensity. Capability depends upon current conditions and site conditions such as climate, slope, landform, soils, and geology, as well as the application of management practices, such as silviculture or protection from fire, insects, and disease.

Corridor: A linear strip of land identified for the present or future location of transportation or utility rights-of-way within its boundaries.

Cost efficiency: The usefulness of specified inputs (costs) to produce specified outputs (benefits). In measuring cost efficiency, some outputs, including environmental, economic, or social impacts, are not assigned monetary values but are achieved at specified levels in the least cost manner. Cost efficiency is usually measured using present net value, although use of benefit-cost ratios and rates-of-return may be appropriate.

Diversity: The distribution and abundance of different plant and animal communities and species within the area covered by a land and resource management plan.

Even-aged management: The application of a combination of actions that results in the creation of stands in which trees of essentially the same age grow together. Managed even-aged forests are characterized by a distribution of stands of varying ages (and, therefore, tree sizes) throughout the forest area. The difference in age between trees forming the main canopy level of a stand usually does not exceed 20 percent of the age of the stand at harvest rotation age. Regeneration in a particular stand is obtained during a short period at or near the time that a stand has reached the desired age or size for regeneration and is harvested. Clearcut, shelterwood, or seed tree cutting methods produce even-aged stands.

Forest land: Land at least 10 percent occupied by forest trees of any size or formerly having had such tree cover and not currently developed for non-forest use. Lands developed for non-forest use include areas for crops, improved pasture, residential, or administrative

areas, improved roads of any width, and adjoining road clearing and powerline clearing of any width.

Goal: A concise statement that describes a desired condition to be achieved sometime in the future. It is normally expressed in broad, general terms and is timeless in that it has no specific date by which it is to be completed. Goal statements form the principal basis from which objectives are developed.

Goods and services: The various outputs, including on-site uses, produced from forest and rangeland resources.

Integrated pest management: A process for selecting strategies to regulate forest pests in which all aspects of a pest-host system are studied and weighed. The information considered in selecting appropriate strategies includes the impact of the unregulated pest population on various resources values, alternative regulatory tactics and strategies, and benefit/cost estimates for these alternative strategies. Regulatory strategies are based on sound silvicultural practices and ecology of the pest-host system and consist of a combination of tactics such as timber stand improvement plus selective use of pesticides. A basic principle in the choice of strategy is that it be ecologically compatible or acceptable.

Long-term sustained-yield timber capacity: The highest uniform wood yield from lands being managed for timber production that may be sustained under a specified management intensity consistent with multiple-use objectives.

Management concern: An issue, problem, or a condition which constrains the range of management practices identified by the Forest Service in the planning process.

Management direction: A statement of multiple-use and other goals and objectives, the associated management prescriptions, and standards and guidelines for attaining them.

Management intensity: A management practice or combination of management practices and associated costs designed to obtain different levels of goods and services.

Management practice: A specific activity, measure, course of action, or treatment.

Management prescription: Management practices and intensity selected and scheduled for application on a specific area to attain multiple-use and other goals and objectives.

Multiple use: The management of all the various renewable surface resources of the National Forest System so that they are utilized in the combination that will best meet the needs of the American people; making the most judicious use of the land for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; that some lands will be used for less than all of the resources; and harmonious and coordinated management of the various resources, each with the other, without impairment of the productivity of the land, with consideration being given to the relative values of the various resources, and not necessarily the combination of uses that will give the greatest dollar return or the greatest unit output.

Net public benefits: An expression used to signify the overall long-term value to the nation of all outputs and positive effects (benefits) less all associated inputs and negative effects (costs) whether they can be quantitatively valued or not. Net public benefits are measured by both quantitative and qualitative criteria rather than a single measure or index. The maximization of net public benefits to be derived from management of units of the National Forest System is consistent with the principles of multiple use and sustained yield.

Objective: A concise, time-specific statement of measurable planned results that respond to pre-established goals. An objective forms the basis for further planning to define the precise steps to be taken and the resources to be used in achieving identified goals.

Planning area: The area of the National Forest System covered by a regional guide or forest plan.

Planning period: One decade. The time interval within the planning horizon that is used to show incremental changes in yields, costs, effects, and benefits.

Planning horizon: The overall time period considered in the planning process that spans all activities covered in the analysis or plan and all future conditions and effects of proposed actions which would influence the planning decisions.

Present net value: The difference between the discounted value (benefits) of all outputs to which monetary values or established market prices are assigned and the total discounted costs of managing the planning area.

Public issue: A subject or question of widespread public interest relating to management of the National Forest System.

Real dollar value: A monetary value which compensates for the effects of inflation.

Receipt shares: The portion of receipts derived from Forest Service resource management that is distributed to State and county governments, such as the Forest Service 25 percent fund payments.

Responsible line officer: The Forest Service employee who has the authority to select and/or carry out a specific planning action.

Sale schedule: The quantity of timber planned for sale by time period from an area of suitable land covered by a forest plan. The first period, usually a decade, of the selected sale schedule provides the allowable sale quantity. Future periods are shown to establish that long-term sustained yield will be achieved and maintained.

Silvicultural system: A management process whereby forests are tended, harvested, and replaced, resulting in a forest of distinctive form. Systems are classified according to the method of carrying out the fellings that remove the mature crop and provide for regeneration and according to the type of forest thereby produced.

Suitability: The appropriateness of applying certain resource management practices to a particular area of land, as determined by an analysis of the economic and environmental consequences and the alternative uses foregone. A unit of land may be suitable for a variety of individual or combined management practices.

Sustained-yield of products and services: The achievement and maintenance in perpetuity of a high-level annual or regular periodic output of the various renewable resources of the National Forest System without impairment of the productivity of the land.

Timber production: The purposeful growing, tending, harvesting, and regeneration of regulated crops of trees to be cut into logs, bolts, or other round sections for industrial or consumer use. For purposes of this subpart, the term "timber production" does not include production of fuelwood.

Uneven-aged management: The application of a combination of actions needed to simultaneously maintain continuous high-forest cover, recurring regeneration of desirable species, and the orderly growth and development of trees through a range of diameter or age classes to provide a sustained yield of forest products. Cutting is usually regulated by specifying the number or proportion of trees of particular sizes to retain within each area, thereby maintaining a planned distribution of size classes. Cutting methods that develop and maintain uneven-aged

stands are single-tree selection and group selection.

§ 219.4 Planning levels.

(a) *General guideline.* Planning requires a continuous flow of information and management direction among the three Forest Service administrative levels: national, regional, and forest. Management direction shall: (1) Include requirements for analysis to determine programs that maximize net public benefits, consistent with locally derived information about production capabilities; (2) reflect production capabilities, conditions and circumstances observed at all levels; and (3) become increasingly specific as planning progresses from the national to the forest level. In this structure, regional planning is a principal process for conveying management direction from the national level to the forest level and for conveying information from forest level to the national level. The planning process is essentially iterative in that the information from the forest level flows up to the national level where in turn information in the RPA Program flows back to the forest level.

(b) *Planning levels and relationships.*—(1) *National.* The Chief of the Forest Service, shall develop the Renewable Resource Assessment and Program (hereafter, "RPA Assessment and RPA Program") according to Sections 3 and 4 of the RPA.

(i) *RPA Assessment.* The RPA Assessment shall include analysis of present and anticipated uses, demand for, and supply of the renewable resources of forest, range, and other associated lands with consideration of, and an emphasis on, pertinent supply, demand, and price relationship trends; an inventory of present and potential renewable resources and an evaluation of opportunities for improving their yield of tangible and intangible goods and services, together with estimates of investment costs and direct and indirect returns to the Federal Government; a description of Forest Service programs and responsibilities in research, cooperative programs, and management of the National Forest System; and analysis of important policy issues and consideration of laws, regulations, and other factors expected to influence and affect significantly the use, ownership, and management of forest, range, and other associated lands. The RPA Assessment shall be based on the future capabilities of forest and rangelands and shall include information generated during the regional, forest, and other planning processes.

(ii) *RPA Program.* The RPA Progam shall consider the costs of supply and the relative values of both market and nonmarket outputs. The alternatives considered shall include national renewable resource goals and quantified objectives for resource outputs and other benefits and shall be designed to represent a range of expenditure levels sufficient to demonstrate full opportunities for management. A portion of each national objective developed in the RPA Program shall be distributed to each region and be incorporated into each regional guide. Resource objectives shall be tentatively selected for each forest planning area. In formulating the objectives for each region and forest planning area, local supply capabilities and market conditions will be considered.

(2) *Regional.* Each Regional Forester shall develop a regional guide. Regional guides shall establish regional standards and guidelines as required by § 219.9(a). Consistent with resource capabilities, regional guides shall reflect goals and objectives of the RPA Program. For planning purposes, the regional guides shall display tentative resource objectives for each Forest from the RPA Program. Regional guides shall also provide for general coordination of National Forest System, State and Private Forestry (S&PF), and Research programs. The Chief shall approve the regional guide. The Regional Forester may request adjustment of assigned regional objectives. Any adjustment shall require the approval of the Chief, Forest Service.

(3) *Forest.* Each Forest Supervisor shall develop a forest plan for administrative units of the National Forest System. One forest plan may be prepared for all lands for which a Forest Supervisor has responsibility; or separate forest plans may be prepared for each National Forest, or combination of National Forests, within the jurisdiction of a single Forest Supervisor. A single forest plan may be prepared for the enitre Tongass National Forest. These forest plans shall constitute the land and resource management plans as required under Sections 6 and 13 of the RPA. A range of resource objectives shall be formulated as alternatives and evaluated, including at least one alternative which responds to and incorporates the tentative RPA Program resource objectives displayed in the regional guide. Based on this evaluation, the Forest Supervisor shall recommend objectives for incorporation into the forest plan to the Regional Forester. The Regional Forester shall approve the forest plan. This approval may incorporate adjustment of the tentative RPA Program resource objectives displayed in the regional guide.

§ 219.5 Interdisciplinary approach.

(a) A team representing several disciplines shall be used for regional and forest planning to insure coordinated planning of the various resources. Through interactions among its members, the team shall integrate knowledge of the physical, biological, economic and social sciences, and the environmental design arts in the planning process. The team shall consider problems collectively, rather than separating them along disciplinary lines. Team functions include, but are not limited to—

(1) Assessing the problems and resource use and development opportunities associated with providing goods and services;

(2) Obtaining the public's views about possible decisions;

(3) Implementing the planning coordination activities within the Forest Service and with local, State and other Federal agencies;

(4) Developing a broad range of alternatives which identify the benefits and costs of land and resource management according to the planning process described in this subpart.

(5) Developing the land and resource management plan and associated environmental impact statement required pursuant to the planning process;

(6) Presenting to the responsible line officer an integrated perspective on land and resource management planning; and

(7) Establishing the standards and requirements by which planning and management activities will be monitored and evaluated.

(b) In appointing team members, the responsible line officer shall determine and consider the qualifications of each team member on the basis of the complexity of the issues and concerns to be addressed through the plan. The team shall collectively represent diverse specialized areas of professional and technical knowledge applicable to the planning area, and the team members shall have recognized relevant expertise and experience in professional, investigative, scientific, or other responsible work in specialty areas which they collectively represent. The team may consist of whatever combination of Forest Service staff and other Federal government personnel is necessary to achieve an interdisciplinary approach. The team is encouraged to consult other persons when required specialized knowledge does not exist within the team itself. In

addition to technical knowledge in one or more resource specialties, members should possess other attributes which enhance the interdisciplinary process. As a minimum, these attributes should include—

(1) An ability to solve complex problems;

(2) Skills in communication and group interaction;

(3) Basic understanding of land and natural resource planning concepts, processes, and analysis techniques; and

(4) The ability to conceptualize planning problems and feasible solutions.

§ 219.6 Public participation.

(a) Because the land and resource management planning process determines how the lands of the National Forest System are to be managed, the public is encouraged to participate throughout the planning process. The intent of public participation is to—

(1) Broaden the information base upon which land and resource management planning decisions are made;

(2) Ensure that the Forest Service understands the needs, concerns, and values of the public;

(3) Inform the public of Forest Service land and resource planning activities; and

(4) Provide the public with an understanding of Forest Service programs and proposed actions.

(b) Provide participation in the preparation of environmental impact statements for planning begins with the publication of a notice of intent in the **Federal Register**. Public involvement in the preparation of draft and final environmental impact statements shall conform to the requirements of the National Environmental Policy Act and associated implementing regulations and Forest Service Manual and Handbook guidance (hereafter, "NEPA procedures"). Public comments shall be analyzed according to NEPA procedures.

(c) Public participation activities, as deemed appropriate by the responsible line officer, shall be used early and often throughout the development of plans. Formal public participation activities will begin with a notice to the news media and other sources which includes, as appropriate, the following information:

(1) A description of the proposed planning action;

(2) A description and map of the geographic area affected;

(3) The issues expected to be discussed;

(4) The kind, extent, and method(s) of public participation to be used;

(5) The times, dates, and locations scheduled or anticipated, for public meetings;

(6) The name, title, address, and telephone number of the Forest Service official who may be contacted for further information; and

(7) The location and availability of documents relevant to planning process.

(d) Public participation activities should be appropriate to the area and people involved. Means of notification should be appropriate to the level of planning. Public participation activities may include, but are not limited to, requests for written comments, meetings, conferences, seminars, workshops, tours, and similar events designed to foster public review and comment. The Forest Service shall state the objectives of each participation activity to assure that the public understands what type of information is needed and how this information relates to the planning process.

(e) Public comments shall be considered individually and by type of group and organization to determine common areas of concern and geographic distribution. The result of this analysis should be evaluated to determine the variety and intensity of viewpoints about ongoing and proposed planning and management standards and guidelines.

(f) All scheduled public participation activities shall be documented by a summary of the principal issues discussed, comments made, and a register of participants.

(g) At least 30 days' public notice shall be given for public participation activities associated with the development of regional guides and forest plans. Any notice requesting written comments on regional planning shall allow at least 60 calendar days for response. A similar request on forest planning shall allow at least 30 calendar days for response. Draft regional guides and forest plans and environmental impact statements shall be available for public comment for a least 3 months. See also §§ 219.8(c) and 219.10(b).

(h) The responsible line officer shall attend, or provide for adequate representation at, public participation activities.

(i) Copies of approved guides and plans shall be available for public review as follows:

(1) The RPA Assessment and the RPA Program shall be available at national headquarters, The Northeastern Area State and Private Forestry Office, and all Regional offices, Research Stations, Forest Supervisors' offices, and District Rangers' offices;

(2) The regional guides shall be available at national headquarters, the issuing regional office and regional offices of contiguous regions, each Forest Supervisor's office of forests within and contiguous to the issuing region, and each District Ranger's office in the region;

(3) The forest plan shall be available at the regional office for the forest, the Forest Supervisor's office, Forest Supervisors' offices contiguous to the forest, District Rangers' offices within the forest, and at least one additional location, to be determined by the Forest Supervisor, which shall offer convenient access to the public.

These documents may be made available at other locations convenient to the public.

(j) Documents considered in the development of plans shall be available at the office where the plans were developed.

(k) Forest planning activities should be coordinated to the extent practicable with owners of lands that are intermingled with, or dependent for access upon, National Forest System lands. The results of this coordination shall be included in the environmental impact statement for the plan as part of the review required in § 219.7(c). The responsible line officer may individually notify these owners of forest planning activities where it is determined that notice provided for the general public is not likely to reach the affected landowners.

(l) Fees for reproducing requested documents shall be charged according to the Secretary of Agriculture's Fee Schedule (7 CFR Part 1, Subpart A, Appendix A).

§ 219.7 Coordination with other public planning efforts.

(a) The responsible line officer shall coordinate regional and forest planning with the equivalent and related planning efforts of other Federal agencies, State and local governments, and Indian tribes.

(b) The responsible line officer shall give notice of the preparation of a land and resource management plan, along with a general schedule of anticipated planning actions, to the State Clearinghouse for circulation among State agencies as specified in OMB Circular A–95. The same notice shall be mailed to all Tribal or Alaska Native leaders whose tribal lands or treaty rights are expected to be impacted and to the heads of units of government for the counties involved. These notices

shall be issued simultaneously with the publication of the notice of intent to prepare an environmental impact statement required by NEPA procedures (40 CFR 1501.7).

(c) The responsible line officer shall review the planning and land use policies of other Federal agencies, State and local governments, and Indian tribes. The results of this review shall be displayed in the environmental impact statement for the plan (40 CFR 1502.16(c), 1506.2). The review shall include—

(1) Consideration of the objectives of other Federal, State and local governments, and Indians tribes, as expressed in their plans and policies;

(2) An assessment of the interrelated impacts of these plans and policies;

(3) A determination of how each Forest Service plan should deal with the impacts identified; and,

(4) Where conflicts with Forest Service planning are identified, consideration of alternatives for their resolution.

(d) In developing land and resource management plans, the responsible line officer shall meet with the designated State official (or designee) and representatives of other Federal agencies, local governments, and Indian tribal governments at the beginning of the planning process to develop procedures for coordination. As a minimum, such conferences shall also be held after public issues and management concerns have been identified and prior to recommending the preferred alternative. Such conferences may be held in conjunction with other public participation activities, if the opportunity for government officials to participate in the planning process is not thereby reduced.

(e) In developing the forest plan, the responsible line officer shall seek input from other Federal, State and local governments, and universities to help resolve management concerns in the planning process and to identify areas where additional research is needed. This input should be included in the discussion of the research needs of the designated forest planning area.

(f) A program of monitoring and evaluation shall be conducted that includes consideration of the effects of National Forest management on land, resources, and communities adjacent to or near the National Forest being planned and the effects upon National Forest management of activities on nearby lands managed by other Federal or other government agencies or under the jurisdiction of local governments.

§ 219.6 Regional planning procedure.

(a) *Regional guide.* A regional guide shall be developed for each administratively designated Forest Service region. Regional guides shall reflect general coordination of National Forest System, State and Private Forestry, and Research programs. Regional guides shall provide standards and guidelines for addressing major issues and management concerns which need to be considered at the regional level to facilitate forest planning. Public participation and coordination, the current RPA Program and Assessment, and the existing forest and resource plans shall be used as sources of information in meeting this requirement. Data and information requirements established nationally will be followed in structuring and maintaining required data.

(b) *Responsibilities.*—(1) *Chief, Forest Service.* The Chief shall establish agency-wide policy for regional planning and approve all regional guides.

(2) *Regional Forester.* The Regional Forester has overall responsibility for preparing and implementing the regional guide and for preparing the environmental impact statement for proposed standards and guidelines in the regional guide. The Regional Forester appoints and supervises the interdisciplinary team.

(3) *Interdisciplinary Team.* The team, under the direction of the Regional Forester, implements the public participation and coordination activities required by § 219.6 and § 219.7. The team shall continue to function even though membership may change and shall monitor and evaluate planning results and recommend amendments. The team shall develop a regional guide in compliance with NEPA procedures.

(c) *Public review.* A draft and final environmental impact statement shall be prepared for the proposed standards and guidelines in the regional guide according to NEPA procedures. To the extent feasible, a single process shall be used to meet planning and NEPA requirements. The draft statement shall identify a preferred alternative. Beginning on the date of publication of the notice of availability of the draft environmental impact statement in the **Federal Register,** the statement and the proposed guide shall be available for public comment for at least 3 months at convenient locations in the vicinity of the lands covered by the guide. During this period, and in accordance with the provisions in § 219.6, the Regional Forester or his designee shall publicize and hold public participation activities as deemed necessary for adequate public input.

(d) *Guide approval.* The Chief shall review the proposed guide and the final environmental impact statement and either approve or disapprove the guide.

(1) *Approval.* The Chief shall prepare a concise public record of decision which documents approval and accompanies the regional guide and the final environmental impact statement. The record or decision shall be prepared according to NEPA procedures (40 CFR 1505.2). The approved regional guide shall not become effective until at least 30 days after publication of the notice of availability of the final environmental impact statement in the **Federal Register.**

(2) *Disapproval.* The Chief shall return the regional guide and final environmental impact statement to the Regional Forester with a written statement of the reasons for disapproval. The Chief may also specify a course of action to be undertaken by the Regional Forester in order to remedy deficiencies, errors, or omissions in the regional guide or environmental impact statement.

(e) *Public appeal of approval decisions.* The provisions of 36 CFR 211, Subpart B apply to any administrative appeal of the Chief's decision to approve a regional guide. Decisions to disapprove a guide and other decisions made during the regional planning process prior to issuance of a record of decision approving the guide are not subject to administrative appeal.

(f) *Amendment.* The Regional Forester may amend the regional guide. The Regional Forester shall determine whether the proposed amendment would result in a significant change in the guide. If the change resulting from the proposed amendment is determined to be significant, the Regional Forester shall follow the same procedure for amendment as that required for development and approval of a regional guide. If the change resulting from the amendment is determined not to be significant for the purposes of the planning process, the Regional Forester may implement the amendment following appropriate public notification and satisfactory completion of NEPA procedures.

(g) *Planning records.* The Regional Forester shall develop and maintain planning records that document decisions and activities that result from the process of developing a regional guide and the accomplishment of legal and administrative planning requirements. These records include at least the draft environmental impact statement, final environmental impact statement, regional guide, record of

decision, a work plan to guide and manage planning, the procedures used in completing each action, and the results of these actions.

§ 219.9 Regional guide content.

(a) The regional guide shall contain—

(1) A summary of the analysis of the regional management situation, including a brief description of the existing management situation and the major issues and management concerns which need to be addressed at the regional level to facilitate forest planning;

(2) A description of management direction including programs, goals, and objectives;

(3) A display of tentative resource objectives for each forest planning area from the current RPA Program;

(4) New or significantly changed regional management standards and guidelines necessary to address major regional issues and management concerns identified in paragraph (a)(1) of this section;

(5) Specific standards and guidelines for the following—

(i) Prescribing appropriate harvest cutting methods to be used within the region according to geographic areas, forest types, or other suitable classifications;

(ii) Establishing the maximum size, dispersal, and size variation of tree openings created by even-aged management, and the state of vegetation that will be reached before a cut-over area is no longer considered an opening, using factors enumerated in § 219.27(d);

(iii) Defining the management intensities and utilization standards to be used in determining harvest levels for the region;

(iv) Designating transportation corridors and associated direction for forest planning, such as management requirements for corridors, transmission lines, pipelines, and water canals. (The designation of corridors is not to preclude the granting of separate rights-of-way over, upon, under, or through the Federal lands where the authorized line officer determines that confinement to a corridor is not appropriate.) (43 U.S.C. 1768, 36 CFR 251.56); and

(v) Identifying in forest plans significant current and potential air pollution emissions from management activities and from other sources in and around the forest planning area and identifying measures needed to coordinate air quality control with appropriate air quality regulation agencies.

(6) A description of the monitoring and evaluation necessary to determine and report achievements and effects of the guide.

(7) A description of measures to achieve coordination of National Forest System, State and Private Forestry, and Research programs.

(b) Existing regional standards and guidelines that are part of the Forest Service directives system, and that are not altered or superseded in the course of complying with § 219.9(a)(4), shall remain in effect.

§ 219.10 Forest planning—general procedure.

(a) *Responsibilities.*—(1) *Regional Forester.* The Regional Forester shall establish regional policy for forest planning and approve all forest plans in the region.

(2) *Forest Supervisor.* The Forest Supervisor has overall responsibility for the preparation and implementation of the forest plan and preparation of the environmental impact statement for the forest plan. The Forest Supervisor appoints and supervises the interdisciplinary team.

(3) *Interdisciplinary team.* The team, under the direction of the Forest Supervisor, implements the public participation and coordination activities required by § 219.6 and § 219.7. The team shall continue to function even though membership may change and shall monitor and evaluate planning results and recommend revisions and amendments. The interdisciplinary team shall develop a forest plan and environmental impact statement using the process established in § 219.12 and paragraph (b) below.

(b) *Public review of plan and environmental impact statement.* A draft and final environmental impact statement shall be prepared for the proposed plan according to NEPA procedures. The draft environmental impact statement shall identify a preferred alternative. To comply with 16 U.S.C. 1604(d), the draft environmental impact statement and proposed plan shall be available for public comment for at least 3 months, at convenient locations in the vicinity of the lands covered by the plan, beginning on the date of the publication of the notice of availability in the Federal Register. During this period, and in accordance with the provisions in § 219.6, the Forest Supervisor shall publicize and hold public participation activities as deemed necessary to obtain adequate public input.

(c) *Plan approval.* The Regional Forester shall review the proposed plan and the final environmental impact statement and either approve or disapprove the plan.

(1) *Approval.* The Regional Forester shall prepare a concise public record of decision which documents approval and accompanies the plan and final environmental impact statement. The record of decision shall be prepared according to NEPA procedures (40 CFR 1505.2). The approved plan shall not become effective until at least 30 days after publication of the notice of availability of the final environmental impact statement in the Federal Register, to comply with 16 U.S.C. 1604(d) and 1604(j).

(2) *Disapproval.* The Regional Forester shall return the plan and final environmental impact statement to the Forest Supervisor with a written statement of the reasons for disapproval. The Regional Forester may also specify a course of action to be undertaken by the Forest Supervisor in order to remedy deficiencies, errors, or omissions in the plan or environmental impact statement.

(d) *Public appeal of approval decision.* The provisions of 36 CFR Part 211, Subpart B apply to any administrative appeal of the Regional Forester's decision to approve a forest plan. Decisions to disapprove a plan and other decisions made during the forest planning process prior to the issuance of a record of decision approving the plan are not subject to administrative appeal.

(e) *Plan implementation.* As soon as practicable after approval of the plan, the Forest Supervisor shall ensure that, subject to valid existing rights, all outstanding and future permits, contracts, cooperative agreements, and other instruments for occupancy and use of affected lands are consistant with the plan. Subsequent administrative activities affecting such lands, including budget proposals, shall be based on the plan. The Forest Supervisor may change proposed implementation schedules to reflect differences between proposed annual budgets and appropriated funds. Such scheduled changes shall be considered an amendment to the forest plan, but shall not be considered a significant amendment, or require the preparation of an environmental impact statement, unless the changes significantly alter the long-term relationship between levels of multiple-use goods and services projected under planned budget proposals as compared to those projected under actual appropriations.

(f) *Amendment.* The Forest Supervisor may amend the forest plan. Based on an analysis of the objectives, guidelines, and other contents of the forest plan, the Forest Supervisor shall determine whether a proposed amendment would

result in a significant change in the plan. If the change resulting from the proposed amendment is determined to be significant, the Forest Supervisor shall follow the same procedure as that required for development and approval of a forest plan. If the change resulting from the amendment is determined not to be significant for the purposes of the planning process, the Forest Supervisor may implement the amendment following appropriate public notification and satisfactory completion of NEPA procedures.

(g) *Revision.* A forest plan shall ordinarily be revised on a 10-year cycle or at least every 15 years. It also may be revised whenever the Forest Supervisor determines that conditions or demands in the area covered by the plan have changed significantly or when changes in RPA policies, goals, or objectives would have a significant effect on forest level programs. In the monitoring and evaluation process, the interdisciplinary team may recommend a revision of the forest plan at any time. Revisions are not effective until considered and approved in accordance with the requirements for the development and approval of a forest plan. The Forest Supervisor shall review the conditions on the land covered by the plan at least every 5 years to determine whether conditions or demands of the public have change significantly.

(h) *Planning records.* The Forest Supervisor and interdisciplinary team shall develop and maintain planning records that document the decisions and activities that result from the process of developing a forest plan. Records that support analytical conclusions made and alternatives considered by the team and approved by the Forest Supervisor throughout the planning process shall be maintained. Such supporting records provide the basis for the development of the forest plan and associated documents required by NEPA procedures.

§ 219.11 Forest plan content.

The forest plan shall contain the following:

(a) A brief summary of the analysis of the management situation, including demand and supply conditions for resource commodities and services, production potentials, and use and development opportunities;

(b) Forest multiple-use goals and objectives that include a description of the desired future condition of the forest or grassland and an identification of the quantities of goods and services that are expected to be produced or provided during the RPA planning periods;

(c) Multiple-use prescriptions and associated standards and guidelines for each management area including proposed and probable management practices such as the planned timber sale program; and

(d) Monitoring and evaluation requirements that will provide a basis for a periodic determination and evaluation of the effects of management practices.

§ 219.12 Forest planning—process.

(a) *General requirements.* The preparation, revision, or significant amendment of a forest plan shall comply with the requirements established in this section. The planning process includes at least those actions set forth in paragraphs (b) through (k) of the section. Some actions may occur simultaneously, and it may be necessary to repeat an action as additional information becomes available. The environmental impact statement for each forest plan shall be prepared according to NEPA procedures. To the extent feasible, a single process shall be used to meet planning and NEPA requirements.

(b) *Identification of purpose and need.* The interdisciplinary team shall identify and evaluate public issues, management concerns, and resource use and development opportunities, including those identified throughout the planning process during public participation activities and coordination with other Federal agencies, State and local governments, and Indian tribes. The Forest Supervisor shall determine the major public issues, management concerns, and resource use and development opportunities to be addressed in the planning process.

(c) *Planning criteria.* Criteria shall be prepared to guide the planning process. Criteria apply to collection and use of inventory data and information, analysis of the management situation, and the design, formulation, and evaluation of alternatives. Criteria designed to achieve the objective of maximizing net public benefits shall be included. Specific criteria may be derived from—

(1) Laws, Executive Orders, regulations, and agency policy as set forth in the Forest Service Manual;

(2) Goals and objectives in the RPA Program and regional guides;

(3) Recommendations and assumptions developed from public issues, management concerns, and resource use and development opportunities;

(4) The plans and programs of other Federal agencies, State and local governments, and Indian tribes;

(5) Ecological, technical, and economic factors; and

(6) The resource integration and management requirements in §§ 219.13 through 219.27.

(d) *Inventory data and information collection.* Each Forest Supervisor shall obtain and keep current inventory data appropriate for planning and managing the resources under his or her administrative jurisdiction. The Supervisor will assure that the interdisciplinary team has access to the best available data. This may require that special inventories or studies be prepared. The interdisciplinary team shall collect, assemble, and use data, maps, graphic material, and explanatory aids, of a kind, character, and quality, and to the detail appropriate for the management decisions to be made. Data and information needs may vary as planning problems develop from identification of public issues, management concerns, and resource use and development opportunities. Data shall be stored for ready retrieval and comparison and periodically shall be evaluated for accuracy and effectiveness. The interdisciplinary team will use common data definitions and standards established by the Chief of the Forest Service to assure uniformity of information between all planning levels. As information is recorded, it shall be applied in any subsequent planning process. Information developed according to common data definitions and standards shall be used in the preparation of the 1990, and subsequent RPA Assessments and RPA Programs.

(e) *Analysis of the management situation.* The analysis of the management situation is a determination of the ability of the planning area covered by the forest plan to supply goods and services in response to society's demands. The primary purpose of this analysis is to provide a basis for formulating a broad range of reasonable alternatives. The analysis may examine the capability of the unit to supply outputs both with and without legal and other requirements. As a minimum, the analysis of the management situation shall include the following:

(1) Benchmark analyses to define the range within which alternatives can be constructed. Budgets shall not be a constraint. The following benchmark analyses shall be consistent with the minimum applicable management requirements of § 219.27 and shall define at least—

(i) The minimum level of management which would be needed to maintain and protect the unit as part of the National Forest System together with associated costs and benefits;

(ii) The maximum physical and biological production potentials of significant individual goods and services together with associated costs and benefits;

(iii) Monetary benchmarks which estimate the maximum present net value of those resources having an established market value or an assigned value;

(A) For forest planning areas with major resource outputs that have an established market price, monetary benchmarks shall include an estimate of the mix of resource uses, combined with a schedule of outputs and costs, which will maximize the present net value of those major outputs that have an established market price;

(B) For all forest planning areas, monetary benchmarks shall include an estimate of the mix of resource uses, combined with a schedule of outputs and costs, which will maximize the present net value of those major outputs that have an established market price or are assigned a monetary value;

(C) For forest planning areas with a significant timber resource, estimates for paragraphs (e)(1)(iii) (A) and (B) of this section shall be developed both with and without meeting the requirements for compliance with a base sale schedule of timber harvest, as described in § 219.16(a)(1), and with and without scheduling the harvest of even-aged stands generally at or beyond culmination of mean annual increment of growth, as described in § 219.16(a)(2)(iii).

(D) Estimates for paragraphs (e)(1)(iii) (A) and (B) of this section shall be developed both with and without other constraints when needed to address major public issues, management concerns, or resource opportunities identified during the planning process.

(2) The current level of goods and services provided by the unit and the most likely amount of goods and services expected to be provided in the future if current management direction continues; this will be the same analysis as that required by § 219.12(f)(5).

(3) Projections of demand using best available techniques, with both price and nonprice information. To the extent practical, demand will be assessed as price-quantity relationships.

(4) A determination of the potential to resolve public issues and management concerns.

(5) Based on consideration of data and findings developed in paragraphs (e)(1)–(4), a determination of the need to establish or change management direction.

(f) *Formulation of alternatives.* The interdisciplinary team shall formulate a broad range of reasonable alternatives according to NEPA procedures. The primary goal in formulating alternatives, besides complying with NEPA procedures, is to provide an adequate basis for identifying the alternative that comes nearest to maximizing net public benefits, consistent with the resource integration and management requirements of §§ 219.13 through 219.27.

(1) Alternatives shall be distributed between the minimum resource potential and the maximum resource potential to reflect to the extent practicable the full range of major commodity and environmental resource uses and values that could be produced from the forest. Alternatives shall reflect a range of resource outputs and expenditure levels.

(2) Alternatives shall be formulated to facilitate analysis of opportunity costs and of resource use and environmental trade-offs among alternatives and between benchmarks and alternatives.

(3) Alternatives shall be formulated to facilitate evaluation of the effects on present net value, benefits, and costs of achieving various outputs and values that are not assigned monetary values, but that are provided at specified levels.

(4) Alternatives shall provide different ways to address and respond to the major public issues, management concerns, and resource opportunities identified during the planning process.

(5) Reasonable alternatives which may require a change in existing law or policy to implement shall be formulated if necessary to address a major public issue, management concern, or resource opportunity identified during the planning process (40 CFR 1501.7, 1502.14(c)).

(6) At least one alternative shall be developed which responds to and incorporates the RPA Program tentative resource objectives for each forest displayed in the regional guide.

(7) At least one alternative shall reflect the current level of goods and services provided by the unit and the most likely amount of goods and services expected to be provided in the future if current management direction continues. Pursuant to NEPA procedures, this alternative shall be deemed the "no action" alternative.

(8) Each alternative shall represent to the extent practicable the most cost efficient combination of management prescriptions examined that can meet the objectives established in the alternative.

(9) Each alternative shall state at least—

(i) The condition and uses that will result from long-term application of the alternative;

(ii) The goods and services to be produced, the timing and flow of these resource outputs together with associated costs and benefits;

(iii) Resource management standards and guidelines; and

(iv) The purposes of the management direction proposed.

(g) *Estimated effects of alternatives.* The physical, biological, economic, and social effects of implementing each alternative considered in detail shall be estimated and compared according to NEPA procedures. These effects include those described in NEPA procedures (40 CFR 1502.14 and 1502.16) and at least the following:

(1) The expected outputs for the planning periods, including appropriate marketable goods and services, as well as nonmarket items, such as recreation and wilderness use, wildlife and fish, protection and enhancement of soil, water, and air, and preservation of aesthetic and cultural resource values;

(2) The relationship of expected outputs to the RPA Program tentative resource objectives for the forest displayed in the current regional guide;

(3) Direct and indirect benefits and costs, analyzed in sufficient detail to estimate—

(i) the expected real-dollar costs (discounted when appropriate), including investment, administrative, and operating costs of the agency and all other public and private costs required to manage the forest up to the point where the outputs are valued and the environmental consequences are realized;

(ii) the expected real-dollar value (discounted when appropriate) of all outputs attributable to each alternative to the extent that monetary values can be assigned to nonmarket goods and services, using quantitative and qualitative criteria when monetary values may not reasonably be assigned;

(iii) the economic effects of alternatives, including impacts on present net value, total receipts to the Federal Government, direct benefits to users that are not measured in receipts to the Federal Government, receipt shares to State and local governments, income, and employment in affected areas; and

(iv) the monetary opportunity costs (changes in present net value) associated with those management standards and resource outputs in each alternative that were not assigned monetary values but were provided at specified levels, compared with the maximum present net value benchmarks developed in § 219.12(e)(1)(iii).

(4) The significant resource tradeoffs and opportunity costs associated with achieving alternative resource objectives.

(h) *Evaluation of alternatives:* Using planning criteria, the interdisciplinary team shall evaluate the significant physical, biological, economic, and social effects of each management alternative that is considered in detail. The evaluation shall include a comparative analysis of the aggregate effects of the management alternatives and shall compare present net value, social and economic impacts, outputs of goods and services, and overall protection and enhancement of environmental resources.

(i) *Preferred alternative recommendation.* The Forest Supervisor shall review the interdisciplinary team's evaluation and shall recommend to the Regional Forester a preferred alternative to be identified in the draft environmental impact statement and displayed as the proposed plan.

(j) *Plan approval.* The Regional Forester shall review the proposed plan and final environmental impact statement and either approve or disapprove the plan in accordance with § 219.10(c). The record of decision for approval of a plan shall include, in addition to the requirements of NEPA procedures (40 CFR 1505.2), a summarized comparison of the selected alternative with:

(1) Any other alternative considered which is environmentally preferable to the selected alternative; and

(2) Any other alternative considered which comes nearer to maximizing present net value.

(k) *Monitoring and evaluation.* At intervals established in the plan, implementation shall be evaluated on a sample basis to determine how well objectives have been met and how closely management standards and guidelines have been applied. Based upon this evaluation, the interdisciplinary team shall recommend to the Forest Supervisor such changes in management direction, revisions, or amendments to the forest plan as are deemed necessary. Monitoring requirements identified in the forest plan shall provide for—

(1) A quantitative estimate of performance comparing outputs and services with those projected by the forest plan;

(2) Documentation of the measured prescriptions and effects, including significant changes in productivity of the land; and

(3) Documentation of costs associated with carrying out the planned management prescriptions as compared with costs estimated in the forest plan.

(4) A description of the following monitoring activities:

(i) The actions, effects, or resources to be measured, and the frequency of measurements;

(ii) Expected precision and reliability of the monitoring process; and

(iii) The time when evaluation will be reported.

(5) A determination of compliance with the following standards:

(i) Lands are adequately restocked as specified in the forest plan;

(ii) Lands identified as not suited for timber production are examined at least every 10 years to determine if they have become suited; and that, if determined suited, such lands are returned to timber production;

(iii) Maximum size limits for harvest areas are evaluated to determine whether such size limits should be continued; and

(iv) Destructive insects and disease organisms do not increase to potentially damaging levels following management activities.

§ 219.13 Forest planning—resource integration requirements.

The minimum requirements for integrating individual forest resource planning into the forest plan are established in §§ 219.14 through 219.26 of this subpart. For the purposes of meeting the requirements of § 219.12(c), additional planning criteria may be found in the guidelines for managing specific resources set forth in the Forest Service Manual and Handbooks.

§ 219.14 Timber resource land suitability.

During the forest planning process, lands which are not suited for timber production shall be identified in accordance with the criteria in paragraphs (a) through (d) of this section.

(a) During the analysis of the management situation, data on all National Forest System lands within the planning area shall be reviewed, and those lands within any one of the categories described in paragraphs (a)(1) through (4) of this section shall be identified as not suited for timber production—

(1) The land is not forest land as defined in § 219.3.

(2) Technology is not available to ensure timber production from the land without irreversible resource damage to soils productivity, or watershed conditions.

(3) There is not reasonable assurance that such lands can be adequately restocked as provided in § 219.27(c)(3).

(4) The land has been withdrawn from timber production by an Act of Congress, the Secretary of Agriculture or the Chief of the Forest Service.

(b) Forest lands other than those that have been identified as not suited for timber production in paragraph (a) of this section shall be further reviewed and assessed prior to formulation of alternatives to determine the costs and benefits for a range of management intensities for timber production. For the purpose of analysis, the planning area shall be stratified into categories of land with similar management costs and returns. The stratification should consider appropriate factors that influence the costs and returns such as physical and biological conditions of the site and transportation requirements. This analysis shall identify the management intensity for timber production for each category of land which results in the largest excess of discounted benefits less discounted costs and shall compare the direct costs of growing and harvesting trees, including capital expenditures required for timber production, to the anticipated receipts to the government, in accordance with § 219.12 and paragraphs(b)(1) through (b)(3) of this section.

(1) Direct benefits are expressed as expected gross receipts to the government. Such receipts shall be based upon expected stumpage prices and payments-in-kind from timber harvest considering future supply and demand situation for timber and upon timber production goals of the regional guide.

(2) Direct costs include the anticipated investments, maintenance, operating, management, and planning costs attributable to timber production activities, including mitigation measures necessitated by the impacts of timber production.

(3) In addition to long-term yield, the financial analysis must consider costs and returns of managing the existing timber inventory.

(c) During formulation and evaluation of each alternative as required in § 219.12 (f) and (g), combinations of resource management prescriptions shall be defined to meet management objectives for the various multiple uses including outdoor recreation, timber, watershed, range, wildlife and fish, and wilderness. The formulation and evaluation of each alternative shall consider the costs and benefits of alternative management intensities for timber production as identified pursuant to paragraph (b) of this section in accordance with § 219.12(f). Lands shall

be tentatively identified as not appropriate for timber production to meet objectives of the alternative being considered if—

(1) Based upon a consideration of multiple-use objectives for the alternative, the land is proposed for resource uses that preclude timber production, such as wilderness;

(2) Other management objectives for the alternative limit timber production activities to the point where management requirements set forth in § 219.27 cannot be met; or

(3) The lands are not cost-efficient, over the planning horizon, in meeting forest objectives, which include timber production.

(d) Lands identified as not suited for timber production in paragraph (a) of this section and lands tentatively identified as not appropriate for timber production in paragraph (c) of this section shall be designated as not suited for timber production in the preferred alternative. Designation in the plan of lands not suited for timber production shall be reviewed at least every 10 years. Such lands may be reviewed and redesignated as suited for timber production due to changed conditions at any time, according to the criteria in paragraphs (a) and (c) of this section, and according to the procedures for amendment or revision of the forest plan in §§219.10 (f) and (g).

§ 219.15 Vegetation management practices.

When vegetation is altered by management, the methods, timing, and intensity of the practices determine the level of benefits that can be obtained from the affected resources. The vegetation management practices chosen for each vegetation type and circumstance shall be defined in the forest plan with applicable standards and guidelines and the reasons for the choices. Where more than one vegetation management practice will be used in a vegetation type, the conditions under which each will be used shall be based upon thorough reviews of technical and scientific literature and practical experience, with appropriate evaluation of this knowledge for relevance to the specific vegetation and site conditions. On National Forest System land, the vegetation management practice chosen shall comply with the management requirements in § 219.27(b).

§ 219.16 Timber resource sale schedule.

In a forest plan, the selected forest management alternative includes a sale schedule which provides the allowable sale quantity. The sale schedule of each alternative, including those which depart from base sale schedules, shall be formulated in compliance with § 219.12(f) and paragraphs (a) and (b) of this section.

(a) Alternatives shall be formulated that include determinations of the quantity of the timber that may be sold during each decade. These quantity determinations shall be based on the principle of sustained yield and shall meet the management requirements in § 219.27. For each alternative, the determination shall include a calculation of the long-term sustained-yield capacity and the base sale schedule and, when appropriate, a calculation of timber sale alternatives that may depart from the base sale schedule as provided in paragraphs (a)(1) through (a)(3) of this section.

(1) For the base sale schedules, the planned sale for any future decade shall be equal to, or greater than, the planned sale for the preceding decade, provided that the planned sale is not greater than the long-term sustained-yield capacity consistent with the management objectives of the alternative.

(2) The determinations of the appropriate long-term sustained-yield capacities, base sale schedules, and departure alternatives to the base sale schedules shall be made on the basis of the guidelines which follow:

(i) For the long-term sustained-yield capacities and the base sale schedules, assume intensities of management and degree of timber utilization consistent with the goals, assumptions, and requirements contained in, or used in, the preparation of the current RPA Program and regional guide. For the base sale schedule, the management and utilization assumptions shall reflect the projected changes in practices for the four decades contained in, or used in, the preparation of the current RPA Program and regional guide. Beyond the fourth decade, the assumptions shall reflect those projected for the fourth decade of the current RPA Program, unless there is a basis for a different assumption;

(ii) For alternatives with sale schedules which depart from the corresponding base sale schedule, assume an appropriate management intensity;

(iii) In accordance with the established standards, assure that all even-aged stands scheduled to be harvested during the planning period will generally have reached the culmination of mean annual increment of growth. Mean annual increment shall be based on expected growth, according to management intensities and utilization standards assumed in paragraphs (a)(2) (i) and (ii) of this section and on forest type and site quality. Mean annual increment shall be expressed in cubic measure. Alternatives which incorporate exceptions to these standards shall be evaluated if it is reasonable to expect that overall multiple use objectives would be better attained. Alternatives which incorporate exceptions to these standards are permitted for the use of sound silvicultural practices, such as thinning or other stand improvement measures; for salvage or sanitation harvesting of timber stands which are substantially damaged by fire, windthrow, or other catastrophe, or which are in imminent danger from insect or disease attack; for cutting for experimental and research purposes; or for removing particular species of trees, after consideration has been given to the multiple uses of the area being planned and after completion of the public participation process applicable to the preparation of a forest plan; and

(iv) Each sale schedule shall provide for a forest structure that will enable perpetual timber harvest which meets the principle of sustained-yield and multiple-use objectives of the alternative.

(3) Alternatives with sale schedules which depart from the principles of paragraph (1) above and which will lead to better attaining the overall objectives of multiple-use management shall be evaluated when any of the following conditions are indicated:

(i) None of the other alternatives considered provides a sale schedule that achieves the assigned goals of the RPA Program as provided in § 219.4(b);

(ii) High mortality losses from any cause can be significantly reduced or prevented or forest age-class distribution can be improved, thereby facilitating future sustained-yield management; or

(iii) Implementation of the corresponding base sale schedule would cause a substantial adverse impact upon a community in the economic area in which the forest is located.

(iv) It is reasonable to expect that overall multiple-use objectives would otherwise be better attained.

(b) The sale schedule of the management alternative selected in accordance with § 219.12 provides the allowable sale quantity for the first plan period.

§ 219.17 Wilderness designation.

(a) Lands revised for wilderness designation under the review and evaluation of roadless areas conducted by the Secretary of Agriculture, but not

designated as wilderness or not designated for further planning, and lands whose designation as primitive areas has been terminated shall be managed for uses other than wilderness in accordance with this subpart. No such area shall be considered for designation as wilderness until a revision of the forest plan under § 219.10(g).

(b) When revising the forest plan, roadless areas of public lands within and adjacent to the forest shall be evaluated and considered for recommendation as potential wilderness areas, as provided in paragraphs (b)(1) and (b)(2) of this section.

(1) During analysis of the management situation, the following areas shall be designated for evaluation:

(i) All previously inventoried wilderness resources not yet designated, if they are currently essentially roadless;

(ii) Areas contiguous to existing wilderness, primitive areas, or administratively proposed wildernesses, regardless of which agency has jurisdiction for the wilderness or proposed wilderness;

(iii) Areas that are contiguous to roadless and undeveloped areas in other Federal ownership that have identified wilderness potential; and

(iv) Areas designated by Congress for wilderness study, administrative proposals pending before Congress, and other legislative proposals pending which have been endorsed by the President.

(2) Each area designated for evaluation under paragraph (b)(1) of this section shall be evaluated with public participation. The evaluation criteria shall include as a minimum—

(i) The values of the area as wilderness;

(ii) The values foregone and effects on management of adjacent lands as a consequence of wilderness designation;

(iii) Feasibility of management as wilderness, in respect to size, nonconforming use, land ownership patterns, and existing contractual agreements or statutory rights;

(iv) Proximity to other designated wilderness and relative contribution to the National Wilderness Preservation System; and

(v) The anticipated long-term changes in plant and animal species diversity, including the diversity of natural plant and animal communities of the forest planning area and the effects of such changes on the values for which wilderness areas were created.

§ 219.18 Wilderness management.

Forest planning shall provide direction for the management of designated wilderness and primitive areas in accordance with the provisions of 36 CFR Part 293. In particular, plans shall—

(a) Provide for limiting and distributing visitor use of specific areas in accord with periodic estimates of the maximum levels of use that allow natural processes to operate freely and that do not impair the values for which wilderness areas were created; and

(b) Evaluate the extent to which wildfire, insect, and disease control measures may be desirable for protection of either the wilderness or adjacent areas and provide for such measures when appropriate.

§ 219.19 Fish and wildlife resource.

Fish and wildlife habitat shall be managed to maintain viable populations of existing native and desired non-native vertebrate species in the planning area. For planning purposes, a viable population shall be regarded as one which has the estimated numbers and distribution of reproductive individuals to insure its continued existence is well distributed in the planning area. In order to insure that viable populations will be maintained, habitat must be provided to support, at least, a minimum number of reproductive individuals and that habitat must be well distributed so that those individuals can interact with others in the planning area.

(a) Each alternative shall establish objectives for the maintenance and improvement of habitat for management indicator species selected under paragraph (g)(1) of this section, to the degree consistent with overall multiple use objectives of the alternative. To meet this goal, management planning for the fish and wildlife resource shall meet the requirements set forth in paragraphs (a)(1) through (a)(7) of this section.

(1) In order to estimate the effects of each alternative on fish and wildlife populations, certain vertebrate and/or invertebrate species present in the area shall be identified and selected as management indicator species and the reasons for their selection will be stated. These species shall be selected because their population changes are believed to indicate the effects of management activities. In the selection of management indicator species, the following categories shall be represented where appropriate: Endangered and threatened plant and animal species identified on State and Federal lists for the planning area; species with special habitat needs that may be influenced significantly by planned management programs; species commonly hunted, fished, or trapped; non-game species of special interest; and additional plant or animal species selected because their population changes are believed to indicate the effects of management activities on other species of selected major biological communities or on water quality. On the basis of available scientific information, the interdisciplinary team shall estimate the effects of changes in vegetation type, timber age classes, community composition, rotation age, and year-long suitability of habitat related to mobility of management indicator species. Where appropriate, measures to mitigate adverse effects shall be prescribed.

(2) Planning alternatives shall be stated and evaluated in terms of both amount and quality of habitat and of animal population trends of the management indicator species.

(3) Biologists from State fish and wildlife agencies and other Federal agencies shall be consulted in order to coordinate planning for fish and wildlife, including opportunities for the reintroduction of extirpated species.

(4) Access and dispersal problems of hunting, fishing, and other visitor uses shall be considered.

(5) The effects of pest and fire management on fish and wildlife populations shall be considered.

(6) Population trends of the management indicator species will be monitored and relationships to habitat changes determined. This monitoring will be done in cooperation with State fish and wildlife agencies, to the extent practicable.

(7) Habitat determined to be critical for threatened and endangered species shall be identified, and measures shall be prescribed to prevent the destruction or adverse modification of such habitat. Objectives shall be determined for threatened and endangered species that shall provide for, where possible, their removal from listing as threatened and endangered species through appropriate conservation measures, including the designation of special areas to meet the protection and management needs of such species.

§ 219.20 Grazing resource.

In forest planning, the suitability and potential capability of National Forest System lands for producing forage for grazing animals and for providing habitat for management indicator species shall be determined as provided in paragraphs (a) and (b) of this section. Lands so identified shall be managed in accordance with direction established in forest plans.

(a) Lands suitable for grazing and browsing shall be identified and their

condition and trend shall be determined. The present and potential supply of forage for livestock, wild and free-roaming horses and burros, and the capability of these lands to produce suitable food and cover for selected wildlife species shall be estimated. The use of forage by grazing and browsing animals will be estimated. Lands in less than satisfactory condition shall be identified and appropriate action planned for their restoration.

(b) Alternative range management prescriptions shall consider grazing systems and the facilities necessary to implement them; land treatment and vegetation manipulation practices; and evaluation of pest problems; possible conflict or beneficial interactions among livestock, wild free-roaming horses and burros and wild animal populations, and methods of regulating these; direction for rehabilitation of ranges in unsatisfactory condition; and comparative cost efficiency of the prescriptions.

§ 219.21 Recreation resource.

To the degree consistent with needs and demands for all major resources, a broad spectrum of forest and rangeland related outdoor recreation opportunities shall be provided for in each alternative. Planning activities to achieve this shall be in accordance with national and regional direction and procedural requirements of paragraphs (a) through (g) of this section.

(a) Forest planning shall identify—

(1) The physical and biological characteristics that make land suitable for recreation opportunities;

(2) The recreational preferences of user groups and the settings needed to provide quality recreation opportunities; and

(3) Recreation opportunities on the National Forest System lands.

(b) The supply of developed recreational facilities in the area of National Forest influence shall be appraised for adequacy to meet present and future demands.

(c) Planning altenatives shall include consideration of establishment of physical facilities, regulation of use, and recreation opportunities responsive to current and anticipated user demands.

(d) In formulation and analysis of alternatives as specified in § 219.12 (f) and (g), interactions among recreation opportunities and other multiple uses shall be examined. This examination shall consider the impacts of the proposed recreation activities on other uses and values and the impacts of other uses and activities associated with them on recreation opportunities, activities, and quality of experience.

(e) Formulation and evaluation of alternatives under paragraphs (c) and (d) of this section shall be coordinated to the extent feasible with present and proposed recreation activities of local and State land use or outdoor recreation plans, particularly the State Comprehensive Outdoor Recreation Plan, and recreation opportunities already present and available on other public and private lands, with the aim of reducing duplication in meeting recreation demands.

(f) The visual resource shall be inventoried and evaluated as an integrated part of evaluating alternatives in the forest panning process, addressing both the landscape's visual attractiveness and the public's visual expectation. Management prescriptions for definitive land areas of the forest shall include visual quality objectives.

(g) Off-road vehicle use shall be planned and implemented to protect land and other resources, promote public safety, and minimize comflicts with other uses of the National Forest System lands. Forest planning shall evaluate the potential effects of vehicle use off roads and, on the basis of the requirements of 36 CFR Part 295 of this chapter, classify areas and trails of National Forest System lands as to whether or not off-road vehicle use may be permitted.

§ 219.22 Mineral resource.

Mineral exploration and development in the planning area shall be considered in the management of renewable resources. The following shall be recognized to the extent practicable in forest planning:

(a) Active mines within the area of land covered by the forest plan;

(b) Outstanding or reserved mineral rights;

(c) The probable occurrence of various minerals, including locatable, leasable, and common variety;

(d) The potential for future mineral development and potential need for withdrawal of areas from development;

(e) Access requirements for mineral exploration and development; and

(f) The probable effect of renewable resource prescriptions and management direction on mineral resources and activities, including exploration and development.

§ 219.23 Water and soil resource.

Forest planning shall provide for—

(a) General estimates of current water uses, both consumptive and non-consumptive, including instream flow requirements within the area of land covered by the forest plan;

(b) Identification of significant existing impoundments, transmission facilities, wells, and other man-made developments on the area of land covered by the forest plan;

(c) Estimation of the probable occurrence of various levels of water volumes, including extreme events which would have a major impact on the planning area;

(d) Compliance with requirements of the Clean Water Act, the Safe Drinking Water Act, and all substantive and procedural requirements of Federal, State, and local governmental bodies with respect to the provision of public water systems and the disposal of waste water;

(e) Evaluation of existing or potential watershed conditions that will influence soil productivity, water yield, water pollution, or hazardous events; and

(f) Adoption of measures, as directed in applicable Executive orders, to minimize risk of flood loss, to restore and preserve floodplain values, and to protect wetlands.

§ 219.24 Cultural and historic resources.

Forest planning shall provide for the identification, protection, interpretation, and management of significant cultural resources on National Forest System lands. Planning of the resource shall be governed by the requirements of Federal laws pertaining to historic preservation, and guided by paragraphs (a)(1) through (a)(3) of this section.

(a) Forest planning shall—

(1) Provide an overview of known data relevant to history, ethnography, and prehistory of the area under consideration, including known cultural resource sites;

(2) Identify areas requiring more intensive inventory;

(3) Provide for evaluation and identification of appropriate sites for the National Register of Historic Places;

(4) Provide for establishing measures for the protection of significant cultural resources from vandalism and other human depredation, and natural destruction;

(5) Identify the need for maintenance of historic sites on, or eligible for inclusion in, the National Register of Historic Places; and

(6) Identify opportunities for interpretation of cultural resources for the education and enjoyment of the American public.

(b) In the formulation and analysis of alternatives, interactions among cultural resources and other multiple uses shall be examined. This examination shall consider impacts of the management of cultural resources on other uses and

activities and impacts of other uses and activities on cultural resource management.

(c) Formulation and evaluation of alternatives shall be coordinated to the extent feasible with the State cultural resource plan and planning activities of the State Historic Preservation Office and State Archaeologist and with other State and Federal agencies.

§ 219.25 Research natural areas.

Forest planning shall provide for the establishment of Research Natural Areas (RNA's). Planning shall make provision for the identification of examples of important forest, shrubland, grassland, alpine, aquatic, and geologic types that have special or unique characteristics of scientific interest and importance and that are needed to complete the national network of RNA's. Biotic, aquatic, and geologic types needed for the network shall be identified using a list provided by the Chief of the Forest Service. Authority to establish RNA's is delegated to the Chief at 7 CFR 2.60(a) and 36 CFR 251.23. Recommendations for establishment of areas shall be made to the Chief through the planning process.

§ 219.26 Diversity.

Forest planning shall provide for diversity of plant and animal communities and tree species consistent with the overall multiple-use objectives of the planning area. Such diversity shall be considered throughout the planning process. Inventories shall include quantitative data making possible the evaluation of diversity in terms of its prior and present condition. For each planning alternative, the interdisciplinary team shall consider how diversity will be affected by various mixes of resource outputs and uses, including proposed management practices. (Refer to § 219.27(g).)

§ 219.27 Management requirements.

The minimum specific management requirements to be met in accomplishing goals and objectives for the National Forest System are set forth in this section. These requirements guide the development, analysis, approval, implementation, monitoring and evaluation of forest plans.

(a) *Resource protection.* All management prescriptions shall—

(1) Conserve soil and water resources and not allow significant or permanent impairment of the productivity of the land;

(2) Consistent with the relative resource values involved, minimize serious or long-lasting hazards from flood, wind, wildfire, erosion, or other natural physical forces unless these are specifically excepted, as in wilderness;

(3) Consistent with the relative resource values involved, prevent or reduce serious, long lasting hazards and damage from pest organisms, utilizing principles of integrated pest management. Under this approach all aspects of a pest-host system should be weighed to determine situation-specific prescriptions which may utilize a combination of techniques including, as appropriate, natural controls, harvesting, use of resistant species, maintenance of diversity, removal of damaged trees, and judicious use of pesticides. The basic principle in the choice of strategy is that, in the long term, it be ecologically acceptable and compatible with the forest ecosystem and the multiple use objectives of the plan;

(4) Protect streams, streambanks, shorelines, lakes, wetlands, and other bodies of water as provided under paragraphs (d) and (e) of this section;

(5) Provide for and maintain diversity of plant and animal communities to meet overall multiple-use objectives, as provided in paragraph (g) of this section;

(6) Provide for adequate fish and wildlife habitat to maintain viable populations of existing native vertebrate species and provide that habitat for species chosen under § 219.19 is maintained and improved to the degree consistent with multiple-use objectives established in the plan;

(7) Be assessed prior to project implementation for potential physical, biological, aesthetic, cultural, engineering, and economic impacts and for consistency with multiple uses planned for the general area;

(8) Include measures for preventing the destruction or adverse modification of critical habitat for threatened and endangered species;

(9) Provide that existing significant transportation and utility corridors and other significant right-of-ways that are capable and likely to be needed to accommodate the facility or use from an additional compatible right-of-way be designated as a right-of-way corridor. Subsequent right-of-way grants will, to the extent practicable, and as determined by the responsible line officer, use designated corridors;

(10) Ensure that any roads constructed through contracts, permits, or leases are designed according to standards appropriate to the planned uses, considering safety, cost of transportation, and effects upon lands and resources;

(11) Provide that all roads are planned and designed to re-establish vegetative cover on the disturbed area within a reasonable period of time, not to exceed 10 years after the termination of a contract, lease or permit, unless the road is determined necessary as a permanent addition to the National Forest Transportation System; and

(12) Be consistent with maintaining air quality at a level that is adequate for the protection and use of National Forest System resources and that meets or exceeds applicable Federal, State and/or local standards or regulations.

(b) *Vegetative manipulation.* Management prescriptions that involve vegetative manipulation of tree cover for any purpose shall—

(1) Be best suited to the multiple-use goals established for the area with potential environmental, biological, cultural resource, aesthetic, engineering, and economic impacts, as stated in the regional guides and forest plans, being considered in this determination;

(2) Assure that lands can be adequately restocked as provided in paragraph (c)(3) of this section, except where pernament openings are created for wildlife habitat improvement, vistas, recreation uses and similar practices;

(3) Not be chosen primarily because they will give the greatest dollar return or the greatest output of timber, although these factors shall be considered;

(4) Be chosen after considering potential effects on residual trees and adjacent stands;

(5) Avoid permanent impairment of site productivity and ensure conservation of soil and water resources;

(6) Provide the desired effects on water quantity and quality, wildlife and fish habitat, regeneration of desired tree species, forage production, recreation uses, aesthetic values, and other resource yields; and

(7) Be practical in terms of transportation and harvesting requirements, and total costs of preparation, logging, and administration.

(c) *Silvicultural practices.* The following management requirements apply to timber harvest and cultural treatments:

(1) No timber harvesting shall occur on lands classified as not suited for timber production pursuant to § 219.14 except for salvage sales, sales necessary to protect other multiple-use values or activities that meet other objectives on such lands if the forest plan establishes that such actions are appropriate. These lands shall continue to be treated for reforestation purposes if necessary to achieve the multiple-use objectives of the plan.

(2) The selected sale schedule provides the allowable sale quantity for the first planning period. Within the planning period, the volume of timber to be sold in any one year may exceed the average annual allowable sale quantity so long as the total amount sold for the planning period does not exceed the allowable sale quantity. Nothing in this paragraph prohibits salvage or sanitation harvesting of timber stands which are substantially damaged by fire, windthrow, or other catastrophe, or which are in imminent danger of insect or disease attack and where such harvests are consistent with silvicultural and environmental standards. Such timber may either substitute for timber that would otherwise be sold under the plan or, if not feasible, be sold over and above the planned volume.

(3) When trees are cut to achieve timber production objectives, the cuttings shall be made in such a way as to assure that the technology and knowledge exists to adequately restock the lands within 5 years after final harvest. Research and experience shall be the basis for determining whether the harvest and regeneration practices planned can be expected to result in adequate restocking. Adequate restocking means that the cut area will contain the minimum number, size, distribution, and species composition of regeneration as specified in regional silvicultural guides for each forest type. Five years after final harvest means 5 years after clearcutting, 5 years after final overstory removal in shelterwood cutting, 5 years after the seed tree removal cut in seed tree cutting, or 5 years after selection cutting.

(4) Cultural treatments such as thinning, weeding, and other partial cutting may be included in the forest plan where they are intended to increase the rate of growth of remaining trees, favor commercially valuable tree species, favor species or age classes which are most valuable for wildlife, or achieve other multiple-use objectives.

(5) Harvest levels based on intensified management practices shall be decreased no later than the end of each planning period if such practices cannot be completed substantially as planned.

(6) Timber harvest cuts designed to regenerate an even-aged stand of timber shall be carried out in a manner consistent with the protection of soil, watershed, fish and wildlife, recreation, and aesthetic resources, and the regeneration of the timber resource.

(7) Timber harvest and other silvicultural treatments shall be used to prevent potentially damaging population increases of forest pest organisms. Silvicultural treatments shall not be applied where such treatments would make stands susceptible to pest-caused damage levels inconsistent with management objectives.

(d) *Even-aged management.* When openings are created in the forest by the application of even-aged silviculture, the following management requirements apply:

(1) Openings shall be located to achieve the desired combination of multiple-use objectives. The blocks or strips cut shall be shaped and blended with the natural terrain, to the extent practicable, to achieve aesthetic, wildlife habitat, or other objectives established in the plan. Regional guides shall provide guidance on dispersion of openings in relation to topography, climate, geography, local land use patterns, forest types or other factors. As a minimum, openings in forest stands are no longer considered openings once a new forest is established. Forest plans may set forth variations to this minimum based on site-specific requirements for achieving multiple-use objectives. Regional guides shall provide guidance for determining variations to this minimum in the forest plan, based on requirements for watershed, wildlife habitat; scenery or other resource protection needs, or other factors.

(2) Individual cut blocks, patches, or strips shall conform to the maximum size limits for areas to be cut in one harvest operation established by the regional guide according to geographic areas and forest types. This limit may be less than, but will not exceed, 60 acres for the Douglas-fir forest type of California, Oregon, and Washington; 80 acres for the southern yellow pine types of Alabama, Arkansas, Georgia, Florida, Louisiana, Mississippi, North Carolina, South Carolina, Oklahoma, and Texas; 100 acres for the hemlock-sitka spruce forest type of coastal Alaska; and 40 acres for all other forest types except as provided in paragraphs (d)(2) (i) through (iii) of this section:

(i) Cut openings larger than those specified may be permitted where larger units will produce a more desirable combination of net public benefits. Such exceptions shall be provided for in regional guides. The following factors shall be considered in evaluating harvest cuts of various sizes and shapes to determine size limits by geographic areas and forest types: Topography; relationship of units to other natural or artificial openings and proximity of units; coordination and consistency with adjacent forests and regions; effect on water quality and quantity; visual absorption capability; effect on wildlife and fish habitat; regeneration requirements for desirable tree species based upon the latest research findings; transportation and harvesting system requirements; environmental and forest pest hazards to regeneration, residual trees, and surrounding stands; and the relative total costs of preparation and administration, transportation requirements, harvesting, site preparation, planting, stocking control, and future stand tending of harvest cuts of various sizes and shapes. Specification for exceptions shall include the particular conditions under which the larger size is permitted and shall set a new maximum size permitted under those conditions.

(ii) Size limits exceeding those established in paragraphs (d)(2) and (d)(2)(i) of this section are permitted on an individual timber sale basis after 60 days' public notice and review by the Regional Forester.

(iii) The established limit shall not apply to the size of areas harvested as a result of natural catastrophic condition such as fire, insect and disease attack, or windstorm.

(e) *Riparian areas.* Special attention shall be given to land and vegetation for approximately 100 feet from the edges of all perennial streams, lakes, and other bodies of water. This area shall correspond to at least the recognizable area dominated by the riparian vegetation. No management practices causing detrimental changes in water temperature or chemical composition, blockages of water courses, or deposits of sediment shall be permitted within these areas which seriously and adversely affect water conditions or fish habitat. Topography, vegetation type, soil, climatic conditions, management objectives, and other factors shall be considered in determining what mangement practices may be performed within these areas or the constraints to be placed upon their performance.

(f) *Soil and water.* Conservation of soil and water resources involves the analysis, protection, enhancement, treatment, and evaluation of soil and water resources and their responses under management and shall be guided by instructions in official technical handbooks. These handbooks must show specific ways to avoid or mitigate damage, and maintain or enhance productivity on specific sites. These handbooks may be regional in scope or, where feasible, specific to physiographic or climatic provinces.

(g) *Diversity.* Management prescriptions, where appropriate and to the extent practicable, shall preserve and enhance the diversity of plant and animal communities, including endemic and desirable naturalized plant and

animal species, so that it is at least as great as that which would be expected in a natural forest and the diversity of tree species similar to that existing in the planning area. Reductions in diversity of plant and animal communities and tree species from that which would be expected in a natural forest, or from that similar to the existing diversity in the planning area, may be prescribed only where needed to meet overall multiple-use objectives. Planned type conversion shall be justified by an analysis showing biological, economic, social, and environmental design consequences, and the relation of such conversions to the process of natural change.

§ 219.28 Research.

(a) Research needs for management of the National Forest System shall be identified during planning and periodically reviewed during evaluation of implemented plans. Particular attention should be given to research needs identified during the monitoring and evaluation described in § 219.12(k). These identified needs shall be included in formulating overall research programs and plans which involve private as well as public forest and rangelands.

(b) Research needed to support or improve management of the National Forest System shall be established and budgeted at the research station and national levels. Priorities for this portion of the Forest Service Research Program shall be based upon the information gathered at all planning levels of the National Forest System.

(c) An annual report shall be prepared at the national level with assistance from Regions and Stations which shall include, but not be limited to, a description of the status of major research programs which address National Forest System needs for Research, significant findings, and how this information is to be or has recently been applied.

§ 219.29 Transition period.

(a) Until a forest planning area of the National Forest System is managed under a forest plan developed pursuant to this subpart and approved by the Regional Forester, the land may continue to be managed under existing land use and resource plans. As soon as practicable, existing plans shall be amended or revised to incorporate standards and guidelines in this subpart. Pending approval of a forest plan, existing plans may be amended or revised to include management requirements not inconsistent with the provisions of the RPA and these regulations.

(b) Requirements of amendments to this subpart shall be incorporated in forest plans and regional guides through the ongoing planning process. Planning process steps already completed need not be repeated.

(1) If, prior to the effective date of an amendment to this subpart, a forest plan either has been approved in final form or released in draft form for public review, the plan need not be modified to incorporate requirements of such amendment, until the next scheduled revision of the forest plan;

(2) If, prior to the effective date of an amendment to this subpart, a regional guide either has been approved in final form or released in draft form for public review, the guide need not be modified to incorporate the requirements of such amendment, until a significant amendment to the guide is made for reasons other than incorporating requirements of amendments to this subpart.

(c) A forest plan may become effective prior to the development and approval of its related regional guide, provided that the forest plan is reviewed upon regional guide approval, and if necessary, amended to comply with regional management direction. If such an amendment is significant, it shall be accomplished pursuant to the requirements for the development of a forest plan as set forth in this subpart.

(d) As a result of the eruption of Mount St. Helens, a land management plan for the Mount St. Helens area shall be prepared substantially in accordance with the following procedures:

(1) Notwithstanding any other provisions in this subpart, the area included in the Mount St. Helens land management plan will not be subject to planning activities for the first generation Gifford Pinchot National Forest Plan unless the Regional Forester for the Pacific Northwest Region determines that additional planning activities are desirable.

(2) Lands which were inventoried as roadless and designated for nonwilderness uses in the Roadless Area Review and Evaluation (RARE II) shall be managed for uses other than wilderness. Except for a small part of the Mount Margaret roadless area (B 6071), the Mount St. Helens land management plan shall not consider wilderness designation for these lands.

(3) Lands which were inventoried as roadless and designated as further planning in the Roadless Area Review and Evaluation (RARE II) shall be evaluated in the Mount St. Helens land management plan and shall be managed in accordance with that plan.

Dated: September 27, 1982.

Douglas W. MacCleery,

Deputy Assistant Secretary For Natural Resources and Environment.

[FR Doc. 82-26698 Filed 9-29-82; 8:45 am]

BILLING CODE 3410-11-M

VETERANS ADMINISTRATION

38 CFR Part 36

Decrease in Maximum Permissible Interest Rates on Guaranteed Mobile Home Loans, and Home and Condominium Loans

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The VA (Veterans Administration) is decreasing the maximum interest rates on guaranteed mobile home unit loans, lot loans, and combination mobile home unit and lot loans. In addition, the maximum interest rate applicable to home and condominium loans is also decreased. These decreases in interest rates are possible because of recent improvements in the availability of funds in various credit markets. The decrease in the interest rates will allow eligible veterans to obtain loans at a lower monthly cost.

EFFECTIVE DATE: September 24, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. George D. Moerman, Loan Guaranty Service (264), Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420 (202-389-3042).

SUPPLEMENTARY INFORMATION: The Administrator is required by section 1819(f), title 38, United States Code, to establish maximum interest rates for mobile home loans guaranteed by the VA as he finds the mobile home loan capital markets demand. Recent market indicators—including the prime rate, the general decrease in interest rates charged on conventional mobile home loans, and the decrease of other short-term and long-term interest rates—have shown that the mobile home capital markets have improved. It is now possible to decrease the interest rates on mobile home unit loans, lot loans, and combination mobile home unit and lot loans while still assuring an adequate supply of funds from lenders and investors to make these types of VA loans.

The Administrator is also required by section 1803(c), title 38, United States Code, to establish maximum interest rates for home and condominium loans. Market indicators similarly favor a

reduction in the maximum interest rate for this type of loan. The lower interest rate should assist more veterans in the purchase of homes and condominiums because of the decrease in the monthly loan payments for principal and interest.

The Administrator's statutory authority to establish interest rates has been delegated by 38 CFR 2.6(b)(3) to the Chief Benefits Director, Deputy Chief Benefits Director, or person authorized to act for them.

Regulatory Flexibility Act/Executive Order 12291

For the reasons discussed in the May 7, 1981 **Federal Register** (46 FR 25443), it has previously been determined that final regulations of this type which change the maximum interest rates for loans guaranteed, insured, or made pursuant to chapter 37 of title 38, United States Code, are not subject to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601–612.

These regulatory amendments have also been reviewed under the provisions of Executive Order 12291. The VA finds that they are not "major rules" as defined in that Order. The existing process of informal consultation among representatives within the Executive Office of the President, OMB, the VA and the Department of Housing and Urban Development has been determined to be adequate to satisfy the intent of this Executive Order for this category of regulations. This alternative consultation process permits timely rate adjustments with minimal risk of premature disclosure. In summary, this consultation process will fulfill the intent of the Executive Order while still permitting compliance with statutory responsibilities for timely rate adjustments and a stable flow of mortgage credit at rates consistent with the market.

These final regulations come within exceptions to the general VA policy of prior publication of proposed rules as contained in 38 CFR 1.12. The publication of notice of a regulatory change in the VA maximum interest rates for VA guaranteed, insured or direct loans would deny veterans the benefit of lower interest rates pending the final rule publication date which would necessarily be more than 30 days after publication in proposed form. Accordingly, it has been determined that publication of proposed regulations prior to publication of final regulations is impracticable, unnecessary, and contrary to the public interest.

(Catalog of Federal Domestic Assistance Program numbers 64.113, 64.114, and 64.119)

These regulations are adopted under authority granted to the Administrator by sections 210(c), 1803(c)(1), 1811(d)(1) and 1819 (f) and (g) of title 38, United States Code and delegated to the undersigned by 38 CFR 2.6(b)(3). The regulations are clearly within that statutory authority and are consistent with Congressional intent.

These decreases are accomplished by amending §§ 36.4212a (1), (2), and (3), and 36.4311(a), and 36.4503(a), title 38, Code of Federal Regulations.

List of Subjects in 38 CFR Part 36

Condominiums, Handicapped, Housing, Loan programs—housing and community development, Mobile homes, Veterans.

Approved: September 23, 1982.

By direction of the Administrator.

John W. Hagan, Jr.,

Deputy Chief Benefits Director.

PART 36—LOAN GUARANTY

The Veterans Administration is amending 38 CFR Part 36 as follows:

1. In § 36.4212, paragraph (a) is revised as follows:

§ 36.4212 Interest rates and late charges.

(a) The interest rate charged the borrower on a loan guaranteed or insured pursuant to 38 U.S.C. 1819 may not exceed the following maxima except on loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration prior to the respective effective date: (38 U.S.C. 1819(f))

(1) Effective September 24, 1982, 15½ percent simple interest per annum for a loan which finances the purchase of a mobile home unit only.

(2) Effective September 24, 1982, 15 percent simple interest per annum for a loan which finances the purchase of a lot only and the cost of necessary site preparation, if any.

(3) Effective September 24, 1982, 15 percent simple interest per annum for a loan which will finance the simultaneous acquisition of a mobile home and a lot and/or the site preparation necessary to make a lot acceptable as the site for the mobile home.

* * * * *

2. In § 36.4311, paragraph (a) is revised as follows:

§ 36.4311 Interest rates.

(a) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration which specify an interest rate in excess of 13½ per centum per annum, effective September 24, 1982, the interest rate on any home or condominium loan guaranteed or insured wholly or in part on or after such date may not exceed 13½ per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

* * * * *

3. In § 36.4503, paragraph (a) is revised as follows:

§ 36.4503 Amount and amortization.

(a) The original principal amount of any loan made on or after October 1, 1980, shall not exceed an amount which bears the same ratio to $33,000 as the amount of the guaranty to which the veteran is entitled under 38 U.S.C. 1810 at the time the loan is made bears to $27,500. This limitation shall not preclude the making of advances, otherwise proper, subsequent to the making of the loan pursuant to the provisions of § 36.4511. Except as to home improvement loans, loans made by the Veterans Administration shall bear interest at the rate of 13½ percent per annum. Loans solely for the purpose of energy conservation improvements or other alterations, improvements or repairs shall bear interest at the rate of 14½ percent per annum. (38 U.S.C. 1811(d) (1) and (2)(A))

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-9-FRL-2212-1]

Guam and Hawaii State Implementation Plan Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: This notice announces EPA's approval, under Section 110 of the Clean Air Act, of a variance granted by the State of Hawaii regarding opacity requirements. In addition, this notice incorporates into the Guam State Implementation Plan (SIP) minor changes to the effective date of certain regulations.

EFFECTIVE DATE: November 29, 1982.

ADDRESSES: Copies of these revisions are available for public inspection during normal business hours at the EPA Region 9 Office and the following locations:

State of Hawaii, Department of Health, P.O. Box 3378, Honolulu, HI 96801

Guam Environmental Protection Agency, P.O. Box 2999, Agana, Guam 96910
Public Information Reference Unit, Room 2404, EPA Library (PM–213), 401 M Street, SW., Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT: Douglas Grano, Chief, State Implementation Plan Section, Air Management Division, Environmental Protection Agency, Region 9, 215 Fremont Street, San Francisco, CA 94105, Telephone: (45) 974–7641

SUPPLEMENTARY INFORMATION: On April 6, 1982, the Governor of Hawaii submitted, as an SIP revision, a variance from Hawaii Public Health Regulations Chapter 43, Air Pollution Control. Specifically, the variance issued by the Hawaii Department of Health (HDOH) approves a request by the McBryde Sugar Company for exemption of its processing mill at Eleele, Kauai, Hawaii from the 40% opacity requirement of Section 8(a)(1) of Chapter 43. The variance covers the period of installation, testing and modification of a wet scrubber, and expires on May 31, 1983. The variance allows up to 60% opacity from existing boilers. EPA has evaluated the HDOH's SIP revision and has determined that the variance will not endanger public health as the net emissions impact is negligible. EPA therefore, approves the HDOH's opacity variance as part of the Hawaii SIP.

On January 6, 1982, the Guam Environmental Protection Agency submitted as a SIP revision amendments to Chapter 18 of its Standards and Regulations. Chapter 18, *Appeals Procedures, Circumvention, Severability, and Effective Date,* was renumbered and is now Chapter 17. In addition, the effective dates of certain regulations were extended to December 1981. These revisions are approved in today's notice.

It is the purpose of this notice to approve all the rule revisions listed above and to incorporate them into the Guam and Hawaii SIPs. EPA's approval of the above revisions to the Guam and Hawaii SIPs is being done without prior proposal because the revisions are not controversial. The public should be advised that this approval action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received by EPA within 30 days that someone wishes to submit adverse or critical comments, the approval action will be withdrawn and a subsequent notice will be published before the effective date. The subsequent notice will indefinitely postpone the effective date, modify the final action to a proposed action, and establish a comment period.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities (see 46 FR 8709). The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under the Clean Air Act, any petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 29, 1982. This action may not be challenged later in proceedings to enforce its requirements.

Note.—Incorporation by reference of the State Implementation plans for Guam and Hawaii was approved by the Director of the Federal Register on July 1, 1982.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental Relations.

(Secs. 110 and 310(a), Clean Air Act, as amended (42 U.S.C. 7410 and 7601(a))

Dated: September 21, 1982.

Anne M. Gorsuch,
Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Subparts M and AAA of Part 52 of Chapter I, Title 40 of the Code of Federal Regulations are amended as follows:

Subpart M—Hawaii

1. Section 52.620 is amended by adding paragraph (c)(14) as follows:

§ 52.620 Identification of plan.

* * * * *

(c) * * *

(14) A variance of the Hawaii Public Health Regulations, Chapter 43, Section 8(b)(1) submitted on April 6, 1982, by the Governor.

* * * * *

Subpart AAA—Guam

2. Section 52.2670 is amended by adding paragraph (c)(4) as follows:

§ 52.2670 Identification of plan.

* * * * *

(c) * * *

(4) Amendments to the Guam Air Pollution Control Standards and Regulations submitted on January 6, 1982 by the Governor's designee.

(i) Chapter 17—Appeals Procedures, Circumvention, Severability, and Effective Date.

BILLING CODE 6560–50–M

---

40 CFR Part 52

[A–5–FRL–2217–8]

Approval and Promulgation of Implementation Plans; Illinois; Correction

AGENCY: Environmental Protection Agency.

ACTION: Final rule; correction.

SUMMARY: This notice corrects a citation appearing in the final rulemaking approving the satisfaction of approval conditions for the Illinois Particulate and Ozone Control Strategies. This final rulemaking was published in the June 21, 1982 **Federal Register** (47 FR 26619).

FOR FURTHER INFORMATION CONTACT: Randolph O. Cano, Regulatory Analysis Section, Air Programs Branch, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6035.

SUPPLEMENTARY INFORMATION: On page 26620 of the June 21, 1982 **Federal Register** in the second column in the codification under the heading: Subpart O Illinois the paragraphs cited for addition into § 52.720(c) were incorrectly numbered.

In particular it was published in the codification that: "Section 52.720(c) is amended by adding paragraphs (33) and (34) to read as follows:." The correct numbers of the paragraphs to be added are (39) and (40) and these additions to § 52.720(c) should read as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(39) On October 1, 1981, the State submitted a report in satisfaction of the Total Suspended Particulate Control Strategy approval condition in which the State agreed to conduct an analysis of the potential air quality impact from storage piles with uncontrolled emissions of less than 50 tons per year, to submit the results of any analysis to EPA, to submit any necessary regulations to the Illinois Pollution Control Board, and promulgate and submit any necessary regulations to EPA. This report concluded that no further regulations were needed.

(40) EPA Study Volatile Organic Compound Emissions from Solvent Cleaning Operations in the State of

Illinois (EPA 905/4–80–008) was prepared to satisfy the Ozone Control Strategy approval condition in which the State agreed to conduct a study to demonstrate that the three pound per hour, 15 pound per day exemption for solvent metal cleaners contained in Rule 205(k) represents RACT, to submit the results of the study to EPA, to submit the necessary regulations to the Illinois Pollution Control Board and promulgate and submit any necessary regulations to EPA. The State reviewed this report and in a February 11, 1981, letter to EPA noted their agreement with the findings of the report and indicated that because there was no need for further regulations, this condition is satisfied.

40 CFR Parts 60 and 61

[A–9–FRL 2217–2]

Delegation of New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS); States of Arizona, California, and Nevada and Territory of Guam

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; notice of delegation.

SUMMARY: The EPA hereby places the public on notice of its delegation of New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS) to various State and local air pollution control agencies in Region 9. This action is necessary to bring the NSPS and NESHAPS program delegations up to date with recent EPA promulgations and amendments of NSPS and NESHAPS categories. This action does not create any new regulatory requirements affecting the public. The effect of the delegation is to shift primary program responsibility for the affected NSPS and NESHAPS source categories from EPA to State and local governments.

DATES: The regulations are amended to reflect these delegations effective September 27, 1982.

The delegations are effective on the dates listed in the Supplementary Information.

FOR FURTHER INFORMATION CONTACT: Julie A. Rose, New Source Section (A–3–1), Air Operations Branch, Air Management Division, EPA, Region 9, 215 Fremont Street, San Francisco, CA 94105, Tel: (415) 974–8236, FTS 454–8236.

SUPPLEMENTARY INFORMATION: The following state and local air pollution control agencies have requested authority for delegation or redelegation of certain NSPS and NESHAPS source categories. Delegation or redelegations of authority were granted to the following agencies and are effective as listed below:

Bay Area Air Quality Management District

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

PART 61—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Subparts A of Parts 60 and 61 of Chapter I, Title 40 of the Code of Federal Regulations are amended as follows:

Subpart A—General Provisions

1. Sections 60.4(b)(D) and 61.04(b)(D) are each amended by adding the address of the State of Arizona to read as follows:

§§ 60.4 Address and 61.04 Address.

* * * * *

(b) * * *

(D) Arizona: Arizona Department of Health Services, 1740 West Adams Street, Phoenix, Arizona 85007.

* * * * *

2. Sections 60.4(b)(F) and 61.04(b)(F) are each amended by revising the addresses of the following Air Pollution Control Districts to read as follows:

§§ 60.4 Address and 61.04 Address.

* * * * *

(b) * * *

(F) * * *

Fresno County Air Pollution Control District, 1221 Fulton Mall, Fresno, CA 93721.

Great Basin Unified Air Pollution Control District, 157 Short Street, Suite 6, Bishop, CA 93514.

Kern County Air Pollution Control District, 1601 H Street, Suite 250, Bakersfield, CA 93301.

Monterey Bay Unified Air Pollution Control, 1164 Monroe Street, Suite 10, Salinas, CA 93906.

Santa Barbara County Air Pollution Control District, 315 Camino del Rimedio, Santa Barbara, CA 93110.

* * * * * *

3. Section 60.4(b) is amended by adding subparagraph (AAA) to read as follows:

§ 60.4 Address.

* * * * *

(b) * * *

(AAA) Territory of Guam: Guam Environmental Protection Agency, Post Office Box 2999, Agana, Guam 96910.

* * * * *

BILLING CODE 6560-50-M

---

40 CFR Part 81

[A-7-FRL-2209-7]

Designation of Areas for Air Quality; Planning Purposes; Iowa

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: EPA today takes final action to redesignate the City of Dubuque, Iowa, from nonattainment to attainment with respect to the National Ambient Air Quality Standards (NAAQS) for sulfur dioxide (SO_2). A nonattainment designation means that air pollution levels are too high and an air pollution control plan must be developed. This redesignation means that air quality in Dubuque has improved so that further SO_2 control measures need not be required.

EFFECTIVE DATE: November 1, 1982.

ADDRESSES: Copies of the redesignation requests and supporting materials are available at the following addresses:

Environmental Protection Agency, Region VII, Air Programs Branch, 324 East 11th Street, Kansas City, Missouri 64106

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT: Daniel J. Wheeler, Environmental Protection Agency, 324 East 11th Street, Kansas City, Missouri 64106, at 816-374-3791.

SUPPLEMENTARY INFORMATION: On December 22, 1980, the Iowa Department of Environmental Quality (IDEQ) submitted a request to redesignate the attainment status of two areas in Iowa. The state had determined that Dubuque exceeded the NAAQS for carbon monoxide (CO) and should be redesignated from attainment to nonattainment for CO, that Dubuque no longer exceeded the NAAQS for SO_2 and should be redesignated from nonattainment to attainment for SO_2, and that particulate monitoring data in Keokuk no longer supported the secondary nonattainment designation and it should be changed to unclassifiable for total suspended particulate (TSP).

EPA proposed to approve these requests on April 3, 1981 (46 FR 20235), and received no public comments on the proposal. On October 5, 1981 (46 FR 48929), EPA redesignated Dubuque for CO and Keokuk for TSP but deferred action on Dubuque for SO_2.

EPA designation criteria require 24 months of valid SO_2 monitoring without a violation for an area to be designated as attainment for SO_2. The Dubuque area has not had a violation of the SO_2 standard for over 4 years but final action was deferred because of the air quality simulation modeling study the state then had underway. The purpose of the delay was to see if the results of the modeling study would indicate areas of violation at points other than monitoring sites.

The modeling study was intended as support for new statewide SO_2 limits. The state proposed to adopt new limits, based on the modeling, earlier this year but the rulemaking has been terminated without final action. Because a new rulemaking will require reproposal and new public hearings, it will be a substantial period of time before the new rules and modeling study are submitted. Therefore, EPA finds it is unreasonable to wait any longer for the modeling results and that further delay in redesignating Dubuque should not be allowed. When the modeling study is submitted, EPA will evaluate the results and determine if any new actions are appropriate.

In summary, air quality monitoring data shows that the sulfur dioxide standards have not been exceeded in Dubuque in more than 2 years, therefore the area meets the criteria to be reclassified from nonattainment to attainment. Therefore, the City of Dubuque is redesignated to attainment with respect to SO_2.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 81

Air pollution control, National parks, and Wilderness areas.

(Secs. 107 and 301 of the Clean Air Act (42 U.S.C. 7407 and 7601))

Dated: September 21, 1982.

Anne M. Gorsuch,

Administrator.

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

Part 81 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart C—Section 107 Attainment Status Designations

§ 81.316 [Amended]

In § 81.316, the table "Iowa-SO_2" is amended by removing the line beginning "Julien Township," by removing the line beginning "Remainder of Dubuque County," by revising "Remainder of State" to read "Entire State" and by removing the footnote.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

41 CFR Part 14H-1

Procurement Responsibility and Authority

July 30, 1982.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Revocation.

SUMMARY: Interior Procurement Regulation System § 14-1.404 and Interior Procurement Memorandum (IPM82-5) of January 29, 1982 were issued to implement the Contracting Officers' Warrant System for the selection, designation, and termination of designation of Contracting Officers. Therefore §§ 14H-1.451, 14H-1.451-2, and 14H-1.451-6 of Part 14H-1, Title 41 of the Code of Federal Regulations, are no longer necessary and are hereby revoked.

EFFECTIVE DATE: September 30, 1982.

FOR FURTHER INFORMATION CONTACT: Dr. Peter A. Campanelli, Department of the Interior, Bureau of Indian Affairs, Washington, D.C 20245, telephone number (202) 343-5125.

SUPPLEMENTARY INFORMATION: This document is issued in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8. The primary author of this document is Dr. Peter A. Campanelli, Department of the Interior, Bureau of Indian Affairs, Washington, D.C. 20245, telephone number (202) 343-5125.

The Department of the Interior has determined that this document is not a major rule and does not require a regulatory analysis under Executive Order 12291 and does not have a significant economic effect on a substantial number of small entities under the criteria established by the Regulatory Flexibility Act.

Lists of Subjects in 41 CFR Part 14H-1

Government procurements.

PART 14H-1—GENERAL

§§ 14H-1.451, 14H-1.451-2 and 14H-1.451-6 [Revoked and Reserved]

Under the authority of the Secretary of the Interior contained in 41 CFR 1-1.4, §§ 14H-1.451, 14H-1.451-2, and 14H-1.451-6 of Part 14H-1, Title 41 of the Code of Federal Regulations are hereby revoked and reserved.

Kenneth Smith,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Parts 2, 56, 59, 61, 62, and 65

Technical Corrections

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This document corrects errors in regulations of FEMA appearing in Title 44. This document corrects errors, changes addresses and makes technical corrections which have no substantive effect in the FEMA regulations.

DATE: Rule is effective September 30, 1982.

FOR FURTHER INFORMATION CONTACT: William L. Harding, Office of General Counsel, 287-0377.

SUPPLEMENTARY INFORMATION: Accordingly, Chapter 1 of Title 44 is amended as follows:

PART 2—ORGANIZATION, FUNCTIONS AND DELEGATIONS OF AUTHORITY

1. Section 2.61(j) (1) and (2) and revised to read:

§ 2.61 Associate Director, State and Local Programs and Support (SLPS).

* * * * *

(j) * * *

(1) Authority under subsections 201 (a) and (b) of the Act except that the authority to delegate civil defense responsibilities to the departments and agencies is reserved;

(2) Those under subsections 201 (c) and (d);

* * * * *

PART 56—STANDARD REINSURANCE CONTRACT

§ 56.40 [Amended]

2. Section 56.40 is amended by removing "1725 I Street, NW" and "20472".

PART 59—GENERAL PROVISIONS

§ 59.1 [Amended]

3. Section 59.1, term "Agency" is amended by removing "1725 I Street, N.W., Washington, D.C. 20472".

PART 61—INSURANCE COVERAGE AND RATES

§ 61.12 [Amended]

4. Section 61.12(c) is amended by removing "1725 I Street, N.W." and "20472".

§ 61.15 [Amended]

5. Section 61.15 is amended by removing "1725 I Street, N.W." and "20472".

PART 62—SALE OF INSURANCE AND ADJUSTMENT OF CLAIMS

§ 62.22 [Amended]

6. Section 62.22(o) is amended by changing "42 U.S.C. 4053" to "42 U.S.C. 4072".

PART 65—IDENTIFICATION AND MAPPING OF SPECIAL HAZARD AREAS

7. Section 65.5(b) is revised to read as follows:

§ 65.5 Requirement to submit new technical data.

* * * * *

(b) The technical and scientific information indicating changes in base flood elevations shall be submitted to Engineering Branch, Natural Hazards Division, Office of Natural and Technological Hazards, Federal Emergency Management Agency, Washington, D.C.

Dated: September 22, 1982.

George Jett,

General Counsel.

[FR Doc. 82-26967 Filed 9-29-82; 8:45 am]

BILLING CODE 6718-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Parts 16, 74, and 96

Block Grant Programs; Correction

AGENCY: Health and Human Services Department (HHS).

ACTION: Final rules, correction.

SUMMARY: On July 6, 1982 the Department published in the Federal Register final rules implementing the seven of the block grant programs established by the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35). 47 FR 29472. This document contains technical corrections that address inadvertent deletions and errors in wording, spelling and punctuation found in those rules.

DATE: The rules were effective July 6, 1982.

FOR FURTHER INFORMATION CONTACT: Robert Raymond, Director for Intergovernmental Policy, Office of Planning and Evaluation, Room 443–D, Hubert Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201, (202) 245–7316.

SUPPLEMENTARY INFORMATION:

Accordingly, the Department of Health and Human Services is correcting FR Doc. 82–18247 appearing on pages 29472–29493 in the issue of July 6, 1982 as follows:

PART 96—BLOCK GRANTS

1. On page 29487, column 1, § 96.3, in line 6 "Pub. L. 96511" is corrected to read "Pub. L. 96–511".

2. On page 29487, column 2, § 96.11, in the last line "fund." is corrected to read "funds.".

3. On page 29487, column 3, § 96.14(a), the heading *"Obligations."* is corrected to read *"Obligation."*.

4. On page 29487, column 3, § 96.15, in line 9, "director" is corrected to read "Director".

5. On page 29488, column 3, § 96.43(b), in line 10, "[insert date 45 days after publication]" is corrected to read "August 20, 1982".

6. On page 29489, column 3, § 96.50(b), lines 11–13, "human Development Services. Complaints with respect to the low-income energy program" is corrected to read "Human Development Services. Complaints with respect to the low-income home energy assistance program".

7. On page 29490, column 1, § 96.50(b), in the last sentence "if" is corrected to read "it".

8. On page 29490, column 1, § 96.50(e), line 9, "stautory" is corrected to read "statutory".

9. On page 29491, column 3, § 96.71, lines 1–2, "Section 2005 (42 U.S.C. 1397d(a)(2) and (a)(5))(a)(2) and (a)(5)" is corrected to read "Section 2005(a)(2) and (a)(5) (42 U.S.C. 1397d(a)(2) and (a)(5))"; and on line 21 the semicolon is changed to a comma.

10. On page 29492, column 1, § 96.82, line 3, the comma is removed after the word "Act" and a comma is added after the parenthentical citation.

11. On page 29492, column 2, § 96.101, line 2, "the" is added after "of"; on line 17 "is due whether the center meets the requirements for receiving" is added after "response".

Dated: September 23, 1982.

Robert F. Sermier,

Deputy Assistant Secretary for Management Analysis and Systems.

[FR Doc. 82–26966 Filed 9–29–82; 8:45 am]

BILLING CODE 4150–04–M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 107, 171, 172, 173, 174, 175, 177, 178 and 179

[Docket No. HM–56; Amdt. Nos. 107–10, 171–66, 172–74, 173–158, 174–41, 175–23, 177–55, 178–72, 179–31]

Hazardous Materials Regulations; Miscellaneous Amendments

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: The purpose of these amendments to the Hazardous Materials Regulations is to change or delete certain incorrect references, to correct certain editorial errors, and to make minor regulatory changes which will not impose any restrictions on persons affected by these regulations.

EFFECTIVE DATE: September 30, 1982.

FOR FURTHER INFORMATION CONTACT: Thomas G. Allan, Office of Hazardous Materials Regulation, Materials Transportation Bureau, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590, (202) 426–2075.

SUPPLEMENTARY INFORMATION: With consolidation of the Hazardous Materials Regulations (HMR) into Title 49 of the Code of Federal Regulations and subsequent amendments thereto, numerous discrepancies have surfaced in the printing of Title 49. These discrepancies include incorrect references, inadvertent omissions of phrases within sections, and punctuation errors. In addition, functional responsibilities relating to certain approvals have been transferred from the Materials Transportation Bureau's (MTB) Office of Operations and Enforcement (OOE) to its Office of Hazardous Materials Regulation (OHMR) and the affected sections are amended to note this. Finally, in response to inquiries which MTB has received concerning the clarity of particular requirements specified in the HMR, changes are made which should reduce uncertainties as to their meaning.

Since these amendments do not impose additional requirements, public notice has not been provided and these amendments are effective without delay. The MTB has determined that this rule, as promulgated, is not a "major rule" under the terms of Executive Order 12291 and DOT implementing procedures (44 FR 11034). A final regulatory evaluation and environmental assessment is not available in the Docket as these amendments are merely clerical in their effect. Based on limited information available concerning size and nature of entities likely to be affected by this amendment, I certify that this amendment will not, as promulgated, have a significant economic impact on a substantial number of small entities.

Docket HM–56 is closed upon issuance of this final rule.

The following is a brief summary on the changes in each Part:

Part 107

Changes reflect the proper title of the Associate Director for HMR in the following sections: § 107.119(b)(c), and (d), § 107.121.

In § 107.373, the word "employer" is changed to read "employee" to reflect the proper relationship to OHMR and OOE.

Part 171

In § 171.16, paragraph (b) is changed to specify the name of the new office to which written incident reports are to be addressed.

In §§ 171.19 and 171.20, corrections are made to reflect the correct title of the Associate Director for HMR.

Part 172

In § 172.101, the Hazardous Materials Table (HMT) is changed by adding and revising entries as follows:

"Allethrin" is amended by changing the identification number in column (3A) from NA2909 to NA2902.

"Barrel, empty", "Gas cylinder, empty," "Tank car, empty *(previously used for a hazardous material)*", "Tank car, empty *(previously used for a Poison A material)*", "Tank, portable empty" and "Tank truck, empty" are changed to appear in italics rather than Roman type.

"Electrolyte (acid) battery fluid" is amended by adding the letter "E" in column (1) and setting the reportable quantity value in italics.

"High explosive" is changed to reflect the correct packaging reference in column (5)(a).

"Hydrogen fluoride" is amended to indicate its proper identification number in column (3A) as UN 1052.

"Infectious substance, human, n.o.s.", inadvertently omitted in a recent republication of the HMT, is added to the table.

"Nitrogen peroxide, liquid" and "Nitrogen tetroxide, liquid" are amended to reflect their additional status as a hazardous substance, since these names are synonymous with "nitrogen dioxide, liquid."

"Phenylenediamine, meta or para, solid" is amended to reflect its correct spelling.

In § 172.200, paragraph (c) is removed since it no longer contains timely information.

In § 172.203, paragraphs (i)(2)(iii), (j)(1), and (k)(3)(iii) are removed since they no longer contain timely information.

In § 172.301, paragraph (c)(3) is removed since it no longer contains timely information.

In § 172.302, paragraph (c) is removed since it no longer contains timely information.

In § 172.336, paragraph (c)(8) is removed since it no longer contains timely information.

In § 172.407, paragraph (d)(5) is removed since it no longer contains timely information.

Part 173

In § 173.55, the antiquated term "dangerous articles" is changed to "hazardous materials."

In § 173.114a, paragraph (j) is removed since it no longer contains timely information.

In § 173.115, Note 1 following paragraph (a)(1)(ii) is removed since it no longer contains timely information.

The following sections are amended to remove the specific reference to intermodal portable tanks (IM–101 and IM–102) since their use is already authorized through other paragraphs in the same sections: § 173.125(a)(8), § 173.128(a)(5), § 173.129(a)(3), § 173.131(a)(3), § 173.132(a)(4), § 173.144(a)(4), § 173.147(a)(2).

In § 173.292, paragraph (a)(2) has the specific reference to MC 303, MC 304, MC 306, MC 307, MC 310, MC 311, and MC 312 tank motor vehicles removed since their use is already authorized through paragraph (a)(1).

In § 173.302, paragraph (c) is changed by having the formulas which appear in Note 1 and Note 2 rewritten to show their correct algebraic expression.

In § 173.331, paragraph (a)(1) is amended by correcting the quantity limit to read "5 cubic centimeters." It was incorrectly entered as 6 cubic centimeters when the HMR were consolidated in Docket No. HM–112 (41 FR 15972, April 15, 1976).

In § 173.334, paragraph (a)(1) has specification 4B240 added to the list of cylinders. It was inadvertently omitted when the HMR were consolidated in Docket No. HM–112 (41 FR 15972, April 15, 1976).

In § 173.353, paragraph (a)(3) is revised to include requirements for valve protection which were adopted under Docket HM–139C (45 FR 46419, July 10, 1980) but inadvertently omitted in a later revision of this paragraph under Docket HM–166C (45 FR 59887, September 11, 1980); and footnote 1 to paragraph (a)(3), omitted in the most recent edition of the CFR, is added.

In § 173.357, paragraph (b)(1) is revised to include requirements for valve protection which were adopted under Docket HM–139C (45 FR 46419, July 10, 1980) but inadvertently omitted in a later revision of this paragraph under Docket HM–166C (45 FR 59887, September 11, 1980).

In § 173.359, paragraphs (a), (a)(13), and (c) are revised by having the suffix "n.o.s." removed from the entries "organic phosphate compound mixtures, n.o.s." and "organic phosphorus compound mixtures, n.o.s." to make these descriptions compatible with those which appear in the Hazardous Materials Table.

In § 173.392, paragraph (d)(2)(ii) is amended by replacing obsolete cargo tank specification section references with the current section number.

In § 173.1090, paragraph (d)(5) is removed since it no longer contains timely information.

Throughout Part 173, changes are made to indicate the transfer of certain functional responsibilities from the Associate Director for OE to the Associate Director for HMR.

The following sections are amended to remove the phrase "because of the present emergency and" since the state of emergency no longer exists: § 173.28(g) Note 1, § 173.119(b)(3) Note 1; and (b)(4) Note 1, § 173.190(b)(3)(i) Note 1, § 173.346(a)(8).

Part 174

In § 174.25, paragraph (a)(2) is amended to add a line item to the Table for the hazard class "Blasting agent"; and paragraph (c) is revised to indicate that billings must communicate the presence of the reportable quantity of a hazardous substance, when appropriate.

In § 174.61, paragraph (b) is changed to reflect the transfer of a functional responsibility from the Associate Director for OE to the Associate Director for HMR.

Part 175

In § 175.25, paragraph (b) is removed since it no long contains timely information.

In § 175.45, paragraph (c) is changed to reflect the name of the new office in MTB to which written incident reports are to be addressed.

In § 175.701, paragraph (c) is amended to reflect the transfer of a functional responsibility from the Associate Director for Operations and Enforcement to the Associate Director for HMR; and paragraph (c)(2) is changed, for the sake of clarity, by removing the word "laterally."

Part 177

In § 177.835, paragraph (g) is amended to specify that detonators may not be transported on the "same" motor vehicle with any Class A or Class B explosive (except detonators). The word "same" was inadvertently dropped in the 1980 and 1981 editions of Title 49.

Changes are made to indicate the transfer of certain functional responsibilities from the Associate Director of OE to the Associate Director for HMR in the following sections: § 177.821(f), § 177.838(g), § 177.848 note 5.

Part 178

Section 178.65–14 is amended by removing the note following paragraph (b)(8) since it no longer contains timely information.

In § 178.68–10, paragraph (a)(2) is amended to reflect the correct cross-reference for physical tests of tensile strength of the material.

Throughout Part 178, changes are made to indicate the transfer of certain functional responsibilities from the Associate Director for OE to the Associate Director for HMR.

Throughout Part 178, changes are made to remove the phrase "because of the present emergency and" since the state of emergency no longer exists.

Part 179

In § 179.202–16, paragraph (b) is changed to permit specification 103AW and 111A60W2 tank cars, which have been coated or lined with a material suitable to resist corrosion, for the carriage of monochloroacetic acid, anhydrous, when shipped as a liquid, as indicated in § 173.294(b).

In § 179.500–4, paragraph (b) is amended by having the divisor 2.0 in the formula $S = U/2.0$ changed to 3.0 to reflect the correct factor of safety.

List of Subjects

49 CFR Part 107

Hazardous materials transportation.

49 CFR Part 171

Hazardous materials transportation.

49 CFR Part 172

Hazardous materials transportation.

49 CFR Part 173

Hazardous materials transportation.

49 CFR Part 174

Hazardous materials transportation, Railroad safety.

49 CFR Part 175

Hazardous materials transportation, Air carriers.

49 CFR Part 177

Hazardous materials transportation, Motor carriers.

49 CFR Part 178

Hazardous materials transportation, Packaging and containers.

49 CFR Part 179

Hazardous materials transportation, Railroad safety.

In consideration of the foregoing, 49 CFR Parts 107, 171 through 175, and 177 through 179 are amended as follows:

PART 107—HAZARDOUS MATERIALS PROGRAM PROCEDURES

§ 107.119 [Amended]

1. In § 107.119, paragraphs (b), (c), and (d) are amended by removing the words "of OE."

§ 107.121 [Amended]

2. Section 107.121 is amended by removing the words "of OE."

§ 107.373 [Amended]

2a. Section 107.373 is amended by removing the word "employer" and inserting, in its place, the word "employee."

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

§ 171.16 [Amended]

3. In § 171.16, paragraph (b) is amended by removing the words "Chief, Information Systems Division, Transportation Programs Bureau" and inserting, in their place, "Information Systems Manager, Materials Transportation Bureau."

§ 171.19 [Amended]

4. Section 171.19 is amended by removing the words "Associate Director for OE" and inserting, in their place, the words "Associate Director for HMR."

§ 171.20 [Amended]

5. In § 171.20, paragraphs (a) and (c) are amended by removing the words "Associate Director for OE"; and inserting in their place, the words "Associate Director for HMR"; and paragraph (b) is amended by removing the words "Associate Director for Operations and Enforcement" and inserting, in their place, the words "Associate Director for Hazardous Materials Regulation."

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

6. In § 172.101, the Hazardous Materials Table is amended as follows:

§ 172.101 Hazardous materials table.

(1)	(2)	(3)	(3)	(4)	(5)		(6)		(7)		
					Packaging		Maximum net quantity in one package		Water shipments		
- /E/A/W	Hazardous materials descriptions and proper shipping names	Hazard class	Identification number	Label(s) required (if not excepted)	Exceptions (a)	Specific requirements (b)	Passenger carrying aircraft or railcar (a)	Cargo only aircraft (b)	Cargo vessel (a)	Passenger vessel (b)	Other requirements (c)

§ 172.200 [Amended]

7. In § 172.200, paragraph (c) is removed.

§ 172.203 [Amended]

8. In § 172.203, paragraph (i)(2)(iii), (j)(1), and (k)(3)(iii) are removed.

§ 172.301 [Amended]

9. In § 172.301, paragraph (c)(3) is removed.

§ 172.302 [Amended]

10. In § 172.302, paragraph (c) is removed.

§ 172.336 [Amended]

11. In § 172.336, paragraph (c)(8) is removed.

§ 172.407 [Amended]

11a. In § 172.407, paragraph (d)(5) is removed.

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

§ 173.21 [Amended]

11b. In § 173.21, paragraphs (b)(2) and (e) are amended by removing the words "Operations and Enforcement" and inserting, in their place, the words "Hazardous Materials Regulation."

§ 173.55 [Amended]

12. In §173.55, paragraph (a) is amended by removing the words "dangerous articles" in both instances and inserting, in their place, the words "hazardous materials."

§ 173.114a [Amended]

13. In § 173.114a, paragraph (d) is amended by removing the words "Operations and Enforcement (OE)" and inserting, in their place, the words "Hazardous Materials Regulation (HMR)"; and paragraph (j) is removed.

§ 173.115 [Amended]

14. In § 173.115, Note 1 following paragraph (a)(1)(ii) is removed.

§ 173.125 [Amended]

15. In § 173.125, paragraph (a)(8) is removed.

§ 173.128 [Amended]

16. In § 173.128, paragraph (a)(5) is removed.

§ 173.129 [Amended]

17. In § 173.129, paragraph (a)(3) is removed.

§ 173.131 [Amended]

18. In § 173.131, paragraph (a)(3) is removed.

§ 173.132 [Amended]

19. In § 173.132, paragraph (a)(4) is removed.

§ 173.144 [Amended]

20. In § 173.144, paragraph (a)(4) is removed.

§ 173.147 [Amended]

21. In § 173.147, paragraph (a)(2) is removed.

22. In § 173.292, paragraph (a)(2) is revised to read as follows:

§173.292 Hexamethylene diamine solution.

(a) * * *

(2) Specifications MC 300, MC 301, MC 302 or MC 305. Tank motor vehicles.

* * * * *

§ 173.300a [Amended]

22a. In § 173.300a, paragraphs (b)(1) and (e) are amended by removing the words "Operations and Enforcement" and inserting, in their place, the words "Hazardous Materials Regulation."

§ 173.300b [Amended]

22b. In §173.300b, paragraph (b)(1) is amended by removing the words, "Operations and Enforcement" and inserting, in their place, the words "Hazaradous Materials Regulation."

§ 173.302 [Amended]

23. In § 173.302, paragraph (c)(3) is amended by removing from Note 1 and Note 2 the formulas:

"$EE=PKV\times D^3/(D^2-d^2)$", and
"$S=P((1.3D^2+0.4d^2)/D^2-d^2))$ and inserting, in their respective place, the formulas:
"$EE=(PKVD^3)/(D^2-d^2)$", and
"$S=(P(1.3D^2+0.4d^2))/(D^2-d^2)$".

§ 173.331 [Amended]

24. In § 173.331, paragraph (a)(1) is amended by removing the number "6" as it appears in the first sentence and inserting, in its place, the number "5".

§ 173.334 [Amended]

25. In § 173.334, paragraph (a)(1) is amended by adding specification "4B240" to the listing of other authorized cylinders.

25a. In §173.353, paragraph (a)(3) is revised, and footnote 1 is added to read as follows:

§ 173.353 Methyl bromide and methyl bromide mixtures.

(a) * * *

(3) Specification 3A225, 3AA225, 3B225, 3E1800, 4A225[1], 4B225, 4BA225, or 4BW225, (§§ 178.36, 178.37, 178.38, 178.42, 178.49, 178.50, 178.51, 178.61 of this subchapter). Metal cylinders. Values and other closing devices must be protected to prevent damage in transit by equipping the cylinder with valve protection required by §173.301(g). Cylinders having a wall thickness of less than 0.08-inch must be packed in boxes or crates (See § 173.25).

* * * * *

26. In § 173.357, paragraph (b)(1) is revised to read as follows:

§ 173.357 Chloropicrin and chloropicrin mixtures containing no compressed gas or poison A liquid.

* * * * *

(b) * * *

(1) Specification 3A, 3AA, 3B, 3C[1], 3D[1], 3E, 4A[1], 4B, 4BA, 4BW, or 4C[1] (§§ 178.36, 178.37, 178.38, 178.40, 178.41, 178.42, 178.49, 178.50, 178.51, 178.52, 178.61 of this subchapter). Metal cylinders. Valves and other closing devises must be protected to prevent damage in transit by equipping the cylinders with valve protection required by §173.301(g) of this subchapter. A cylinder closed by means of a solid plug may have the closure protected by a metal collar. Cylinders having a wall thickness of less than 0.08 inch must be packaged in boxes or crates. Each cylinder having a water capacity over 275 pounds must have a minimum design pressure of 225 p.s.i.g., unless the specification requires a higher minimum design pressure.

* * * * *

§ 173.359 [Amended]

27. In § 173.359, paragraphs (a), (a)(13), and (c) are amended by removing the suffix "n.o.s." each time it appears as a part of the materials description.

[1] Use of existing cylinders authorized, but new construction not authorized.

§ 173.392 [Amended]

28. In § 173.392, paragraph (d)(2)(ii) is amended by removing the parenthetical section references "§ 178.330, § 178.331" and inserting, in their place, "§ 178.340".

§ 173.1090 [Amended]

29. In § 173.1090, paragraph (d)(5) is removed.

PART 173 [AMENDED]

30. In addition to the amendments set forth above, Part 173 is amended by removing the words "Asssociate Director for OE" and inserting, in their place, the words "Associate Director for HMR" in the following places:

§ 173.24(c)(1)(ii)
§ 173.31 (footnote (i))
§ 173.32(b)(3)
§ 173.34(g)(4)(ii); (i); (i)(4)(i); (1); (1)(2); and (1)(3)
§ 173.53(h) and (h)(1)
§ 173.65(h)
§ 173.88(g)
§ 173.94(b)
§ 173.100(r); (r)(11); (u); (x); (y); (aa); and (ee)
§ 173.114a(d)(2); (d)(4); and (e)
§ 173.119(b)(3) Note 1
§ 173.120(c)
§ 173.124(a)(1); and (a)(2)
§ 173.197a
§ 173.245(a)(25)
§ 173.252(g)(1)
§ 173.258(a)(3)
§ 173.260(g)
§ 173.266(f)(2)
§ 173.272(i)(18)
§ 173.300(b)(1)
§ 173.300a(c); (d); (e); (g); (h); and (i)
§ 173.300b(c); (d); (e); (f); (g)
§ 173.300c(a); and (b)
§ 173.305(c)(1)
§ 173.306(d)(1)
§ 173.315(i)(12)
§ 173.332(d)
§ 173.336(a)(4)
§ 173.366(a)(3)
§ 173.370(a)(13)
§ 173.385(b); and (c)

30a. In addition to the amendments set forth above, Part 173 is amended by removing the words "because of the present emergency and" from the following sections:

§ 173.28(g) Note 1
§ 173.119(b)(3) Note 1; and (b)(4) Note 1
§ 173.190(b)(3)(i) Note 1
§ 173.346(a)(8)

PART 174—CARRIAGE BY RAIL

31. In § 174.25, the table in paragraph (a)(2) is amended by inserting the line entry "Blasting agent—Do—Do" in the appropriate columns and immediately below "Explosives, Class C—Placarded DANGEROUS—Do"; and paragraph (c) is revised by adding a new sentence at the end of the paragraph to read as follows:

§ 174.25 Additional information on waybills, switching orders and other billings.

* * * * *

(c) * * * For an empty tank car that last contained a hazardous substance and still contains a reportable quantity, the letters "RQ" shall be entered on the billing either before or after the basic description.

* * * * *

32. In § 174.61, paragraph (b) is amended by removing the words "Associate Director for OE" and inserting, in their place, the words "Associate Director for HMR."

PART 175—CARRIAGE BY AIRCRAFT

§ 175.25 [Amended]

33. In § 175.25, paragraph (b) is removed.

§ 175.45 [Amended]

34. In § 175.45, paragraph (c) is amended by removing the words "Office of Hazardous Materials Regulations" and inserting, in their place, "Information Systems Manager."

§ 175.701 [Amended]

35. In § 175.701, paragraph (c) is amended by removing the words "Operations and Enforcement" and inserting, in their place, the letters "HMR"; and paragraph (c)(2) is amended by removing the word "laterally."

PART 177—CARRIAGE BY PUBLIC HIGHWAY

§ 177.835 [Amended]

35a. In § 177.835, paragraph (g) is amended by adding the word "same" immediately prior to the word "motor" in the second sentence.

PART 177 [AMENDED]

36. Part 177 is amended by removing the words "Associate Director for OE" and inserting, in their place, the words "Associate Director for HMR" in the following places:

§ 177.821(f)
§ 177.836(g)
§ 177.848 Note 5

PART 178—SHIPPING CONTAINER SPECIFICATIONS

§ 178.65–14 [Amended]

37. Section 178.65–14 is amended by removing the "Note" which follows paragraph (b)(8); and paragraph (d) is amended by removing the words "Operations and Enforcement" and inserting, in their place, the words "Hazardous Materials Regulation."

§ 178.68–10 [Amended]

38. In § 178.68–10, paragraph (a)(2) is amended by removing the section reference "178.63–15" and inserting, in its place, "178.68–15."

PART 178 [AMENDED]

39. In addition to the amendments set forth above, Part 178 is amended by removing the words "Associate Director for OE" and inserting, in their place, the words "Associate Director for HMR" in the following places:

§ 178.5–8(f)
§ 178.6–8(a)(2)
§ 178.8–10(f)
§ 178.13–2(a)
§ 178.13–5(a)(2)
§ 178.14–3(a)
§ 178.14–7(a)(2)
§ 178.14–8(f)
§ 178.19–6(a)(3)
§ 178.21–2(b)(2)
§ 178.24–5(a)(2)
§ 178.27–2(c)(2)
§ 178.33–9(a)(2)
§ 178.33a–9(a)(2)
§ 178.35–3(b)(2)
§ 178.35a–2(c)(2)
§ 178.36–3
§ 178.37–3
§ 178.38–3
§ 178.39–3
§ 178.42–3
§ 178.44–3
§ 178.45–3
§ 178.47–3
§ 178.50–3
§ 178.51–3
§ 178.53–3
§ 178.54–3

BILLING CODE 4910-60-M

National Highway Traffic Safety Administration

49 CFR Part 577

[Docket No. 80–17; Notice 2]

Denial of Petitions for Reconsideration

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of petitions for reconsideration of a final rule.

SUMMARY: This notice denies petitions for reconsideration of an amendment to the agency's defect and noncompliance notification regulation. The amendment added the agency's Auto Safety Hot Line telephone number to the procedure set forth in defect and noncompliance notification letters for consumers to contact the agency. Petitioners contended that the amendments should have been preceded by a proposal and request for comments. The agency concludes that the amendment was a technical amendment which clarified a minor procedural aspect of the notification regulation and which has negligibly affected regulated parties. The agency notes further that the inclusion of the Hot Line in notification letters will improve the agency's efficiency in monitoring recalls and identifying problems regarding them.

FOR FURTHER INFORMATION CONTACT: Mr. James Murray, Office of Defects Investigation, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202–426–2840).

SUPPLEMENTARY INFORMATION: On January 22, 1981 (46 FR 6971), the agency published a final rule requiring the inclusion of the agency's Auto Safety Hot Line telephone number in defect and noncompliance letters. The purpose of that amendment to 49 CFR Part 577, *Defect and Noncompliance Notification,* was to elaborate upon the means which Congress intended consumers to have in order to inform the agency about problems involving the recall of defective or noncomplying motor vehicles and motor vehicle equipment. The agency made the amendment without notice and opportunity for comment, because the agency determined the amendment to be a minor technical clarification of Part 577 with little impact on the manufacturers.

In response to that notice, the agency received several petitions for reconsideration of the amendment. The petitions were submitted by manufacturers, an individual, and the Motor Vehicle Manufacturers Association (MVMA).

The petitioners first argued that the amendment was improperly processed under rulemaking procedures and should therefore be retracted. The agency disagrees. The Administrative Procedure Act (APA) permits rulemaking without notice and comment when the action is interpretive, involves agency procedure or when the agency finds for good cause that notice and comment are unnecessary. The agency believes that elements of all these exceptions were involved in the amendment in question. The APA recognizes the appropriateness of allowing shortened procedures for minor technical amendments that clarify, facilitate, or update a minor provision of a standard or regulation. To undertake a full rulemaking proceeding in these instances is a waste of agency resources.

Since June 28, 1977, the defect and noncompliance regulation has required manufacturers to include the agency's name and address in defect and noncompliance letters. This requirement was adopted in compliance with the Motor Vehicle and Schoolbus Safety

Amendments of 1974. Public Law 93-492, 88 Stat. 1470. As a result of those amendments, section 153(a)(6) of the National Traffic and Motor Vehicle Safety Act of 1966, as amended, requires that defect and noncompliance letters contain

> a description of the *procedure* to be followed by the recipient of the notification in informing the Secretary whenever a manufacturer, distributor, or dealer fails or is unable to remedy without charge such defect or failure to comply.

15 U.S.C. 1413(a)(6) [emphasis added].

Upon further consideration of section 153(a)(6) in late 1980, the agency interpreted the procedure mandated by Congress for contacting it as being intended to include not only the agency's address, but also its telephone number. A telephone number is typically an integral part of the information given by goverment agencies, corporations and other entities regarding the procedure for contacting them. Accordingly, in January 1981, the agency amended Part 577 to require manufacturers to include the agency's Auto Hot Line as part of the procedure for recipients of notification letters to contact the agency. Since the amendment merely required the addition of a 10-digit number to notification letters, the agency concluded that the effects of the amendment on the manufacturer were minor.

A second argument advanced by the petitioners is that the effects of the Hot Line amendment on manufacturers would not be minor, and therefore the amendment could not be made under the APA exception for minor, technical amendments. The petitioners suggested that the inclusion of the Hot Line would result in a proliferation of telephone calls from notification letter recipients to NHTSA to manufacturers to dealers.

The agency disagrees with the petitioners' contentions regarding impact. Petitioners do not even attempt to argue that the amendment has more than a negligible direct impact on manufacturers. Instead, they seek to argue that the amendment will, through an extended chain of events, have an indirect impact on them. The suggestion that the amendment will lead to a substantial increase in the communications from consumers to NHTSA to manufacturers is both speculative and improbable.

Neither the recall experience before nor since the Hot Line amendment furnishes any support for the proposition advanced by the petitioners. The manufacturer, not the agency, has been and continues to be the typical first point of contact by consumers with questions about notification letters. Most consumers prefer to deal directly with the manufacturers when any problem first arises regarding a recall campaign. The agency is typically contacted subsequently only if the recall problems are perceived by the consumers to remain unsolved. It is precisely in those circumstances that the agency should be contacted so that it can meet its responsibilities to ensure the implementation of the recall and remedy provisions of the Vehicle Safety Act. There is no indication, however, that the addition of the Hot Line number to the agency's address in notification letters has led to any significant increase in these contacts with the agency. Indeed, in the past, the Hot Line has had the effect of screening out large numbers of information requests and complaints which might have been based on misunderstandings relating to recalls. Thus, those calls never reached the manufacturers.

Further, those instances in which consumers do contact the agency have previously been taken into account. When Part 577 was amended to include the agency's address, NHTSA considered the impacts of those contacts on the agency and any resultant impact on the manufacturers. The agency has no basis for assuming that the degree of impact on manufacturers will increase as a result of the Hot Line amendment.

Petitioners also contended that the agency would be required to hire additional staff to answer the Hot Line as a result of this amendment. The agency has no plans to hire any additional personnel as a result of this amendment and does not anticipate a substantial increase in the number of Hot Line calls. Thus, the amendment will not be burdensome to NHTSA. In fact, the amendment was an agency procedural rule facilitating efficiency since it will allow the agency to handle more complaints or requests from the public by telephone. It is simpler for the agency to supply information by telephone rather than by processing letters from the public and sending written responses. The agency's response by telephone will be quicker and better tailored to the specific request as revealed through the telephone discussion. Moreover, the agency believes that the addition of the number will be beneficial to manufacturers since it will allow the agency to filter public communications that only seek information about recall campaigns, rather than to register complaints with manufacturers. With the addition of the number, the agency will likely receive many requests for information that the manufacturers would have otherwise gotten. Therefore, any increase in calls resulting from the Hot Line number will likely be informational and would not result in any increased impact on manufacturers.

For the reasons stated above, the agency reiterates its conclusion that the amendment in question (§ 577.5) was a minor, technical rule that had no significant impact on the regulatory structure of Part 577, and that the rights of petitioners were not significantly changed by the regulation. Therefore, the agency believes that there was good cause for concluding that notice and comment were unnecessary prior to issuance of this rule. Accordingly, the petitions for reconsideration are hereby denied.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1391, 1407); delegation of authority at 49 CFR 1.50)

Issued on September 22, 1982.

Raymond A. Peck, Jr.,

Administrator.

BILLING CODE 4910-59-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1002

Change in Insurance Billing Cycle

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Commission is changing its procedure for billing the insurance companies which submit certificates of insurance and surety bonds covering motor carriers, freight forwarders and brokers from an annual billing to a monthly billing. Under the new system, receipted copies of all certificates of insurance or surety bonds accepted for filing by the Commission will be returned to the insurer at the close of the month with a statement of charges. To permit monthly billing by the Commission, the language 49 CFR 1002.2 is amended. There is no change in the fees assessed. This change will permit insurers to verify the charges assessed and reduce paperwork and recordkeeping for both the Commission and the insurers.

EFFECTIVE DATE: November 1, 1982.

FOR FURTHER INFORMATION CONTACT: Edward C. Fernandez, (202) 275-7591.

SUPPLEMENTARY INFORMATION: In the past, the Commission has assessed an annual qualification service fee for

insurer, surety, or self-insurer accepted certificates of insurance or surety bonds based on a formula of $10 per accepted certificate or surety bond, with a minimum annual fee of $50. Once yearly each insurer has been furnished a listing of accepted filings and an annual statement of charges. The Commission has also been returning actual copies of these filings to the insurers, twice monthly by letter.

In order to simplify the procedure for both the insurers and the Commission, new procedures are being adopted which will return copies of certificates of insurance and surety bonds to the insurers at the close of each month with a monthly statement of filing charges. This change will permit insurers to verify the charges assessed and reduce paperwork and recordkeeping for both the Commission and the insurers.

List of Subjects in 49 CFR Part 1002

Freedom of Information, Administrative practice and procedures, Common carriers.

PART 1002—FEES

Accordingly, 49 CFR Part 1002 is amended to reflect the change in billing procedures as follows:

§ 1002.2 [Amended]

In § 1002.2 paragraph (d), item (39) and footnote number (3) under PART IV: OTHER PROCEEDINGS, are amended by revising the word "annual" to read "monthly."

This is not a major Federal action significantly affecting the quality of the human environment or the conservation of energy resources.

We find that this procedural change in our rules will not have an adverse or substantial effect on small entities, insurance companies, or regulated carriers. The monthly billings sent to the insurance companies will not increase the amount paid by the companies, only their record keeping methods will be affected. We believe that the revised procedure, which provides for monthly verification of charges will be beneficial to those record keeping efforts.

Moreover, notice and public comment are unnecessary since the change involved is minor and concerns a matter in which the public is not particularly interested.

(49 U.S.C. 10321; 5 U.S.C. 559; 5 U.S.C. 553 (b)(A) and (b)(B))

By the Commission, Reese H. Taylor, Jr., Chairman.

Dated: September 20, 1982.

Agatha L. Mergenovich,

Secretary.

49 CFR Part 1033

Various Railroads Authorized To Use Tracks and/or Facilities of Chicago, Rock Island and Pacific Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Amendment No. 1 to Forty-First Revised Service Order No. 1473.

SUMMARY: Pursuant to Section 122 of the Rock Island Railroad Transition and Employee Assistance Act, Pub. L. 96–254, this order authorizes various railroads to provide interim service over the Chicago, Rock Island and Pacific Railroad Company, Debtor (William M. Gibbons, Trustee), and to use such tracks and facilities as are necessary for operations. This order permits carriers to continue to provide service to shippers which would otherwise be deprived of essential rail transportation.

EFFECTIVE: 11:59 p.m., September 30, 1982, and continuing in effect until 11:59 p.m., January 31, 1983, unless otherwise modified, amended or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT: M. F. Clemens, Jr., (202) 275–1559.

SUPPLEMENTARY INFORMATION:

Decided: September 24, 1982.

Upon further consideration of Forty-first Revised Service Order No. 1473 (47 FR 32426), and with respect to this amendment, the Board recognizes that certain revisions to the order have been requested and that other matters related to this order are before the Board for consideration. However, in order not to adversely affect shippers and the unaffected carriers and due to the shortness of time, all revisions are being considered subsequent to this amendment and good cause appearing therefor:

§ 1033.1473 [Amended]

It is ordered, § 1033.1473 Various Railroads Authorized To Use Tracks and/or Facilities of the Chicago, Rock Island and Pacific Railroad Company, Debtor, (William M. Gibbons, Trustee) Forty-first Revised Service Order No. 1473 is amended by substituting the following paragraph (n) for paragraph (n) thereof:

(n) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 31, 1983, unless otherwise modified, amended, or vacated by order of this Commission.

Effective date. This order shall become effective at 11:59 p.m., September 30, 1982.

This action is taken under authority of 49 U.S.C. 10304–10305 and Section 122, Pub. L. 96–254.

This amendment shall be served upon the Association of American Railroads, Transportation Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms to that agreement and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

BILLING CODE 7035-01-M

Proposed Rules

Federal Register
Vol. 47, No. 190
Thursday, September 30, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL RESERVE SYSTEM

12 CFR Part 220

[Docket No. R-0423]

Regulation T; Credit by Brokers and Dealers; Private Mortgage Pass-Through Securities as OTC Margin Bonds

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed rule.

SUMMARY: The Board is proposing for public comment an amendment to Regulation T that will specify the characteristics of "private" mortgage pass-through securities (i.e., not guaranteed by agencies of the United States government) that may be used as collateral for margin credit at securities brokerage firms. The existing definition of "OTC margin bond" in Regulation T will be expanded to cover these instruments. At present, any "OTC margin bond" is eligible for credit on a "good faith" basis. The proposed criteria for inclusion of a private mortgage pass-through security in the definition of "OTC margin bond" differ from the criteria in the existing definition because of the nature of the mortgage pass-through security. Unlike a typical corporate bond, the principal balance of this security declines each month as mortgages backing the security are amortized or prepaid. The proposed criteria, therefore, will require (1) an original issue of $25,000,000 (rather than an outstanding principal amount at the time credit is extended) that may be sold in separate series, (2) current filings with the Securities and Exchange Commission, and (3) the passing through of mortgage interest and principal payments by the servicing agent according to the terms of the offering. The Board specifically requests comment as to whether the $25,000,000 minimum initial size is an appropriate criterion to establish adequate marketability of the security for margin account purposes. In addition, the Board requests views as to the likelihood that a broker would liquidate these securities to meet margin calls when there are other types of securities in the customer's account with that broker.

DATE: Comments should be received on or before October 29, 1982.

ADDRESS: Comments, which should refer to Docket No. R-0423, may be mailed to the Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, NW, Washington, D.C. 20551 or delivered to Room B-2223 between 8:45 a.m. and 5:14 p.m. Comments received may also be inspected at Room B-1122 between 8:45 a.m. and 5:15 p.m.

FOR FURTHER INFORMATION CONTACT: Laura Homer or Robert Lord, Division of Banking Supervision and Regulation (202) 452-2781 or David Seiders, Division of Research and Statistics, (202) 452-2694, at the Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION:

Initial Regulatory Flexibility Analysis:

The Board believes there will be no significant economic impact on a substantial number of small entities if this proposed rule is adopted.

List of Subjects in 12 CFR Part 220

Banks, banking, Brokers, Credit, Federal Reserve System, Margin, Margin requirements, Reporting requirements, Securities.

PART 220—CREDIT BY BROKERS AND DEALERS

Pursuant to sections 7 and 23 of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78g and w), the Board proposes to amend Regulation T (12 CFR 220) by revising § 220.2(i) as set forth below:

§ 220.2 Definitions.

* * * * *

(i) The term "OTC margin bond" means (1) a debt security not traded on a national securities exchange which meets all of the following requirements:

(i) At the time of the extension of credit, a principal amount of not less than $25,000,000 of the issue is outstanding.

(ii) The issue was registered under section 5 of the Securities Act of 1933 and the issuer either files periodic reports pursuant to section 13(a) or 15(d) of the Securities Exchange Act of 1934 or is an insurance company which meets all of the conditions specified in section 12(g)(2)(G) of the Act.

(iii) At the time of the extension of credit, the creditor has a reasonable basis for believing that the issuer is not in default on interest or principal payments; or

(2) A private mortgage pass-through security (not guaranteed by an agency of the U.S. government) meeting all of the following requirements:

(i) An aggregate principal amount of not less than $25,000,000 (which may be issued in series) was issued pursuant to a registration statement filed with the Securities and Exchange Commission under section 5 of the Securities Act of 1933.

(ii) Current reports relating to the issue have been filed with the Securities and Exchange Commission.

(iii) At the time of the credit extension, the creditor has a reasonable basis for believing that mortgage interest and principal payments are being passed through and that the servicing agent is meeting all the obligations required under the terms of the offering.

By order of the Board of Governors of the Federal Reserve System, September 22, 1982.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Airworthiness Docket No. 82-ASW-58]

Airworthiness Directives; Bell Helicopter Model 206L and 206L-1

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) which would require inspection of the float inflation valve assembly on all Bell Model 206L and 206L-1 series helicopters equipped with an emergency flotation system to determine if the piston pin is installed correctly. The proposed AD is needed to prevent

failure of the emergency flotation system (i.e., failure of the float bags to inflate). Failure of the bags to inflate would result in loss of the helicopter in the event of ditching.

DATE: Comments must be received on or before November 8, 1982.

ADDRESSES: Send comments on the proposal in triplicate to: Office of the Regional Counsel, Attention: Docket No. 82–ASW–58, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101.

A copy of the service information may be examined at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106. A copy of the service information may be obtained from Bell Helicopter Textron, P.O. Box 482, Fort Worth, Texas 76101.

FOR FURTHER INFORMATION CONTACT:
J. R. Bannister, Helicopter Certification Branch, ASW–170, Aircraft Certification Division, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone (817) 624–4911, extension 521.

SUPPLEMENTARY INFORMATION:
Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Office of the Regional Counsel, Southwest Region Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

In a recent report of a flight over water, a Model 206L–1 developed loss of engine power. The pilot autorotated toward the water, actuating the emergency flotation equipment as the helicopter approached the water. The emergency floatation pneumatic system valve failed to actuate and allow inflation of the float bags. On landing in the water, the helicopter rotated to an inverted position, floating partly submerged, allowing the nitrogen cylinder to be salvaged and returned to Bell Helicopter Textron, Inc., for investigation.

Examination of the valve assembly revealed that the squib charge had fired. Further investigation revealed that the shear head release piston pin had been incorrectly installed and was wedged in the machines groove of the shear head. The binding of the piston pin in the machined groove prevented released of the shear head and release of the nitrogen gas to inflate the float bags. Bell Helicopter Textron, Inc., Technical Bulletin No. 206L–81–21 was issued to accomplish the inspection of the shear pin for correct installation in relation to the shear head. To assure that the valve assemblies are inspected for proper assembly within the next 150 flight hours, the FAA is proposing to adopt a new AD for all Bell Model 206L and 206L–1 series helicopters equipped with emergency flotation equipment kits P/N 206–706–067–1, –3, –5, –101, and 206–706–210–101 and –103.

Approximately 270 helicopters may have the shear head release piston pin installed incorrectly. The cost impact for the inspection is approximately $185.50 for each helicopter, and $50,085 for the fleet.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety,

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

Bell Helicopter Textron, Inc.: Applies to all model 206L and 206–1 helicopters certificated in all categories that are equipped with emergency flotation equipment kits P/N 206–706–067–1, –3, –5, –101, and 206–706–210–101, and –103.

Compliance is required within 150 hours' time in service after the effective date of this AD unless already accomplished in accordance with Service Bulletin 206L–81–21.

To determine whether the shear heads in the float inflation valve assembly have been damaged by incorrect installation, accomplish the following:

a. Disconnect the battery.

Note.—Do not disconnect electrical connector to the squib valve on the inflation valve at the cylinder assembly.

b. Remove the nitrogen gas from inflation cylinder, carefully bleeding off the gas through the Schrader inlet valve.

Caution

DO NOT ATTEMPT TO REMOVE THE SHEAR HEAD PISTON PIN PRIOR TO REMOVAL OF THE NITROGEN GAS FROM THE CYLINDER.

c. Carefully remove the shear head release piston pin. Visually inspect the pin, as removed, to determine if the position of the flat machined side of the piston pin faces the inlet end of the shear head machined groove (Ref. Figure 1, Bell Helicopter Textron Service Bulletin 206L–81–21, dated May 7, 1981).

d. If the shear head release piston pin has been installed by rotating the pin 90 to 180 degrees, placing the round side of the pin against the inlet side of the shear head inlet groove, the pin has been incorrectly installed.

e. If the shear head release piston pin is found installed incorrectly, remove the shear head from the valve body and discard. Install a new shear head and "O" rings. On installation, thread shear head into the valve body and torque to 20 foot-pounds, *prior to installing the shear head release piston pin.* Reinstall piston pin as described in paragraph f.

f. If the shear head release piston pin is found correctly installed, place "O" ring in groove of piston pin and install piston pin part way into body with flat side on end of piston pin facing inlet port. Rotate piston pin 90 degrees and lightly push piston pin down into valve body until it bottoms out. While pushing on piston pin, rotate piston pin 90 degrees in the opposite direction. Piston pin should drop deeper into body. Flat side of piston pin must engage groove in shear head, with flat side facing inlet port.

g. Refill cylinder with nitrogen. Check for leaks. Connect battery, and refer to appropriate service instruction.

Note

X-ray Inspection (Alternate Method)

Where X-ray equipment is available, inspection of the valve assembly may be accomplished by use of X-ray pictures. Reference Figure 2, Bell Helicopter Textron Service Bulletin 206L–81–21 dated May 7, 1981 or FAA approved equivalent for examples of correct and incorrect piston pin installation in the valve assembly. This eliminates the need to bleed off the nitrogen and to disassemble the valve assembly.

Caution

DISCONNECT AND REMOVE THE SQUIB FROM THE VALVE ASSEMBLY PRIOR TO USE OF X-RAY.

h. Equivalent means of compliance with the AD may be approved by the Manager, Aircraft Certification Division, Southwest Region, Fort Worth, Texas.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85)

Note.—The FAA has determined that this document involves a proposed regulation which is not major under Executive Order 12291 or significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

It is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities since it involves only 270 helicopters at a cost of $185.50 per helicopter. A draft regulatory evaluation has been prepared and has been placed in the public docket. A copy of it may be obtained by contacting the person identified under the caption **FOR FURTHER INFORMATION CONTACT.**

Issued in Fort Worth, Texas, on September 16, 1982.

F. E. Whitfield,

Acting Director, Southwest Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 82-NM-72-AD]

Airworthiness Directives: Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an Airworthiness Directive (AD) that would require revision of the limitations section in the FAA approved Boeing Model 747 Airplane Flight Manual (AFM) and installation on the pilots' forward panel of low engine fan rotor rpm N_1 warning indication for each engine. The revision to the AFM would clarify operation of the thermal anti-icing procedure, the need to maintain the specified minimum N_1 during icing conditions, and expand the definition of icing conditions. Activation of the low N_1 indication would warn the flight crew of operation at a lower N_1 than required for icing conditions. Engine operation below this minimum rpm has caused multiple engine flameout and engine damage during certain airplane operations in icing conditions. The minimum N_1 warning and AFM information is needed to insure engines are not operated below a safe level during icing conditions.

DATES: Comments must be received on or before December 3, 1982.

ADDRESSES: Send comments to FAA Northwest Mountain Region, Office of the Regional Counsel, Attention: Docket No. 82-NM-72, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168. The applicable Service Bulletin (S/B 747-77-2060) may be obtained from the Boeing Company, P.O. Box 3707, Seattle, Washington 98124, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT:

Kanji K. Patel, Propulsion Branch, ANM-140S, Seattle Area Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington telephone: (206) 767-2520

Mailing address: Federal Aviation Administration, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of comments received. All comments submitted will be available both before and after the closing date in the rules docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the rules docket.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 82-NM-72-AD, 17900 Pacific Highway South, C68966, Seattle, Washington, 98168.

Discussion

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to Boeing Model 747 series airplanes. Since the introduction of the Model 747 airplane into service, five operators have reported multiple engine flameout incidents or lack of response to throttle movement due to engine icing. The latest incident which occurred on April 3, 1982, involved flameout of all four engines. Following this incident, Boeing issued an Operations Manual Bulletin, OMB 82-2, dated April 31, 1982; and General Electric issued Operations Engineering Bulletin No. 507, dated May 10, 1982. These bulletins re-emphasized the importance of adhering to the engine anti-ice procedures and operational requirements published in the FAA approved Airplane Flight Manual and the specific Airlines Operations Manuals. This action was only considered an interim solution until a more comprehensive solution, based on the understanding of the lack of power and/or flameout, could be developed.

A review of conditions at the time of these incidents shows that each occurred during idle descent from a cruising altitude and penetrating icing conditions with engines at idle power. In certain cases, significant engine damage occurred, requiring engien replacement. Investigation of the reported incidents by the engine and airframe manufacturers has revealed that the cause of engine lack of response to throttle movement and/or flameout was ice accumulation on unheated engine internal aerodynamic surfaces while operating at low N_1 rotor speed. Ice protection for the Pratt & Whitney JT9D, General Electric CF6 and Rolls Royce RB211 engines is provided as follows:

1. Pratt and Whitney JT9D engines are certified with the engine core inlet guide vanes and nacelle (inlet cowl) anti-icing system.

2. General Electric CF6 engines are certified with the nacelle (inlet cowl) anti-icing system only.

3. Rolls Royce RB211-524B2/C2 engines are certified with the nacelle (inlet cowl and spinner) anti-icing system while RB211-524D4 is certified with inlet cowl anti-ice system only.

Additional protection of unheated engine surfaces is provided by heat-of-compression through the engine compressors by maintaining higher-than-idle engine rpm's. Therefore, at low idle power during icing conditions, accumulation of ice on engine aerodynamic surfaces may occur. The buildup of ice causes aerodynamic instability of the engine which may result in surging of compressors and shedding of ice from the surfaces causing engine damage. Once the ice accumulation has occurred, advancing throttles to clear the engines aggravates the situation by dislodging more ice which blocks the airflow passages to the compressors causing complete compressor stall and engine flameout or requires a precautionary engine shutdown.

To provide thermal anti-icing protection during icing conditions, the AFM Normal Procedures Section instructs the flight crew to operate the engines at a minimum of 45% N_1 rpm below 10,000 feet and 50% N_1 above 10,000 feet altitude. In spite of the AFM procedures, experience has shown that procedural requirements for operations in icing conditions have not provided adequate protection. Therefore, to

protect engines from ice buildup and thereby prevent multiple engine flameout on the Model 747 series airplanes, the FAA is proposing an Airworthiness Directive (AD) to require an engine anti-ice system operating limitation in the FAA approved Airplane Flight Manual, and installation of an indicating system to warn the flight crew when any engine is being operated below the minimum safe rpm with the engine or nacelle anti-ice system "ON."

After a careful review of the proposed Airworthiness Directive (AD) it has been estimated that a total of 160 airplanes will be affected by this AD, it will take less than 100 man hours per airplane to accomplish the proposed modification and AFM revisions, and the average labor cost will be $35 per man hour. Necessary modification components are estimated at less than $5,500 per airplane. Based on these estiamtes, the total cost impact of this AD will be $9,000 per airplane for a total cost of $1,440,000 to operators of U.S. registered airplanes. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. No small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Boeing: Applies to Boeing Model 747 Series Airplanes certificated in all categories. To prevent engine flameout or damage due to accumulation of ice on unheated engine surfaces, accomplish the following:

A. Within 90 days from the effective date of the AD, unless already accomplished, revise the FAA approved Airplane Flight Manual CERTIFICATE LIMITATIONS SECTION by adding: *"ENGINE ANTI-ICE SYSTEM."* The use of continuous ignition is required in icing conditions.

When penetrating or operating in Icing Conditions, maintain a minimum of 50% N_1 rpm at 10,000 feet and above, and 45% N_1 rpm below 10,000 feet except as required for landing.

Nacelle anti-ice must be ON during all ground and flight operations when Icing Conditions exist or are anticipated, except during climb and cruise when the temperature is below −40°C SAT. Nacelle anti-ice must be on prior to and during descent in all icing conditions, including temperatures below −40°C SAT.

Note.—*Icing Conditions*—Icing Conditions exist when the OAT on the ground or TAT inflight is 10°C (50°F) or below and visible moisture in any form is present (such as clouds, fog with visibility of one mile or less, rain, snow, sleet, ice crystals) or standing water, slush, ice, or snow is present on the ramps, taxiways, or runways."

B. Within one year from the effective date of this AD, unless already accomplished, provide N_1 indication that will warn the flight crew that the nacelle/engine anti-icing is "ON" and N_1 is less than 45% below 10,000 feet or is less than 50% N_1 above 10,000 feet altitude.

Note.—Boeing is planning to release Service Bulletin 747–77–2060 in January 1983. This Service Bulletin will describe the installation of a Low N_1 RPM warning system.

C. Alternate means of compliance with the AD which provide an equivalent level of safety may be used when approved by the Manager, Seattle Area Aircraft Certification Office, FAA Building, Boeing Field, Seattle, Washington, 98108.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble the FAA has determined that this document involves a proposed regulation that is not major under the provisions of Executive Order 12291. It has been further determined that this proposed regulation is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the draft regulatory evaluation for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified above under the caption **"FOR FURTHER INFORMATION CONTACT."** In addition, it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities since it involves few, if any, small entities.

Issued in Seattle, Washington on September 20, 1982.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 82–ANE–17]

Airworthiness Directives; Detroit Diesel Allison, Model 250–C20, –C20B, –C20C(T63–A–720), –B17, –B17B, and –B17C Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) superseding AD 77–18–03. The new AD requires inspecting and replacing slotted third stage turbine wheels installed in Detroit Diesel Allison (DDA) Model 250–C20, –C20B, –C20C(T63–A–720), –B17, –B17BN, and –B17C engines and restricts the N1 and N2 operating ranges. The proposed Ad is needed to prevent possible partial blade and/or shroud separation of slotted third stage turbine wheels.

DATES: Comments must be received on or before October 30, 1982.

ADDRESSES: Send comments on the proposed AD in duplicate to: Federal Aviation Administration, Office of Regional Counsel, Attn: Rules Docket No. 82–ANE–17, 12 New England Executive Park, Burlington, Massachusetts 01803.

The applicable service bulletins may be obtained from: Detroit Diesel Allison, Division of General Motors Corporation, Indianapolis, Indiana 46206.

A copy of the service bulletin[1] is contained in the Rules Docket at the above FAA address:

FOR FURTHER INFORMATION CONTACT: Mr. Royace Prather, Chicago Aircraft Certification Office, ACE–140C, FAA, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694–7132.

SUPPLEMENTARY INFORMATION: The FAA has determined that slotted third stage turbine wheels, whether full or center slot, crimped or uncrimped, have encountered partial blade and/or shroud separation before reaching their scheduled life limit of 4,550 operating hours. This partial blade and/or shroud separation can result in loss of engine power. Detroit Diesel Allison (DDA) issued Commercial Engine Alert Bulletin CEB–A–1174/1146 on April 20, 1981, which requires inspecting and replacing slotted third stage turbine wheels per a phase-down schedule. Additionally, CEB–A–1174/1146 requires that all slotted third stage wheels not be operated between 90 percent and 98 percent N2 (including autorotation and flight idle) except during transients, while maintaining safe flight practices, and restricts engine N1 speeds during ground operation. Compliance to date with the N1/N2 operating restrictions, reduced life limits and required inspections has significantly reduced the occurrence of partial blade and/or shroud separations. However, an AD is being proposed to require mandatory compliance with CEB–A–1174/1146 to preclude the possibility of engine power loss resulting from operating slotted third stage turbine wheels to their life limit and to preclude operations in the restricted N1/N2 ranges.

---

[1] Bulletin filed as part of original document.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire.

Information on the economic, environmental, and energy impact that might result because of adoption of the proposed rule is requested. Communications should identify the regulatory docket number and be submitted in duplicate to the New England Regional Office address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of the proposed AD will be filed in the Rules Docket.

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, and Safety.

The Proposed Amendment

Accordingly, the FAA proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new AD:

Detroit Diesel Allison: Applies to all Model 250–C20, –C20B, –C20C(T63–A–720), B17,–B17B, and –B17C engines equipped with the following slotted third stage turbine wheels:

Part No.	Type of shroud
6867113	Full slot.
6868633	Full slot.
6896863	Crimped full slot.
6898551	Center slot.
6898567	Center slot.
6898733	Center slot.
6898743	Center slot.
6898753	Center slot.
6898763	Center slot.
6899823	Crimped full slot.
6899384	Crimped full slot.
6899405	Crimped Center slot.
6899415	Crimped Center slot.
6899416	Crimped Center slot.
6899417	Crimped Center slot.
6899418	Crimped Center slot.
6899419	Crimped center slot.

Accomplish the following to prevent possible engine power loss resulting from partial blade and/or shroud separation of slotted third stage turbine wheels:

1. Compliance required, as indicated, unless already accomplished:

a. Remove, inspect, reintroduce into service where applicable, and ultimately retire affected turbine wheels in compliance with the schedule and instructions provided in Detroit Diesel Allison Commercial Engine Alert Bulletin CEB–A–1174/1146, Revision 2 dated September 15, 1982, or later FAA approved revisions.

2. Compliance required within 60 days after the effective date of this AD, unless already accomplished:

a. Placards, markings, or flight manual changes shall be provided to flight crews to avoid sustained operation of all affected engines between 90 and 98 percent N2, except during transients, while maintaining safe flight practices. This restriction also applies to autorotation practice and engine idle during engine-out simulation on multiengine aircraft.

b. During all ground operation of affected turbine wheels installed in 250–C20, –C20B, –C20C(T63–A–720) engines, the engine N1 speed must be maintained at ground idle, except during transient operation, when performing required operational checks, or in high or gusty wind conditions, or where safety would be adversely affected. Placards, markings, or flight manual changes shall be used to advise flight crews of the ground operating restriction.

c. During all ground operation of affected turbine wheels installed in 250–B17, –B17B, –B17C engines, the engine N2 speed must be maintained below 90 percent N2 r.p.m., except during transient operation, when performing required operational checks, or in high or gusty wind conditions, or where safety would be adversely affected. Placards, markings, or flight manual changes shall be used to advise flight crews of the ground operating restriction.

Upon request of the operator, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Chicago Aircraft Certification Office, FAA, Central Region. The manufacturer's specifications and procedures identified and described in this directive are available upon request to Detroit Allison, Division of General Motors Corporation, Indianapolis, Indiana 46206. These documents may also be examined at the New England Regional Office, 12 New England Executive Park, Burlington, Massachusetts 01803. A historical file on this AD is maintained by the FAA at the New England Regional Office.

This proposed AD will supersede Amendment 39–3011, 42 FR 43969, AD 77–18–03.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—The FAA has determined that this document involves a proposed regulation which is not considered to be major under Executive Order 12291 or significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11034: February 26, 1979). It is certified that the final rule will not, at promulgation, have a significant economic impact on a substantial number of small entities because the cost of the action is less than $5,000 per engine which is nominal compared to the overall cost of the aircraft involved or the cost of rebuilding the entire engine if the correction is not made in time.

A draft regulatory evaluation prepared for this document is contained in the public docket, and a copy may be obtained by writing to: FAA, Office of Regional Counsel, Attn: Rules Docket No. 82–ANE–17, 12 New England Executive Park, Burlington, Massachusetts 01803.

Issued in Burlington, Massachusetts on September 20, 1982.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

15 CFR Part 806

Benchmark Survey of U.S. Direct Investment Abroad—1982

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Proposed rule.

SUMMARY: Written public comments are solicited on the following proposed rule change which provides for the conduct of a statistical survey, the BE–10, Benchmark Survey of U.S. Direct Investment Abroad—1982, as required by the International Investment Survey Act of 1976.

DATE: Written comments must be received by BEA on or before November 29, 1982.

ADDRESS: Written comments should be addressed to the U.S. Department of Commerce Bureau of Economic Analysis, International Investment Division (BE–50), Washington, D.C. 20230. All comments in response to this notice will be available for public inspection from 8:00 to 4:00 p.m. in room 608, 1401 K Street NW., Washington, D.C.

Draft report forms for carrying out the survey have been prepared and are available from BEA. All requests for copies of the draft forms must be in writing to the above address; telephone requests will not be accepted.

FOR FURTHER INFORMATION CONTACT: George R. Kruer, Chief, International Investment Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230, (202) 523–0657. (Do not call to request draft forms; such requests must be in writing as prescribed above.)

SUPPLEMENTARY INFORMATION: The International Investment Survey Act of 1976, 22 U.S.C. 3101–3108, requires that a benchmark survey of U.S. direct investment abroad be conducted

covering 1982. The last such survey covered 1977.

The draft report forms are similar in content to those utilized for the 1977 BE–10 survey, although a sizable number of items have been dropped and a number of items have been added. The major changes are: (1) The threshold reporting level for individual foreign affiliates is being increased to $3,000,000 from the $500,000 level used in 1977. This will significantly reduce the reporting burden for respondents. (2) In the 1977 survey, a BE–10B BANK was not required for indirectly owned foreign bank affiliates. Under the rules as proposed for the 1982 survey, a BE–10B BANK report will be required for foreign bank affiliates that are more than 50 percent indirectly owned. (3) Reports may be made for a business enterprise's fiscal year rather than for a calendar year. (4) The list of industry codes has been expanded slightly to include more codes for service industries.

The change in the definition of "U.S. Reporter" is for clarification purposes only and is not intended to change the scope of the definition.

The Bureau of Economic Analysis has determined that these proposed rule changes are not "major" under Executive Order 12291. The public use burden will be undertaken within the Department of Commerce proposed FY 1983 Information Collection Budget ceiling.

Regulatory Flexibility Act—The provisions of the Regulatory Flexibility Act relating to preparation of an initial regulatory flexibility analysis are not applicable to these proposed rule changes because they will not have a significant economic impact on a substantial number of small entities. The increase in the exemption level will eliminate reporting for most small businesses.

Accordingly, the General Counsel, Department of Commerce, has certified under provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that these proposed rule changes will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 15 CFR Part 806

Economic statistics, Foreign investment in the United States, Penalties, Reporting requirements, United States investments abroad.

Part 806 is therefore modified as set forth below.

George Jaszi,

Director, Bureau of Economic Analysis.

15 CFR Part 806 is amended as follows:

Authority: 5 U.S.C. 301, 22 U.S.C. 3101–3108, and Executive Order 11961.

In § 806.14(a), the present paragraph (2) is revised to read as follows:

§ 806.14 U.S Direct Investment Abroad.

(a) *Specific definitions.* * * *

(2) "U.S. Reporter" means the U.S. person which has direct investment in a foreign business enterprise, including a branch. If the U.S. person is an incorporated business enterprise, the U.S. Reporter is the fully consolidated U.S. domestic enterprise consisting of (i) the U.S. corporation whose voting securities are not owned more than 50 percent by another U.S. corporation, and (ii) proceeding down each ownership chain from that U.S. corporation, any U.S. corporation (including Domestic International Sales Corporations) whose voting securities are more than 50 percent owned by the U.S. corporation above it.

* * * * *

2. Section 806.16 is revised to read as follows:

§ 806.16 Rules and regulations for BE–10, Benchmark Survey of U.S. Direct Investment Abroad—1982.

A BE–10, Benchmark Survey of U.S. Direct Investment Abroad, will be conducted covering 1982. All legal authorities, provisions, definitions, and requirements contained in §§ 806.1 through 806.13, 806.14(a), (b), (c), (d) and (g)(2) are applicable to this Survey. Specific additional rules and regulations for the BE–10 Survey concerning who must report and forms required are given below.

(a) *Basic requirement*—BE–10 report is required from every U.S. person having a foreign affiliate—that is, every U.S. person having direct or indirect ownership or control of at least 10 per centum of the voting stock of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise—at any time during the year ending December 31, 1982, or, if the U.S. person is a business enterprise, at any time during its 1982 fiscal year. A business enterprise's 1982 fiscal year is the enterprise's financial reporting year that has an ending date in calendar year 1982. For a person that does not have a financial reporting year, or does not have a financial reporting year ending in calendar year 1982, its 1982 fiscal year is deemed to be the same as calendar year 1982. Reports are required even though the foreign business enterprise may have been established, acquired, seized, liquidated, sold, expropriated, or inactivated during the reporting period.

(b) *Form BE–10A (Report for U.S. Reporter).*—(1) *Filing*—A completed Form BE–10A is required from each U.S. Reporter (see definition). Exception: When a U.S. business enterprise owns a foreign affiliate and the U.S. business enterprise is owned more than 50 per centum by a U.S. individual, the report should be filed by, and Form BE–10A should be for, the business enterprise rather than the individual. Direct transactions or positions, if any, with the foreign affiliate by the individual must be included in the U.S. business enterprise's report.

(2) *Partial exemption when all foreign affiliates are exempt*—When the U.S. Reporter has foreign affiliates, but all are exempt from filing Form BE–10B, then only item 1 of Form BE–10A, and Form BE–10A Supplement, which lists exempt foreign affiliates, must be completed and filed.

(3) *Partial exemption based on type of reporter*—U.S. Reporters which are religious, charitable, or other nonprofit organziations and individuals who directly own a foreign affiliate, are required to file a Form BE–10A, but are exempt from completing Part II, Financial and Operating Data of U.S. Reporter, of the form.

(c) *Form BE–10B (Report for Foreign Affiliate).*

(1) *Filing*—A U.S. person is required to file one Form BE–10B for each foreign affiliate which is not exempt pursuant to paragraph (c)(2) of this section. (Under those limited conditions where foreign affiliates may be consolidated, the consolidated entity is considered to be one foreign affiliate.) To determine whether, for purposes of reporting, a given foreign business enterprise is considered as its foreign affiliate, a U.S. person should sum its percentages of voting ownership through all limes, or chains of ownership, direct and indirect. If the resulting sum is at least 10 percent, then the enterprise is the U.S. person's foreign affiliate and, unless otherwise exempt, must be reported. In the case of a line of indirect ownership, the U.S. person's percentage ownership in a given foreign business enterprise should be computed as its direct ownership percentage in the first foreign business enterprise in the chain, multiplied by that first enterprise's direct ownership percentage in the second enterprise in the chain, multiplied by the second enterprise's direct ownership percentage in the third enterprise in the chain, multiplied by the corresponding percentages for all other intervening enterprises in the chain, multiplied by the last intervening enterprise's direct ownership percentage in the given

foreign business enterprise. To illustrate, suppose that the U.S. person owned 50 percent of foreign business enterprise A directly, and that A owned 75 percent of foreign business enterprise B that, in turn, owned 80 percent of foreign business enterprise C. Then the U.S. person's percentage of indirect ownership of B would be 37.5 percent (the product of the first two percentages), its indirect ownership of C would be 30 percent (the product of all three percentages), and B and C (as well as A) would be considered the U.S. person's foreign affiliates.

(2)(i) *Total exemption*—A Form BE–10B need not be filed if the foreign affiliate's total assets, sales or gross operating revenues excluding sales taxes, and net income after income taxes, are each (all three are) less than $3,000,000.00 (positive or negative), and the foreign affiliate does not own another foreign affiliate for which a Form BE–10B must be filed. If the latter condition is not met, then Form BE–10B must be filed for the foreign affiliate holding the equity interest regardless of the value of its assets, sales or income. That is, all affiliates upward in a chain of ownership must be reported.

(ii) An affiliate's receivables due from its parent may not be netted against total assets when applying the exemption criteria.

(3) *Number of Form's BE–10B required*—If two or more U.S. Reporters jointly own a foreign affiliate, directly or indirectly, each U.S. Reporter must submit a Form BE–10B for the affiliate. The U.S. Reporter having the highest percentage ownership (direct or indirect combined) in the foreign affiliate must file a Form BE–10B in which only Part I, and Part III, if there is direct ownership, positions, or transactions, have been completed. If the percentage of ownership is the same, the U.S. Reporters must decide among themselves which one will submit the complete report.

(4) *Foreign affiliate consolidation*—In cases where the recordkeeping system of the foreign affiliates makes it impossible or extremely difficult to file a separate report for each foreign affiliate, a U.S. Reporter may consolidate affiliates in the same country when the following conditions apply:

(i) The affiliates are in the same BEA 3-digit industry, as defined in the *Direct Investment Industry and Foreign Trade Classifications Booklet;* or

(ii) The affiliates are integral parts of the same business operation. For example, if German affiliate A manufactures tires and a majority of its sales are to German affiliate B which produces autos, then affiliates A and B may be consolidated.

In all other situations, the U.S. Reporter should call this office at (202) 523–0632 for guidance. Under no circumstances may a U.S. Reporter consolidate foreign affiliates in different countries.

(d) *Relationship between Forms BE–10A and BE–10B.* The term "U.S. Reporter" as defined means the fully consolidated U.S. domestic enterprise; therefore, on Form BE–10B, when data on trade and financial relationships between the U.S. Reporter and the foreign affiliate are requested, the data must reflect the foreign affiliate's relationship with the entire U.S. enterprise, not merely with one division or part.

(e) *Specialized report forms for banks*—Specialized report forms have been adopted for banks, that is, for business enterprises over 50 percent of whose total revenues are generated by activities classified in BEA industry code 600, because much of the information on banks foreign activities which is requested on the standard forms is already being reported to other agencies of the Federal Government. The specialized report forms are designed to yield only such additional information as is deemed necessary. Use of specialized Forms BE–10A BANK and BE–10B BANK rather than the standard forms is at the discretion of BEA; in situations where their possible use is not clear-cut, permission must be secured from BEA in advance of filing.

(1) A specialized report form—BE–10A BANK—has been developed for reporting by a U.S. Reporter which is a bank or a bank holding company. It is not to be used by a U.S. Reporter which may technically be classified as a bank holding company because of an interest in a banking activity, but which has over 50 percent of its revenues generated by non-bank activities (Activities of subsidiaries which may not be banks but which provide support to the parent company, such as real estate subsidiaries set up to hold the office building occupied by the parent company, are considered bank activities.)

(2) A specialized report form—BE–10B BANK—has also been developed for reporting of a foreign affiliate which is a bank and in which the U.S. Reporter holds a direct ownership interest, or an indirect interest of more than 50.0 percent. Incorporated foreign bank affiliates in which the U.S. Reporter holds a direct equity interest, or an indirect equity interest of more than 50.0 percent, must be separately reported. All branch banks of the U.S. Reporter in a given foreign country must be consolidated on one Form BE–10B Bank even if it is the Reporter's practice to report data for these branches separately on Federal Reserve Form FR105f or on Comptroller of the Currency Form CC7610–09.

(3) A foreign bank affiliate of the U.S. Reporter in which the U.S. Reporter holds an indirect ownership interest of 50.0 percent or less may be treated as an exempt foreign affiliate and need not be separately reported on Form BE–10B Bank, but must be listed on Form BE–10A Supplement.

(4) A U.S. reporter which is a bank, but which has a nonbank foreign affiliate, must file a Form BE–10A Bank for itself and a standard Form BE–10B for the nonbank foreign affiliate.

(5) A U.S. reporter which is not a bank, but which has a bank foreign affiliate, must file a standard Form BE–10A Bank for itself and a Form BE–10B Bank for the bank foreign affiliate.

(6) Banks located on U.S. military bases abroad and servicing base personnel are not considered "foreign" and a Form BE–10B Bank should *not* be filed for them.

(7) The specialized report forms, where their use is permitted, stand in place of the standard forms, and the regulations and instructions should be so construed.

(f) *Due date*—BE–10 reports containing both Form BE–10A and Form(s) BE–10B are due on the following dates:

May 31, 1983—U.S. Reporter required to file less than 20 Forms BE–10B
June 30, 1983—U.S. Reporter required to file from 20 to 99 Forms BE–10B
July 31, 1983—U.S. Reporter required to file 100 or more Forms BE–10B

(g) Inquiries concerning the BE–10 Survey should be directed to: U.S. Department of Commerce, Bureau of Economic Analysis (BE–50,SSB), Washington, D.C. 20230, phone 202–523–0632.

[FR Doc. 82–27880 Filed 9–29–82; 8:45 am]
BILLING CODE 3510–06–M

DEPARTMENT OF STATE

22 CFR Part 51

[Docket No. 178]

Validity Period of Passports; Passport Fees; Passport Execution Fee

AGENCY: State Department.

ACTION: Proposed rule.

SUMMARY: The Department proposes to double the validity period of passports to 10 years for adults 18 years and over, and to set the validity period at 5 years

for minors under 18 years. The Department further proposes to set at $35.00 the fee collected for issuance of passports having a validity or potential validity period of 10 years and to set at $20.00 the fee for passports having a validity or potential validity period of 5 years. These amendments, which represent only the second increase in passport fees since 1932, are necessary in order to comply with the cost recovery requirements of 31 U.S.C. 483a and to implement the provisions of Pub. L. 97-241 of 1982 which amend Sections 214 and 217a of Title 22, United States Code. The Department also proposes to increase the fee for the execution of a passport application and the related fee for the examination of a passport application executed before a foreign official to $7.00. Until adopted in final form, current regulations remain in effect.

DATE: Comments must be received by November 29, 1982.

ADDRESS: Send comments to the Office of Citizenship Appeals and Legal Assistance, Passport Services, Bureau of Consular Affairs, Department of State, Washington, D.C. 20520, ATTN: PPT/C, room 5813.

FOR FURTHER INFORMATION CONTACT: William B. Wharton on (202) 632-0801.

SUPPLEMENTARY INFORMATION: Currently, all passports issued are valid for a period of 5 years unless limited by the Secretary of State to a shorter period of time. As amended by Pub. L. 97-241, 22 U.S.C. 217a now provides that passports issued subsequent to the effective date of the amendment shall be valid for a period of 10 years from the date of issuance except where limited by the Secretary to a shorter period. Such limitations may be made in an individual case, or on a general basis pursuant to regulation. As amended, the regulations would provide that all regular passports issued to persons 18 years old and above would be valid or potentially valid for 10 years. Those passports issued to persons under 18 years of age would be valid or potentially valid for 5 years. Diplomatic, Official and other passports for which no fee is collected also would be valid or potentially valid for 5 years.

Passports issued to persons under the age of 18 will be valid for a period of 5 years. A minor does not need to participate in his own passport application until the age of 13 years, and does not attain full legal competence until the age of 18 years. By statute (8 U.S.C. 1101(a) (30)) a passport attests not only to the bearer's nationality but also to his identity. Persons under the age of 18 years go through very rapid changes in physical appearance. Setting the validity period of 5 years for minors will ensure that the passport serves the purpose for which it was designed. It will also ensure the continued orderly administration of the regulations governing the issuance and denial of passports to minor children.

Public Law 97-241 also amends the provisions of 22 U.S.C. 214 by delegating to the Secretary the authority to establish by regulation the fee which must be collected for the issuance of a passport. That fee has remained unchanged since 1968, at which time it was established at $10.00. The purpose of the passport fee is to recover the costs of issuance of passports to United States citizens and consular services rendered to them abroad. The present passport fee does not meet those costs. Therefore, the Secretary has determined that it is necessary to increase the fee of a passport issued for 5 years to $20.00, and to establish the fee for a passport issued for 10 years at $35.00.

The execution fee is designed to cover the cost of the execution of the passport application by the personal appearance of the applicant. The Secretary has determined that it is necessary to increase this fee from $5.00 to $7.00. The associated fee for examination of a passport application executed before a foreign official will also be raised from $5.00 to $7.00.

In accordance with 5 U.S.C. 605(b), the Secretary of State certifies that the rule will not have a significant economic impact on a substantial number of small entities.

This rule is not a major rule within the meaning of section 1(b) of E.O. 12291.

List of Subjects in 22 CFR Part 51

Administrative practice and procedure, Passports and visas.

PART 51—PASSPORTS

Accordingly, it is proposed to amend Title 22, Code of Federal Regulations, Part 51, as set forth below:

1. Section 51.4 of Part 51, Chapter I is amended by revising paragraphs (b) and (e) and by adding paragraph (f) to read as follows:

§ 51.4 Validity of passports.

* * * * *

(b) *Period of validity of a regular passport.* A regular passport issued on or after —— to an applicant 18 years of age or older is valid for 10 years from date of issue unless limited by the Secretary to a shorter period. A regular passport issued on or after —— to an applicant under the age of 18 years is valid for 5 years from date of issue unless limited by the Secretary to a shorter period. An outstanding passport issued before —— remains valid for 5 years from date of issue unless limited by the Secretary to a shorter period.

* * * * *

(e) *Period of a Regular Passport issued for no fee:* A regular passport for which payment of the fee has been excused is valid for a period of 5 years from the date of issue unless limited by the Secretary to a shorter period.

(f) *Limitation and extension of validity.* The validity period period of any passport may be limited by the Secretary to less than the normal validity period. Applications for extension of passports limited to less than the normal full validity period must be made in writing and must be submitted, with the passport, to a passport issuing Office. In no event may a passport be extended beyond the normal periods of validity prescribed for such passport by paragraphs (b) through (e) of this section.

2. Section 51.61 of Part 51, Chapter I is revised to read as follows:

§ 51.61 Statutory fees.

(a) *Passport fee.* The fee for a U.S. passport is (1) $35.00 when the passport issued will be valid or potentially valid for a period of 10 years from date of issue; or (2) $20.00 when the passport issued will be valid or potentially valid for a period of 5 years from date of issue; and (3) the passport fee shall be paid by all applicants except as provided by § 51.63(a).

(b) *Execution fee.* Except as provided in § 51.63(b), the fee for execution of an application for a U.S. passport is $7.00, which shall be remitted to the U.S. Treasury when an application is executed before a Federal official, but which may be collected and retained by any State official before whom an application is executed. The execution fee shall be paid only when an application must be executed under oath or affirmation as prescribed by § 51.21(a).

(Sec. 1, 44 Stat. 887; Sec. 1, 41 Stat. 750; Sec. 2, 44 Stat. 887; Sec. 4, 63 Stat. 111, as amended (22 U.S.C. 211a, 214, 217a, 2658); E.O. 11295, 36 FR 10603; 3 CFR 1966-70 Comp. p. 507)

Dated: September 10, 1982.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 1

[FHWA Docket No. 82-13]

Limitation on Federal Participation— Attorney Fees Awarded Against a State

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would amend regulations concerning limitations on the participation of Federal funds in costs incurred by States to provide that Federal-aid highway funds may not participate in payments of attorney fees paid by a State to an opposing party in litigation. This amendment would clarify FHWA policy with regard to Federal participation in attorney fees and would implement current statutory and administrative restrictions on such participation.

DATE: Comments must be received on or before November 29, 1982.

ADDRESS: Comments should be sent to FHWA Docket No. 82-13, Federal Highway Administration, HCC-10, Room 4205, 400 Seventh Street, SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m. ET, Monday through Friday. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Reid Alsop, Office of the Chief Counsel, 202-426-0800, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: Current FHWA regulations at § 710.304(b)(3) provide that FHWA may not participate in "a property owner's attorney fees * * * or similar costs which are paid by the SHD [State Highway Department] in connection with acquisition of rights-of-way" except in the limited situations set forth in section 304 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4654). This prohibition applies "whether or not costs are included in court judgments or awarded as court costs in litigated cases." This reflects both a longstanding FHWA policy against participating in attorney fees that may be paid by a State to an opposing party in litigation, and the requirements of Office of Management and Budget (OMB) Circular A-87.

The absence of any other FHWA regulation that discusses FHWA participation in attorney fees paid to an opposing party is due to the lack, until recently, of any claims or requests for participation in such costs.

The proposed amendment would prohibit Federal-aid highway funds from participating in any payment or award of attorney fees to a party in litigation against a State, except as provided in § 710.304(b)(3). This would extend the prohibition concerning payments of attorney fees in eminent domain proceedings, contained in § 710.304(b)(3), to all State litigation.

including cases where a State and the FHWA are co-defendants, and would eliminate any ambiguity that might exist concerning FHWA participation in such costs. This extension would clarify and promulgate current FHWA policy. It is considered necessary because there is some indication that increasingly States are being asked to pay for an opposing party's attorney fees.

The proposed rule is considered to be a reasonable limitation on the expenditure of Federal-aid highway funds and is similar to numerous other such limitations contained in FHWA regulations. Such limitations have been upheld by the courts on several occasions, most notably in "People of the State of California v. U.S.," 547 F. 2d 1388, 1390 (9th Cir. 1977). See Also "People of the State of California v. U.S.," 551 F. 2d 843 (Ct. Cl. 1977); "State of Nebraska Department of Roads v. Tiemann," 510 F. 2d 446 (8th Cir. 1975); "Michigan State Highway Commission v. Coleman," Civ. No. 78–581 (W.D. Mich. 1978); "Commonwealth v. Connor," 248 F. Supp. 656 (D. Mass.) aff'd 366 F. 2d 778 (1st Cir. 1966); and "Louisiana Department of Highways v. U.S.," 604 F. 2d 1339, (Ct. Cl. 1979).

The award of attorney fees against the Federal government is governed by 28 U.S.C. 2412. Prior to the amendment of § 2412, by the Equal Access to Justice Act (Title II of Pub. L. 96–481), it provided that attorney fees could not be awarded against the Federal government unless expressly provided by statute. Section 2412, as amended, now provides for the recovery of attorney fees against the Federal government in proceedings "pending on or commenced on or after October 1, 1981".

However, 28 U.S.C. 2412 clearly does not require that Federal grant statutes, such as those governing the Federal-aid highway program in 23 U.S.C., be revised or interpreted to provide that a State's costs attributable to an opposing party's attorney fees be included as part of a project's cost for purposes of Federal participation.

Congress has specifically addressed the question of the liability of the United States for attorney fees in § 2412. As amended it appears that its provisions can render the FHWA and other Federal agencies directly liable for attorney fees after October 1, 1981.

Since Congress had enacted specific legislation governing the Federal government's liability for attorney fees, we do not believe that the longstanding Federal and FHWA policy against including an opposing party's attorney fees in project costs should be reversed. Such a reversal would allow Federal participation in such fees indirectly, as a project cost, conflict with policies designed to insure cost effective and efficient project management, and intrude in an area in which Congress has already acted.

Moreover, OMB Circular A–87, which establishes principles and standards applicable to Federal grants and contracts with State and local governments, provides, in paragraph B16 of Attachment B, that legal expenses for the prosecution of claims against the Federal Government are not allowable grant costs, and hence are not eligible for Federal participation. The proposed amendment would implement this provision of the OMB Circular.

Under certain circumstances FHWA may participate in attorney fees paid by a State to defend itself. These are set forth in 23 CFR 140, Subpart E, and 23 CFR 712.408 and are not affected by this proposed change.

The FHWA has determined that this document contains neither a major proposal under Executive Order 12291 nor a significant proposal under DOT regulatory procedures. The economic impacts of this action would be minimal. Although certain project related costs incurred by State highway departments would not be eligible for Federal participation, the amount of grant money available to the States would not be diminished in any way. Accordingly, under the criteria of the Regulatory Flexibility Act, it is certified that this action, if promulgated, will not have a significant economic impact on a substantial number of small entities. For the foregoing reasons, a full regulatory evaluation of this proposal is not required.

PART 1—GENERAL

In consideration of the foregoing, it is proposed that 23 CFR 1.9(a) be amended by adding a third sentence at the end thereof to read as follows:

§ 1.9 Limitation on Federal participation.

(a) * * * Except as provided in § 710.304(b)(3) of this chapter, Federal-aid funds shall not participate in any award or payment of attorney fees paid by a State to an opposing party in litigation.

* * * * *

BILLING CODE 4910–22–M

SELECTIVE SERVICE SYSTEM

32 CFR Parts 1656 and 1660

Selective Service Regulations; Alternative Service

AGENCY: Selective Service System.

ACTION: Proposed rule.

SUMMARY: Procedures to implement the program of alternative service under section 6(j) of the Military Selective Service Act (50 U.S.C. App. 456(j)) are revised to assure greater fairness and efficiency in its administration.

DATES: Comment Date: Written comments received on or before October 30, 1982 will be considered. Effective date: Subject to the comments received the amendments are proposed to become effective upon publication in the **Federal Register** of a final rule not earlier than November 1, 1982.

ADDRESS: Written comment to: Selective Service System, Attn: General Counsel, Washington, D.C. 20435.

FOR FURTHER INFORMATION CONTACT: Henry N. Williams, General Counsel, Selective Service System, Washington, D.C. 20435 Phone: (202) 724–1167.

SUPPLEMENTARY INFORMATION: These amendments to Selective Service Regulations are published pursuant to section 13(b) of the Military Selective Service Act (50 U.S.C. App. 463(b)). These Regulations implement section 6(j) of the Military Selective Service Act (50 U.S.C. App. 456(j)). This proposal replaces the proposal appearing at 47 FR 24599 (June 7, 1982).

Various sections of 32 CFR Chapter XVI will be revised in separate rule making to bring them in consonance with this proposed rule.

The Proposed Concept of Alternative Service (46 FR 6998, January 22, 1981) has no stature and should not be considered in interpreting this proposal.

Interested persons are invited to submit written comments on the proposed regulations. All written comments filed in response to this notice of proposed rulemaking will be

available for public inspection in the office of the General Counsel from 9:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

As required by Executive Order 12291, I have determined that this proposed rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), I have determined that these regulations do not have significant economic impact on a substantial number of small entities.

Thomas K. Turnage,

Director.

PART 1660 [REMOVED]

32 CFR Part 1660, Alternate Service, is removed.

32 CFR Part 1656 is added to read as follows:

PART 1656—ALTERNATIVE SERVICE

Sec.

1656.1 Purpose; definitions.
1656.2 Order to perform alternative service.
1656.3 Responsibility for administration.
1656.4 Alternative Service Office: Jurisdiction and authority.
1656.5 Employment development
1656.6 Prohibited job assignments.
1656.7 Review of job assignments—Civilian Review Board.
1656.8 Employer responsibilities.
1656.9 Employment agreements.
1656.10 Alternative service worker's responsibilities.
1656.11 Job placement.
1656.12 Job performance standards and sanctions.
1656.13 Reassignment.
1656.14 Postponement of reporting date.
1656.15 Suspension of order to perform alternative service because of hardship to dependents.
1656.16 Early release—grounds and procedures.
1656.17 Administrative complaint process.
1656.18 Computation of creditable time.
1656.19 Completion of alternative service.
1656.20 Expenses for emergency medical care.

Authority: Sec. 6(j) Military Selective Service Act; 50 U.S.C. Appendix 456(j).

§ 1656.1 Purpose; definitions.

(a) The provisions of this part govern the administration of registrants in Class 1–W and the Alternative Service Program.

(b) The definitions of this paragraph shall apply in the interpretation of the provisions of this part:

(1) *Alternative Service (AS).* Civilian work performed in lieu of military service by a registrant who has been classified in Class 1–W.

(2) *Alternative Service Office (ASO).* An office to administer the Alternative Service Program in a specified geographical area.

(3) *Alternative Service Office Manager (ASOM).* The head of the ASO.

(4) *Alternative Service Work.* Civilian work which the Director deems appropriate and which contributes to the maintenance of the national health, safety or interest.

(5) *Alternative Service Worker (ASW).* A registrant ordered to perform alternative service (Class 1–W).

(6) *Civilian Review Board.* A board to hear appeals by ASWs on certain job assignments and reassignments.

(7) *Creditable Time.* Time that is counted toward an ASW's fulfillment of his alternative service obligation.

(8) *Director.* The Director of Selective Service, unless used with a modifier.

(9) *Employer.* Any institution, firm, agency or corporation engaged in lawful activity in the United States, its territories or possessions or the commonwealth of Puerto Rico that has been approved by Selective Service to employ ASWs.

(10) *Job Bank.* A current inventory of alternative service job opeinings.

(11) *Job Matching.* A comparison of the ASW's work experience, education, training, special skills, and work preferences with the requirements of the positions in the job bank.

(12) *Job Placement.* Assignment of the ASW to alternative service work.

(13) *Open placement.* The assignment of ASWs without employer interview to employers who have agreed to employ all ASWs assigned to them up to an agreed number.

§ 1656.2 Order to perform alternative service.

The local board of jurisdiction shall order any registrant who has been classified in Class 1–O–Q to perform alternative service at a time and place to be specified by the Director.

§ 1656.3 Responsibility for administration.

(a) The Director in the administration of the Alternative Service Program shall establish and implement appropriate procedures to:

(1) Assure that the program complies with the Selective Service Law;

(2) Provide information to ASWs about their rights and duties;

(3) Find civilian work for ASWs;

(4) Place ASWs in jobs approved for alternative service;

(5) Monitor the work performance of ASWs placed in the program;

(6) Order reassignment and authorize job separation as necessary;

(7) Issue certificates of completion;

(8) Specify the location of Alternative Service Offices;

(9) Specify the geographical area in which the ASOs shall have jurisdiction over ASWs;

(10) Refer to Department of Justice, when appropriate, any ASW who fails to perform satisfactorily his alternative service;

(11) Perform all other functions necessary for the administration of the Alternative Service Program; and

(12) Delegate any of his authority to such office, agent or person as he may designate and provide as appropriate for the subdelegation of such authority.

(b) The region Director shall be responsible for the administration and operation of the Alternative Service Program in his Region as prescribed by the Director.

(c) The State Director shall perform duties for the administration and operation of the Alternative Service Program in his State as prescribed by the Director.

(d) The ASOM shall perform duties for the administration and operation of the Alternative Service Program as prescribed by the Director.

(1) The ASO shall be an office of record that is responsible for the administration and operation of the Alternative Service Program in its assigned geographical area of jurisdiction.

(2) The staff of each ASO shall consist of as many compensated employees as shall be authorized by the Director.

(e) The manager of an area office shall perform duties for Alternative Service as prescribed by the Director.

§ 1656.4 Alternative Service Office: Jurisdiction and authority.

(a) Jurisdiction over the ASW will be transferred from the area office immediately after his classification in Class 1–W to the ASO that administers the Alternative Service Program in the area in which he is assigned to perform alternative service.

(b) The ASO shall:

(1) Evaluate and approve jobs and employers for Alternative Service;

(2) Issue such orders as are required to schedule the ASW for job placement;

(3) Issue such orders as are required to schedule the ASW for job interviews;

(4) Order the ASW to report for alternative service work;

(5) Monitor the ASW's job performance;

(6) Issue a certificate of satisfactory completion of the ASW's Alternative Service obligation;

(7) Return the ASW to the jurisdiction of the area office from which he was directed to perform Alternative Serivce; and

(8) Perform such other actions as necessary to administer the Alternative Service Program.

§ 1656.5 Employment development.

(a) The Director will determine which civilian employment programs or activities contribute to the maintenance of the national health, safety or interest and are appropriate for Alternative Service work.

(b) The Director may establish priorities in the assignment of ASWs to types of Alternative Service work.

(c) An organization desiring to employ ASWs to perform Alternative Service is encouraged to submit a request in writing to the Director or an ASOM for approval. Such requests will be considered at any time.

(d) Selective Service shall negotiate employment agreements with the objective of obtaining an adequate number of agreements to assure the timely placement of all ASWs. Participating employers will provide prospective job listings to Selective Service.

(e) Selective Service shall also negotiate employment agreements with eligible employers wherein the employer will agree to hire a specified number of ASWs for open placement positions.

(f) An ASW may seek his own alternative service work by identifying a job with an employer he believes would be eligible for Alternative Service and by having the employer advise the ASO in writing that he desires to employ the ASW. The acceptability and priority of the job so identified will be evaluated as all others considered for ASW assignment.

§ 1656.6 Prohibited job assignments.

No ASW will be assigned to work:

(a) In such jobs as the manufacture or transportation of military ammunition, aircraft, equipment, vehicles or weapons;

(b) In an activity that is illegal under the laws of the United States or a state or a municipality at the place that it is performed;

(c) Outside of the United States, its territories or possessions.

§ 1656.7 Review of job assignments—Civilian Review Board.

Any ASW who believes that his job assignment violates the provisions of § 1656.6 of this part may appeal to an Alternative Service Civilian Review Board for the district in which his assigned work is to be performed. If the Civilian Review Board finds that the assignment violates subsection 1656.6 of this part, it shall so advise the ASO that issued the assignment order, and the ASO then shall reassign the ASW. The decision of the Civilian Review Board is final unless the Director otherwise directs. Pending disposition of his appeal by the Civilian Review Board, the ASW may continue to work or he may stop working and not earn creditable time.

§ 1656.8 Employer responsibilities.

Employers participating in the Alternative Service Program are responsible for:

(a) Complying with the employment agreement with Selective Service;

(b) Providing a clear statement of duties, responsibilities, compensation and employee benefits to the ASW;

(c) Providing full-time employment for ASWs;

(d) Providing adequate supervision of ASWs in his employ; and

(e) Providing nondiscriminatory treatment of ASWs in his employ.

§ 1656.9 Employment agreements.

(a) *Nature of Agreement.* Before any ASW is placed with an employer, Selective Service and the employer shall enter into an employment agreement that specifies their respective duties and responsibilities under the Alternative Service Program.

(b) *Restrictions on Selective Service.* The Selective Service System shall not act in any controversy involving ASW's wages, hours and working conditions except to the extent any of these subjects is specifically covered in the employment agreement between Selective Service and the employer.

(c) *Investigating and Negotiating.* Whenever there is evidence that an employer appears to be violating the employment agreement, Selective Service will investigate the matter. If the investigation produces substantial evidence of violations of the employment agreement, Selective Service may negotiate a resolution of the matter with the employer within the terms of the employment agreement.

(d) *Termination of Employment Agreement.* If a resolution of a dispute cannot be reached by negotiation within a reasonable time, the Selective Service System shall terminate the employment agreement and shall reassign the ASW.

§ 1656.10 Alternative service worker's responsibilities.

(a) A registrant classified in Class 1-W is required to comply with all orders issued under this part.

(b) A registrant classified in Class 1-W is liable to perform 24 months of creditable time toward completion of Alternative Service.

§ 1656.11 Job placement.

(a) Selective Service will maintain a job bank for the exclusive purpose of placing ASWs in alternative service jobs.

(b) Information supplied by the ASW about his skills and preferences will be considered by Selective Service in making job interview referrals and in making assignments of ASWs to jobs.

(c) When an ASW is hired, the ASO will issue a Job Placement Order specifying the employer, the time, date and place to report for his alternaitve service work.

(d) The ASO will normally place the ASW in an alternative service job within 30 days after classification in Class 1-W.

§ 1656.12 Job performance standards and sanctions.

(a) *Standard of Performance.* An ASW is responsible for adhering to the standards of conduct, attitude, appearance and performance demanded by the employer of his other employees in similar jobs. If there are no other employees, the standards shall conform to those that are reasonable and customary in a similar job.

(b) *Failure to Perform.* An ASW will be deemed to have failed to perform satisfactorily whenever:

(1) He refuses to comply with an order of the Director issued under this part;

(2) He refuses employment by an approved employer who agrees to hire him;

(3) His employer terminates the ASW's employment because his conduct, attitude, appearance or performance violates reasonable employer standards; or

(4) He quits or leaves his job without reasonable justification.

(c) *Sanctions for ASW's Failure to Perform.* (1) The sanctions for failure to meet his Alternative Service obligation are job reassignment, loss of creditable time during such period and referral to the Department of Justice for failure to comply with the Military Selective Service Act.

(2) Prior to invoking any of the sanctions discussed herein, the ASO will conduct a review as prescribed in § 1656.17 of all allegations that an ASW

has failed to perform pursuant to any of the provisions of § 1656.12(b).

§ 1656.13 Reassignment.

(a) *Grounds for reassignment.* Each of the following conditions may be the basis for job reassignments:

(1) An ASW experiences a change in his mental or physical condition which renders him unfit or unable to continue performing satisfactorily in his assigned job;

(2) An ASW's dependents incur a hardship which is not so severe as to justify a supension of the Order to Perform Alternative Service under § 1656.15;

(3) The employer ceases to operate an approved program or activity;

(4) The employer fails to comply with the terms and conditions of the employment agreement;

(5) Continual and severe differences between the employer and ASW remain unresolved; or

(6) The Director determines that reassignment is justified.

(b) *Who May Request Reassignment.* Any ASW may request reassignment to another job. An employer may request job reassignment of an ASW who is in his employ.

(c) *Method for Obtaining a Reassignment.* All requests for reassignment must be in writing with the reasons specified. The request may be filed with the ASO of jurisdiction at any time during an ASW's alternative service employment. An ASW must continue in his assigned job, if available, until the request for reassignment is approved.

(d) It is the responsibility of the ASW to notify the ASO promptly in writing of any grounds which could be a reason for his reassignment.

§ 1656.14 Postponement of reporting date.

(a) *General.* The reporting date in any of the following orders may be postponed in accord with this section.

(1) Report for Job Placement;

(2) Report for a Job Interview;

(3) Report to an Employer to Commence Employment.

(b) *Requests for Postponement.* A request for postponement of a reporting date specified in an order listed in paragraph (a) of this section must be made in writing and filed prior to the reporting date with the office which issued the order. Such requests must include a statement of the nature of the emergency and the expected period of its duration.

(c) *Grounds for Postponement.* An ASW may, upon presentation of the appropriate facts in his request, be granted a postponement based on one or more of the following conditions:

(1) The death of a member of his immediate family;

(2) An extreme emergency involving a member of his immediate family;

(3) His serious illness or injury; or

(4) An emergency condition directly affecting him which is beyond his control.

(d) *Basis for Considering Request.* The ASW's eligibility for a postponement shall be determined by the office of jurisdiction based upon official documents and other written information contained in his file. Oral statements made by the ASW or made by another person in support of the ASW shall be reduced to writing and placed in the ASW's file.

(e) *Duration of Postponement.* The initial postponement shall not exceed 60 days from the reporting date in the order. When necessary, the Director may grant one further postponement, but the total postponement period shall not exceed 90 days from the reporting date in the order involved.

(f) *Termination of Postponement.* (1) A postponement may be terminated by the Director for cause upon no less than ten days written notice to the ASW.

(2) Any postponement shall be terminated when the basis for the postponement has ceased to exist.

(3) It is the responsibility of the ASW promptly to notify in writing the office that granted the postponement whenever the basis for which his postponement was granted ceases to exist.

(g) *Effect of Postponement.* A postponement of the reporting date in an order shall not render the order invalid, but shall only serve to postpone the date on which the ASW is to report. The ASW shall report at the expiration or termination of the postponement.

(h) *Religious Holiday.* The Director may authorize a delay of reporting under any of the orders specified for an ASW whose date to report conflicts with a religious holiday historically observed by a recognized church, religious sect or religious organization of which he is a member. Any ASW so delayed shall report on the next business day following the religious holiday.

§ 1656.15 Suspension of Order To Perform Alternative Service Because of Hardship to Dependents.

(a) Whenever, after an ASW has begun work, a condition develops that results in hardship to his dependent as contemplated by § 1630.30(a) of this chapter which cannot be alleviated by his reassignment under § 1656.13(a) of this part, the ASW may request a suspension of Order to Perform Alternative Service. If the local board that ordered the ASW to report for Alternative Service determines he would be entitled to classification in Class 3–A, assuming that the ASW were eligible to file a claim for that class, further compliance with his order shall be suspended for a period not to exceed 365 days, as the local board specifies. Extensions of not more than 365 days each may be granted by the local board so long as the hardship continues until the ASW's liability for training and service under the Military Selective Service Act terminates.

(b) An ASW may file a request for the suspension of his Order to Perform Alternative Service with the ASO. This request must be in writing, state as clearly as possible the basis for the request, and be signed and dated by the ASW. The ASW must continue working in his assigned job until his request for the suspension of his Order to Perform Alternative Service has been approved.

(c) Local boards shall follow the procedures established in Part 1648 of this chapter to the extent they are applicable in considering a request for the suspension of an Order to Perform Alternative Service.

§ 1656.16 Early release—grounds and procedures.

(a) *General Rule of Service Completion.* An ASW will not be released from alternative service prior to completion of 24 months of creditable service.

(b) *Reasons for Early Release.* The Director may authorize the early release of an ASW whenever the ASO determines that the ASW:

(1) Has failed to meet the performance standards of available alternative service employment because of physical, mental or moral reasons;

(2) No longer meets the physical, mental or moral standards that are required for retention in the Armed Forces based on a physical or mental examination at a MEPS or other designated location;

(3) Is planning to return to school and has been accepted by such school and scheduled to enter within 30 days prior to the scheduled completion of his alternative service obligation;

(4) Has been accepted for employment and that such employment will not be available if he remains in alternative service the full 24 months. Such early release shall not occur more than 30 days before the scheduled completion of his alternative service obligation; or

(5) Has enlisted in or has been inducted into the Armed Forces of the United States.

§ 1656.17 Administrative complaint process.

(a) Whenever the ASOM learns that the ASW may have failed to perform satisfactorily his work (see § 1656.12(b)) or he receives a complaint by an employer or an ASW involving the ASW's work other than matters described in §§ 1656.6 and 1656.9(b) of this part, he shall take necessary action to:

(1) Interview, as appropriate, all parties concerned to obtain information relevant to the problems or complaints;

(2) Place a written summary of each interview in the ASW's file;

(3) Inform the persons interviewed that they may prepare and submit to him within ten days after the interview their personal written statements concerning the problem;

(4) Place such statements in the ASW's file; and

(5) Resolve the matter.

(b) The employer or ASW may seek a review of the decision under § 1656.17(a)(5) of this section. Such request must be filed in writing with the ASO, for action at the next higher level, within ten days after the date the notice of the decision is transmitted to the ASW and employer.

§ 1656.18 Computation of creditable time.

(a) Creditable time starts when the ASW begins work pursuant to an Order To Perform Alternative Service or 30 days after the issuance of such order, whichever occurs first. Creditable time will accumulate except for periods of:

(1) Work of less than 35 hours a week or an employer's full-time work week whichever is greater;

(2) Leaves of absence in a calendar year of more than 5 days in the aggregate granted by the employer to the ASW to attend to his personal affairs unless such absence is approved by the ASOM;

(3) Time during which an ASW fails or neglects to perform satisfactorily his assigned Alternative Service;

(4) Time during which the ASOM determines that work of the ASW is unsatisfactory because of his failure to comply with reasonable requirements of his employer;

(5) Time during which the ASW is not employed in an approved job because of his own fault; or

(6) Time during which the ASW is in a postponement period or his Order to Perform Alternative Service has been suspended.

(b) Creditable time will be awarded for periods of travel, job placement and job interviews performed under orders issued by Selective Service. Creditable time may be awarded for up to 10 work days of leave per year.

§ 1656.19 Completion of alternative service.

Upon completion of 24 months of creditable time served in alternative service or when released early in accordance with § 1656.16(b)(3) or (4):

(a) The ASW shall be released from the Alternative Service Program; and

(b) The Director shall issue to the ASW a Certificate of Completion and the registrant shall be reclassified in Class 4–W in accordance with § 1630.47 of this chapter.

§ 1656.20 Expenses for emergency medical care.

(a) Claims for payment of actual and reasonable expenses for emergency medical care, including hospitalization, of ASWs who suffer illness or injury, and the transportation and burial of the remains of ASWs who suffer death as a direct result of such illness or injury will be paid in accordance with the provisions of this section.

(b) The term "emergency medical care, including hospitalization", as used in this section, means such medical care or hospitalization that normally must be rendered promptly after occurrence of the illness or injury necessitating such treatment. Discharge by a physician or facility subsequent to such medical care or hospitalization shall terminate the period of emergency.

(c) Claims will be considered only for expenses:

(1) For which only the ASW is liable and for which there is no legal liability for his reimbursement except in accord with the provisions of this section; and

(2) That are incurred as a result of illness or injury that occurs while the ASW is acting in accord with orders of Selective Service to engage in travel or perform work for his Alternative Service employer.

(d) No claim shall be allowed in any case in which the Director determines that the injury, illness, or death occurred because of the negligence or misconduct of the ASW.

(e) No claim shall be paid unless it is presented to the Director within one year after the date on which the expense was incurred.

(f) Cost of emergency medical care including hospitalization greater than usual and customary fees for service established by the Social Security Administration, will *prima facie* be considered unreasonable. Payment for burial expenses shall not exceed the maximum that the Administrator of Veteran's Affairs may pay under the provisions of 38 U.S.C. 902(a) in any one case.

(g) Payment of claims when allowed shall be made only directly to the ASW or his estate unless written authorization of the ASW or the personal representative of his estate has been received to pay another person.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-10-FRL 2186-6]

Approval and Promulgation of State Implementation Plans; Washington

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: The purpose of this Notice is to present the results of EPA's review of the 1982 Vancouver, Washington, ozone (O_3) State Implementation Plan (SIP) revision. This SIP revision was developed in accordance with the provisions of Part D of the 1977 Clean Air Act, as amended, which requires plans for O_3 nonattainment areas with approved attainment date extensions to be submitted by July 1, 1982.

In today's action, EPA is proposing to approve the Vancouver SIP revision which was submitted by the Governor of Washington to EPA on July 16, 1982. EPA is requesting public comments on its proposed actions for a period of 30 days.

DATE: Comments must be received on or before November 1, 1982.

ADDRESSES: Comments should be addressed to: Laurie M. Kral, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, WA 98101.

Copies of the materials submitted to EPA may be examined during normal business hours at:

Central Docket Section, (10A–82–10) West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20400

Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, WA 98101

State of Washington, Department of Ecology, 4224 Sixth Avenue, SE., Lacey, WA 98503.

FOR FURTHER INFORMATION CONTACT: Richard F. White, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, WA 98101. Telephone No. (206) 442–4016, FTS: 399–4016.

SUPPLEMENTARY INFORMATION:

I. Introduction

Today's **Federal Register** action was processed in parallel with action on the State and local level to adopt and submit a revision to the currently approved SIP. This process enabled EPA to comment on the SIP in the early stages of SIP development and should reduce the need for the State to make changes in the SIP after State adoption. It also allows EPA to carry out its administrative rulemaking process concurrent with that of the State so that final EPA action can be completed shortly after the State submits its adopted SIP.

II. Background

The Clean Air Act Amendments of 1977 require States to submit plans to demonstrate how they will attain and maintain compliance with National Ambient Air Quality Standards for those areas designated as nonattainment. The Act further requires these plans to demonstrate compliance with primary standards no later than December 31, 1982. Provisions for an extenstion until December 31, 1987 are available for O_3 SIPs if the State can demonstrate that despite implementation of all reasonably available control measures the December 31, 1982 attainment date cannot be met.

The State of Washington department of Ecology (DOE) submitted an initial SIP revision for the Vancouver O_3 nonattainment area in June 1979. DOE requested EPA to extend the attainment date for the O_3 standard in this area beyond 1982, but no later than 1987. EPA approved the extension request and conditionally approved the initial plan revision on June 5, 1980 (45 FR 37821). EPA gave final approval to this intial plan revision on September 14, 1981 (46 FR 45607) after the conditions had been fulfilled.

The SIP revision subject to proposal today is the second phase of the 1979 SIP. It implements some measures and contains commitments to implement others described in the 1979 SIP. Since June of 1979 the Clark County Regional Planning Council (CCRPC) and the Southwest Air Pollution Control Authority (SWAPCA) have been updating the emission inventories for stationary and mobile sources of volatile organic compounds (VOC), refining the air quality modeling, holding additional public hearings and meetings with their advisory and policy making committees, narrowing down the number of transportation control measures (TCMs) and, finally, obtaining commitments from the local governmental jurisdictions to implement the selected TCMs. As a result of these activities, a draft SIP revision was prepared and submitted to EPA and DOE in April 1982. The SIP revision was adopted by CCRPC at a pubic hearing held April 28, 1982, and forwarded to DOE on May 3, 1982. DOE held another public hearing on June 10, 1982, adopted the SIP revision on June 22, 1982 and forwarded it to EPA for approval on July 16, 1982.

III. Plan Review

The general requirements for O_3 SIPs were described in the **Federal Register** published on January 22, 1981 (46 FR 7182). EPA reviewed the Vancouver O_3 SIP revision in accordance with those requirements and developed a technical support document which describes EPA's conclusions regarding each SIP requirement. The technical support document describes the elements of the adopted SIP revision, their location in the SIP and EPA's conclusions regarding approvability. The following discussion will briefly describe the SIP revision in terms of the major review points and indicate what action EPA Proposes.

A. *Technical Data and Modeling Results.* The Vancouver O_3 SIP revision was developed using a baseline design concentration of 0.146 parts per million (ppm). This design value was derived from data collected over the past three years.

The strategy for attaining the O_3 standard (i.e., bringing air quality levels from the design concentration of 0.146 ppm to the standard of 0.12 ppm) centers around reducing emissions of VOC, one of the major precursors to the formation of O_3. To determine the reduction needed for attainment, the "city specific Empirical Kinetic Modeling Approach" model was utilized. Based on this analysis, a 26 percent reduction in VOC emissions is required for attainment. Implementing the Vancouver stationary and mobile source control measures described below in combination with the measures being implemented in the Portland area, the required emission reduction is expected to be achieved by the end of 1987.

B. *Control Measures.* 1. *Stationary Sources.* Stationary source controls for VOC in the Vancouver nonattainment area are embodied in the DOE Washington Administrative Code (WAC) 173–490, which is enforced by the Southwest Air Pollution Control Authority (SWAPCA). DOE regulations, adopted in 1979 and 1980 to satisfy guidance published in the EPA Control Techniques Guidelines (CTG) for Groups I and II VOC categories, were approved as SIP revisions on September 14, 1981 (46 FR 45607) and April 14, 1982 (47 FR 16018). Under separate action, EPA is approving revisions to the State stationary source controls for VOC which were submitted on July 16, 1982. This action will satisfy the remaining requirements called for in the April 14, 1982 (47 FR 16018) notice. State regulations for Group III VOC sources will be developed and adopted in accordance with schedules published on June 5, 1980 (45 FR 37821). There are no other non-CTG sources emitting more than 100 tons per year. Additionally, new or modified major sources of VOC's will be required to obtain an emission offset in order to construct in Vancouver.

2. *Mobile Sources.* Measures for controlling VOC emissions from mobile sources include the Federal Motor Vehicle Emission Control Program and regional TCMs. The regional TCMs that have been committed to include improved public transit, programs to encourage employer rideshare and expanded park-and-ride facilities. The SIP describes each TCM in detail including funding commitments from implementing agencies and projected emission reductions.

The implementation of an inspection and maintenance program is not being required in Vancouver since the existing program in Portland, in operation since 1975, already meets Reasonably Available Control Technology (RACT) as defined for the entire Portland/Vancouver nonattainment area. Justification for this finding is contained in the technical support document for this action. The finding is based, in part, on the existence of an operating inspection and maintenance program with a demonstrated capability to achieve emission reductions equivalent to RACT.

C. *Other Major Elements.* 1. *Reasonable Further Progress.* Reasonable further progress (RFP) will be assessed in terms of the expected reductions described for the nonattainment area and the actual implementation of control measures. The plan includes a TCM monitoring procedure whereby the CCRPC will prepare an annual report identifying growth of new major and minor VOC sources, updating the emission inventory, identifying emission reductions and relating annual ambient

air quality to attainment status. The CCRPC will then use this report in combination with air quality data to assess RFP toward meeting air quality standards. If it is determined that RFP is not being maintained, a contingency plan contained in the SIP revision will be implemented to account for the shortfall.

2. *Basic Transportation Needs.* The SIP revision discusses "basic transportation needs" in relation to the selection of reasonably available control measures and their effect on public mobility. The control measures selected emphasize the local commitment to reduce VOC emissions and improve public transportation facilities.

3. *Conformity.* The conformity analysis procedure developed for the Portland, Oregon, portion of the nonattainment area to meet EPA requirements has been adopted by the CCRPC and is part of the submitted SIP revision. Regardless of the initial conformity finding of various plans and programs, individual projects still must comply with all provisions and requirements of the SIP.

4. *Public and Elected Official Participation.* Participation in the SIP revision development process extended to a wide range of public and elected officials. The Air Quality Advisory Task Force representing Federal, State and local government officials, citizens groups and industry groups met monthly to identify air quality impacts and trade offs between control measures for stationary and transportation sources. Socio-economic impacts, land use and energy usage were also considered. The Task Force developed recommendations on reasonably available transportation control measures, which were approved by the lead agency's Board of Directors. After a public hearing the completed Vancouver SIP revision was adopted on April 28, 1982 and forwarded to DOE for inclusion in the Washington SIP. The final SIP revision was submitted to EPA on July 16, 1982.

IV. Proposed EPA Action

EPA is proposing to approve the O_3 attainment plan revision which was submitted by DOE pursuant to Part D requirements. The proposed approval includes the extension of the attainment date for O_3 to December 31, 1987.

Interested parties are invited to comment on all aspects of this proposed approval of the Washington SIP. Comments should be submitted, preferably in triplicate, to the address listed in the front of this Notice. Public comments postmarked by November 1, 1982 will be considered in any final action EPA takes on this proposal.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant impact on a substantial number of small entities (46 FR 8709 (January 27, 1981)).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

(Secs. 110, 172, Clean Air Act (42 U.S.C. 7410(b) and 7502))

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend Medicare regulations to clarify which useful life guidelines providers of health care services may use to determine the useful life of a depreciable asset for Medicare reimbursement purposes. Current regulations state that providers must utilize HHS useful life guidelines or, if none have been published by HHS, the American Hospital Association (AHA) useful life guidelines of 1973 or IRS guidelines. We are proposing to eliminate the reference to IRS guidelines because those previously acceptable for Medicare purposes are outdated and have been made obsolete by the IRS or by statutory change. We would also delete the specific reference to the 1973 AHA guidelines. In addition, we intend this amendment to clarify that certain tax legislation on accelerated depreciation, recently passed by Congress, does not apply to the Medicare program.

DATES: To assure consideration, comments should be mailed by November 29, 1982.

ADDRESS: Please address comments in writing to: Administrator, Health Care Financing Administration, Department of Health and Human Services, P.O. Box 17073, Baltimore, Maryland 21235.

In commenting, please refer to file code BPP-125-P. If you prefer, you may deliver your comments to Room 309-G Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, D.C., or to Room 132, East High rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Comments will be available for public inspection, as they are received, beginning approximately three weeks from today, in Room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, D.C. 20201, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202-245-7890).

FOR FURTHER INFORMATION CONTACT: Bernard Patashnik, 301-597-1335.

SUPPLEMENTARY INFORMATION:

I. Background

Under the Medicare program (title XVIII of the Social Security Act), hospitals, skilled nursing facilities and home health agencies furnish medically necessary inpatient, outpatient or home health services to eligible beneficiaries. These institutions or organizations, known as providers of health care services, are reimbursed by Medicare for the covered services they provide to beneficiaries, based on the lesser of the reasonable costs or customary charges for providing the services. In determining reasonable costs, HCFA takes into account only costs that are necessary and proper expenses in providing health care services.

Current requirements

Current Medicare regulations (42 CFR 405.415(a)) provide that an appropriate allowance for depreciation on buildings and equipment used by providers in furnishing patient care is an allowable cost. The regulations further provide that depreciation is a proration of the costs of depreciable assets over the estimated useful lives of the assets. The useful life of an asset is defined as the normal operating or service life of the asset to the provider (42 CFR 405.415(b)(7)). Thus, the useful life of an asset is an estimate of how long a provider can use the asset in the production of health care services. Generally, we require that assets be depreciated to salvage value. These concepts are consistent with contemporary accounting theory, which defines depreciation as a systematic and rational method of allocating costs to periods in which benefits are received.

In projecting the useful life of an asset, a provider may consider factors

such as normal wear and tear, obsolescence due to normal economic and technological changes, climatic and other local conditions, and the provider's policies regarding repair and replacement. Various guidelines are available to aid the provider in estimating useful lives. Some guidelines provide an item-by-item breakdown of useful lives, and others give recommendations for classes of assets.

Current regulations (42 CFR 405.415(b)(7)(i)) require that providers use guidelines established by the Secretary. The regulations further state that, if there are no such guidelines, the guidelines published by the American Hospital Association (AHA) in its 1973 edition of "Chart of Accounts for Hospitals" or Internal Revenue Service (IRS) guidelines must be used. Alternatively, the regulations permit a provider to select a useful life not contained in the AHA or IRS guidelines. In this case, however, the useful life must nonetheless be based on the asset's operating or service life to the provider, and we require providers to furnish the Medicare fiscal intermediary with convincing reasons and supporting documentation to justify its selection, and to obtain the intermediary's approval.

AHA guidelines

The AHA's "Chart of Accounts for Hospitals" contains general accounting data and information which may be used by hospitals in establishing a uniform system for classification of accounts in the hospital field. The document also contains guidelines for estimating useful lives of depreciable assets. Those guidelines are periodically updated by the AHA and were last revised in 1978.

As noted above, current regulations state that providers may use the 1973 AHA useful life guidelines. In the proposed regulations, we would change the reference to state that providers may continue to use the edition of AHA guidelines as specified in HCFA Medicare program manuals.

Providers routinely receive manual changes through their intermediaries and would thereby be notified if we update the reference to acceptable AHA guidelines.

IRS guidelines

Use of IRS useful life guidelines by providers is not widespread. We estimate that fewer than ten percent of all providers currently rely on them. We have permitted providers to use IRS guidelines because the IRS concept of an asset's useful life, for the most part, has been consistent with that of the Medicare program. However, IRS guidelines have been changed over the years and have included various options not acceptable for Medicare reimbursement purposes because they did not constitute an acceptable method for estimating an asset's useful life. For example, we specifically prohibit, in Medicare program manuals but not in regulations, the use of the Asset Depreciation Range System (ADRS) which sets forth class lives for broad classes of assets and designates upper and lower limits from which a life may be selected for depreciation purposes. We determined that ADRS was unacceptable because the depreciation period may be significantly shorter than the actual useful life of the asset. Moreover, the IRS guidelines that were acceptable to HCFA in the past are now outdated (for instance, *Bulletin F, Estimated Useful Lives and Depreciation Rates* and *Revenue Procedure 62–21*). In addition, recent changes to the tax law virtually eliminate the concept of a useful life based on the utility of the asset. For these reasons, this proposal would remove from the regulations the option allowing providers to select IRS useful life guidelines for estimating the useful lives of newly acquired assets. However, because previously acceptable IRS guidelines have been based on the utility of an asset, and because this proposal would permit the use of guidelines other than AHA guidelines subject to the approval of the intermediary, providers that are currently using those IRS guidelines for existing assets would continue to be permitted to do so.

New legislation

The new legislation (section 201 of Pub. L. 97–34, the Economic Recovery Tax Act of 1981) established an accelerated cost recovery system (ACRS) for writing off the costs of assets for tax purposes. This provision is designed to encourage investments by business and industry in new assets as a means of stimulating the national economy. It allows all assets to be depreciated for tax purposes over much shorter periods of time than may be done under previously existing tax laws. For example, ACRS permits real property such as buildings to be depreciated over 15 years. This contrasts with existing depreciation rules, approved for use in the Medicare program, that prescribe useful lives of buildings as 30, 40 or even 50 years.

Congress specifically provided in section 203(e) of Pub. L. 97–34 that the Secretary of HHS is not required to apply any provision of the Internal Revenue Code of 1954, as amended, in calculating depreciation for the purpose of determining any cost under a program administered by HHS, unless required by law to do so.

The new tax reduction legislation does not repeal or amend any provisions of the Medicare statute or reimbursement principles established as part of the Medicare program. However, in departing from the concept of a useful life based on the utility of the asset for depreciation, the application of ACRS to the Medicare program would have a severe adverse impact on the program by resulting in significantly accelerated reimbursement having no reasonable connection to the efficient delivery of patient care. We believe that reduction of the amount of time over which assets may be depreciated to reduce tax liabilities should not be applied to accelerate the reimbursement of costs for patient care under Medicare.

The Medicare program is intended to finance quality health care to eligible individuals, with reimbursement to providers of the reasonable cost of furnishing that care, as required by section 1861(v)(1) of the Social Security Act. We believe that application of the ACRS would be at variance with that requirement and with current efforts to contain the rising costs of health care. Consequently, we do not think it is either intended or appropriate for the Medicare program to be included in general with business and industry in the use of ACRS to stimulate the economy.

II. Changes in the regulations

We are proposing to delete the specific reference to the AHA 1973 "Chart of Accounts for Hospitals" and the general reference to IRS guidelines contained in 42 CFR 405.415 (b)(7)(i). In place of the reference to specific AHA guidelines, we would state that the acceptable edition of AHA guidelines is specified in HCFA manuals. Thus, providers would be able to use guidelines established by HCFA or, in their absence, approved AHA guidelines or an alternative guideline approved by their intermediary for determining useful lives of assets.

The first proposed change would eliminate the need to update the reference in the regulations to AHA guidelines. The second change would ensure that any existing tax depreciation methods (for example, ADRS or ACRS), or any new methods developed in the future, which do not provide for depreciation based on the asset's useful life are not used by

providers for Medicare reimbursement purposes.

The use of ACRS for tax purposes, where it applies in business and industry, is mandatory and prospective for assets acquired on or after January 1, 1981. Thus, the proposed regulations would not remove an option previously allowed to providers. Rather, we would be prohibiting the use of new tax legislation for Medicare reimbursement purposes. Therefore, we do not believe that this change in the regulations will result in any disadvantage to providers. To be consistent with the effective date of the ACRS provisions of Pub. L. 97–34, we would make the final regulations resulting from this proposed rule effective on January 1, 1981.

It is important to emphasize here that providers will continue to have the right to request approval from their intermediaries to use a particular set of guidelines different from the approved AHA guidelines. As noted above, any useful life guideline proposed for use by a provider must be based on the utility of the asset to the provider, and the provider must submit documentation to the intermediary to justify the selection.

III. Impact Analyses

A. Executive Order 12291

The Secretary has determined that this proposed rule does not meet the criteria for a "major rule," as defined by section 1(b) of Executive Order 12291.

While the proposed regulations would implement a change in Medicare policy regarding the use of IRS guidelines in determining useful lives of assets, the effect on providers and intermediaries would be minimal. Few providers currently use the guidelines. Moreover, providers currently using previously acceptable IRS guidelines for Medicare depreciation purposes would be able to continue for existing assets.

In addition, providers will retain the right, with respect to newly acquired assets, to seek approval of useful lives other than those set out in approved AHA guidelines. On the other hand, the change in policy would help to avoid possible increased costs to the Medicare program because of inadvertent application of IRS accelerated depreciation methods or guidelines in Medicare depreciation determinations.

B. Regulatory Flexibility Act

The Secretary certifies, under the Regulatory Flexibility Act (5 U.S.C. 605(b)), that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

Many providers of health care services qualify as small businesses. However, the proposed change in policy concerning the IRS useful life guidelines would not have a significant economic effect because few providers currently use those guidelines. Furthermore, for newly acquired assets, providers could seek the approval of their intermediaries to use guidelines that are as advantageous to the providers as the previously acceptable IRS guidelines.

IV. Reponses to Comments

Because of the large number of comments we receive from the public, we cannot acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments and will respond to them in the preamble to that rule.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Certification of compliance, Clinics, Contracts (Agreements), End-Stage Renal Disease (ESRD), Health care, Health facilities, Health maintenance organizations (HMO), Health professions, Health suppliers, Home health agencies, Hospitals, Inpatients, Kidney diseases, Laboratories, Medicare, Nursing homes, Onsite surveys, Outpatient providers, Reporting requirements, Rural areas, X-rays.

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Subpart D—Principles of Reimbursement for Provider Costs and for Services by Hospital-Based Physicians

The authority citation for Subpart D reads as follows:

Authority: Secs. 1102, 1814(b), 1833(a), 1861(v), and 1871, 49 Stat. 647, as amended. 79 Stat. 296, 79 Stat. 302, 79 Stat. 322, 79 Stat. 331; 42 U.S.C. 1302, 1395 et seq., unless otherwise noted.

42 CFR 405.415 is amended by reprinting the introductory language in paragraph (b)(7) and by revising paragraph (b)(7)(i) to read as follows:

§ 405.415 Depreciation: Allowance for depreciation based on asset costs.

* * * * *

(b) *Definitions.* * * *

(7) *Useful life.* The estimated useful life of a depreciable asset is its normal operating or service life to the provider, subject to the provisions in paragraph (b)(7)(i) of this section. Factors to be considered in determining useful life include normal wear and tear; obsolescence due to normal economic and technological changes; climatic and other local conditions; and the provider's policy for repairs and replacement.

(i) *Initial selection of useful life.* In selecting a proper useful life for computing depreciation under the Medicare program, providers must use the useful life guidelines published by HCFA. If HCFA has not published applicable useful life guidelines, providers must use—

(A) The edition of the American Hospital Association useful life guidelines, as specified in HCFA Medicare program manuals; or

(B) A different useful life specifically requested by the provider and approved by the intermediary. A different useful life may be approved by the intermediary if the provider's request is properly supported by acceptable factors that affect the determination of useful life. However, such factors as an expected early sale, retirement, demolition or abandonment of an asset, or termination of the provider from the Medicare program may not be used.

42 CFR Parts 431, 434, 435, and 447

Medicaid Program; Contracts with Health Maintenance Organizations and Prepaid Health Plans

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rules.

SUMMARY: These proposed amendments would—

(1) Make it possible for Medicaid agencies to contract on a risk basis with health maintenance organizations (HMOs) other than those that meet all the requirements for a Federally qualified HMO;

(2) Ease requirements that limit the proportion of HMO enrollees that may be persons eligible for Medicare or Medicaid; and

(3) Permit States to continue to provide Medicaid, for a period of up to 6

months from the date of enrollment in a Federally qualified HMO, even if the enrollee loses Medicaid eligibility before the end of that period.

These regulations are necessary to implement section 2178 of the Omnibus Budget Reconciliation Act of 1981. They also include changes made as part of regulatory reform. The intent is to encourage and enable Medicaid agencies to make greater use of HMOs and other prepaid health plans (PHPs) to provide cost-effective health care to Medicaid recipients.

In addition, as part of our regulatory reform effort, we are eliminating several existing regulatory requirements and simplifying others to provide greater flexibility for States in contracting with prepaid health care organizations.

DATE: In order to ensure consideration, comments should be mailed by November 29, 1982.

ADDRESSES: Address comments in writing to: Administrator, Health Care Financing Administration, Department of Health and Human Services, P.O. Box 17073, Baltimore, Maryland 21235.

In commenting, please refer to BPP–504–P. If you prefer you may deliver your comments to Room 309–G Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, D.C., or to Room 132 East High Rise, 6325 Security Boulevard, Baltimore, Md. 21207.

Comments will be available for public inspection as they are received, beginning approximately three weeks after publication in Room 309–G of the Department's office at 200 Independence Ave., SW., Washington, D.C., 20201 on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202–245–7890).

FOR FURTHER INFORMATION CONTACT: Bernard Truffer, (301) 597–1369.

SUPPLEMENTARY INFORMATION: Current Medcaid regulations at 42 CFR Part 431, Subpart L, contain a number of requirements applicable to State contracts with HMOs and other types of prepaid health plans (PHPs). Statutory amendments made by the Omnibus Budget Reconciliation Act of 1981 require changes in the regulations. In addition, the HCFA Task Force on Regulatory Reform has reviewed certain of the requirements and determined that they can be either eliminated or modified to provide greater opportunity for States to use these organizations as a cost-effective means of furnishing services.

Before the 1981 amendments, section 1903(m) of the Social Security Act allowed Federal financial participation (FFP) in State expenditures under a risk-basis contract for comprehensive medical services only if the contract was with an HMO or with certain other entities (specified in section 1903(m)(2)(B)) that had received grants under the Public Health Service Act or the Appalachian Regional Development Act or had contracts with Medicaid agencies before enactment of the HMO provisions. Section 1903(m) defined HMO as an organization that furnished certain specified services and met the requirements of sections 1301(b) and (c) of the Public Health Service (PHS) Act regarding form of organization and manner of furnishing services. As a condition of payment to an HMO, Section 1903(m) required that: (1) The Secretary determine that the organization meets the HMO definition; and (2) the HMO comply with a specified composition of enrollment standard (see below the discussion of "Composition of Enrollment"). The entities specified in section 1903(m)(2)(B) are exempted from these two conditions, and are described in the regulations as PHPs that qualify for risk contracts.

The law does not define "risk basis", but uses it in the same sense as "prepaid capitation basis". Section 431.502 of the regulations defines "risk" as the chance that the contractor's cost of furnishing the services may exceed the reimbursement, that is, the capitation or premium payments determined at the start of a contract period. Although the law does not define "nonrisk", we have interpreted the term to mean that a Medicaid agency may make retroactive adjustments at the end of a contract period so that the contractor is reimbursed for costs actually incurred. The upper limits for State agency payments under risk contracts are different from the upper limits for nonrisk contracts. (See below discussion of "Payments Limits".)

Changes Based on Statutory Amendments

The changes made by section 2178 of Pub. L. 97–35, and the corresponding changes we propose to make in the regulations are discussed below:

Definition of HMO

Section 2178 of Pub. L. 97–35 broadens the definition of HMO to permit FFP for comprehensive services furnished, under a risk contract, not only by organizations that meet the requirements of sections 1301(b) and (c) of the PHS Act (hereafter referred to as Federally qualified HMOs), but also for services furnished by other entities that—

1. Make their services available to Medicaid enrollees to the same extent they are available from other sources to nonenrolled Medicaid recipients in the area; and

2. Make provision (satisfactory to the State) against the risk of insolvency and assure that Medicaid recipients will not be responsible for the HMO's debts if it does become bankrupt.

We propose to amend the regulations to provide that, if a State plan provides for risk-basis contracts with other than Federally qualified HMOs, it must include the State's definition of HMO, and to require that, under the State definition, the HMO must meet at least the two statutory requirements listed above (§ 434.20(c)). The State may impose additional requirements it finds necessary. Since section 1903(m)(1)(B) of the Act still requires the Secretary to determine whether an organization is an HMO, § 434.71(b) would require the HCFA Regional Administrator to certify that contractors meet the State definition of HMO.

Composition of Enrollment

Previous law specified that Medicare and Medicaid beneficiaries must constitute less than 50 percent of the enrollees of an HMO and provided for a temporary waiver of that requirement (up to 3 years) for HMOs entering the program.

Section 2178 of Pub. L. 97–35 raised from 50 percent to 75 percent the maximum proportion of an HMO's enrollees that may be persons entitled to Medicare or Medicaid and retained the temporary waiver of that upper limit for new HMOs. In addition, it authorized waiver or modification of the limit for public HMOs if there are special circumstances that justify this and if the HMO is making reasonable efforts to enroll non-beneficiaries. The provision recognizes that HMOs run by State, county, or municipal hospitals or health departments may find it difficult to meet the 75 percent limitation because they serve primarily the beneficiaries of public programs.

Corresponding amendment would be made in §§ 434.26(b) and (c).

Contract Requirements

The section 2178 amendments to section 1903(m) of the Act make clear that the contract between a Medicaid agency and the HMO must provide for the following:

1. The capitation fee is determined on an actuarially sound basis.

2. The Secretary and the State may inspect and audit the financial records

of the contractor and any subcontractors.

3. In enrolling Medicaid recipients, the HMO will not discriminate on the basis of the individual's health status or need for health care services.

4. A Medicaid enrollee may terminate enrollment at any time without cause, and is informed of this right when he or she enrolls.

5. Either the State of the HMO pays promptly for emergency services furnished by a source other than the HMO.

These provisions would be implemented by several sections of Subpart C of Part 434.

Extended Medicaid Eligibility

One factor that has kept States from making greater use of HMOs is the adminstrative difficulties caused by fluctuations in Medicaid eligibility. Since beneficiaries may have frequent changes in income, they may go on and off the rolls several times during a relatively short period. This causes problems for both the State and the HMO. The State's system for making capitation payments to the HMO may not always be tied closely enough to the eligibility process to ensure that the payments stop when eligibility ends. Thus, the State may make three or four payments for a person not currently eligible. The fluctuations also make it impossible for the HMO to be certain of the amounts it will receive, in capitation fees, for a particular period.

Section 2178 of Pub. L. 97–35 amended section 1902(e) of the Act to provide States the option of continuing Medicaid, for a period of up to 6 months from date of enrollment in a Federally qualified HMO, even if the enrollee loses Medicaid eligibility before the end of that period. This should help to resolve the administrative problems for both States and HMOs and facilitate use of HMOs in Medicaid.

This option would be set forth in new §§ 435.212 and 435.326.

Regulatory Reform Changes

The changes made as part of our regulatory reform effort are intended to simplify the regulations and provide States greater flexibility in using HMOs and PHPs as sources of Medicaid services.

1. *Elimination of certain requirements.* The current Medicaid regulations repeat some of the requirements contained in the PHS Act, which are applied by the Public Health Service in determining whether an organization is a Federally qualified HMO. Because the repetition is unnecessary with respect to these HMOs and because we are not imposing these requirements for State-defined HMOs, we propose to eliminate them from the regulations. These include, for example, requirements for feasibility and planning studies (current § 431.541), certain enrollment provisions (§§ 431.527(a) and 431.528(a)), and emergency service provisions (§ 431.532(a)).

In addition to the PHS requirements, the regulations now contain certain other requirements not specified by statute. We believe these can be eliminated, without decreasing accessibility or quality of services, in order to permit States greater freedom in determining the types of contracts they wish to have. For this purpose, we propose to delete the requirements for specifying in contracts certain risk, savings apportionment, and reinsurance provisions (§§ 431.524–431.526); a requirement that the contractor provide information on health care to each enrollee to help improve his or her health status (§ 431.536), and a provision for contractor distribution of general information about its services (§ 431.545). We believe these are the types of requirements best handled by each State both in the overall context of its health care delivery system, and with respect to the particular needs of each contract situation.

2. *HMO nonrisk contracts.* The regulations provide that Medicaid agencies may enter into nonrisk contracts (as well as risk contracts) with Federally qualified HMOs (§ 434.20(b)). Existing regulations do not allow States to enter into nonrisk contracts with HMOs. They allow such contracts only with PHPs. Since this restriction is not required by the statute, we believe that States should have the flexibility to enter into nonrisk, as well as risk, contracts with HMOs.

3. *Payment limits.* Current regulations (§ 447.361) state that total capitation payments made by the agency may not exceed what it would pay for the same group of services on a fee-for-service basis, or what other third party payers are paying for comparable services under comparable circumstances. We would revise § 447.361—

- To make clear that it applies only to risk contracts; and
- To delete the reference to what other third party payers are paying.

We have concluded that the third party payer language is redundant and confusing because, in most cases, third party payment rates are indirectly incorporated in the fee-for-service rates. We would also add a new § 447.362 to provide that, for nonrisk contracts, the agency payments may take into account the cost of administrative services (such as quality assurance or securing payment from liable third parties) that are performed by the contractor, but would have to be performed by the Medicaid agency itself if it paid on a fee-for-service basis.

The regulatory reform changes apply to contracts with all PHPs, not just HMOs, and we have extended to PHPs the statutory provision that raises to 75 percent the limitation on the composition of enrollment. We are continuing our review of the requirements applicable to risk and nonrisk contracts with PHPs to determine whether all of them need to be retained. If we determine some can be eliminated, we will publish an additional notice of proposed rulemaking. However, we do not want to delay implementation of the options provided by the statutory amendments, pending completion of that review. For that reason, these proposed regulations contain the existing requirements not yet reviewed as well as the changes discussed above.

In summary, the proposed changes would increase flexibility and thus encourage States to make greater use of HMOs and other prepayment plans to furnish Medicaid services. The additional options would make it possible for Medicaid agencies to:

- Enter into risk contracts with State-defined HMOs (as well as Federally qualified HMOs, and certain other prepayment plans specified in the Medicaid statute).
- Enter into nonrisk contracts with Federally qualified HMOs, as well as with State-defined HMOs and other prepayment plans.
- Continue to provide Medicaid, for a period of up to 6 months from the date of enrollment, to a Medicaid enrollee of a Federally qualified HMO, even if the enrollee loses Medicaid eligibility before the end of the specified period.

We are also reorganizing all of the material on contracts now in Subpart L of 42 CFR Part 431 and relocating it in a new Part 434. This includes rules on contracts made by a State Medicaid agency with other entities, as well as those with HMOs and PHPs. No substantive changes other than those described above are being made at this time.

Response to Comments

Because we receive large numbers of comments, we cannot acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments and will respond to them in the preamble to that rule.

Impact Analysis

Executive Order 12291

Executive Order 12291 requires us to prepare a regulatory analysis for any rule that is likely to result in an annual effect on the economy of $100 milion or more; a major increase in costs or prices for consumers, individual industries, government agencies, or geographical regions; or significant adverse effects on business or employment.

We have determined that these regulations will not have a significant economic impact. The elimination of requirements that are duplicative or unnecessary may permit some administrative economies, and more extensive use of risk-basis contracts with HMOs and PHPs would tend to reduce program costs.

Regulatory Flexibility Act of 1980 (Pub. L. 96–354)

This Act requires us to prepare and publish a regulatory flexibility analysis for any regulations that will have a significant economic impact on a substantial number of small entities. There are currently approximately 36 State contracts with HMOs serving 187,000 beneficiaries, and 18 PHP contracts serving 94,600 beneficiaries. The changes made by these regulations will not affect participating entities except to reduce some requirements. To the extent that State Medicaid agencies take advantage of their new options, additional; HMOs and PHPs, both large and small, will have opportunity to participate in the program. Since we have no way of knowing how many will become participants, we have no basis for an anaylsis.

Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) requires Federal agencies to seek the approval of the Executive Office of Management and Budget (EOMB) for any regulations that contain reporting and recordkeeping requirements that are subject to the statute.

In compliance with Pub. L. 96–511, we have requested EOMB approval of the following sections of these regulations which require the collection of information:

Sec.
434.6 General requirements for all contracts and subcontracts.
434.10 Contracts with fiscal agents.
434.12 Contracts with nonmedical institutions.
434.14 Contracts with health insuring organizations.
434.20 Basic rules.
434.23 Capitation fees.
434.25 Coverage and enrollment.
434.27 Termination of enrollment.
434.32 Grievance procedures.
434.53 Periodic medical audits.

431.597 Deleted as unnecessary, given the reorganization and revision of these regulations.	

42 CFR Chapter IV is amended as set forth below:

PART 431—STATE ORGANIZATION AND GENERAL ADMINISTRATION

The authority citation for Part 431 reads as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

A. Part 431 is amended by removing and reserving Subpart L and amending the table of contents to reflect that change:

Subparts G–L—[Reserved]

B. The content of Subpart L of Part 431 is revised and redesignated as a new Part 434, to read as follows:

PART 434—CONTRACTS

Subpart A—General Provisions

Sec.
434.1 Basis and scope.
434.2 Definitions.
434.4 State plan requirement.
434.6 General requirements for all contracts and subcontracts.

Subpart B—Contracts with Fiscal Agents, Nonmedical Institutions, and Health Insuring Organizations

434.10 Contracts with fiscal agents.
434.12 Contracts with nonmedical institutions.
434.14 Contracts with health insuring organizations.

Subpart C—Contracts with HMOs and PHPs:

General Requirements

Sec.
434.20 Basic rules.

Additional requirements for Certain Risk Contracts

434.21 Contracts that must meet additional requirements.
434.23 Capitation fees.
434.25 Coverage and enrollment.
434.26 Composition of enrollment.
434.27 Termination of enrollment.
434.29 Choice of health professional.
434.30 Emergency medical services.
434.32 Grievance procedures.
434.34 Quality assurance system.
434.36 Marketing.
434.38 Inspection and audit of HMO's financial records.

Subpart D—Contracts with HMOs and PHPs: Medicaid Agency Responsibilities

434.50 Proof of capability.
434.52 Furnishing of required services.
434.53 Periodic medical audits.
434.55 Approval of marketing plans, procedures, and materials.
434.57 Limit on payment to other providers.
434.59 Continued service to recipients whose enrollment is terminated.
434.61 Computation of capitation fees.
434.63 Monitoring procedures.
434.65 Services included in the State plan not covered by the contract.

Subpart E—Federal Financial Participation

434.70 Condition for FFP: Status of contract.
434.71 Condition for FFP: Prior approval.
434.72 Effect of final determination that a provisional status HMO is not an HMO.
434.74 Costs under risk-basis contracts.
434.75 Costs under no-risk contracts.
434.76 Costs under fiscal agent contracts.
434.78 Right to reconsideration of disallowance of.

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

Subpart A—General Provisions

§ 434.1 Basis and scope.

(a) *Basis.* This part is based on sections 1902(a)(4) and 1903(m) of the Act. Section 1902(a)(4) requires that the State plan provide for methods of administration that the Secretary finds necessary for proper and efficient operation of the plan. Section 1903(m)(1)(A) of the Act defines an HMO as an entity that meets the requirements of the Public Health Service (PHS) Act to be a Federally qualified HMO, or meets two specified requirements pertaining to accessibility of services and fiscal solvency. Section 1903(m)(2)(A) limits risk-basis contracts for specified health services to entities that meet the HMO definition of section 1903(m)(1)(A) and sets forth certain enrollment and other requirements that these contracts must meet as a condition for FFP. Section 1903(m)(2)(B) exempts, from the limitations of section 1903(m)(2)(A), certain specified prepayment plans that are not HMOs.

(b) *Scope.* This part sets forth the requirements for contracts with certain organizations for furnishing Medicaid services or processing or paying Medicaid claims.

§ 434.2 Definitions.

As used in this part, unless the context indicates otherwise—

"*Contractor*" means any of the following entities that contract with the Medicaid agency, under the terms of this subpart, to process claims, or to pay for or provide medical services, under a State plan in return for a payment:

(a) A fiscal agent.

(b) A health care project grant center.

(c) A private nonmedical institution.

(d) A health insuring organization.

(e) A health maintenance organization.

(f) A prepaid health plan.

"*Enrolled recipient*" means an individual who is eligible for Medicaid and who enters into an agreement to receive services from a health maintenance organization or prepaid health plan that contracts with the agency under this part.

"*Federally qualified HMO*" means an HMO that has been determined by the Public Health Service (PHS) to be a qualified HMO under section 1310(d) of the PHS Act.

"*Fiscal agent*" means an entity that processes or pays vendor claims for the agency.

"*Health care projects grant center*" means an entity that—

(a) Is supported in whole or in part by Federal project grant financial assistance; and

(b) Provides or arranges for medical services to recipients.

"*Health insuring organization*" means an entity that—

(a) Pays for medical services provided to recipients in exchange for a premium or subscription charge paid by the agency; and

(b) Assumes an underwriting risk.

"*Health maintenance organization (HMO)*" means a public or private organization organized under State law that—

(a) Is a Federally qualified HMO; or

(b) Meets the State plan's definition of an HMO.

"*Capitation fee*" means the fee the agency pays periodically to a contractor for each recipient enrolled under a contract for the provision of medical services under the State plan, whether or not the recipient receives the services during the period covered by the fee.

"*Prepaid health plan (PHP)*" means an entity that provides medical services under contract with the Medicaid agency to enrolled recipients, on the basis of prepaid capitation fees but does not qualify as an HMO.

"*Private nonmedical institution*" means an entity that—

(a) Provides medical care through contracts or other arrangements with medical providers;

(b) Is reimbursed through prepaid capitation payments from the agency;

(c) Does not assume an underwriting risk; and

(d) Is not, as a matter of regular business, a prepaid health insuring organization or community health care center. Examples of private nonmedical institutions are child-care institutions and maternity homes.

"*Provisional status HMO*" means an HMO that the State agency has determined is a provisional status Federally qualified HMO because more than 90 days have elapsed since the HMO applied to the PHS for Federal qualification and the PHS has not made a final determination. The provisional status continues until the PHS makes the final determination or the contract with the Medicaid agency is terminated, whichever occurs first.

"*Risk*" or "*underwriting risk*" means a significant chance that a contractor may incur a loss—

because the cost of providing services may exceed the capitation fees paid by the agency to the contractor during the contract period.

§ 434.4 State plan requirement.

If the State plan provides for contracts of the types covered by this part, the plan must also provide for meeting the applicable requirements of this part.

§ 434.6 General requirements for all contracts and subcontracts.

(a) *Contracts.* All contracts under this part must—

(1) Be in writing;

(2) Specify the contract period;

(3) Specify the functions of the contractor;

(4) Identify the population covered by the contract;

(5) Specify any procedures for enrollment or reenrollment of the covered population;

(6) Specify the amount, duration, and scope of medical services to be provided or paid for;

(7) Provide that the agency and HHS may evaluate through inspection or other means, the quality, appropriateness and timeliness of services performed under the contract;

(8) Provide that the agency and HHS may audit and inspect any of the contractor's records that pertain to services performed and determination of amounts payable under the contract;

(9) Specify procedures and criteria for extending the contract;

(10) Specify procedures and criteria for renegotiating the contract;

(11) Specify procedures and criteria for terminating the contract, including a requirement that the contractor promptly supply all information necessary for the reimbursement of any outstanding Medicaid claims;

(12) Provide that the contractor maintains an appropriate record system for services to enrolled recipients;

(13) Provide that the records referred to in paragraph (a)(12) of this section are retained in accordance with the record retention requirements of 45 CFR Part 74;

(14) Provide that the contractor safeguards information about recipients as required by Part 431, Subpart F of this chapter;

(15) Specify any activities to be performed by the contractor that are related to third party liability requirements in Part 433, Subpart D, of this chapter;

(16) Specify which functions may be subcontracted; and

(17) Provide that any subcontracts meet the requirements of paragraph (b) of this section.

(b) *Subcontracts.* All subcontrcts must—

(1) Be in writing; and

(2) Fulfill the requirements of this part that are appropriate to the service or activity delegated under the subcontract.

(c) *Continued responsibility of contractor.* No subcontract terminates the legal responsibility of the contractor to the agency to assure that all activities under the contract are carried out.

Subpart B—Contracts With Fiscal Agents, Nonmedical Institutions, and Health Insuring Organizations

§ 434.10 Contracts with fiscal agents.

Contracts with fiscal agents must—

(a) Meet the requirements of § 434.6;

(b) Include termination procedures that require the contractors to supply promptly all material necessary for continued operation of payment and related systems. This material includes—

(1) Computer programs;

(2) Data files;

(3) User and operation manuals, and other documentation;

(4) System and program documentation; and

(5) Training programs for Medicaid agency staff, their agents or designated representatives in the operation and maintenance of the system;

(c) Offer to the State one or both of the following options, if the fiscal agent or the fiscal agent's subcontractor has a proprietary right to material specified in paragraph (b) of this section:

(1) Purchasing the material; or

(2) Purchasing the use of the material through leasing or other means;

(d) State the amount to be paid to the contractor for performing the functions under the contract;

(e) State the basis for the amount to be paid to the contractor;

(f) State when payment is to be made to the contractor; and

(g) State that payment to providers will be made in accordance with Part 447 of this chapter.

§ 434.12 Contracts with private nonmedical institutions.

Contracts with private nonmedical institutions must—

(a) Meet the requirements of § 434.6;

(b) Specify a capitation fee based on the cost of the services provided, in accordance with the reimbursement requirements prescribed in Part 447 of this chapter; and

(c) Specify when the capitation fee must be paid.

§ 434.14 Contracts with health insuring organizations.

(a) Contracts with health insuring organizations must—

(1) Meet the requirements of § 434.6;

(2) Specify that the capitation fee will not exceed the limits set forth under Part 447 of this chapter;

(3) Specify that, except as permitted under paragraph (b) of this section, the capitation fee paid on behalf of each recipient may not be renegotiated—

(i) During the contract period if the contract is for 1 year or less; or

(ii) More often than annually if the contract period is for more than 1 year;

(4) Specify that the capitation fee will not include any amount for recoupment of any losses suffered by the contractor for risks assumed under the same contract or a prior contract with the agency;

(5) Specify that the contractor assumes at least part of the underwriting risk and:

(i) If the contractor assumes the full underwriting risk, specify that payment of the capitation fees to the contractor during the contract period will constitute full payment by the agency for the cost of medical services provided under the contract; and

(ii) If the contractor assumes less than the full underwriting risk, specify how the risk is apportioned between the agency and the contractor;

(6) Specify whether the contractor returns to the agency part of any savings remaining after allowable costs are deducted from the capitation fees and, if savings are returned, the apportionment between the agency and the contractor;

(7) Specify the extent, if any, to which the contractor may obtain reinsurance of a portion of the underwriting risk;

(8) Specify the acutarial basis for computation of the capitation fee.

(b) The capitation fee may be renegotiated more often than annually for recipients who are not enrolled at the time of renegotiation or if the renegotiation is required by changes in Federal or State law.

Subpart C—Contracts With HMOs and PHPs: Contract Requirements

General Requirements

§ 434.20 Basic rules.

(a) *Entities eligible for risk contracts for services specified in § 434.21.* A Medicaid agency may enter into a risk contract, for the services specified in § 434.21, only with an entity that—

(1) Is a Federally qualified HMO, including a provisional status Federally qualified HMO;

(2) Meets the State plan's definition of an HMO, as specified in paragraph (c) of this section; or

(3) Is one of several entities identified in section 1903(m)(2)(B) (i), (ii) and (iii) of the Act, and considered as PHPs.

(b) *Entities eligible for other kinds of contracts.* A Medicaid agency may enter into a nonrisk contract, or a risk contract for services other than those specified in § 434.21, with any of the entities identified in paragraph (a) of this section, or with any other PHP.

(c) *State plan definition of HMO.* If the plan provides for risk contracts with entities that are not Federally qualified HMOs, for the services specified in § 434.21, the plan must include a State definition of an HMO. Under the definition, the HMO must meet at least the following requirements:

(1) Be organized primarily for the purpose of providing health care services.

(2) Make the services it provides to its Medicaid enrollees as accessible to them (in terms of timeliness, amount, duration, and scope) as those services are to nonenrolled Medicaid recipients within the area served by the HMO.

(3) Make provision, satisfactory to the Medicaid agency, against the risk of insolvency, and assure that Medicaid enrollees will not be liable for the

HMO's debts if it does become insolvent.

(d) *Services that may be covered.* A contract with an HMO or a PHP may cover services to enrolled recipients that are not provided under the plan to nonenrolled recipients as permitted under § 440.250(g) of this chapter.

(e) *Requirements for all contracts.* For all contracts with HMOs or PHPs—

(1) The contract must meet the requirements of § 434.6; and

(2) The Medicaid agency must carry out the responsibilities specified in Subpart D of this part.

Additional Requirements for Certain Risk Contracts

§ 434.21 Contracts that must meet additional requirements.

Unless otherwise indicated, the additional requirements set forth in §§ 434.23 through 434.38 must be met—

(a) In all non-risk contracts; and

(b) In risk contracts for furnishing inpatient hospital services and any of the following services, or any three or more of the following services or groups of services:

(1) Outpatient hospital services and rural health clinic services.

(2) Other laboratory and X-ray services.

(3) Skilled nursing facility (SNF) services, early and periodic screening, diagnosis and treatment (EPSDT), and family planning.

(4) Physicians' services.

(5) Home health services.

§ 434.23 Capitation fees.

The contract must specify—

(a) The actuarial basis for computation of the capitation fees; and

(b) That the capitation fees and any other payments provided for in the contract do not exceed the payment limits set forth in §§ 447.361 and 447.362 of this chapter.

§ 434.25 Coverage and enrollment.

(a) Contracts with HMOs and PHPs must—

(1) Specify the period during which enrollment may be open;

(2) Provide that the HMO or PHP will accept individuals who are eligible to be covered under the contract—

(i) In the order in which they apply;

(ii) Without restrictions, unless authorized by the Regional Administrator; and

(iii) Up to the limits set in the contract; and

(3) Provide that enrollment is voluntary.

(b) Contracts with HMOs must also provide that the HMO will not discriminate, against individuals eligible to be covered under contract, on the basis of health status or need for health services.

§ 434.26 Composition of enrollment.

(a) *Basic rule.* Except as provided in paragraphs (b) and (c) of this section, the contract must provide that Medicare beneficiaries and Medicaid recipients constitute less than 75 percent of the total enrollment of the HMO or PHP.

(b) *Exceptions: HMOs.*—(1) *Waiver for New HOMs.* The requirement of paragraph (a) of this section may be waived for up to three years from the date the Regional Administrator determines the entity to be an HMO (as provided in § 434.71) if the HMO submits annual reports demonstrating, to the Regional Administrator's satisfaction, that it is making continuous efforts and progress towards achieving compliance with paragraph (a) of this section.

(2) *Waiver for HMOs that are public entities.* The Regional Administrator may approve waiver or modification of the requirement of paragraph (a) of this section, for an HMO that is owned or operated by a State, county, or municipal health department or hospital, if—

(i) There are special circumstances that justify modification or waiver; and

(ii) The HMO has made and continues to make reasonable efforts to enroll individuals who are not eligible for Medicare or Medicaid.

(c) *Exception: Waiver for PHPs.* The Medicaid agency may waive the requirement of paragraph (a) of this section for a PHP that requests waiver and shows good cause.

§ 434.27 Termination of enrollment.

The contract must specify—

(a) The reasons for which the HMO or PHP may terminate a recipient's enrollment;

(b) That the HMO or PHP will not terminate enrollment because of the recipient's health status or need for health care services;

(c) That each termination by the HMO or PHP will be submitted for approval by the agency;

(d) That an HMO enrollee may terminate enrollment at any time, effective no later than the first day of the second month after the month in which he or she requests termination; and

(e) That the HMO will inform each recipient, at the time of enrollment, of the right to terminate enrollment.

§ 434.29 Choice of health professional.

The contract must allow each enrolled recipient to choose his health professional in the HMO or the PHP to the extent possible and appropriate.

§ 434.30 Emergency medical services.

If the contract covers emergency medical services, it must—

(a) Provide that all covered emergency services are available 24 hours a day and 7 days a week, either in the contractor's own facilities or through arrangements, approved by the agency, with other providers; and

(b) Specify whether it is the contractor, or the agency, that will make prompt payment for covered emergency services that are furnished by providers with which the HMO or PHP does not have arrangements if—

(1) Those services were needed because of an unforeseen illness or condition;

(2) Use of the contractor's facilities (or the facilities of providers with whom the contractor has arrangements) would have endangered the recipient's health or caused him severe pain and discomfort.

§ 434.32 Grievance procedure.

The contract must provide for an internal grievance procedure that—

(a) Is approved in writing by the agency;

(b) Provides for prompt resolution; and

(c) Assures the participation of individuals with authority to require corrective action.

§ 434.34 Quality assurance system.

The contract must provide for an internal quality assurance system that:

(a) Is consistent with the utilization control requirements of Part 456 of this chapter;

(b) Provides for review by appropriate health professionals of the process followed in providing health services;

(c) Provides for systematic data collection of performance and patient results;

(d) Provides for interpretation of this data to the practioners; and

(e) Provides for making needed changes.

§ 434.36 Marketing.

The contract must provide that the HMO or PHP submits marketing plans, procedures, and materials to the agency for approval before using the plans.

§ 434.38 Inspection and audit of HMO's financial records.

A risk contract with an HMO must provide that the agency and the Department may inspect and audit any financial records of the HMO or its subcontractors, relating to the HMO's

capacity to bear the risk of potential financial losses.

Subpart D—Contracts with HMOs and PHPs: Medicaid Agency Responsibilities

§ 434.50 Proof of HMO or PHP capability.

The agency must obtain from each contractor proof of—

(a) Financial responsibility, including proof of adequate protection against insolvency; and

(b) The contractor's ability to provide the services under the contract efficiently, effectively, and economically.

§ 434.52 Furnishing of required services.

The agency must obtain assurances from each contractor that—

(a) It furnishes the health services required by enrolled recipients as promptly as is appropriate; and

(b) The services meet the agency's quality standards.

§ 434.53 Periodic medical audits.

(a) The agency must establish a system of periodic medical audits to insure that each contractor furnishes quality and accessible health care to enrolled recipients.

(b) The system of periodic medical audits must—

(1) Provide for audits conducted at least once a year for each contractor;

(2) Identify and collect management data for use by medical audit personnel; and

(3) Provide that the data includes—

(i) Reasons for enrollment and termination; and

(ii) Use of services.

§ 434.55 Approval of marketing plans, procedures, and materials.

(a) The agency must provide for a system for approval of the marketing plans, procedures, and materials submitted by the contractor under § 434.36.

(b) The requirements for approval must be in writing.

(c) The system must provide that the contractor not engage in marketing practices that mislead, confuse, or defraud either recipients or the agency.

§ 434.57 Limit payment to other providers.

The agency must ensure that, except as specified in § 434.30(b) for emergency services, payment for services covered by the contract and furnished to an enrolled recipient is made only to the contractor, not to any other provider.

§ 434.59 Continued service to recipients whose enrollment is terminated.

The agency must arrange for Medicaid services without delay for any recipient whose enrollment is terminated, unless it is terminated because of ineligibility for Medicaid.

§ 434.61 Computation of capitation fees.

The agency must determine that the actuarial basis for computing the capitation fees and any other payments provided for in the contract is sound.

§ 434.63 Monitoring procedures.

The agency must have procedures to—

(a) Monitor enrollment and termination practices; and

(b) Insure proper implementation of the contractor's grievance procedures.

§ 434.65 Services included in the State plan not covered by the contract.

If the contract does not cover all services available under the plan, the agency must arrange for services not included to be available and accessible. This may be done by having the contractor refer enrolled recipients to other providers or by some other means.

Subpart E—Federal Financial Participation

§ 434.70 Condition for FFP: Status of contract.

(a) FFP is available in expenditures for payments to contractors only for the periods that the contract—

(1) Meets the requirements of this part;

(2) Meets the appropriate requirements of 45 CFR Part 74; and

(3) Is in effect.

(b) HCFA may withhold FFP for any period during which—

(1) The State fails to meet the State plan requirements of this part; or

(2) Either party to a contract substantially fails to carry out the terms of the contract.

§ 434.71 Condition for FFP: Prior approval.

(a) FFP is not available in expenditures made under any contract exceeding $100,000 unless, before the execution of the contract, the Regional Administrator has approved in writing the expenditures that can reasonably be expected to be made during the contract period.

(b) FFP is not available in expenditures under an HMO contract unless the agency secured prior written notice from the Regional Administrator, indicating that the contractor meets the definition of an HMO.

§ 434.72 Effect of a final determination that a provisional status HMO is not an HMO.

(a) FFP is available in expenditures for payments to a provisional status HMO until the Public Health Service reaches a final determination that it is not a Federally qualified HMO.

(b) The Public Health Service's determination that the entity with provisional status is not an HMO is not considered final until—

(1) All administrative, but not judicial, appeal procedures are exhausted; or

(2) The time for requesting administrative review has lapsed without a request from the HMO.

§ 434.74 Costs under risk-basis contracts.

Under each contract in which the contractor assumes an underwriting risk, the total amount paid by the agency for carrying out the provisions of the contract is a medical assistance cost.

§ 434.75 Costs under no-risk contracts.

Under each contract in which the contractor assumes no underwriting risk—

(a) The amount paid by the agency for furnishing medical services to eligible recipients is a medical assistance cost; and

(b) The amount paid by the agency for the contractor's performance of other functions is an administrative cost.

§ 434.76 Costs under fiscal agent contracts.

Under each contract with a fiscal agent—

(a) The amount paid to the provider of medical services is a medical assistance cost; and

(b) The amount paid to the contractor for performing the agreed-upon functions is an administrative cost.

§ 434.78 Right to reconsideration of disallowance.

A Medicaid agency dissatisfied with a disallowance of FFP under this subpart may request and will be granted reconsideration in accordance with 45 CFR Part 16.

PART 435—ELIGIBILITY IN THE STATES AND DISTRICT OF COLUMBIA

The authority citation for Part 435 reads as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302) unless otherwise noted.

Subpart A—Introduction, Definitions, and General Provisions

C. Section 435.3 is amended by reprinting the title and lead-in clause and adding, in numerical order, a new statutory citation of 1902(e)(2), to read as follows:

§ 435.3 Basis.

This part implements the following sections of the Act, which state eligibility requirements and standards.

* * * * *

1902(e)(2) Minimum eligibility period for recipient enrolled in an HMO.

Subpart C—Options for Coverage as Categorically Needy

D. Subpart C of Part 435 is amended by adding a new §435.212 to read as follows:

§ 435.212 Individuals who would be ineligible if they were not enrolled in an HMO.

The agency may provide that a recipient who is enrolled in a Federally qualified HMO (under a risk contract as specified in § 434.20(a)(1) of this chapter) and who becomes ineligible for Medicaid is deemed to continue to be eligible—

(a) For a period specified by the agency, ending no later than 6 months from the date of enrollment; but

(b) Only for benefits provided to him or her as an HMO enrollee.

Subpart D—Optional Coverage of the Medically Needy

E. Subpart D of Part 435 is amended by adding a new § 435.326 to read as follows:

§ 435.326 Individuals who would be ineligible if they were not enrolled in an HMO.

If the agency provides Medicaid to the categorically needy under § 435.212, it may provide Medicaid under the same rules to medically needy recipients who are enrolled in a Federally qualified HMO.

PART 447—PAYMENTS FOR SERVICES

The authority citation for Part 447 reads as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

F. Part 447 is amended by revising § 447.361, reprinting the undesignated heading immediately before it, and adding a new § 447.362, to read as follows:

Prepaid Capitation Plans

§ 447.361 Upper limits of payment: Risk contract.

Under a risk contract, Medicaid payments to the contractor, for a defined scope of services to be furnished to a defined number of recipients, may not exceed the cost to the agency of providing those same services on a fee-for-service basis.

§ 447.362 Upper limits of payment: Nonrisk contract.

Under a nonrisk contract, Medicaid payments to the contractor may not exceed—

What Medicaid would have paid, on a fee-for-service basis, for the services actually furnished to recipients; plus

(b) The net savings of administrative costs the Medicaid agency achieves by contracting with the plan instead of purchasing the services on a fee-for-service basis.

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance program)

Dated: July 7, 1982.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

Approved: August 20, 1982.

Richard S. Schweiker,

Secretary.

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: We are proposing amendments to the Medicaid regulations that govern State residency requirements for Medicaid eligibility. Specifically, we would revise the residency rule used for residents receiving out-of-State care, and the policy pertaining to medical documentation when an individual is incapable of acknowledging intent to reside. These proposed rules are part of the Department's regulatory reform efforts that are designed to clarify regulations, delete unnecessary or burdensome requirements, and provide maximum flexibility to States while promoting patient health and safety.

DATES: To assure consideration, comments should be submitted by November 29, 1982.

ADDRESSES: Address comments in writing to: Administrator, Health Care Financing Administration, Department of Health and Human Services, P.O. Box 17076, Baltimore, Maryland 21235.

If you prefer, you may deliver your comments to Room 309–G Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, D.C., or to Room 132, East High Rise 6325 Security Boulevard, Baltimore, Maryland 21207.

In commenting, please refer to file code BPP–512–P.

Comments will be available for public inspection, as they are received, beginning approximately three weeks from today, in Room 309–G of the Department's office at 200 Independence Ave., SW., Washington, D.C. on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202–245–7890).

FOR FURTHER INFORMATION CONTACT: Marinos Svolos, (301) 594–9050.

SUPPLEMENTARY INFORMATION:

I. Background

The Medicaid program (title XIX of the Social Security Act) provides medical assistance to certain categories of individuals with low income. The program is jointly funded by the State and Federal governments, but is administered by the States. Generally, persons are determined to be eligible for Medicaid under a combination of State and Federal requirements. One requirement relates to State residency. Under section 1902(b)(3) of the Social Security Act, a State may not impose a residency requirement that excludes any individual who resides in the State. Moreover, under section 1902(a)(16) of the Act, States are obligated to furnish medical assistance to eligible individuals who are residents of the State but who are absent from the State.

The current regulations concerning residency (for the various States, the District of Columbia and the Northern Mariana Islands, 42 CFR 435.403; and for Guam, Puerto Rico, and the Virgin Islands, 42 CFR 436.403) were issued on July 17, 1979 and became effective October 15, 1979. The regulations were issued because prior regulations did not address a variety of situations that arise in residency determinations, and were not being interpreted uniformly by the States. Hence, the current regulations are intended to achieve more uniform application of rules on residency and to insure that no eligible individual is denied Medicaid because a State does not recognize him or her as a resident. In addition, the regulations are designed to protect States with adequate medical facilities against the costs of caring for an influx of individuals from States that provide less adequate institutional care.

Despite the clarification provided by the current regulations, States still encounter problems determining residency in situations where an eligible resident receives out-of-State care. This problem is particularly notable with respect to institutionalized individuals because of the expensive cost of care. Members of Congress, States and

recipient representatives have requested that we further clarify the current regulations to allow States to utilize interstate agreements for cases of disputed residency, and for other administrative purposes.

II. Provisions of the Regulations

Generally, we would revise 42 CFR 435.403 and 436.403 to clarify what constitutes State placement of an individual in a medical institution and the policy pertaining to medical documentation for incapability of indicating intent. Technical changes to update cross references and other information would also be made. The simplification of these regulations and revisions to the requirements are part of the Department's regulatory reform efforts.

The current regulations (§§ 435.403(a) and 436.403(a)) state that the agency must provide Medicaid to "otherwise eligible" residents of the State. The phrase was intended to apply to resident individuals who are absent from the State. Therefore, we would amend the regulations to clearly state that the agency must furnish Medicaid to State residents who are absent from the State. A cross reference would be added to inform States of the conditions under which they are responsible for paying for out-of-State care.

We would add a new paragraph to define the term "institution" for State residency purposes. The term would have the same meaning as that provided in 42 CFR 435.1009 for purposes of determining the conditions under which Federal financial participation (FFP) is available for persons in public institutions.

One widespread problem with these regulations concerns findings of incompetency. Documentation of competency acceptable to one State may not be acceptable to another State. Since a finding of incompetency has an impact on establishing the State of residence (especially for the institutionalized), States would have difficulty in resolving a disputed case of residency requiring evaluation of the individual's intent to reside in a State if they cannot agree whether or not an individual is incompetent. Therefore, we would revise the current regulations to allow only medical documentation from a physician, psychologist, or other person licensed by the State in the field of medical retardation to serve as evidence that an individual is incapable of acknowledging intent to reside. This revision would decrease instances of disagreements between States concerning acceptable documentation and would help resolve cases of disputed residency. It also would eliminate the possibility of documentation by a nonprofessional that may not be valid.

States have identified two problems concerning State placement of individuals in mental institutions. First, under current regulations it is unclear which State has the authority to make a placement. Second, it is unclear what actions constitute State placement. Under current regulations, if a State arranges for placement in a facility in another State, the State making the placement is the individual's State of residence, irrespective of the individual's indicated intent or ability to indicate intent. The current regulations were written in this manner so there would be no question of responsibility for payment of care. Although most States favor this approach, they would like the regulations to be more specific as to what constitutes "State placement." Since most States want to retain the "State placement" rule so long as it is clarified, we are proposing to revise the regulations to meet the State's needs without requiring interstate agreements. The proposal defines State placement, and identifies certain agencies as acting for the State. In addition, we believe that Medicaid recipients and their families would also benefit from this revision because they would be assisted by States in obtaining placements.

We would also revise the regulations to make the State of residence for an institutionalized individual who is under 21 or became incompetent before age 21, the State in which the parents or legal guardian lived at the time of placement or the parents' or legal guardians' current State of residence, if the individual is institutionalized in that State. Under the current regulations (§§ 435.403(g)(3), 436.403(f)(3)), the State of residence of these individuals is that of the parents or legal guardian (or if the parents reside in separate States, the parent that applies for Medicaid). However, in some cases, institutionalized individuals do not live in the parents' State. Hardship situations have arisen where an individual who has lived in a particular institution all his life is determined to be a resident of another State because the parents moved. As a result, the institutionalized individual is taken from a familiar environment and placed in a new institution in the parents' State of residence. Since such a move can be detrimental to the individual, guardianship appointments are frequently sought by institutional personnel if parents do not live in the State and do not wish to move the individual, or when the parents' State of residence does not offer the needed services. In addition, some States have objected to being responsible for reimbursement for services provided to individuals in institutions in other States. The proposed revision (§§ 435.403(h)(3), 436.403(g)(3)) would alleviate these problems by adopting a more flexible policy under which residency would not always be based on the parents' or guardians' current State of residence. This revision would also ease administrative burden on States because the State would not have to make a new residency determination as required under current regulations when a parent moves to another State.

Sections 435.403(h)(4) and 436.403(g)(4) would be revised to state that individuals under age 21 who are married or who have been emancipated from parental control under State law are also residents of the State in which they are institutionalized.

Last, we would revise the regulations to allow States the option to use interstate agreements for administrative purposes in other than cases of disputed residency. Some States have entered into reciprocal agreements whereby each State agrees to treat the other State's residents as residents of their own. For example, Georgia will recognize any California resident who is in a Georgia institution as a Georgia resident and California reciprocates. This type of agreement was not contemplated by the current regulation since these are not cases of disputed residency but of States' reciprocal agreements for the purpose of administrative ease. To facilitate administration of the program and to provide maximum State flexibility, we would make a technical change to the regulations to allow States the option of using interstate agreements for purposes of facilitating administration of the program as well as for purposes of resolving residency disputes.

III. Impact Analyses

A. Executive Order 12291

The Secretary has determined that the proposed regulations do not meet the criteria for a "major rule" as defined by section 1(b) of Executive Order 12291. That is, the proposed regulations will not—

- Have an annual effect on the economy of $100 million or more;
- Result in a major increase in costs or prices for consumers, any industries, any government agencies, or any geographic regions; or

• Have significant adverse effects on competition; employment, investment, productivity, innovation; or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or import markets.

Since we are proposing to clarify provisions already in effect, there would be no change in the current Medicaid expenditures with respect to the affected individuals. We believe that the total annual administrative costs to the Federal and State governments resulting from the regulations would be minor.

B. Regulatory Flexibility Act

The Secretary certifies, under 5 U.S.C. 605(b), enacted by the Regulatory Flexibility Act (Pub. L. 96-354) that the proposed regulations will not have a significant economic impact on a substantial number of small businesses, non-profit entities or small local governments.

As defined by the Regulatory Flexibility Act, the term "small entities" includes "small governmental jurisdictions". The latter term is defined as local governments (cities, counties, towns, townships, villages, school districts, or other special districts) with a population of less than fifty thousand persons. State governments are not included in this definition.

As explained previously, these proposed regulations would clarify the definitions of State residency and incompetency, and would make technical changes to requirements for State placement. Although we are uncertain of the number of institutions or beneficiaries that might be affected by these regulations, we do not believe that the number will be substantial nor the effect economically significant. We intend that these revisions have only an advantageous effect on the State agencies.

IV. Response to Comments

Because of the large number of comments we receive, we cannot acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments and respond to them in the preamble to that rule.

List of Subjects

42 CFR Part 435

Aid to Families with Dependent Children, Aliens, Categorically needy, Contracts (agreements—State plan), Eligibility, Grant-in-Aid program—health, Health facilities, Medicaid, Medically needy, Reporting requirements, Spend-down, Supplemental security income (SSI).

42 CFR Part 436

Aid to Families with Dependent Children, Aliens, Contracts (agreements), Eligibility, Grant-in-Aid program—health, Guam, Health facilities, Medicaid, Puerto Rico, Supplemental security income (SSI), Virgin Islands.

42 CFR Parts 435 and 436 are amended as set forth below:

PART 435—ELIGIBILITY IN THE STATES, DISTRICT OF COLUMBIA AND THE NORTHERN MARIANA ISLANDS

The authority citation for Part 435 reads as follows:

Authority.—Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

1. Section 435.403 is revised to read as follows:

§ 435.403 State residence.

(a) *Requirement.* The agency must provide Medicaid to eligible residents of the State, including residents who are absent from the State. The conditions under which payment for services is provided to out-of-State residents are set forth in § 431.52 of this chapter.

(b) *Definition.* For purposes of this section—"Institution" has the same meaning as "Institution" and "Medical institution", as defined in § 435.1009 of this chapter, and for purposes of State placement, the term also includes foster care homes providing food, shelter and supportive services to one or more persons unrelated to the proprietor.

(c) *Incapability of indicating intent.* For purposes of this section, an individual is considered in capable of indicating intent if the individual—

(1) Has an I.Q. of 49 or less or has a mental age of 7 or less, based on tests acceptable to the mental retardation agency in the State;

(2) Is judged legally incompetent; or

(3) Is found incapable of indicating intent based on medical documentation obtained from a physician, psychologist, or other person licensed by the State in the field of mental retardation.

(d) *Who is a State resident.* A resident of a State is any individual who:

(1) Meets the conditions in paragraphs (e) through (h) of this section; or

(2) Meets the criteria specified in an interstate agreement under paragraph (j) of this section.

(e) *Placement by States in an out-of-State institution.* Any agency of the State, including an entity under contract with the State for such purposes, that arranges for an individual to be placed in an institution located in another State, is recognized as acting on behalf of the State in making a placement. The State making the placement is considered as the individual's State of residence, irrespective of the individual's indicated intent or ability to indicate intent.

(f) *Individuals receiving a State supplementary payment (SSP).* For any individual who is receiving an SSP, the State of residence is the State paying the SSP.

(g) *Non-institutionalized individual.* (1) For any non-institutionalized individual under age 21 whose Medicaid eligibility is based on blindness or disability, the State of residence is the State in which the individual is living.

(2) For any other non-institutionalized individual under age 21, the State of residence is determined in accordance with 45 CFR 233.40, the rules governing residence under the AFDC program.

(3) For any non-institutionalized individual over age 21, the State of residence is the State where the individual is—

(i) Living with the intention to remain there permanently or for an indefinite period (or if incapable of stating intent, where the individual is living); or

(ii) Living and which the individual entered with a job commitment or seeking employment (whether or not currently employed).

(h) *Institutionalized individuals.* (1) Under both paragraphs (h) (2) and (3) of this section the State where the institution is located is the individual's State of residence unless that State determines that the individual is a resident of another State, by applying the rules under paragraphs (h) (2) and (3).

(2) For any institutionalized individual who became incapable of indicating intent at or after age 21, the State of residence is the State in which the individual is physically present, except where another State makes a placement.

(3) For any institutionalized individual who is under age 21, or who is age 21 or older, and became incapable of indicating intent before age 21, the State of residence is—

(i) The parents' or legal guardian's State of residence at the time of placement; or

(ii) The parents' or legal guardian's current State of residence, if the individual is institutionalized in that State.

(4) For any other institutionalized individual age 21 or older, and individuals under 21 who are emancipated from their parents or who are married, the State of residence is the

State where the individual is living with the intention to remain there permanently or for an indefinite period.

(i) *Specific prohibitions.* (1) The agency may not deny Medicaid eligibility because an individual has not resided in the State for a specified period.

(2) The agency may not deny Medicaid eligibility to an individual in an institution, who satisfies the residency rules set forth in this section, on the ground that the individual did not establish residence in the State before entering the institution.

(3) The agency may not deny or terminate a resident's Medicaid eligibility because of that person's temporary absence from the State if the person intends to return when the purpose of the absence has been accomplished, unless another State has determined that the person is a resident there for purposes of Medicaid.

(j) *Interstate agreements.* A State may have a written agreement with another State setting forth rules and procedures resolving cases of disputed residency. These agreements may establish criteria other than those specified in paragraph (c) through (h) of this section, but must not include criteria that result in loss of residency in both States or that are prohibited by paragraph (i) of this section. The agreements must contain a procedure for providing Medicaid to individuals pending resolution of the case. States may use interstate agreements for purposes other than cases of disputed residency to facilitate administration of the program.

(k) *Continued Medicaid for institutionalized recipients.* If, on June 23, 1982, an agency is providing Medicaid to an institutionalized recipient who, as a result of this section, would be considered a resident of a different State—

(1) The agency must continue to provide Medicaid to that recipient until June 23, 1983 unless it makes arrangements with another State of residence to provide Medicaid at an earlier date; and

(2) Those arrangements must not include provisions prohibited by paragraph (i) of this section.

PART 436—ELIGIBILITY IN GUAM, PUERTO RICO, AND THE VIRGIN ISLANDS

The authority citation for Part 436 reads as follows:

Authority:—Section 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

2. Section 436.403 is revised to read as follows:

§ 436.403 State residence.

(a) *Requirement.* The agency must provide Medicaid to eligible residents of the State, including residents who are absent from the State. The conditions under which payment for services is provided to out-of-State residents are set forth in § 431.52 of this chapter.

(b) *Definition.* For purposes of this section—"Institution" has the same meaning as "Institution" and "Medical institution", as defined in § 435.1009 of this chapter, and for purposes of State placement, the term also includes foster care homes providing food, shelter and supportive services to one or more persons unrelated to the proprietor.

(c) *Incapability of indicating intent.* For purposes of this section, an individual is considered incapable of indicating intent if the individual—

(1) Has an I.Q. of 49 or less or has a mental age of 7 or less, based on tests acceptable to the mental retardation agency in the State;

(2) Is judged legally incompetent; or

(3) Is found incapable of indicating intent based on medical documentation obtained from a physician, psychologist, or other person licensed by the State in the field of mental retardation.

(d) *Who is a State resident.* A resident of a State is any individual who:

(1) Meets the conditions in paragraphs (e) through (g) of this section; or

(2) Meets the criteria specified in an interstate agreement under paragraph (i) of this section.

(e) *Placement by States in an out-of-State institution.* Any agency of the State, including an entity under contract with the State for such purposes, that arranges for an individual to be placed in an institution located in another State, is recognized as acting on behalf of the State in making a placement. The State making the placement is the individual's State of residence, irrespective of the individual's indicated intent or ability to indicate intent.

(f) *Non-institutionalized individuals.* (1) For any non-institutionalized individual under age 21, the State of residence is determined in accordance with 45 CFR 233.40, the rules governing residence under the AFDC program.

(2) For any other individual over age 21, the State of residence is the State where the individual is—

(i) Living with the intention to remain there permanently or for an indefinite period (or if incapable of stating intent, where the individual is living); or

(ii) Living and which the individual entered with a job commitment or seeking employment (whether or not currently employed).

(g) *Institutionalized individuals.* (1) Under both paragraphs (g) (2) and (3) of this section, the State where the institution is located is the individual's State of residence unless that State determines that the individual is a resident of another State, by applying the rules under paragraphs (g) (2) and (3).

(2) For an institutionalized individual who became incapable of indicating intent at or after age 21, the State of residence is the State in which the individual is physically present, except where another State makes a placement.

(3) For any institutionalized individual who is under age 21, or who is age 21 or older, and became incapable of indicating intent before age 21, the State of residence is—

(i) The parents' or legal guardian's State of residence at the time of placement; or

(ii) The parents' or legal guardian's current State of residence, if the individual is institutionalized in that State.

(4) For any other institutionalized individual age 21 or older, and individuals under 21 who are emancipated from their parents or who are married, the State of residence is the State where the individual is living with the intention to remain there permanently or for an indefinite period.

(h) *Specific prohibitions.* (1) The agency may not deny Medicaid eligibility because an individual has not resided in the State for a specified period.

(2) The agency may not deny Medicaid eligibility to an individual in an institution, who satisfies the residency rules set forth in this section, on the grounds that the individual did not establish residence in the State before entering the institution.

(3) The agency may not deny or terminate a resident's Medicaid eligibility because of that person's temporary absence from the State if the person intends to return when the purpose of the absence has been accomplished, unless another State has determined that the person is a resident there for purposes of Medicaid.

(i) *Interstate agreements.* A State may have a written agreement with another State setting forth rules and procedures resolving cases of disputed residency. These agreements may establish criteria other than those specified in paragraphs (c) through (g) this section, but most not include criteria that result in loss of residency in both States or that are prohibited by paragraph (h) of this section. The agreements must contain a procedure for providing Medicaid to individuals pending resolution of the case. States may use interstate

agreements for purposes other than cases of disputed residency to facilitate administration of the program.

(j) *Continued Medicaid for institutionalized recipients.* If, on June 23, 1982, an agency is providing Medicaid to an institutionalized recipient who, as a result of this section, would be considered a resident of a different State—

(1) The agency must continue to provide Medicaid to that recipient until June 23, 1983 unless it makes arrangements with another State of residence to provide Medicaid at an earlier date; and

(2) Those arrangements must not include provisions prohibited by paragraph (h) of this section.

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance)

Dated: July 16, 1982.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

Approved: September 3, 1982.

Richard S. Schweiker,

Secretary.

BILLING CODE 4120-03-M

Office of the Secretary

45 CFR Part 5b

Privacy Act; Exempt Record System

AGENCY: Department of Health and Human Services.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of Inspector General of the Department of Health and Human Services is, by separate **Federal Register** notice, proposing to establish a new system of records entitled "Civil and Administrative Investigative Files of the Inspector General, HHS/OS/OIG". The Department intends to exempt this system from certain provisions of the Privacy Act, 5 U.S.C. 552a. The proposed exemption is authorized by subsection (k)(2) of the Privacy Act, which applies to investigative materials compiled for law enforcement purposes. The Office of Inspector General (OIG) is authorized to gather information for civil and administrative law enforcement purposes under Pub. L. 94-505, establishing the HHS Office of Inspector General, and section 1128A of the Social Security Act, authorizing civil money penalties for the filing of false claims in certain health care financing programs. In order to maintain the integrity of the OIG investigative process and to assure that the OIG will be able to obtain access to complete and accurate information, the Department proposes to exempt this system, under subsection (k)(2), from the notification, access, correction and amendment provisions of the Privacy Act. The Department is requesting public comments on the proposed exemption.

DATES: Comments are due on or before November 1, 1982.

ADDRESS: Comments should be addressed to Richard McGowan, Public Affairs Officer, Office of Inspector General, Department of Health and Human Services, Room 5267 North Building, 330 Independence Avenue, SW., Washington, D.C. 20201. Comments received will be available for inspection at the above address.

FOR FURTHER INFORMATION CONTACT: Richard McGowan, Public Affairs Officer, Office of Inspector General, Department of Health and Human Services, at the above address or call (202) 472-3142.

SUPPLEMENTARY INFORMATION: The Office of Inspector General is expanding its responsibilities in the area of civil and administrative investigations involving DHHS programs and operations. This requires the establishment of a records system to document the investigations which will be conducted by the OIG or other investigative agencies; to improve the tracking of reviews conducted because of allegations and complaints received by DHHS or other agencies concerning DHHS programs, or current or former HHS personnel; to improve the reporting of the results of civil and administrative investigations to other components of the Department for their use in operating and evaluating their programs; and to assist in civil and administrative proceedings, including proceedings under section 1128A of the Social Security Act (establishing civil monetary penalties in the Medicare, Medicaid, and Maternal and Child Health programs).

This system will contain sensitive investigative records, the release of which could impede on-going investigations, violate the privacy rights of individuals other than the subjects of the investigations, reveal the identities of confidential sources, or otherwise impair the ability of the Office of Inspector General to conduct civil and administrative investigations. For these reasons, the Department proposes to exempt this system, under subsection (k)(2) of the Privacy Act, from the notification, access, correction and amendment provisions of the Privacy Act.

The proposed exemption does not meet the standards set forth in Executive Order 12291 for classification as a major rule, and no regulatory analysis statement is required.

The Secretary certifies that the proposed exemption will not have a significant impact on any substantial number of small entities as defined by the Regulatory Flexibility Act, Pub. L. 96-354.

List of Subjects in 45 CFR Part 5b

Privacy.

For the reasons set out in the preamble it is proposed that the Department's Privacy Act Regulations, Part 5b of 45 CFR Subtitle A, be amended as follows:

PART 5b—PRIVACY ACT REGULATIONS

1. By adding paragraph (b)(2)(ii)(D) as follows:

§ 5b.11 Exemptions.

* * * * *

(b) * * *

(2) * * *

(ii) * * *

(D) Civil and Administrative Investigative Files of the Inspector General, HHS/OS/OIG.

(5 U.S.C. 552a)

Dated: September 10, 1982.

Richard S. Schweiker,

Secretary.

ACTION

Information Collection Request Under Review

This notice sets forth certain information about an information collection proposal by ACTION, the national volunteer agency.

Background:

Under the Paperwork Reduction Act (44 U.S.C., Chapter 35), the Office of Management and Budget (OMB) reviews and acts upon proposals to collect information from the public or to impose recordkeeping requirements. ACTION has submitted the information collection proposal described below to OMB. OMB and ACTION will consider comments on proposed collection of information and recordkeeping requirements. Copies of the proposed forms and supporting documents [request for clearance (SF 83), supporting statement, instructions, transmittal letter, and other documents] may be obtained from the agency clearance officer.

Information About This Proposed Collection:

Agency Clearance Officer—Richard D. English—202–254–8501.

Agency Address: ACTION, 806 Connecticut Ave., NW., Washington, D.C. 20525.

Title of Form: The President's Volunteer ACTION Awards.

Office of ACTION Issuing Proposal: Office of Policy and Planning.

Agency Official to Contact for Further Information: Mark Blitz, Assistant Director.

Type of Request: New.

Frequency of Collection: Annually.

General Description of Respondents: Individuals or Groups involved in private or federally sponsored volunteer activities.

Estimated Number of Responses: 2,500.

Estimated Hours for All Respondents to Complete Form: 2,500.

Respondent's Obligation to Reply: Voluntary.

This is not a collection proposal under Section 3504 (h) of the Paperwork Reduction Act. Person responsible for OMB Review: James L. Thomas, 202–395–6880.

Richard D. English,

Deputy Assistant Director, ACTION.

BILLING CODE 6050–01–M

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

Advisory Committee on Foreign Animal and Poultry Diseases Meeting; Correction

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of a meeting of the Secretary's Advisory Committee on Foreign Animal and Poultry Diseases: Correction.

SUMMARY: The purpose of this document is to give notice that the meeting of the Secretary's Advisory Committee on Foreign Animal and Poultry Diseases announced in the **Federal Register** issue of Friday, September 3, 1982, appearing on page 38955 (FR Doc. 82–24395) is extended by one day to October 14, 1982.

PLACE, DATE, AND TIME OF MEETING: FR Doc. 82–24395 appearing on page 38955 in the issue of Friday, September 3, 1982 inadvertently announced that the meeting would be held on October 13, 1982, instead of stating the meeting would be held on October 13, 1982, and October 14, 1982. The meeting will take place in Room 743A Federal Building, United States Department of Agriculture, Hyattsville, Maryland 20783, October 13, 1982 from 9:00 a.m. to 4:00 p.m. and October 14, 1982 from 9:00 a.m. to 2:00 p.m.

FOR FURTHER INFORMATION CONTACT: Dr. Harless McDaniel, Chief Staff Officer, Technical Support, APHIS, VS, Federal Building, Room 757, Hyattsville, Maryland 20783, 301–436–8087.

BILLING CODE 3410–34–M

Office of Rural Development Policy

National Advisory Council on Rural Development, Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–163), notice is hereby given of a meeting of the National Advisory Council on Rural Development. The meeting will be held on October 12–14, 1982, at the Lakeway Inn, 101 Lakeway Drive, Village of Lakeway, Austin, Texas 78734. The Council will convene at 1:00 p.m. on October 12th.

The purpose of the meeting will be to make final proposals and recommendations on a national rural development strategy.

The meeting will be open to the public as space allows. In order to provide opportunity for the public to comment on the work of the Council, written statements will be received 2 weeks prior to and 2 weeks following the meeting. Due to the press of business, however, public participation will be limited to written statements. Views and comments will be addressed in writing, and, when deemed appropriate by the Cochairman, may be addressed orally at the next meeting of the Council.

Written comments, both prior to and following the meeting, should be addressed to: Mr. Willard (Bill) Phillips, Jr., Director, Office of Rural Development Policy, Room 4128–S, United States Department of Agriculture, 12th and Independence SW., Washington, D.C 20250, (202) 382–0044.

Dated: September 24, 1982.

Willard (Bill) Phillips,

Director, Office of Rural Development Policy.

BILLING CODE 3410–07–M

Office of Director for Science and Education

Animal Health Science Research Advisory Board; Meeting

According to the Federal Advisory Committee Act of October 6, 1972, Pub. L. 92–463, Science and Education announces the following meeting:

Name: Animal Health Science Research Advisory Board.
Date: November 2–3, 1982.
Time: 8:30 a.m.
Place: Room 104–A, Administration Building, U.S. Department of Agriculture, 14th and Independence Avenue, SW., Washington, D.C. 20250.
TYPE OF MEETING: Open to the public. Persons may participate in the meeting as time and space permit.
COMMENTS: The public may file written comments before or after the meeting with the contact person below.
PURPOSE: The Board will consult with and advise the Secretary of Agriculture on implementing animal health and disease research programs. Recommendations will be made also on priorities of research in these programs.
BOARD NAMES AND AGENDA: Available from contact person below.
CONTACT PERSON: Earl J. Splitter, Executive Secretary, Animal Health Science Research Advisory Board, Cooperative State Research Service, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447–5007.

Done at Washington, D.C., this 13th day of September 1982.

T. B. Kinney, Jr.,
Acting Assistant Secretary, Science and Education.

BILLING CODE 3410-03-M

Office of the Secretary

Detrrmination of the Market Stabilization Price for Sugar for Fiscal Year 1983

AGENCY: Agriculture Department.
ACTION: Notice.

SUMMARY: This notice sets forth the market stabilization price for sugar for the period October 1, 1982–September 30, 1983. The market stabilization price was announced as 20.73 cents per pound on September 1, 1982 by the Secretary of Agriculture.

EFFECTIVE DATE: October 1, 1982
FOR FURTHER INFORMATION CONTACT: James Truran, Telephone: (202) 447–2916.

SUPPLEMENTARY INFORMATION: Presidential Proclamation 4940 of May 5, 1982 (47 FR 19657) established a market stabilization price for sugar for May 11, 1982–September 30, 1982 of 19.88 cents. The market stabilization price is the sum of (1) the price support level for the applicable fiscal year expressed in cents per pound of raw cane sugar; (2) adjusted average transportation costs; (3) interest cost, if applicable; and (4) 0.2 cent. The adjusted average transportation costs are the weighted average costs of handling and transporting domestically produced raw cane sugar from Hawaii to gulf and Atlantic Coast ports, as determined by the Secretary. Interest costs shall be the amount of interest, as determined or estimated by the Secretary, that would be required to be paid by a recipient of a price support loan for raw cane sugar upon repayment at full maturity. Interest costs are only applicable if a price support loan recipient is not required to pay interest upon forfeiture of the loan collateral.

The proclamation also requires the Secretary of Agriculture to announce the market stabilization price applicable to each subsequent fiscal year no later than 30 days prior to the beginning of the fiscal year for which such market stabilization price is applicable. The Secretary made this announcement on September 1, 1982.

The proposed rule for the price support loan program for sugar was published in the **Federal Register** July 29, 1982. Comments on the proposed rule were received through August 25. The comments received have been considered and the Secretary of Agriculture has determined that the applicable loan rate expressed in cents per pound for raw cane sugar shall be 17.0 cents per pound. Furthermore, it has been determined that a loan recipient will not be required to pay interest upon forfeiture of the loan collateral.

Accordingly, after appropriate review, it has been determined that the market stabilization price for fiscal year 1983 shall be 20.73 cents per pound. This consists of the 17.0 cent loan rate; adjusted average transportation costs of 2.66 cents; an interest cost of 0.87 cent; and 0.2 cent per pound. The transportation factor represents data for the most recent year with complete data available, 1981, adjusted to 1983 by applying a projected increase in the Producer Price Index for finished goods over this time. The interest factor is based on an estimated average interest rate of 10.25 percent over the year, and a six month loan maturity period.

Notice

Notice is hereby given that in conformity with the provisions of paragraph c of Headnote 4 of part 3 of the Appendix to the Tariff Schedules of the United States, the market stabilization price for sugar for fiscal year 1983 has been determined to be 20.73 cents per pound.

Dated: September 27, 1982.
John R. Block,
Secretary of Agriculture.

BILLING CODE 3410-10-M

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committee of the American Economic Association; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463, as amended by Pub. L. 94–409), notice is hereby given that the Census Advisory Committee of the American Economic Association will convene on October 22, 1982, at 9:15 a.m. in Room 2424, Federal Building 3 at the Bureau of the Census in Suitland, Maryland.

The Census Advisory Committee of the American Economic Association advises the Director, Bureau of the Census, on technical matters, accuracy levels, and conceptual problems concerning the economic censuses; reviews major aspects of the Bureau's programs; and advises on the role of analysis within the Bureau and the need for providing data in more detail.

The Committee is composed of 15 members of the American Economic Association.

The agenda for the meeting, which is scheduled to adjourn at 3:45 p.m., is: (1) Introductory remarks by the Director, Bureau of the Census, including staff changes and major budget program developments; (2) election of chairperson-elect; (3) income imputation processing; (4) concurrent seasonal adjustment; (5) gross labor force flows date; (6) industrial data for economic analysis; (7) status report on inventory improvement project; (8) update on 1990 census; (9) Committee recommendations; and (10) plans and date for the next meeting.

The meeting will be open to the public, and a brief period will be set aside for public comment and questions. Extensive questions or statement must be submittee in writing to the Committee Control Officer at least 3 days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting or who wish to submit written statements may contact the Committee Control Officer, Mr. Thomas L. Mesenbourg, Bureau of the

Census, Room 2102C, Federal Building 4, Suitland, Maryland. (Mail address: Washington, D.C. 20233). Telephone (303) 763–7800.

Dated: September 27, 1982.

Bruce Chapman,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

Foreign-Trade Zone Board

[Order No. 196]

Approval for Expansion of Foreign-Trade Zone No. 54, Clinton County, New York, Adjacent to the Champlain-Rouses Point Customs Port of Entry

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board (the Board) adopts the following order:

Whereas, the Clinton County Area Development Corporation on behalf of Clinton County, New York, Grantee of Foreign-Trade Zone No. 54, has applied to the Board for authority to expand its general-purpose zone located in Plattsburgh and Champlain, New York, to include 101 acres at the Clinton County Air Industrial Park in Plattsburgh, adjacent to the Champlain-Rouses Point Customs port of entry;

Whereas, the application was accepted for filing on September 25, 1981, and notice inviting public comment was given in the **Federal Register** on October 9, 1981 (46 FR 50091);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to provide zone services to new tenants whose operations cannot be accommodated within existing zone space; and

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed September 25, 1981. The Grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, D.C. this 23rd day of September 1982.

Malcolm Baldrige,

Secretary of Commerce, Chairman and Executive Officer, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 82-26888 Filed 9-29-82; 8:45 am]

BILLING CODE 3510-25-M

[Order No. 197]

Approval for Expansion of Foreign-Trade Zone No. 51, Duluth, Minnesota, Within the Duluth Customs Port of Entry

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board (the Board) adopts the following order:

Whereas, the Seaway Port Authority of Duluth, Grantee of Foreign-Trade Zone No. 51, has applied to the Board for authority to expand its general-purpose zone located in Duluth's marine terminal area, to include a 29-acre site at the Airpark Industrial Park adjacent to Duluth International Airport, within the Duluth Customs port of entry;

Whereas, the application was accepted for filing on December 2, 1981, and notice inviting public comment was given in the **Federal Register** on December 10, 1981 (46 FR 60485);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to provide zone services to new tenants whose operations cannot be accommodated within existing zone space; and

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed December 2, 1981. The Grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, D.C. this 23rd day of September 1982.

Malcolm Baldrige,

Secretary of Commerce, Chairman and Executive Officer, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 82-26889 Filed 9-29-82; 8:45 am]

BILLING CODE 3510-25-M

[Order No. 198]

Approval for Expansion of Foreign-Trade Zone No. 64, Jacksonville, Florida, Within the Jacksonville Customs Port of Entry

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board (the Board) adopts the following order:

Whereas, the Jacksonville Port Authority, Grantee of Foreign-Trade Zone No. 64, has applied to the Board for authority to expand its general-purpose zone adjacent to Jacksonville International Airport, to include an existing warehouse located at 2001 North Ellis Road, Jacksonville, within the Jacksonville Customs port of entry;

Whereas, the application was accepted for filing on January 12, 1982, and notice inviting public comment was given in the **Federal Register** on January 20, 1982 (47 FR 2897);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the temporary site is necessary to provide zone services for the Jacksonville area until permanent facilities are developed; and

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed January 12, 1982. The Grantee shall notify the Executive Secretary of the Board for approval prior

to the commencement of any manufacturing operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, D.C. this 23rd day of September 1982.

Malcolm Baldrige,

Secretary of Commerce, Chairman and Executive Officer, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-25-M

[Order No. 199]

Approval for Expansion of Foreign-Trade Zone No. 57, Mecklenburg County, North Carolina, Within the Charlotte Customs Port of Entry

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board (the Board) adopts the following order:

Whereas, the North Carolina Department of Commerce, Grantee of Foreign-Trade Zone No. 57, has applied to the Board for authority to expand its general-purpose zone located on 5 acres in Mecklenburg County to include a nearby industrial park covering 85 acres in the Arrowood industrial development, within the Charlotte Customs port of entry;

Whereas, the application was accepted for filing on February 18, 1982, and notice inviting public comment was given in the **Federal Register** on February 26, 1982 (47 FR 8392);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to provide zone services to new tenants whose operations cannot be accommodated within existing zone space; and

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed February 18, 1982. The Grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, D.C. this 23rd day of September 1982.

Malcolm Baldrige,

Secretary of Commerce, Chairman and Executive Officer, Foreign-Trade Zones Board.

Attest:

BILLING CODE 3510-25-M

International Trade Administration

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue N.W., Washington, D.C. 20230.

Docket No. 82–00244. Applicant: The University of Texas at Dallas, Biology Program, Box 688, Richardson, TX 75080. Instrument: Electron Microscope, Model EM 10CA and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: See Notice on page 32180 in the **Federal Register** of July 26, 1982. Application received by Commissioner of Customs: June 17, 1982.

Docket No. 82–00245. Applicant: The Johns Hopkins Hospital, 600 North Wolfe Street, Baltimore, MD 21205. Instrument: Electron Microscope, Model JEM–100S and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of instrument: See Notice on page 32181 in the **Federal Register** of July 26, 1982. Instrument Ordered: June 3, 1982.

Docket No. 82–00247. Applicant: University of Wisconsin-Madison, Materials Science Center, 1115 Engineering Research Building, 1500 Johnson Drive, Madison, WI 53706. Instrument: Scanning Transmission Electron Microscope, Model JEM 200CX. Manufacturer: JEOL Ltd., Japan. Intended use of instrument: See Notice on page 33527 in the **Federal Register** of August 3, 1982. Instrument ordered: April 21, 1982.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered. Reasons: Each foreign instrument to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each instrument establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each instrument described above or at the time of receipt of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign instruments to which the foregoing applications relate, for such purposes as these instruments are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Service.

[FR Doc. 82-26866 Filed 9-29-82; 8:45 am]

BILLING CODE 3510-25-M

Michigan Molecular Institute; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15

CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs staff, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 82-00001. Applicant: Michigan Molecular Institute, 1910 West St., Andrews Road, Midland, MI 48640. Instrument: Nuclear Magnetic Resonance Spectrometer, Model WM-360 and Accompanying Accessories. Manufacturer: Bruker-Physik AG, West Germany. Intended use of instrument: See Notice on page 56633 in the **Federal Register** of November 18, 1981.

Comments: Comments dated December 21, 1981 had been received from the Intermagnetics General Corporation (IGC) reflecting the statement (in answer to Question 9 of the application form) that there are no domestic manufacturers of 8.5T magnets. IGC claims it has produced a number of NMR quality magnet systems including a 9T system delivered to Cornell University and a 14.1T system delivered to Carnegie Mellon University. IGC believes that a combination of a Nicolet spectrometer and IGC magnet system would, in fact, provide a capability similar to that of the Bruker system ultimately purchased. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used was being manufactured in the United States at the time the foreign instrument was ordered (December 22, 1980). Reasons: The foreign instrument provides a decoupler suitable for performing the cross relaxation experiment which requires the capability of switching both the irradiation frequency and power level so that the labile proton resonance and the water resonance are alternately irradiated for short time periods and at different power levels in the period prior to the sampling pulse. We are advised by the Department of Health and Human Services (DHHS) in its memorandum dated June 17, 1982 that the capability of the foreign instrument described above is pertinent to the applicant's intended uses and the most closely comparable domestic instrument, the Nicolet Model 360, did not offer the cross relaxation capability at the time of purchase. For these reasons, we find the Nicolet Model 360 was not of equivalent scientific value to the foreign instrument for such purposes as the foreign instrument is intended to be used at the time the foreign-instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as the foreign instrument is intended to be used which was being manufactured in the United States at the time the foreign instrument was ordered.

[FR Doc. 82-26867 Filed 9-29-82; 8:45 am]

BILLING CODE 3510-25-M

New York State Police Crime Laboratory; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00196. Applicant: New York State Police Crime Laboratory, Building No. 22, State Campus, Albany, New York 12226. Article: Video Spectral Comparator and Accessory. Manufacturer: Foster & Freeman Ltd., United Kingdom. Intended use of instrument: See Notice on page 27389 in the **Federal Register** of June 24, 1982.

Comments: No comments have been received with respect to this application. Decision: Application denied. Because the instrument possesses no scientific value for the purposes for which it is intended, a prima facie case is not presented upon which to base a finding of scientific equivalency. Reasons: To qualify for duty-free entry under item 851.60, an applicant must show that it intends to use the foreign instrument in either scientific research or formal science-oriented education. Item 851.60 and the preceding superior heading read as follows:

Articles entered for the use of any non-profit institution, whether public or private, established for educational or scientific purposes:

851.60 Instruments and apparatus, if no instrument or apparatus *of equivalent scientific value for the purposes for which the instrument or apparatus is intended to be used* is being manufactured in the United States (emphasis added, see headnote 6 to this part).

Thus, Congress clearly presumed that an instrument must have at least some "scientific value for the purposes for which the instrument or apparatus is intended to be used" to be eligible for duty-free entry under item 851.60. Unless an applicant actually intends that the instrument will be used either in scientific research or science-oriented education, the required scientific equivalency determination would be meaningless.

Thus, in order to make the determination of scientific equivalency, it is clear that some scientific use for the foreign instrument, whether educational or research, must be intended. Although the foreign instrument falls within the tariff items eligible for duty-free entry consideration, it is intended to be used in the Police Laboratory in the detection of alterations, erasers, substitutions in evidential material, in the deciphering of charred documents, and in viewing obliberated text. In connection with this use the scientific consultants at the National Bureau of Standards (NBS) advise in a memorandum dated August 11, 1982, that the foreign instrument does not qualify for duty-free entry under Pub. L. 89-651 [Item 851.60, TSUS] because the application does not relate to any scientific or educational purposes. In view of the intended use of the instrument, and the above stated requirements of Pub. L. 89-651, the Department cannot make the finding on scientific equivalency upon which duty-free entry must be conditioned. Therefore, the application is denied.

BILLING CODE 3510-25-M

Stanford University; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15

CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 81-00213. Applicant: Stanford University, 851 Welch Road, Palo Alto, CA 94304. Article: Tritium Meter with Accessories. Manufacturer: Hughes Whitlock, Ltd., United Kingdom. Intended use of instrument: See Notice on page 31467 in the **Federal Register** of June 16, 1982.

Comments: No comments have been received with respect to this application. Decision: Application denied. Because the instrument possesses no scientific value for the purposes for which it is intended, a prima facie case is not presented upon which to base a finding of scientific equivalency. Reasons: To qualify for duty-free entry under item 851.60, an applicant must show that it intends to use the foreign instrument in either scientific research or formal science-oriented education. Item 851.60 and the preceding superior heading read as follows:

Articles entered for the use of any non-profit institution, whether public or private, established for educational or scientific purposes:

851.60 Instruments and apparatus, if no instrument or apparatus of equivalent scientific value for the purposes for which the instrument or apparatus is intended to be used is being manufactured in the United States (see headnote 6 to this part).

Thus, Congress clearly presumed that an instrument must have at least some "scientific value for the purposes for which the instrument or apparatus is intended to be used" to be eligible for duty-free entry under item 851.60. Unless an applicant actually intends that the instrument will be used either in scientific research or science-oriented education, the required scientific equivalency determination would be meaningless.

Thus, in order to make the determination of scientific equivalency, it is clear that some scientific use for the foreign instrument, whether educational or research, must be intended. Although the foreign instrument falls within the tariff items eligible for duty-free entry consideration, it is intended to be used to conduct assays for radioactive contamination resulting from the use of radioactive biochemicals in research and teaching laboratories throughout the applicant University. It is not being used for a specific experiment or to obtain scientific knowledge (e.g., on the effects of radiation) but it is support equipment or a safety device, not unlike a badge that measures exposure to radiation, or an alarm system triggerd by radiation. In connection with this use our scientific consultants at the National Bureau of Standards (NBS) advise in their memorandum dated October 8, 1981 that the foreign instrument does not qualify for duty-free entry under Pub. L. 89-651 [Item 851.60, TSUS] for the apparent intended use. In view of the intended use of the instrument, and the above stated requirements of Pub. L. 89-651, the Department cannot make the finding on scientific equivalency upon which duty-free entry must be conditioned. Therefore, the application is denied.

[FR Doc. 82-26863 9-29-82; 8:45 am]

BILLING CODE 3510-25-M

University of Tennessee Center for the Health Sciences; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 82-00202. Applicant: University of Tennessee Center for the Health Sciences, Charles B. Stout, Mass Spectrometry Laboratory, 800 Madison Avenue, Memphis, Tennessee 38163. Instrument: FAB11NF FAB-GG Field Ion Source. Manufacturer: Ion Tech, United Kingdom. Intended use of instrument: See Notice on page 27389 in the **Federal Register** of June 24, 1982.

Comments: No comments have been received with respect to this application. Decision: application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (November 11, 1981). Reasons: The foreign instrument provides the capability to volatilize and ionize compounds of low volatility and high molecular weight. The Department of Health and Human Services advises in its memorandum dated August 5, 1982 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign article was ordered.

BILLING CODE 3510-25-M

[Case No. 636]

Digital Resources, Ltd.; Order Temporarily Denying Export Privileges

In the matter of: Alan C. T. Simmons, Keasen Farm, St. Ive Liskard, Cornwall, England, d.b.a. Digital Resources, Ltd., 34th Pezikow Syntagmatos 17, Pireas, Greece.

The Department of Commerce (the "Department"), pursuant to the provisions of § 388.19 of the Export Administration Regulations (15 CFR Part 368, *et. seq.* (1981)) (the "Regulations"), has petitioned the Hearing Commissioner for an order temporarily denying all export privileges to Alan C. T. Simmons, doing business as Digital Resources, Ltd. ("Simmons-DRL").

The Department states that Simmons-DRL is under investigation by the Department's Office of Export Enforcement. The Department states further that its investigation gives it reason to believe: (i) That Simmons-DRL has engaged in a scheme to procure United States-origin goods for use in, for, or by the Soviet Union; (ii) that, in carrying out certain transactions, Simmons-DRL has reexported U.S.-origin commodities contrary to the Regulations; and (iii) that Simmons-DRL may attempt future reexports contrary to the Regulations unless appropriate action is taken to preclude such attempts.

Based upon the showing made by the Department, I find that an order

temporarily denying all export privileges to Simmons-DRL is required in the public interest to facilitate enforcement of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2401, *et seq.* (Supp. III 1979)), and the Regulations and to permit completion of the Department's investigation.

Anyone who is now or may in the future be dealing with the above-named respondent in transactions that in any way involve U.S.-origin commodities or technical data is specifically alerted to the provisions set forth in Paragraph IV below.

Accordingly, it is hereby Ordered:

I. All outstanding validated export licenses in which respondent appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Administration for cancellation.

II. The respondent, its successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (a) As a party or as a representative of a party to a validated export license application, (b) in the preparation or filing of any export license application or reexport authorization, or of any document to be submitted therewith, (c) in the obtaining of using of any validated or general export license or other export control document, (d) in the carrying on of negotiations with respect to, or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported, and (e) in the financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. Such denial of export privileges shall extend not only to the respondent, but also to its agents and employees and to any successor. After notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Administration, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with the respondent or related party, or whereby the respondent or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for the respondent or any related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

V. In accordance with the provisions of § 388.19(b) of the Regulations, the respondent may move at any time to vacate or modify this temporary denial order by filing with the Hearing Commissioner, International Trade Administration, U.S. Department of Commerce, Room 6716, 14th and Constitution Avenue, NW., Washington, D.C. 20230, an appropriate motion for relief, supported by substantial evidence, and may also request an oral hearing thereon, which, if requested, shall be held before the Hearing Commissioner at the earliest convenient date. In accordance with the provisions of § 388.22 of the Regulations, the respondent or any related party may appeal to the Assistant Secretary for Trade Administration, U.S. Department of Commerce, Room 3898–B, 14th and Constitution Avenue, NW., Washington, D.C. 20230, and order temporarily denying export privileges.

VI. This order is effective immediately. It remains in effect until the final disposition of any administrative or judicial proceeding or proceedings initiated against the respondent as a result of the ongoing investigation. A copy of this order and Parts 387 and 388 of the Regulations shall be served upon the respondent.

Dated: September 24, 1982.

Thomas W. Hoya,

Hearing Commissioner.

BILLING CODE 3510–25–M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1982; Additions and Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to and deletions from procurement list.

SUMMARY: This action adds to and deletes from Procurement List 1982 services to be provided by and commodities to be produced by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: September 30, 1982.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: On June 11, 1982, May 21, 1982, and July 23, 1982, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (47 FR 25399, 47 FR 22141, and 47 FR 31915 and 31916) of proposed additions to and deletions from Procurement List 1982, November 12, 1981 (46 FR 55740).

Additions

After consideration of the revelant matter presented, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77.

Accordingly, the following services are hereby added to Procurement List 1982:

SIC 7349

Janitorial/Custodial, DCASR Building B–05, Lockheed Complex, 805 Walker Street, DCASR Building B–05, AF Plant 6, 612 Tinker Street, Marietta, Georgia

SIC 7349

Janitorial Service, Bureau of Land Management, Salem District Office, 1717 Fabry Road, S.E., Salem, Oregon

Deletions

After consideration of the relevant matter presented, the Committee has

determined that the commodities and service listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77.

Accordingly, the following commodities and service are hereby deleted from Procurement List 1982:

Class 1430

Circuit Card Assembly, 1430–00–471–5375, 1430–00–403–5787

Class 1440

Circuit Card Assembly, 1440–00–454–8574

Class 6920

Circuit Card Assembly, 6920–00–482–8335

SIC 7399

Assembly of General Mechanic's Tool Kit, (5180–00–177–7033), GSA Depot, Kansas City, Missouri

C. W. Fletcher,

Executive Director.

[FR Doc. 82–26977 Filed 9–29–82; 8:45 am]

BILLING CODE 6820–33–M

Procurement List 1982; Correction of Proposed Additions

In FR Doc. 82–25664, published September 17, 1982 (47 FR 41154), the NSN for the item under Scarf, Branch of Service, Camouflage is corrected to read 8455–01–078–0745.

C. W. Fletcher,

Executive Director.

BILLING CODE 6820–33–M

Procurement List 1982; Proposed Additions

AGENCY: Committee for Purchase From the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to Procurement List 1982 commodities to be produced by and services to be provided by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: November 3, 1982.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher (703) 557–1145.

SUPPLEMENTARY INFORMATION:

This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and services to Procurement List 1982, November 12, 1981 (46 FR 55740):

Class 8115

Box, Shipping Wood,
8115–00–935–5887, 8115–00–935–6518,
8115–00–935–6525,
8115–00–935–6528,
8115–00–935–6530

Class 8415

Sock, Extreme Cold Weather, 8415–01–057–3503

SIC 0782

Grounds Maintenance, Vancouver Army Barracks, Vancouver, Washington

SIC 7349

Janitorial Service, John E. Moss Building, 650 Capital Mall, Sacramento, California
Janitorial Service, Federal Building, 1130 "O" Street, Fresno, California
Janitorial/Custodial (Laundry), National Defense University, Health Fitness, Ft. NcNair, Washington, D.C.
Janitorial Service, Federal Records Center, 380 Trapelo Road, Waltham, Massachusetts
Janitorial Service, Federal Building and Courthouse, 228 Walnut Street, Harrisburg, Pennsylvania
Janitorial Service, Federal Building, 431 Crawford Street, Portsmouth, Virginia
Janitorial Service, Marine Corps Development and Education Command Buildings: 3035, 2034, 3400, 3098, and 2079, Quantico, Virginia

SIC 7349

Janitorial Service, U.S. Post Office and Courthouse, 10th and Main Streets, Richmond, Virginia
Janitorial Services, Survival School Buildings 1212, 1228, 1324, 1334, 1342, and 1207, Fairchild AFB, Washington
Janitorial Service, Federal Building, 502 6th Street, Post Office and Courthouse, 5th Avenue and 9th Street
O. I., 720 Sixth Avenue, Steiner Building, 233–37 4th Avenue, Hampton Warehouse, 25th and Suyan Avenue, Huntington, West Virginia

BILLING CODE 6820–33–M

COMMODITY FUTURES TRADING COMMISSION

Minneapolis Grain Exchange Proposed White Wheat Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Minneapolis Grain Exchange ("MGE") has applied for designation as a contract market in white wheat. The Commission has determined that the terms and conditions of the proposed white wheat futures contract are of major economic significance and that, accordingly, making available the proposed contract for public inspection and comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before November 29, 1982.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the Minneapolis Grain Exchange white wheat futures contract.

FOR FURTHER INFORMATION CONTACT: Robert Clark, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C., (202) 254–7303.

A copy of the terms and conditions of the MGE proposed white wheat futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the MGE in support of its application for contract market designation in white wheat may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1981)). Requests for inspection of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the

terms and conditions of the proposed futures contracts, or with respect to other materials submitted by the MGE in support of its application, should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, by November 29, 1982. Such comment letters will be publicly available except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C. on September 27, 1982.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Department of the Air Force

Proposed Deactivation of the Titan II Missile System; Finding of No Significant Impact

The United States Air Force has completed its environmental impact analysis process and has issued the following finding of no significant impact (FONSI):

Section 1.0 *Introduction.*

The Air Force is proposing to deactivate the Titan II Missile Weapons System. The missile, its support equipment, and materiel, together with the system's operating, maintenance and logistic support personnel will be removed from the three operational bases. Training activities will terminate. Logistic and administrative support functions will also cease. Real estate and real property structures associated with the Titan II system will be disposed of or reassigned as separate actions from this decision.

Section 2.0 *Description of Proposed Action.*

The proposed action is to deactivate 52 operational missile sites: 18 at Davis-Monthan AFB, Arizona; 17 at McConnell AFB, Kansas; and 17 at Little Rock AFB, Arkansas. Missile site deactivation will include removal of warhead/reentry vehicle and transport to disposition points, off-loading of propellants and transport to storage/disposition points, removal of the booster (missile) and transport to storage for possible reuse as a space vehicle, and equipment removal with disposition through the established procedures of the Air Force Supply System and Defense Property Disposal System.

The project is considered in four phases:

I. Missile site deactivation.

II. Transport of items to disposition points.

III. Disposition of items.

IV. Deactivation of training and support bases.

Section 3.0 *Alternatives.*

3.1 The alternatives to the proposed action include several schedule alternatives including delayed deactivation, partial deactivation, prolonged deactivation, accelerated deactivation and the no-action alternative. Only the no-action alternative differs in the impact on the biophysical environment; all other alternatives are, in effect, scheduling alternatives. The factors in choosing among these alternatives are primarily management economy and logistic capability.

3.2 The no-action alternative means retention of a portion of the ICBM force that does not meet the changing strategy and guidance for strategic weapon systems in the late 1980's as well as newer systems which will eventually replace it.

Section 4.0 *Summary of Environmental Impacts.*

4.1 Phase I Impacts.

4.1.1 Atmospherics: The impact of the proposed action on air quality will be negligible. Vehicle-generated emissions and dust compose the greatest contribution. Small amounts of propellant vapors usually generated during propellant transfer may result in localized temporary exceedance of air quality standards for these substances. These are normal to existing operations and will have insignificant impact on the biophysical environment. Severe spills or propellant losses which would have a detectable effect on the biota are very unlikely for the entire program schedule, based on a record of two major accidents in 20 years, and the resulting safety measures introduced to prevent recurrence of these type accidents.

4.1.2 Hydrology: The impact of the proposed action on the hydrology will be positive. Water consumption at the missile sites will be greatly reduced in caretaker status. No planned action will result in discharges to the ground or surface waters. Unlikely worst case accidents resulting in spilled products reaching sensitive waters would be improbable.

4.1.3 Biology: Operations associated with missile site deactivation will have no impact on threatened or endangered species. No plant or animal life in those categories have been found near the missile sites. Transient birds and mammals would tend to avoid the area of human activity.

4.1.4 Aesthetics: No permanent changes to visual aesthetics would be associated with the planned action.

4.1.5 Demography and Economics: Demographic changes will occur in the vicinity of the Titan II operational bases as a result of Air Force manpower reductions. These are insignificant in the larger population areas of Tuscon, Arizona, and Wichita, Kansas. The city of Jacksonville, Arkansas will experience more of an impact on its population, school enrollment, and employment because of its smaller population. The regional impact on Pulaski County Arkansas will be minor, however.

4.1.6 Land Use: No immediate land use impacts will be caused by conversion of the sites to caretaker status.

4.1.7 Cultural Resources: No effect.

4.2.6 Local Transportation: Air Force vehicle usage of local roads will increase in the short term and decrease in the long term. Both will have insignificant effects.

4.1.9 Noise: Insignificant vehicle and equipment noise usually associated with a construction site will occur.

4.2 Phase II Impacts.

4.2.1 Atmospherics: Transport of missile and missile site components will have insignificant vehicle emission impacts. The unlikely event of a propellant spill could have severe local impacts, but the probability of a spill is low. The estimated probability of a major or minor propellant spill is less than one in fifty thousand per shipment.

4.2.2 Hydrology: The planned action will have no environmental effect on hydrology. The unlikely event of an accident induced propellant spill multiplied by the low probability of such a spill occurring within reach of a sensitive body of water make this risk insignificant.

4.2.3 Biology: The planned action will have no effect on biological species, except in the unlikely event of an accident-induced propellant spill. The improbability of a spill, compounded with the improbability of threatened or endangered species being within the spill affected area, results in a negligible impact. A greater danger exists to human populations in the event of a propellant spill during transport. Although the probability of experiencing a spill during the deactivation is very low, the consequences of any spill could be serious. However, the propellants would require eventual movement in any alternative including the no-action alternative. If it were feasible to neutralize these chemicals in place, similar amounts of new propellants

would require cross country transport to support space programs. Rail shipment of propellants would probably be less safe in the long run. The safety record and experience of the Air Force contracted propellant carriers is significantly better than the average highway carrier. The use of a highway carrier reduces the number of transfer operations compared with rail transport and also provides a full-time knowledgeable monitor of the load in the person of the driver. Response measures disseminated by the Air Force in coordination with the Federal Emergency Management Agency would considerably mitigate impacts of a spill. Anticipated impacts, combined with the probability of events, are considered insignificant.

4.2 Aesthetics, demographics, land use and cultural resources are unaffected in this phase of the deactivation.

4.2.5 Local transportation will have negligible impact. Most shipments will be on well established routes which are normally used to transport identical materials in support of Titan II operations.

4.2.6 Noise will be at the usual levels associated with the modes of transport.

4.3 Phase III Impacts.

4.3.1 Atmospherics and Hydrology: The impacts to air and water quality of this phase would be nearly identical to Phase I and are considered insignificant.

4.3.2 Biology: Planned operations should have no effect on threatened or endangered species.

4.3.3 Demography, land use, cultural resources, aesthetics, local transportation and noise will not be affected by the proposed action.

4.3.4 Economics: Reuse of Titan II propellants and components will result in an economic savings to the government. Increased operations at the disposition points should produce negligible increases in employment.

4.3.5 Rocky Mountain Arsenal: Although discussed in the Environmental Assessment, Rocky Mountain Arsenal is no longer being considered as a disposition point for Titan II propellants.

4.4 Phase IV Impacts.

4.4.1 There are no impacts on the biophysical environment from discontinuing Titan II logistic support and training activities.

4.4.2 Demographics: Decreases in employment associated with discontinuing support and training activities will be minor, as will all associated socioeconomic effects.

5.0 Changes to Manpower Reduction Numbers.

5.1 Just prior to the publication date of the environmental assessment, manpower reduction numbers at the operational bases were changed from 3420 to 4244 as shown on page 20 of the Environmental Assessment. This increase is for military positions, and about evenly distributed among the three bases. This change is not of a magnitude which should generate reanalysis or cause significant changes in the effects as presented in the assessment.

6.0 Conclusions.

6.1 The environmental assessment supports a conclusion that the proposed action will have little or no effect on the biophysical environment except in the event of a major propellant-spill accident. Missile Site (Phase I) spill accident impacts as a result of the proposed action are considered insignificant based on the record of only two severe propellant spills in twenty years of operation, extensive procedural and equipment modifications by the Air Force to prevent recurrence and/or mitigate the severity of these type accidents, and the relative isolation of the missile sites. Over the road transport (Phase II) propellant spill accidents have the potential for significant biophysical impact but the low probability of any accident involving any spill make the risk insignificant. The probability of a vehicle accident which could result in a major or minor spill is approximately one in fifty thousand per propellant shipment, and the probability of a major spill with significant impact is a fraction of that (only one spill of hazardous material is known to have occurred in the 80,000,000 carrier transport miles). Based on the probability of a severe propellant spill, the risk is considered insignificant. Propellant operations in Phase III (disposition) would be similar to Phase I in biophysical effect and risk and is also considered insignificant.

6.2 The socioeconomic impacts of the proposed action are minor and primarily associated with movement of military personnel.

Copies of the Environmental Assessment for the Proposed Deactivation of the Titan II Missile System and the FONSI are available from Headquarters Strategic Air Command/DEV, Offutt Air Force Base, Nebraska 68113. For further information, contact Capt. Pat Quinn, (402) 294–5854.

Winnibel F. Holmes,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910–01–M

Corps of Engineers; Department of the Army

Intent To Prepare a Draft Environmental Impact Statement; Albeni Falls Dam, Seattle District

AGENCY: Army Corps of Engineers, Seattle District, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement (DEIS) for an operating project known as Albeni Falls Dam, which is on the Pend Oreille River in northern Idaho.

Summary

a. *The Existing Project.* Albeni Falls Dam was constructed in 1951 and 1952 and is part of the Columbia River power system. The project was authorized to regulate Pend Oreille Lake for flood control, navigation, fish and wildlife conservation, recreation, and power generation. Under existing operation, the lake is held at elevation 2,062.5 feet above sea level in the summer. Lake level drawdown generally begins at about Labor Day, reaching a minimum level of about 2,051 feet by about 20 November. Refill of the lake to elevation 2,062.5 feet is usually accomplished by about 1 July. Pend Oreille Lake is one of the largest and deepest lakes in the western United States. It supports a major sport fishery, large populations of waterfowl, and significant winter bald eagle and summer osprey populations. Vegetated wetlands along the shores of the lake offer important nesting and feeding habitat to a wide variety of birds and mammals. Recreation and tourism associated with the lake and its resources are major contributors to the economic base of the region. Since no environmental documentation was prepared prior to the project's construction, the DEIS is intended to provide an assessment of environmental impacts of the present operation of the project and to compare and contrast these impacts with the potential impacts of alternative project operations.

b. *Alternatives.* The DEIS will discuss three alternatives to the existing lake operation: an alternative that enhances recreation, one that enhances hydropower production, and one that enhances fish and wildlife resources. The recreation alternative would have the latest drawdown (1 October), the highest winter elevation (2,060 feet), and probably the earliest refill (as early as 1 June). The hydropower alternative would have the earliest drawdown (1 September or before), a low winter level of 2,051 feet, and probably latest refill (as late as 15 July). The hydropower alternative would increase at site and

Columbia River system hydropower production. The fish and wildlife alternative would be similar to the recreation alternative except the winter lake level would be lower (2,056 feet). The fish and wildlife alternative would have slightly beneficial impacts to recreation, fish, and wildlife compared to the existing condition. The Corps of Engineers does not propose to change the operating mode of the Albeni Falls Dam project.

c. *Public Involvement and Review.* The DEIS will receive wide distribution among all interested and affected Federal, state, and local agencies; Indian tribes; and other private organizations and parties.

d. *Significant Issues.* The following issues will be analyzed in depth in the DEIS:

(1) What impact would the three alternatives and the existing operation have on migrating and resident waterfowl, bald eagles, osprey, and aquatic mammals?

(2) What impact would increased or decreased lake level fluctuations have on lake boating access, lake moorage, and tourism?

(3) What impact would the alternatives have on hydropower production?

(4) What impact would the alternatives have on lake fish populations (particularly kokanee) and fishing?

(5) What impact would the alternatives have on archeologic resources around the lake shoreline?

e. *Availability of DEIS.* The DEIS is presently scheduled to become available to the public in November 1982.

f. *Address.* Information about the DEIS can be obtained by contacting: Mr. Tom Bonde, Environmental Resources Section, Department of the Army, Seattle District, Corps of Engineers, Post Office Box C–3755, Seattle, Washington 98124, Telephone (206) 764–3625, (FTS) 399–3625.

Dated: September 22, 1982.

Norman C. Hintz,

Colonel, Corps of Engineers, District Engineer.

[FR Doc. 82–26934 Filed 9–29–82; 8:45 am]

BILLING CODE 3710–GB–M

Intent To Prepare a Draft Environmental Impact Statement; Great Salt Lake, Davis County, Utah

AGENCY: Army Corps of Engineers, DOD.

ACTION: Notice of Intent to prepare a Draft Environmental Impact Statement (DEIS) on a Department of Army permit application by Davis County Planning Commission to discharge fill material in wetlands adjacent to Farmington Bay of the Great Salt Lake, Davis County, Utah. A permit is required under Section 404 of the Clean Water Act (33 U.S.C. 1344).

SUMMARY: Davis County proposes to fill wetlands adjacent to Farmington Bay for development of an industrial complex. The property is owned in separate parcels by various individuals and corporations. Approximately 687 acres of wetlands would be filled including saline flats, saline meadows, fresh wet meadows, and deep water marsh. All fill material placed in wetlands would consist of clean earth and gravel. Davis County also proposes construction of two main roads through wetlands to service the industrial areas. These roads would be constructed with a pervious rock base to minimize changes in the flow of ground water.

The alternatives being considered at this time are:

1. Proposed development as requested by the applicant.
2. Proposed development with other schemes of mitigation.
3. Scaled-down development.
4. Development located in upland areas.
5. No action.

Concurrently with this notice, the Sacramento District is issuing a public notice to initiate the scoping process. The public notice is being sent to all known interested parties, requesting that the reviewers provide comments on the topical scope, alternatives, and major issues to be discussed in the EIS. If, after review of the comments, it is determined that additional public input is needed, public scoping meetings will be held.

The significant issues which have been identified to date and which will be analyzed in the EIS are:

1. The need for the project.
2. Social and economic effects.
3. Wetland effects.
4. Water quality effects.
5. Flood plain effects.
6. Wildlife effects.
7. Hydrologic effects.
8. Cultural resources effects.
9. Cumulative effects.

Questions concerning the proposed action and EIS should be directed to Mr. Tom Coe, Regulatory Section, U.S. Army Corps of Engineers, 650 Capitol Mall, Sacramento, California 95814, telephone (916) 440–2541 (FTS–448–2541).

Arthur E. Williams,

Colonel, CE, District Engineer.

DEPARTMENT OF ENERGY

National Petroleum Council, Coordinating Subcommittee of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Coordinating Subcommittee of the Committee on Enhanced Oil Recovery will meet in October 1982. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location and agenda of the Coordinating Subcommittee meeting follows:

The Coordinating Subcommittee will hold its first meeting on Tuesday, October 19, 1982, in the Conference Room of the National Petroleum Council, 1625 K Street, NW., Washington, D.C., starting immediately after the adjournment of the 10:00 a.m. meeting of the National Petroleum Council Committee on Enhanced Oil Recovery.

The Tentative agenda for the Coordinating Subcommittee meeting follows:

1. Review the scope, organization, and timetable of the study from the NPC Committee on Enhanced Oil Recovery.
2. Discuss membership of proposed task groups for the study.
3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Coordinating Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Coordinating Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353–3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading

Room, Room 1E-190, DOE, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on September 23, 1982.

Donald L. Bauer,

Deputy Assistant Secretary for Fossil Energy.

[FR Doc. 82-26999 Filed 9-29-82; 8:45 am]

BILLING CODE 6450-01-M

Voluntary Agreement and Plan of Action to Implement the International Energy Program; Meetings

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272), the following meeting notices are provided:

I. A meeting of Subcommittee A of the Industry Advisory Board (IAB) of the International Energy Agency (IEA) will be held on October 6, 1982, at the offices of Standard Oil Company of California, 575 Market Street, San Francisco, California, beginning at 9:30 a.m.

The agenda for the meeting is as follows:

1. Opening remarks.
2. Current oil market and stock developments, IEA/SOM (82)42; IEA Secretariat's August Assessment, IEA/SEQ (82) 32.
3. Quarterly Oil Forecast, IEA/SEQ (82) 27.
4. Oil contingency plans.
5. Allocation System Test-4 (AST-4) matters.
6. Industry Supply Advisory Group staffing.
7. Future work program and meeting schedule.

II. A meeting of Subcommittee C of the IAB of the IEA will be held on October 7, 1982, at the offices of Standard Oil Company of California, 575 Market Street, San Francisco, California, beginning at 9:30 a.m.

The agenda for the meeting is as follows:

1. Opening remarks.
2. IEA Dispute Settlement Centre, including:
   A. Report of the Director;
   B. Schedule of fees and expenses; and
   C. Status of consents to arbitration.
3. Status of U.S. statutory antitrust defense, including:
   A. Legislation; and
   B. Plan of Action.
4. Status of application for legal clearance under the Treaty of Rome.
5. Legal clearances for AST-4.
6. Availability of contract breach defense, including:
   A. Status of defenses in participating countries; and
   B. Effect of choice of law clause.
7. Future work program.

III. A meeting of the IAB of the IEA will be held on October 8, 1982, at the offices of Standard Oil Company of California, 575 Market Street, San Francisco, California, beginning at 9:00 a.m.

The agenda for the meeting is as follows:

1. Opening remarks; adoption of the agenda; approval of Record Notes of June 18, 1982, IAB meeting.
2. Correspondence and communications with Reporting Companies, including distribution of documents.
3. Oil contingency plans.
4. Report of Subcommittee A on documents:
   A. August Assessment—IEA/SEQ(82)32; and
   B. Quarterly Oil Forecast—IEA/SEQ(82)27.
5. Report of Subcommittee C on its October 7, 1982, meeting.
6. Progress report from AST-4 Design Group.
7. Staffing of committees.
8. Next IAB meeting.

As permitted by 10 CFR 209.32, the usual 7-day notice period has been shortened because unanticipated procedural delays prevented processing in sufficient time to provide such notice.

As provided in section 252(c)91)(A)(ii) of the Energy Policy and Conservation Act, these meetings will not be open to the public.

Issued in Washington, D.C., September 28, 1982.

Craig S. Bamberger,

Assistant General Counsel, International Trade and Emergency Preparedness.

[FR Doc. 82-27104 Filed 9-29-82; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 82-13-LNG]

Distrigas Corp.; Application To Amend Authorization To Import Liquefied Natural Gas From Algeria

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Application to Amend Authorization to Import Liquefied Natural Gas from Algeria.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on August 27, 1982, of the application of Distrigas Corporation (Distrigas) to amend its existing authorization to import liquefied natural gas (LNG) from Algeria. Currently, Distrigas is authorized to import 1,900,000 cubic meters (43.5 million MMBtu) of LNG per year from Algeria. Distrigas is requesting ERA to amend the current import authorization by approving the terms of Amendment No. 1 (Amendment) to the Agreement for the Sale and Purchase of Liquefied Natural Gas of April 13, 1976 (Supply Agreement) between Distrigas and Sonatrach, the Algerian national energy company. The Amendment, dated July 31, 1982, reflects the renegotiation by both signatories of several provisions of the Supply Agreement related to, among other things, the base price, the F.O.B. price, the escalator clause, and Distrigas's take-or-pay obligation

The application is filed with ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-54. Protests or petitions to intervene are invited.

DATE: Protests or petitions to intervene are to be filed no later than 4:30 p.m., November 1, 1982.

FOR FURTHER INFORMATION CONTACT:

R. T. Gehring (Natural Gas Branch, Oil and Gas Imports Division), Economic Regulatory Administration, 12th & Pennsylvania Avenue, NW., Room 6144, RG-631, Washington, D.C. 20461, (202) 633-9296

Michael T. Skinker (Office of General Counsel, Natural Gas and Mineral Leasing), 1000 Independence Avenue, SW., Forrestal Building, Room 6E-042,

Washington, D.C. 20585, (202) 252–6667

SUPPLEMENTARY INFORMATION: In an ERA order issued on December 31, 1977, in ERA Docket No. 77–011–LNG (FPC Docket Nos. CP77–216, CP77–217 and CP77–218), Distrigas was authorized to import LNG from Algeria at Everett, Massachusetts, for sale to its affiliate, Distrigas of Massachusetts Corporation (DOMAC), under the Supply Agreement. DOMAC transfers the LNG to storage tanks prior to sale and delivery to its eleven distribution company customers in New England, New York, and New Jersey, which use the LNG primarily for peak-shaving and high priority service. Distrigas was authorized to purchase a total of up to 43.5 million MMBtu of LNG per year for a period of twenty (20) consecutive years from the date of the first regular delivery of LNG in 1978.

The Supply Agreement expires in 1998 and provides that Distrigas and Sonatrach may meet for the purpose of reviewing the LNG sales price every four years commencing in 1980. Pursuant to this provision, the parties commenced negotiations in 1980, and have entered into the Amendment which reflects the agreed upon changes to the Supply Agreement. The principal provisions of the Amendment, as described by Distrigas in its application, are:

(1) An increase in the current base price from $1.30 to $4.44 per MMBtu, resulting in an increase in the current F.O.B. price from approximately $3.92 to $4.44 per MMBtu;

(2) A quarterly adjustment of the F.O.B. price based upon an average price for six different crude oils;

(3) A reduction in the number of cargoes that Distrigas is obligated to take or otherwise pay for from 17 to 14 cargoes annually;

(4) A modification of the delivery schedule to provide that delivery of the LNG cargoes more closely coincide with the requirements for LNG of DOMAC's customers (nine cargoes will be delivered in the winter and five cargoes in the summer);

(5) An option, exercisable at the sole discretion of Distrigas, to receive up to three additional ships in any one contract year through 1985. From and after 1986, its option is reduced to two ships annually;

(6) A change in the method of calculating the Btu content of the LNG sold by Sonatrach, resulting in a price reduction of approximately 5 cents per MMBtu;

(7) Establishment of provisions to minimize demurrage;

(8) Postponement of the next contract review by two years until January 1988; and

(9) A surcharge designed to give effect to the new F.O.B. price from and after the date of filing of this application.

No change in the current authorized volumes is sought by this application.

The C.I.F. price paid by Distrigas under the Supply Agreement is adjusted periodically in accordance with formulas set forth in the Supply Agreement which specify the method of recalculating both the F.O.B. price (commodity component) for the gas and the cost of transportation (transportation component), the sum of which comprises the total C.I.F. price. Except for a one-time change in the calculation period from a calendar year to a twelve-month period commencing April 1983, the Amendment does not change the formula used to compute the transportation component of the total price. It does, however, change the formula used to compute the commodity component.

Under the authorized formula, the current F.O.B. price is adjusted semiannually using a base price of $1.30 per MMBtu indexed to changes in the prices of No. 2 and No. 6 fuel oils from their July 1975 levels. This adjustment is made as a percentage (50%) of the changes in the prices of No. 2 and No. 6 fuel oil as compared to a base period price. The adjustment under the Amendment is made on a dollar-for-dollar basis, not a percentage basis. The old formula resulted in an F.O.B. price of $3.9172 per MMBtu as of July 1, 1982. The Amendment increases the base price to $4.44 per MMBtu and results in a new F.O.B. price that would currently be $4.44 per MMBtu. The F.O.B. price under the amendment is subject to a quarterly adjustment based upon an escalator formula in which $4.44 per MMBtu is the base price and the adjustment is based on the arithmetic average of the daily prices of a basket of six different crude oils; expressed in dollars per MMBtu. The six crude oils are: Arabian Light (Saudi Arabia); Sahara Blend (Algeria); Bonny Light (Nigeria); Isthmus (Mexico); Minas (Indonesia); and Tia Juana (Venezuela). This quarterly adjustment will reflect the difference between the revised average price of the crude oils at the time of adjustment and a dollar base figure of $5.879572 per MMBtu, which represents the arithmetic average price per MMBtu for these selected crude oils during the second quarter of 1982. The price adjustment may be upward or downward.

The Amendment, including the new F.O.B. sales price, is effective August 3, 1982. Since no deliveries of LNG are anticipated during the month of August 1982, the amended price will not be applicable to any sales until the September cargo is received, on or about September 22, 1982. In order to give effect to the new price from the date of the filing of the application until final approval, the Amendment provides for a surcharge to be assessed by Sonatrach after ERA approval of the Amendment. The method of calculation of the surcharge is set forth in a separate letter dated July 31, 1982, submitted as part of the application.

Distrigas states that the Amendment is not inconsistent with the public interest for the following reasons:

(1) Distrigas asserts that since substantial capital investments have been made in facilities by both DOMAC and its customers, significant adverse economic impact would result from ERA's failure to approve the application.

(2) There continues to be a need for the service provided, as the LNG is used for peak-shaving purposes in the market area involved which includes Massachusetts, Connecticut, Rhode Island, New York, and New Jersey. Distrigas states that it has under preparation a study of its customers' need for this LNG. This study will be submitted to ERA in the near future and will then be made a part of the record and available to the public.

(3) The amended C.I.F. price represents only a ten percent increase and compares favorably with the delivered price of LNG in recent contracts with European buyers and in other U.S. markets. Further, Distrigas asserts that the operation of the surcharge with respect to the price was an important element in the overall negotiations in which Distrigas was able to obtain substantial concessions, such as the more favorable scheduling of cargoes, the reduction of Distrigas's take-or-pay obligation, the delay of the date of the next quadrennial review, a reduction in demurrage payments, and a different method of measuring the Btu content of the LNG, resulting in a price reduction of about 5 cents per Btu.

(4) The Amendment provides for a quarterly adjustment in price based on the average dollar value of a basket of crude oils. Distrigas asserts that this methodology is not without precedent and that because of the choice of heavy

crude oils, it will tend to favor Distrigas in the calculation of future price adjustments. Additionally, the use of decreased crude oil prices, as well as increased prices for determining the adjusted price, is designed to reflect energy market conditions.

(5) Distrigas asserts that the source and security of supply is unaffected by the Amendment, because the volumes will not change and will be supplied from the same source. Distrigas further asserts that no regional or national overdependence will result from these imports, because the volumes are relatively small in relation to the total requirements of the ultimate end-users. Distrigas states that the security of supply has been satisfactory over many years, even under adverse conditions, and that Sonatrach has satisfied fully the supply requirements of Distrigas since the implementation of the expanded program in 1978. Distrigas asserts that Sonatrach has ample incentive to continue performance under the Supply Agreement, because of Algeria's declining oil revenues resulting from a decline in oil production.

It is, thus, anticipated that gas exports will become the main source of foreign currency for Algeria.

(6) Distrigas asserts that the Amendment will have no significant adverse effect upon the United States balance of payments because the volume of gas imported by Distrigas is only a small part of the total volume of natural gas imported into the United States each year and the increase in price reflected in the Amendment is small. Distrigas further states that this LNG offsets, in part, the need for the purchase of other high priced supplemental supplies from other foreign sources.

(7) Distrigas asserts that because of the relatively small amount of LNG imported by Distrigas and its use as a supplemental fuel, it will have virtually no impact on either long-term or short-term domestic natural gas production.

(8) Distrigas notes that its customer, DOMAC, sells only the LNG imported by Distrigas, and has no other source of gas. Distrigas states that the price of the LNG paid by Distrigas is passed through directly to DOMAC which, in turn, passes through the cost to its customers. Thus, there is no subsidization or rolling-in of LNG costs with other purchased gas costs, but a direct flow-through of costs to customers.

(9) Distrigas also asserts that the Amendment between Sonatrach and Distrigas will not require the construction of any new facilities on behalf of Distrigas or DOMAC.

Procedures

Any person wishing to become a party to the proceeding, and thus to participate in any conference or hearing which might be convened, must file a petition to intervene. Any person may file a protest with respect to this application. The filing of a protest will not serve to make the protestant a party to the proceeding. Protests will be considered in determining the appropriate action to be taken on the application.

All protests and petitions to intervene must meet the requirements that were specified by the regulations that were in effect on October 1, 1977 (the establishment of DOE), in 18 CFR 1.8 and 1.10. They should be filed with the Natual Gas Branch, Economic Regulatory Administration, Room 6144, RG–631, 12th & Pennsylvania Avenue, NW., Washington, D.C. 20461. All protests and petitions to intervene must be filed no later than 4:30 p.m., November 1, 1982.

A hearing will not be held unless a motion for a hearing is made by a party or person seeking intervention and granted by ERA, or if ERA on its own motion believes that a hearing is necessary or required. A person filing a motion for hearing must demonstrate how a hearing will advance the proceedings. If a hearing is scheduled, ERA will provide notice to all parties and persons whose petitions to intervene are pending.

A copy of Distrigas' application is available for inspection and copying in the Natural Gas Branch Docket Room, located in Room 6144, 12th & Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C. on September 24, 1982.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Energy Information Administration

Coal Distribution Report; Request for Comments on Extension of Form EIA–6

AGENCY: Energy Information Administration, DOE.

ACTION: Request for comments on extension of Form EIA–6.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy (DOE) plans to extend the quarterly Coal Distribution Report and invites comments on the survey and content of the form.

DATES: Written comments must be submitted within 30 days of the publication of this notice.

ADDRESSES: Send comments to Harriet M. Tarver at the address listed immediately below.

FOR FURTHER INFORMATION CONTACT: To obtain additional information or copies of the EIA–6, contact Ms. Harriet M. Tarver, EI–521, Coal Division, Energy Information Administration, Department of Energy, MS: 2F–021, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–9723.

SUPPLEMENTARY INFORMATION:

I. Background
II. Coal Distribution Report, Form EIA–6
III. Request for Comments

I. Background

The EIA announces plans to extend the collection of coal distribution data on the Coal distribution Report (Form EIA–6). The EIA–6 is designed to provide volume data for coal distribution by mode of transportation and consumer catagory. The EIA–6 is a mandatory form collected under authority of the Federal Energy Administration (FEA) Act of 1974 (P.L. 93–275) and the Powerplant and Industrial Fuel Act of 1978 (P.L. 95–620), which is filed quarterly by all companies in the 50 States and the District of Columbia that distributed more than 50,000 tons of coal during the past year. These companies include coal mining companies and wholesale and retail coal dealers.

II. Coal Distribution Report, EIA–6

A sample of the Form EIA–6 and the instructions follow.

III. Request for Comments

EIA invites the public to comment on the form within 30 days of the publication of this notice. The following general guidelines are provided to assist in the preparation of responses.

A. Are the instructions and definitions clear and sufficient? If not, which instructions require clarifying?

B. Can the data be submitted using the definitions included in the instructions?

C. Can the data be submitted in accordance with the response time specified in the instructions?

D. How many hours, including time for computation, preparation and administrative review, will it take your company to complete and submit a quarterly form?

E. What is the cost of completing a quarterly form, including the direct and indirect costs associated with this data collection? Direct costs should include all one-time and recurring costs, such as development, assembly, equipment, ADP and other administrative costs directly attributable to providing this information.

F. How can this form be improved?

Comments provided on the Form EIA–6 will be included in EIA's submission to the Office of Management and Budget and will become a matter of public record.

Issued in Washington, D.C.

Dated: September 21, 1982.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 5450-01-M

Energy Information Administration
Coal Distribution Report

U.S. Department of Energy

This report is being collected under the mandatory authorities vested in the U.S. Department of Energy under the Federal Energy Administration Act of 1974 (P.L. 93-275) and the Powerplant and Industrial Fuel Use Act of 1978 (P.L. 95-620). Late filing, failure to file, or failure otherwise to comply with these instructions may result in criminal fines, civil penalties and other sanctions as provided by section 13 (i) of P.L. 93-275. For provisions concerning the confidentiality of information submitted on this form, see Section IX of the instructions.

Form Approved
O.M.B. No. 1905-0005
Approval Expires 4/30/83

I. RESPONDENT IDENTIFICATION

If the above name and address label is incorrect, please make changes in the space provided at the right.

If you have nothing to report, please indicate this in the Remarks (Part VII), sign the Certification (Part X) and return the form.

Please read the instructions before completing this form.

Report all coal quantities in short tons (2,000 lbs.) to the nearest whole ton. If exact figures are not available, estimate the quantities and indicate the estimated data by placing (est) in front of the reported data item.

Blanks will be interpreted as zeros; therefore it is not necessary to enter "not applicable (NA)," or dashes or zeros where you have no data to report.

If a data item reported herein includes a revision to the same data item as previously reported which results in a net minus quantity, indicate this by enclosing the reported quantity in parentheses ( ).

After entering your data, please check its consistency using the equations given in Part VI to ensure that your data submission can be processed.

If you desire a copy of the publication, "Coal Distribution", Quarterly, please check here. ☐

A. Coal Producing District
Enter the number for the coal producing district covered in this report as described in table 1 of the instructions. ☐☐

A SEPARATE FORM EIA-6 MUST BE SUBMITTED FOR EACH COAL PRODUCING DISTRICT IN WHICH COAL WAS MINED.

B. Name(s) and Address(es) of Parent Company(ies): See VI D2. of the instructions for the definition of Parent Company before completing this section. (If additional space is needed, use a separate sheet of paper.)

Name of Parent Company	Address (Street, City, State, Zip)

II. MINE ORIGIN OF COAL

A. Coal Produced at Your Company's Mines during the Quarter:
The quantity of coal reported here must reflect the condition of the coal (i.e., raw, crushed, screened or mechanically cleaned) as of its sale, distribution or placement into stocks. Exclude refuse. For each of your company's mines located in this coal producing district, enter the name of the producing company (if different than responding company), the name and location of the mine and the quantity of coal produced during the reporting quarter. (If additional space is needed, use a separate sheet of paper.)

Name of Mine	Name of Producing Company (if different than responding company)	Mine Location (County)	Mine Location (State)	Quantity Produced (short tons)
Total coal produced in this District at your company's mines during the quarter excluding refuse.				

B. Coal Purchased from Other Companies during the quarter which was produced in this District:
The quantity of coal reported here must reflect the condition of the coal (i.e., raw, crushed, screened or mechanically cleaned) as of its purchase.

Report here the quantity of coal purchased from other companies during the reporting quarter which was produced in this coal producing district. Enter for each company, the company name and address, the name(s) of the mining operations from which the coal originated and the quantity of coal purchased. (If additional space is needed, use a separate sheet of paper.)

Name of Company	Address (Street, City, State, Zip)	Name of Producing Mine(s)	Quantity Purchased (short tons)
Total coal purchased from other companies during the quarter which was produced in this District excluding refuse.			
C. Total Coal Produced or Purchased during the quarter which was mined in this district. *(Sum of totals in Sections A and B.)* →			

III. DISTRIBUTION WHERE THE CONSUMER IS KNOWN

Report here the distribution during the reporting quarter of that portion of the coal reported in Part II.C. plus any coal distributed from stocks located in this coal producing district for which you know the consumer. **Please read Parts VI. A, B, and C of the instructions before completing Part III** so that the consumer categories, methods of transportation and other uses will be correctly identified. Please note that mining (column 4 of the consumer categories) does not include coal mining. Coal used at your company's mining operations must be reported in Part III C Line 37499. Report Shipments of Coal to Tidewater Piers or Coastal Ports for Overseas Exports (except Canada and Mexico) on Line 34802 of Part III D.

Name	Address *(Street, City, State, Zip)*		Section	State	Consumer Category
Total quantity of coal purchased by other coal distribution companies that was reported in Part III, Sections A-G					

Page 5 of 6 pages

IV. DISTRIBUTION WHERE THE CONSUMER IS UNKNOWN I.D. No.

Enter below the name(s) and address(es) of coal distribution companies who purchased any of your company's coal during the reporting quarter where the consumer is unknown to you. For each company, identify the quantity of coal purchased from you during the reporting quarter. (If additional space is needed, use a separate sheet of paper.) **Report coal exported overseas in Part III D on line 34802.**

Coal Company that Purchased Your Coal		
Name	Address *(Street, City, State, Zip)*	Quantity Purchased (Short Tons)

Total quantity of your coal purchased by other coal distribution companies where the consumer is unknown.

V. STOCKS

	Quantity (Short Tons)
A. Coal produced in this district which was held in stocks by your company at the start of the reporting quarter *(exclude refuse)*.	
B. Coal produced in this district which was held in stocks by your company at the end of the reporting quarter *(exclude refuse)*.	

VI. DATA CONSISTENCY CHECKS

The following equations should be used to check the consistency of your data:

A. Stock Equation: Line code 51999 (current quarter) = Line code 52999 (previous quarter).

B. Balance Equation: Line codes (current quarter) 51999 + 21999 + 22999 = Line codes (current quarter) 31199 + 32299 + 33399 + 34499 + 35599 + 36699 + 37199 + 37299 + 37399 + 37499 + 37599 + 40999 + 52999.

If these equations are not satisfied it means that your data are inconsistent and some data elements are missing from your report (such as stocks) or entered incorrectly. These equations must be satisfied before your data can be processed by EIA.

VII. REMARKS

VIII. POINT OF CONTACT

Enter the name, title, and telephone number of your company representative who can answer questions regarding the information provided on this form.

Name	Title	Area Code & Office Telephone No.
		( ) - -

IX. DISCLOSURE STATEMENT

Please read Part IX of the instructions before completing this section.

A. Information requested on this form is confidential and if released will cause substantial competitive injury . . . . . ☐ Yes ☐ No

B. Written substantial justification is attached . . . . . ☐ Yes ☐ No

C. Written substantial justification previously attached . . . . . ☐ Yes ☐ No

X. CERTIFICATION

This part of the form must be completed by the company official empowered to certify that the information provided on this form is true and accurate. Print or type the certifying official's name and title. The certifying official must sign and date the certification.

I certify that the information provided herein and appended hereto is true and accurate to the best of my knowledge.

Energy Information Administration
Instructions for Form EIA-6–
Coal Distribution Report

U.S. Department of Energy

I. Purpose

Form EIA-6 is designed to provide volume data for coal distribution by mode of transportation and consumer category. The data collected will be used in the compilation of aggregated statistical reports, for coal related analyses and policy studies, and for monitoring the effects of mandated coal programs. This form is a mandatory reporting requirement under the Federal Energy Administration (FEA) Act of 1974 (P.L. 93-275) and the Powerplant and Industrial Fuel Use Act of 1978 (P.L. 95-620).

II. Who Shall Submit

All companies in the 50 States and the District of Columbia that owned or purchased and distributed in excess of 50,000 tons of coal during the year defined by the current reporting quarter and the previous three reporting quarters. These companies include coal mining companies, wholesale coal dealers (including brokers), and retail coal dealers Companies that take custody (physical possession) of the coal and transport but never own or purchase the coal or companies that only negotiate the sales of coal but never own or purchase the coal need not report. Retain the copy marked "File Copy" for your records.

III. Where to Submit

Companies shall return completed EIA-6 forms to.

Energy Information Administration, EI-34
Mail Station: BG-086, FORSTL
U.S. Department of Energy
Washington, D.C. 20585

Request for further information, additional forms and instructions, an extension of the reporting deadline or copies of the report "Coal Distribution, Quarterly" may be directed to the address above or by telephone to (202) 252-6886.

IV. When to Submit

Form EIA-6 shall be submitted no later than thirty (30) working days after the close of each report quarter. The reporting quarters are: January 1- March 31, April 1 - June 30, July 1 - September 30, and October 1 - December 31.

V. Sanctions

The timely submission of Form EIA-6 by a company required to report is a mandatory requirement. Late filing, failure to file, or failure otherwise to comply with these instructions may result in criminal fines, civil penalties and other sanctions as provided by Section 13 (i) of the FEA Act of 1974 (P.L. 93-275).

VI. Definitions

A. Consumer Categories

1. **Electric Utilities**– All privately owned companies and all publicly owned agencies engaged in the production of electric power for public use. Publicly owned agencies include the following: Municipal electric utilities; Federal power projects, such as the Tennessee Valley Authority (TVA); and rural electrification cooperatives, power districts, and State power projects.
2. **Coke Plants**– All plants where coal is carbonized for the manufacture of coke in slot or beehive ovens. Report only coal that is carbonized to produce coke. Shipments of coal to coke plants for use in space heating or electric power generation should be included with "Manufacturing (except Coke Plants)." Do not report coal used to produce form coke. Include coal used for form coke with "Manufacturing (except Coke Plants)."
3. **Manufacturing (except Coke Plants)**– Those industrial users/plants, not including coke plants, that are engaged in the mechanical or chemical transformation of materials or substances into new (i.e., finished or semifinished) products.
4. **Agriculture, Mining, and Construction**– Companies engaged in agriculture, mining (other than coal mining), or construction industries.
5. **Residential/Commercial**– Housing units; wholesale and retail businesses (except coal wholesale dealers); health institutions (hospitals); social and educational institutions (schools and universities); and Federal, State, and local governments (military installations, prisons, office buildings, etc.). Exclude shipments to Federal power projects, such as TVA; rural electrification cooperatives, power districts, and State power projects; these are to be included in consumer category 1 (Electric Utilities).

B. Methods of Transportation to Consumers

1. **Rail**– Shipments of coal moved to consumers by rail (private or public/commercial). Included is coal hauled to or away from a railroad siding by truck
2. **River**– Shipments of coal moved to consumers via river by barge. Not included are shipments to Great Lakes Coal Loading Docks or Tidewater Piers or Coastal Ports.
3. **Great Lakes**– Shipments of coal moved to consumers via the Great Lakes. These shipments are moved via the Great Lakes Coal Loading Docks which are identified by name and location as follows:

   Superior Midwest Energy Terminal, Superior, Wisconsin
   Bessemer & Lake Erie Coal Storage & Transfer Facility, Conneaut, Ohio
   B&O Railroad Coal Loading Dock, Lorain, Ohio
   C&O Railroad Presque Isle Docks, Toledo, Ohio
   Lakefront Dock & Railroad Terminal Company Coal Loading Dock, Toledo, Ohio
   N&W Sandusky Coal Pier No. 3, Sandusky, Ohio
   ConRail Coal Transfer Facilities, Ashtabula, Ohio
   Rail to Water Transfer Corp. Dock, Chicago, Illinois

4. **Tidewater Piers and Coastal Ports**–Shipments of coal moved to Tidewater Piers and Coastal Ports for further shipments to consumers via coastal water or ocean. The Tidewater Piers are identified by name and location as follows:

   B&O Curtis Bay Coal Piers, Baltimore, Maryland
   C&O Coal Piers Nos. 14 & 15, Newport News, Virginia
   N&W Lamberts Point Coal Piers Nos. 5 & 6, Norfolk, Virginia
   Alabama State Docks Bulk Handling Plant, Mobile, Alabama
   Alabama State Docks/McDuffie Terminals, Mobile, Alabama
   Canton Coal Pier, Baltimore Harbor on Chesapeake Bay
   Greenwich Coal Pier, Greenwich Point, Philadelphia, Pa. on Delaware River
   Port Richmond Pier, Pier 18–Port Richmond, Philadelphia, Pa. on Delaware River
   Galveston Regional Coal Distribution Center, Pelican Island, Galveston, Texas
   International Marine Terminals/Plaquemines Parish Terminal, Mile 57 AHP–Mississippi River, Approx. 30 miles South of New Orleans
   Energy Terminals of Houston, Inc., a Subsidiary of Soros Associates, Houston, Texas

The Coastal Ports include those located at Charleston, S.C., New York, N.Y., San Diego, Ca., Los Angeles, Ca., Seattle, Wa.

Instructions for Form EIA-6—Coal Distribution Report—Continued

5. Truck— Shipments of coal moved to consumers by truck. Not included is coal hauled to or away from a railroad siding by truck.
6. Tramway, Conveyor, or Slurry Pipeline— Shipments moved to consumers by tramway, conveyor, or slurry pipeline.

C. Other Uses
1. Railroad fuel— Shipments of coal to railroad companies to be used as fuel (engine, powerhouse, etc.)
2. Vessel/Ship fuel— Shipments of coal to be used as vessel/ship fuel.
3. Coal gasification/liquefaction— Conversion of coal to gaseous (low to medium BTU gas) or liquid (such as synthetic crude oil and methanol) hydrocarbons.
4. Coal used at your company's mines— Coal consumed at your company's mines in this district during the reporting quarter.
5. Coal sold to employees— coal sold to employees during the reporting quarter.

D. Miscellaneous
1. Coal Producing Districts— See definitions of Coal Producing Districts in table 1 of the instructions.
2. Parent Company— A company which solely or jointly owns the reporting company and which is not itself a subsidiary of or owned by another company.

VII. General Instructions

A separate report shall be submitted for each coal producing district in which the coal was mined. Complete all data items on the form applicable to your operation. All figures should be rounded to the nearest whole number. Report all tonnage in short tons (2,000 pounds). Blanks will be interpreted as zeroes; therefore it is not necessary to enter "not applicable (NA)" or dashes or zeroes where you have no data to report.

VIII. Specific Instructions

How to report the methods of transporting coal to a consumer:

A. If the shipment involved only one method of transportation from the point of origin to the consumer, report the shipment in the section for that method of transportation.

B. If the shipment involved more than one method of transportation from the point of origin to the consumer, use the following guidelines in reporting the method of transportation:

1. If water transportation was involved, regardless of other methods of transportation also involved, report the method of transportation as one of the three types of water shipments, i.e., river, Great Lakes, or Tidewater Piers and Coastal Ports. In addition, specify how the shipment(s) was(were) delivered to the river (rail or truck), Great Lakes (rail, truck, or river) or Tidewater Piers or Coastal Ports (i.e., by rail truck or river).
2. If rail and truck are involved and no water transportation was involved, then report the method of transportation as rail.
3. Truck is to be reported as the method of transportation to the consumer only if the coal was shipped directly to the consumer by truck.

IX. Disclosure Information

The information contained on form EIA-6 may be (i) information which is exempt from disclosure to the public under the exemption for trade secrets and confidential commercial information specified in the Freedom of Information Act (FOIA) [5 U.S.C. 552 (b) (4)] or (ii) prohibited from public release by 18 U.S.C. 1905. However, before a determination can be made that particular information is within the coverage of either of these statutory provisions, the person submitting the information must make a showing satisfactory to the Department concerning its confidential nature.

Therefore, you should state briefly and specifically (on an element by element basis if possible), in a letter accompanying your submission of the form, why you consider the information concerned to be a trade secret or other proprietary information, whether such information is customarily treated as confidential by your company and the industry, and the type of competitive harm that would result to your company from disclosure of the information. In accordance with the provisions of 10 C.F.R. 1004.11 of DOE's FOIA regulations, DOE will determine whether any information submitted should be withheld from public disclosure.

If DOE does not receive a request for exemption from you, it will assume that you do not object to public disclosure of any information submitted on this form by your company. A new written justification need not be submitted each time a form EIA-6 is submitted if—

a) your views concerning information items identified by you as privileged or confidential have not changed and
b) a written justification setting forth your views in this regard was previously submitted.

By statutory authority DOE must provide this information, when requested, to the Congress or any committee of Congress and the General Accounting Office.

Instructions
Page 3

Table 1. Definition of Coal Producing Districts

District 1
Maryland—All mines in the State.
Pennsylvania—
All mines in the following counties:

Bedford	Centre	Forest	McKean
Blair	Clarion	Fulton	Mifflin
Bradford	Clearfield	Huntingdon	Potter
Cambria	Clinton	Jefferson	Somerset
Cameron	Elk	Lycoming	Tioga

Selected mines in the following counties:
Armstrong County (part)—All mines east of the Allegheny River, and those mines served by the Pittsburgh & Shawmut Railroad located on the west bank of the river.
Fayette County (part)—All mines located on and east of the line of Indian Creek Valley branch of the Baltimore & Ohio Railroad.
Indiana County (part)—All mines not served by the Saltsburg branch of the CONSOLIDATED RAIL CORPORATION.
Westmoreland County (part)—All mines served by the CONSOLIDATED RAIL CORPORATION from Torrance, east.

West Virginia—All mines in the following counties:
Grant Mineral Tucker

District 2
Pennsylvania—
All mines in the following counties:

Allegheny	Butler	Lawrence	Venango
Beaver	Green	Mercer	Washington

Selected mines in the following counties:
Armstrong County (part)—All mines west of the Allegheny River except those mines served by the Pittsburgh & Shawmut Railroad.
Fayette County (part)—All mines except those on and east of the line of Indian Creek Valley branch of the Baltimore & Ohio Railroad.
Indiana County (part)—All mines served by the Saltsburg branch of the CONSOLIDATED RAIL CORPORATION.
Westmoreland County (part)—All mines except those served by the CONSOLIDATED RAIL CORPORATION from Torrance, east.

District 3
West Virginia—
All mines in the following counties:

Barbour	Jackson	Randolph	Webster
Braxton	Lewis	Ritchie	Wetzel
Calhoun	Marion	Roane	Wirt
Doddridge	Monongalia	Taylor	Wood
Gilmer	Pleasants	Tyler	
Harrison	Preston	Upshur	

Selected mines in the following county:
Nicholas County (part)—All mines served by or north of the Baltimore & Ohio Railroad.

District 4. Ohio—All mines in the State.

District 5. Michigan—All mines in the State.

District 6
West Virginia—All mines in the following counties:
Brooke Hancock Marshall Ohio

District 7
Virginia—
All mines in the following counties:
Montgomery Pulaski Wythe Giles Craig
Selected mines in the following counties:
Buchanan County (part)—All mines in that portion of the county served by the Richlands-Jewell Ridge branch of the Norfolk & Western Railroad and in that portion on the headwaters of Dismal Creek east of Lynn Camp Creek (a tributary of Dismal Creek).
Tazewell County (part)—All mines in those portions of the county served by the Dry Fork branch to Cedar Bluff and from Bluestone Junction to Boissevain branch of the Norfolk & Western Railroad and Richlands-Jewell Ridge branch of the Norfolk & Western Railroad.
West Virginia—
All mines in the following counties:
Greenbrier Mercer Monroe Pocahontas Summers
Selected mines in the following counties:
Fayette County (part)—All mines east of Gauley River and all mines served by the Gauley River branch of the Chesapeake & Ohio Railroad and mines served by the Norfolk & Western Railroad.
McDowell County (part)—All mines in that portion of the county served by the Dry Fork branch of the Norfolk & Western Railroad and east thereof.
Raleigh County (part)—All mines except those on the Coal River branch of the Chesapeake & Ohio Railroad and north thereof.
Wyoming County (part)—All mines in that portion served by the Guyandot branch of the Norfolk & Western Railroad lying east of the mouth of Skin Fork of Guyandot River and in that portion served by the Virginia division main line of the Norfolk & Western Railroad.

District 8
Kentucky—All mines in the following counties in eastern Kentucky:

Bell	Greenup	Lawrence	Morgan
Boyd	Harlan	Lee	Owsley
Breathitt	Jackson	Leslie	Perry
Carter	Johnson	Letcher	Pike
Clay	Knott	McCreary	Rockcastle
Elliott	Knox	Magoffin	Wayne
Floyd	Laurel	Martin	Whitley

North Carolina—All mines in the State.
Tennessee—All mines in the following counties:

Anderson	Claiborne	Fentress	Overton	Scott
Campbell	Cumberland	Morgan	Roane	

District 8—*Continued*
Virginia—
All mines in the following counties:
Dickinson Lee Russell Scott Wise
Selected mines in the following counties:
Buchanan County (part)—All mines in the county, except in that portion on the headwaters of Dismal Creek, east of Lynn Camp Creek (a tributary of Dismal Creek) and in that portion served by the Richlands-Jewell Ridge branch of the Norfolk & Western Railroad.
Tazewell County (part)—All mines in the county except in those portions served by the Dry Fork branch of the Norfolk & Western Railroad and branch from Bluestone Junction to Boissevain of Norfolk & Western Railroad and Richlands-Jewell Ridge branch of the Norfolk & Western Railroad.
West Virginia—
All mines in the following counties:

Boone	Clay	Lincoln	Mason	Putnam
Cabell	Kanawha	Logan	Mingo	Wayne

Selected mines in the following counties:
Fayette County (part)—All mines west of the Gauley River except mines served by the Gauley River branch of the Chesapeake & Ohio Railroad.
McDowell County (part)—All mines west of and not served by the Dry Fork branch of the Norfolk & Western Railroad.
Nicholas County (part)—All mines in that part of the county south of and not served by the Baltimore & Ohio Railroad.
Raleigh County (part)—All mines on the Coal River branch of the Chesapeake & Ohio Railroad and north thereof.
Wyoming County (part)—All mines in that portion served by the Guyandot branch of the Norfolk & Western Railroad and lying west of the mouth of Skin Fork of Guyandot River.

District 9
Kentucky—All mines in the following counties in western Kentucky:

Butler	Hancock	McLean	Todd
Christian	Henderson	Muhlenberg	Union
Crittenden	Hopkins	Ohio	Warren
Daviess	Logan	Simpson	Webster

District 10. Illinois—All mines in the State.

District 11. Indiana—All mines in the State.

District 12. Iowa—All mines in the State.

District 13
Alabama—All mines in the State.
Georgia—All mines in the State.
Tennessee—All mines in the following counties:

Bledsoe	Hamilton	McMinn	Sequatchie	Warren
Grundy	Marion	Rhea	Van Buren	White

District 14
Arkansas—All mines in the State.
Oklahoma—All mines in the following counties:
Haskell Le Flore Sequoyah

District 15
Kansas—All mines in the State.
Missouri—All mines in the State.
Oklahoma—All mines in the following counties:

Coal	Latimer	Okmulgee	Rogers	Wagoner
Craig	Muskogee	Pittsburg	Tulsa	

Texas—All mines in the State.

District 16
Colorado—All mines in the following counties:

Adams	Boulder	Elbert	Jackson	Larimer
Arapahoe	Douglas	El Paso	Jefferson	Weld

District 17
Colorado—All mines except those included in District 16.
New Mexico—All mines except those included in District 18.

District 18
Arizona—All mines in the State.
California—All mines in the State.
New Mexico—All mines in the following counties:

Grant	McKinley	Sandoval	San Miguel	Socorro
Lincoln	Rio Arriba	San Juan	Santa Fe	

District 19
Idaho—All mines in the State.
Wyoming—All mines in the State.

District 20. Utah—All mines in the State.

District 21
North Dakota—All mines in the State.
South Dakota—All mines in the State.

District 22. Montana—All mines in the State.

District 23
Alaska—All mines in the State.
Oregon—All mines in the State.
Washington—All mines in the State.

District 24. (Pennsylvania Anthracite)
Pennsylvania—
All mines in the following counties: Carbon, Columbia, Dauphin, Lackawanna, Lebanon, Luzerne, Northumberland, Schuylkill, Sullivan, Susquehanna.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 295.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–CB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA82-35-000]

American Resources Management Corp.; Petition for Adjustment

Issued: September 24, 1982.

On September 15, 1982, American Resources Management Corporation (ARMC) filed with the Federal Energy Regulatory Commission (Commission) a petition for an adjustment pursuant to section 502(c) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. §§ 3301–3432 (Supp. IV 1980) and Subpart K of the Commission's Rules of Practice and Procedure, 18 CFR 385.1101–.1117 (1982).

ARMC seeks a waiver of § 273.204(c)(1) of the Commission's regulations, which requires a 45-day waiting period between the date a well category determination becomes final and the date the producer is allowed to retroactively collect the NGPA rate for which a well has qualified. ARMC alleges that the 45-day waiting period required by the Commission's regulations causes it to suffer special hardship and inequity. ARMC alleges that in the 45 days after NGPA section 107(c)(5) tight sands well category determinations for five wells become final, it will pay $14,335.93 in interest, at 18 percent, on unpaid accounts due. The NGPA determinations became final on September 19, 1982. The 45-day period ends November 3, 1982. ARMC therefore requests a waiver of § 273.204(c)(1) so it may begin collecting a tight sands price for its gas and pay its creditors.

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure, Order No. 225, issued April 28, 1982, effective August 26, 1982 (47 FR. 19014, May 3, 1982).

Any person desiring to participate in this adjustment proceeding must file a motion to intervene in accordance with the provisions of such Subpart K. All motions to intervene must be filed within 15 days after publication of this notice in the **Federal Register.**

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2600-001 and 2600-002]

Bangor Hydro-Electric Co.; Amended Notice of Application for New License and Amendment of License [1]

September 24, 1982.

Take notice that Bangor Hydro-Electric Company (Applicant) filed on August 4, 1982, and application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for construction and operation of a water power project to be known as the West Enfield Project No. 2600. The project would be located on the Pensobscot River in W. Enfield and Howland, Penobscot County, Maine. Correspondence with the Applicant should be directed to: Robert S. Briggs, Vice President, Bangor Hydro-Electric Company, 33 State Street, Bangor, Maine 04401.

Project Description —The W. Enfield project presently consists of: (1) a dam on the Penobscot River about 980 feet long and about 20 feet high in three sections, (a) a rock-filled timber crib, topped by four-foot flashboards, and containing a 10-foot log sluice and a 30-foot raft sluice, (b) a concrete gated section, and (c) a granite masonry gate-house structure with 13 concrete gates, 7x7.5 feet together with a auxillary earth dam (Runaround) located on the west bank of Merrill Brook about 200 feet long and 15 feet high containing three steel gates controlling diversions to the Piscataquis River, (2) a reservoir at normal elevation 154.75 feet about 7.3 miles long with an area of about 1,050 acreas; (3) a canal from the gate-house on the left bank to the powerhouse forebay about 1,390 feet long and varying from 100 to 240 feet wide; (4) a concrete-brick powerhouse in two sections containing (a) a 1,400-kw generating unit and (b) two 1,200-kw generating units, (5) and outdoor substation with three step-up 2.3–46 kV transformers aggregating 5,000 kVa capacity, (6) a substation with a step-up 2.3–12.5/7.2 kV transformer with 4,500 kVa capacity, for local distribution, and (7) appurtenant facilities:

Applicant requests that the license for the W. Enfield Project be amended by changing the expiration date of the license from December 31, 1987, to coincide with the date of issuance of a new 50 year license for the redevelopment and continued operation of the W. Enfield Project.

Applicant proposes under the new license: (1) To install a new powerhouse containing 5 new turbine-generators with a total rated capacity of 13 MW and new gate house within the power canal and located approximately 800 feet downstream of the existing power canal inlet gate structure (The existing gate structure and powerhouse would be removed); (2) to increase the hydraulic capacity to the existing canal and rehabilitate the existing canal embankment/training wall to accommodate an inlet flow to and outlet flow from the new powerhouse of up to 9,000 cfs; (3) to increase the normal water surface elevation of the reservoir by 9 inches to 155.5 feet m.s.l. by installing new flashboards with a total height of 5.6 feet (4) to install two new fishways to insure adequate passage to anadromous fishes; (5) to construct a new 800-foot-long, 46-kV transmission line. The redeveloped project would generate an additional 52,700,000 Kwh annually. Energy produced at the project would be utilized within the Applicants distribution system.

Project No. 2600 would also be subject to Federal takeover under sections 14 and 15 of the Federal Power Act. The Applicant has calculated that the estimated net investment in the project would amount to $2,294,491 as of December 31, 1981. The Applicant's estimated severance damages as of December 31, 1981, would amount to $100,000.

Competing Applications —Anyone desiring to file a competing application must submit to the Commission, on or before *March 9, 1983,* a competing application. [See 18 CFR § 4.33(d)(e) and 18 CFR part 16 (1981)].

Comments, Protests, or Motions To Intervene —Anyone may file comments, a protests, or a motion to intervene in accordance with the requirements of the Rules 211 or 214, 18 CFR 385.211 or 385.214, 47 Fed. Reg. 19025–28 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be filed on or before November 29, 1982.

Filing and Service of Responsive Documents —Any filings must bear in

[1] This notice supersedes the previously published notices of September 23 and September 30, 1982; 47 FR (39229) (September 7, 1982)

all capital letters the title "COMMENTS", "COMPETING APPLICATION", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C 22426. An additional copy must be sent to: Fred E. Springer, Chief, Application Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any competing application or motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP68-5-000]

Northern Natural Gas Company, Division of InterNorth, Inc.; Petition To Amend

September 27, 1982.

Take notice that on September 17, 1982, Northern Natural Gas Company, Division of InterNorth, Inc. (Petitioner) 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP68-5-000 a petition to amend the order issued December 11, 1967,[1] in Docket No. CP68-5 as amended, pursuant to Section 7(c) of the Natural Gas Act to eliminate the requirement that there would be no additional reduction in the heating value of the gas stream downstream from Bushton, Kansas as a result of the extraction of ethane, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that it presently is authorized to deliver up to approximately 962,400 Mcf of gas per day to Northern Gas Products Company (NGP) for the extraction of propane, butanes, natural gasoline and ethane at NGP's Bushton complex. The natural gas delivered to the Bushton complex is produced principally from the Hugoton Field and Anadarko Basin producing areas. Petitioner states that the Hugoton Field gas is low in Btu and high in nitrogen content, whereas the Anadarko Basin gas has a higher Btu and a lower nitrogen content.

Petitioner asserts that under the Btu equivalency constraint of the December 11, 1967, order, the ethane plant cannot operate independently from the helium plant. It is explained that the helium plant must be operated whenever ethane is extracted at the ethane plant from the natural gas stream entering this plant because nitrogen and helium (inerts) are extracted from such volumes at this helium plant in order to maintain the heating content of the gas downstream of the Bushton complex in accordance with the December 11, 1967, order. To provide sufficient rejection of nitrogen to assure that there would be no additional reduction in the heating value of the gas stream as it emerges from Petitioner's Bushton, Kansas compressor station, requires that at least 380,000 Mcf per day of Hugoton Field quality gas flow through the Helium Plant, it is claimed. It is further maintained that flow rates below 380,000 Mcf per day through the Helium Plant would thwart the delicate design balance of the helium plant and thereby create high risks, physical damages and operating unknowns, which have necessitated a shutdown of the helium plant.

Petitioner alleges that since late March 1982, the flow of Hugoton Field gas has averaged approximately 200,000 Mcf per day, and that this volume contains insufficient inerts to permit ethane extraction in accordance with the present Commission order. Petitioner states that since the helium plant is the sole mechanism used to reject inerts, to maintain the heating content of the gas downstream of Petitioner's Bushton, Kansas compressor station, the ethane plant cannot be operated in compliance with December 11, 1967, order.

It is asserted that removal of the heating value balancing requirement would enable the ethane plant to operate independently of flows of Hugoton Field quality gas through the helium plant. To provide for the removal of the heating value balancing requirement, Petitioner and NGP have entered into an agreement dated August 27, 1982, which provides, *inter alia*, it is said, that NGP agrees that its extraction of ethane from the natural gas stream delivered by Petitioner would not cause, at any time the weighted average of the gross heating value of the natural gas being delivered to Petitioner's principal market area in the composite of Petitioner's main transmission lines downstream of Petitioner's Bushton compressor station to be less than Petitioner's tariff requirements as approved by the Commission, it is stated.

Petitioner asserts that as part of its general rate increase filing with the Commission in Docket No. RP82-71, it proposed, *inter alia*, (1) to adjust the commodity portions of the gas bills for its Market Area Sales to reflect the Btu content of gas delivered, and (2) to lower the Btu minimum of its gas to 950. Petitioner would effectuate the proposed tariff provisions, subject to refund, on October 27, 1982. Petitioner requests that the order amending the certificate become effective on October 27, 1982. It is stated that implementation of the revised tariff provisions would result in a billing procedure whereby Petitioner's customers would be charged on the basis of heating value received.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-27012 Filed 9-29-82; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. ER82-804-000]

American Electric Power Service Corp.; Filing

September 24, 1982.

Take notice that American Electric Power Service Corporation (AEP) on September 17, 1982, tendered for filing on behalf of its affiliate Indiana & Michigan Electric Company (I&ME) Modification No. 14 dated July 15, 1982 to the Interconnection Agreement dated (July 20, 1956 between Commonwealth Edison Company (Commonwealth) and I&ME, I&ME's Rate Schedule FERC No. 20, and Commonwealth's Rate Schedule FERC No. 2

AEP states that Section 1 of this Agreement modernizes the Billing and Payment Article of the Interconnection Agreement, while Sections 2 and 3 provide for an increase in the demand rate for Short Term Power and Limited Term Power to $1.25/KW-week and $6.50/kW-month respectively when I&ME is the supplying party. Commonwealth's demand rates will remain at their previous level of $1.05/

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

kW-week and $5.50/kW-month for Short Term Power and Limited Term Power respectively. Section 4 of this Agreement revises the Compensation section of the Emergency Service Schedule. The changes made in these service schedules in this Agreement are to comply with the Commission's Order 84 and to substantially conform with the terms and conditions in other Service Schedules previously filed by AEP and have been accepted for filing by the Commission.

AEP requests an effective date of October 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served upon the Commonwealth Edison Company, ther Public Service Commission of Indiana, the Michigan Public Service Commission, and the Illinois Commerce Commission.

Any person desiring to be heard or to protect said filing should file a motion to intervene or protect with the Federal Energy Regualtory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions of protests should be filed on or before October 12, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-805-000]

American Electric Power Service Corp.; Filing

September 24, 1982.

Take notice that American Electric Power Service Corporation (AEP) on September 20, 1982, tendered for filing on behalf of its affiliate Ohio Power Company (OPCO) Modification No. 10 dated July 1, 1982 to the Facilities and Operating Agreement dated May 1, 1967 between Dayton Power & Light Company (Dayton) and OPCO, OPCO's Rate Schedule FERC No. 36 and Dayton Rate Schedule FERC No. 31.

AEP states that Section 1 of this Agreement modernizes the Billing and Payment article of the facilities and Operating Agreement. Sections 2 and 3 of this Agreement update the Emergency Service and the Interchange Power Service Schedules. Sections 4 and 5 provide for an increase in the capacity demand rate for Short Term and Limited Term Power to $1.25 per kilowatt per week and $6.50 per kilowatt per month respectively and increases Dayton's Short Term and Limited Term Power transmission demand rate to $0.24 per kilowatt per week and $1.00 per kilowatt per month respectively. The Short Term Power Service Schedule has been revised to include a provision to allow for the sale of Short Term Power on a daily basis. The changes made in these Service Schedules in this Agreement to comply with the Commission's Order 84 and to substantially conform with the terms and conditions in other Service Schedules previously filed by AEP and which have been accepted for filing by the Commission. This Agreement is proposed to become effective October 1, 1982.

AEP requests an effective date of October 1, 1982, and therefore request waiver of the Commission's notice requirements.

Copies of this filing were served upon the Dayton Power & Light Company and the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-808-000]

Bangor Hydro-Electric Co.; Filing

September 24, 1982.

Take notice that on September 20, 1982, Bangor Hydro-Electric Company (Bangor) tendered for filing a Sales Agreement (Agreement) made as of August 18, 1982 between Bangor and Fitchburg Gas and Electric Light Company (Fitchburg) for the sale of unit power by Bangor to Fitchburg.

Bangor states that the Agreement provides for a unit sale of 10,000 kilowatts from Bangor's entitlement in the Mystic Unit No. 7, owned and operated by the Boston Edison Company (Boston), to Fitchburg. Bangor has such entitlement under contract for the proposed term of the Agreement from Boston. Such contract has been accepted for filing as Boston's Rate Schedule FPC No. 106. The Agreement provides that Fitchburg pay for the capacity at the rate of $58 per kilowatt per year and for their pro-rate share of the actual energy costs.

Bangor requests an effective date of August 18, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been served upon Fitchburg.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP82-526-000]

Columbia Gas Transmission Corp.; Application

September 24, 1982.

Take notice that on September 9, 1982, Columbia Gas Transmission Corporation (Applicant), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP82-526-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction of 48 interconnecting tap facilities to provide additional points of delivery to existing wholesale customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the following new points of delivery for the following wholesale customers:

(1) Columbia Gas of Kentucky, Inc.: 8 taps for residential service—estimated annual usage of 1,200 Mcf.

(2) Columbia Gas of Ohio, Inc.: 20 taps for residential service; 1 tap for commercial service; 1 tap for combined residential and industrial service; 2 taps for industrial service—estimated annual usage of 14,070 Mcf.

(3) Columbia Gas of Pennsylvania, Inc.: 1 tap for commercial service—estimated annual usage of 1,370 Mcf.

(4) Columbia Gas of West Virginia, Inc.: 13 taps for residential service; 1 tap for industrial service—estimated annual usage of 7,955 Mcf.

(5) The Dayton Power and Light Company: 1 tap for residential service—estimated annual usage of 150 Mcf.

Applicant estimates that the total cost of the interconnections proposed herein is $14,480 to be financed through internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26878 Filed 9-29-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ST82-409-000]

Louisiana Gas Intrastate, Inc. of Shreveport; Application

September 24, 1982.

Take notice that on August 13, 1982, Louisiana Gas Intrastate Inc. of Shreveport (Applicant), 890 Dresser Tower, Houston, Texas 77002 filed in Docket No. ST82-409-000 an application pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA) and Section 284.123(b)(2) of the Regulations for approval of the the rates and charges to be assessed by Applicant for transportation services to be provided for Texas Gas Transmission Company (Texas Gas), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is an intrastate natural gas pipeline within the meaning of Louisiana law with approximately 200 miles of pipeline located in Bienville, Claiborne, Jackson, Lincoln, Natchitoches, Ouachita, Union and Webster Parishes, Louisiana. Through a transportation agreement entered into with its sister corporation, Louisiana Gas Purchasing Corporation, Applicant states its system is operated as a totally integrated pipeline facility.

Pursuant to an agreement between Applicant and Texas Gas dated July 15, 1982, Applicant has agreed to transport up to 12,500 million Btu's of natural gas per day for Texas Gas. For such service Applicant would charge Texas Gas a rate of 25.75 cents per million Btu. Applicant asserts that the proposed rates are fair and equitable and not in excess of an amount which is reasonably comparable to the rates and charges which interstate pipelines would be permitted to charge for providing similar transportation service within the meaning of Section 311(a)(2)(B)(i) of the NGPA. Applicant further asserts that the rates are necessary reasonably to compensate Applicant for expenses incurred in connection with the transportation service and to provide Applicant with the opportunity to earn a reasonable profit on such services. Applicant also asserts that the proposed rate is equal to the rate approved by the Commission by operation of Section 284.123(b)(2)(ii) of the Commission's Regulations in Docket Nos. ST82-7 and ST82-8.

Applicant indicates that the local authorization necessary to provide the transportation services for an interstate pipeline has already been obtained from the appropriate Louisiana officials.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26879 Filed 9-29-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-494-000]

Natural Gas Pipeline Company of America; Application

September 24, 1982.

Take notice that on August 17, 1982, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP82-494-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain gas purchase facilities located in the Pita S. E. Field, Kleberg County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated Applicant seeks to abandon a 3-inch measuring facility, 28,417 feet of 4-inch pipeline and other appurtenant facilities which connect the State Tract 172 Well No. 1, in Laguna Madre Area, Kleberg County, Texas to the pipeline facilities of Florida Gas Transmission Company. Applicant states that there are no remaining salvable recoverable gas reserves that can be produced from the State Tract 172 Well No. 1 which was plugged and abandoned on December 15, 1981.

It is further stated that Applicant would remove all salvable facilities and retain them in stock until needed for reuse at another location. Applicant

asserts that abandonment of the facilities would not cause any termination of service to any customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26880 Filed 9-29-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-505-000]

Natural Gas Pipeline Company of America; Application

September 24, 1982.

Take notice that on August 24, 1982, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP82-505-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for the account of Columbia Gas Transmission Corporation and Columbia Gulf Transmission Company (referred to collectively as Columbia) and the construction and operation of certain pipeline, a tap and meter station, and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it has contracted to transport a daily demand quantity of 56,500 million Btu's of natural gas on a firm basis, and up to 14,125 million Btu's of overrun gas, on a best efforts basis, for Columbia from the terminus of the Trailblazer System in Gage County, Nebraska for redelivery at the proposed interconnection between Applicant and Columbia at Pecan Lake, in Cameron Parish, Louisiana.

Applicant proposes initially to charge Columbia a monthly transportation demand charge of $7.78 times the demand quantity. Columbia would also pay Applicant a monthly charge of 25.60 cents per million Btu for overrun gas delivered at Applicant's receipt point.

Applicant further proposes that if the facilities proposed in the instant docket are certificated before Applicant's applications at Docket Nos. CP82-293-000 and CP82-355-000, Applicant requests authorization to construct and operate 3.66 miles of 36-inch diameter pipeline loop on Applicant's Louisiana Line extending eastward from the east end of the 37.38 mile pipeline loop certificated in Docket No. CP82-50-000 to permit the firm redelivery of 56,500 million Btu's per day to Columbia. Applicant also proposes to construct one 12-inch tap and a meter station with one 12-inch meter run at the Pecan Lake redelivery point in Cameron Parish, Louisiana, a valve and regulator at Station 302, and appurtenant facilities.

It is estimated that the cost of the proposed Louisiana Line facilities would be $3,648,150 which cost would be financed initially by funds on hand, issuance of commercial paper, use of existing bank lines of credit or other interim financing arrangements as may be negotiated. Permanent financing subsequently would be undertaken as part of Applicant's overall long term financing program.

As an alternate proposal, Applicant states that if its application at Docket No. CP82-293 is approved before the present application, Applicant would propose to construct and operate 5.05 miles of 36-inch diameter pipeline loop on its Louisiana Line extending eastward from the east end of the 8.16-mile pipeline loop certificated in Docket No. CP82-293-000, one 12-inch meter run at Pecan Lake and appurtenant facilities. It is stated that the estimated cost of this alternate proposal would be $4,275,371, which cost would be financed in the same manner as is described for the first proposal for the Lousiana Line facilities.

The proposed service and facilities, it is stated, would provide transportation of Columbia's Rocky Mountain gas supplies from the terminus of the Trailblazer System in Gage County, Nebraska, for redelivery of the proposed interconnections at Pecan Lake, Cameron Parish, Louisiana.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be necessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26881 Filed 9-29-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-809-000]

Niagara Mohawk Power Corp.; Filing

September 24, 1982.

Take notice that Niagara Mohawk Power Corporation (Niagara), on September 20, 1982, tendered for filing as a rate schedule, an agreement between Niagara and Rochester Gas and Electric Corporation (Rochester) dated August 23, 1982.

Niagara presently has on file an agreement with Rochester dated July 3, 1980 and amended June 8, 1981. This agreement is for the transmission of Rochester's share of the Oswego #6 generation unit over Niagara's transmission system to Rochester.

The August 23, 1982 agreement contained in this filing revises the transmission rate for transmitting Oswego Unit #6 power and from the Oswego Unit #6 generating station to Rochester as provided for in the terms of the original agreement.

Niagara requests waiver of the Commission's notice requirements in order to allow an effective date of July 1, 1982.

Copies of this filing were served upon Rochester and the Public Service Commission of the State of New York.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-810-000]

Portland General Electric Co.; Filing

September 24, 1982.

Take notice that on September 20, 1982, Portland General Electric Company (PGE) tendered for filing the written report regarding Average System Cost (ASC) prepared by the Bonneville Power Administration (BPA), the BPA's Average System cost determination and PGE's Appendix 1, Schedule 5. This determination was made on August 30, 1982.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP82-508-000]

Quivira Gas Co.; Application

September 24, 1982.

Take notice that on August 20, 1982, Quivira Gas Company (Applicant), P.O. Box 2256, Wichita, Kansas 67201, filed in Docket No. CP82-508-000 an application pursuant to Section 311(a) of the Natural Gas Policy Act of 1978 (NGPA) and Section 284.127 of the Commission's Regulations for authorization to provide an intrastate transportation service for Tennessee Gas Transmission Company, a Division of Tenneco, Inc. (Tennessee) for a term of ten years, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is a Kansas corporation which owns and operates intrastate natural gas pipeline systems in five states, including Mississippi. Applicant avers Tennessee has purchased natural gas from producers in Jefferson Davis and Marion Counties, Mississippi, and that Applicant owns and operates all pipeline facilities necessary to transport Tennessee's gas to connections in those counties to the intrastate pipeline system of Mississippi Fuel Company (MFC). Applicant states that its pipeline system consists of a nine mile 6-inch pipeline which connects three wells in the Vintage Field with MFC's line in Jefferson Davis County and nineteen miles of 4-inch and 6-inch pipeline which connects fifteen wells in Newsom, East Morgantown and South Morgantown Fields to MFC's line in Marion County. Applicant indicates that MFC would redeliver equal quantities of gas to an interconnection on Tennessee's line in eastern Mississippi.

Pursuant to Section 311(a)(2) of the NGPA, Applicant proposes to transport up to 20,950 Mcf of natural gas per day for a term up to and not exceeding ten years. The estimated total volumes of gas to be transported would be 32,600,000 Mcf for the ten year term. For such service Applicant proposes to charge Tennessee a transportation rate of $0.120 per Mcf of natural gas delivered for Tennessee's account to MFC. Applicant further states that this rate would be adjusted at annual intervals to reflect actual increases in taxes, operating, and maintenance costs to Applicant.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982 file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-806-000]

San Diego Gas & Electric Co.; Filing

September 24, 1982.

Take notice that on September 20, 1982, San Diego Gas & Electric Company (SDG&E) tendered for filing as an initial rate schedule an Economy Energy Agreement and Schedule Outage Assistance Agreement between SDG&E and Plains Electric Generation and Transmission Cooperative, Inc. (Plains), dated August 4, 1982.

SDG&E requests an effective date of August 4, 1982, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825

North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. G-1969-000]

Tennessee Gas Pipeline Company, a Division of Tenneco Inc.; Petition To Amend

September 24, 1982.

Take notice that on August 18, 1982, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. G-1969-000 a petition to amend the order [1] issued in Docket No. G-1969 pursuant to Section 7(c) of the Natural Gas Act so as to reduce the maximum daily quantity of natural gas Petitioner is authorized to transport on behalf of Iroquois Gas Corporation (Iroquois), to add two delivery points in Erie County, New York, and to reflect Natural Fuel Gas Supply Corporation's (Natural Fuel) acquisition by merger of certain properties of Iroquois, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that in Docket No. G-1969 it currently is authorized to transport on a firm basis for Iroquois and its affiliates, Pennsylvania Gas Company (PGC) and United Natural Gas Company (UNGC) up to 49,728 Mcf of natural gas per day under Petitioner's transportation Rate Schedule T-1 of its FERC Gas Pipeline Tariff. It is further stated that National Fuel Gas Supply Corporation (National Fuel) received authorization in Docket No. CP73-294 to acquire by merger, effective July 10, 1974, certain natural gas transmission, storage, and production properties of Iroquois.

Petitioner maintains that production has declined from the properties which are the source of the natural gas authorized to be transported by Applicant in Docket No. G-1969. Therefore, at National Fuel's request, Petitioner proposes to substitute National Fuel for Iroquois, PGC, and UNGC and to reduce the quantity of natural gas Petitioner is authorized to transport hereunder from 49,728 Mcf per day to 30,000 Mcf per day. In addition, Petitioner proposes to establish two new delivery points at existing interconnections between Petitioner's and National Fuel's pipelines in Erie County, New York.

Petitioner indicates that it would charge National Fuel a transportation rate based on a demand charge equal to the aggregate of $8.84 multiplied by the maximum daily volume and a volume charge equal to 56.24 cents per Mcf of gas delivered. Petitioner also indicates that there are provisions for a minimum monthly bill.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 384.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ES82-75-000]

Texas-New Mexico Power Co; Application

September 24, 1982.

Take notice that on September 16, 1982, Texas-New Mexico Power Company (Applicant) filed an application wih the Federal Energy Regulatory Commission, pursuant to Section 204 of the Federal Power Act, seeking authority to negotiate for the placement of not more than $25,000,000 of first Mortgage Bonds, 450,000 shares of Common Stock, par value of $10 per share, and 80,000 shares of Cumulative Preferred Stock, $100 par value.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). The application is on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26887 Filed 9-29-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-481-000]

Transcontinental Gas Pipe Line Corp.; Application

September 24, 1982.

Take notice that on August 11, 1982, Tancscontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP82-481-000 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity to make an off-system sale of up to 200,000 dt equivalent of natural gas per day to Bridgeline Gas Distribution Company (Bridgeline) and to construct and operate pipeline taps and related facilities required to deliver such gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant maintains that a temporary surplus of gas has been caused by unexpected high rates of deliverability of offshore wells from which Applicant purchases gas and because of competition from alternate fuels. In order to reduce its substantial take-or-pay obligations Applicant proposes to make the off-system sale for a term of two years and to abandon such sale at the end of the two-year term.

Specifically, Applicant proposes to deliver gas for the account of Bridgeline at three points. Applicant states that it has a lateral (Lucy) which connects its Southeast Louisiana Gathering System (SELGS) with Texaco Inc.'s (Texaco) Paradis Gasoline Plant in St. Charles Parish, Louisiana (Paradis). Texaco currently sells and delivers up to 25,000 Mcf of natural gas per day from Paradis to Applicant. As part of the proposed off-system sale, instead of delivering such gas to Applicant, Texaco would deliver the gas to Riverway Gas Pipline

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was

Company (Riverway) on behalf of Applicant for the account of Bridgeline. Riverway then would redeliver the gas to Bridgeline. Up to 20,000 dt of natural gas per day would be delivered by Applicant to Riverway for the account of Bridgeline by reversing the flow in the Lucy lateral. An existing check valve would be removed at the interconnection of the SELGS and the Lucy lateral and Riverway would construct a pipeline which would connect with Applicant's facilities at Applicant's existing meter station in Paradis. Applicant would use the existing meter station to measure the gas to be sold at this delivery point but it would install bypass piping in the meter station yard in order to connect with Riverway's pipeline. The remainder of the gas subject to this application would be delivered to Riverway for the account of Bridgeline at a proposed interconnection between the SELGS and Riverway's existing line which crosses the SELGS in Ascension Parish, Louisiana. To accomplish such interconnection, Applicant would need to install two taps in the SELGS. Riverway would construct the necessary pipeline and meter station to complete the interconnection. The estimated cost of the proposed facilities is $108,115.

Applicant proposes that the price to be paid by Bridgeline for gas sold be set each month at the greater of the then current Section 102 rate of the Natural Gas Policy Act of 1978 or Applicant's then average cost of purchased gas included in its most recent Purchase Gas Adjustment filing. Applicant asserts that this price is necessary to enable it to compete in the current market and that none of its off-system sales purchasers are interested in sales priced at a rate equivalent to that charged under Applicant's principal jurisdictional rate schedule at an assumed 100 percent load factor, as the Commission has done in the past.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26866 Filed 9-29-82; 8:45 am]

BILLING CODE 6717-M

[Docket No. CP82-484-000]

Transwestern Pipeline Co.; Application

September 24, 1982.

Take notice that on August 13, 1982, Transwestern Pipeline Company (Applicant), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP82-484-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Texas Eastern Transmission Corporation (TETCO), and the construction and operation of certain facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that TETCO has agreed to purchase quantities of Canadian natural gas from Nortwest Pipeline Company (Northwest). The agreement provides for the sale by Northwest of up to 300,000 dt equivalent of natural gas per day on a firm basis and an additional 25,000 dt equivalent of natural gas per day subject to Northwest's overall system suppy being sufficient to meet Northwest's existing customers firm contract obligations. The term of the agreement is for a period continuing through October 31, 1989, and would be extended from year to year thereafter subject to Northwest's continuing ability to receive sufficient volumes of natural gas from Westcoast Tranmission Company, Ltd. To implement the purchase, Applicant and TETCO entered into a general partnership agreement under the name of Continental Divide Pipeline Company (Continental Divide). In order to effectuate receipt of said quantities of natural gas by TETCO, Applicant and TETCO have entered into a transportation agreement.

Specifically, Applicant proposes to transport for TETCO, on a firm basis, 162,000 dt equivalent of natural gas per day and such additional quantities in excess of 162,500 dt equivalent as Applicant in its sole discretion determines it is able to transport, less actual fuel usage. It is stated that Applicant would receive 162,500 dt equivalent of gas per day from Continental Divide at the proposed point of interconnection between Continental Divide and Applicant located at Applicant's compressor station No. 5 in McKinley County, New Mexcio, and transport and redeliver equal quantities of a firm basis, less the actual fuel usage of its compressors at the point of delivery, to Valero Transmission Company (Valero), for the account of TETCO, at a point of interconnection between the systems of Applicant and Valero in Pecos County, Texas. The agreement provides that, when requested, Applicant would endeavor to transport a quantity of gas in excess of the contract quantity but that the ability of Applicant to transport such excess gas would be determined exclusively by Applicant.

It is stated that the agreement further provides that the transportation service would be for a primary term of 15 years from the date of initial delivery and from year to year thereafter until terminated by either party by prior written notice of not less than 2 years. It is stated that Applicant would charge TETCO a monthly facility charge of $249,623.00 and a commodity charge of 6.48¢ per dt equivalent of gas delivered.

In order to effectuate the transportation, Applicant proposes to construct a new compressor station consisting of 2 compressors of up to 4,000 horsepower each, and a new metering and regulating station. It is stated that the facilities would be located at the point of interconnection between Applicant and Valero in Pecos County, Texas. Applicant asserts that the additional compression is necessary to effectuate the transfer of natural gas from its system to Valero and that it would not increase the capacity of Applicant's West Texas Lateral pipeline. It is stated that the maximum

capacity at the point of interconnection between Applicant and Valero would be approximately 300,000 Mcf of gas per day.

The total cost for the proposed facilities is estimated at $8,396,000 to be financed from funds on hand and/or from borrowings under Applicant's revolving credit agreements which may later be replaced with long-term financing.

Applicant submits that the proposed transportation service would provide TETCO with the most efficient and cost-effective method of receiving the quantities of firm gas supplies which TETCO has purchased from Northwest and that the construction of the proposed compression and metering facilities is necessary in order to effectuate Applicant's transportation service for TETCO.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-811-000]

Upper Peninsula Power Co.; Filing

September 24, 1982.

Take notice that on September 20, 1982, Upper Peninsula Power Company (Upper Peninsula) tendered for filing Addendum B between Upper Peninsula and the Ontonagon County Rural Electrification Association dated September 16, 1982. Upper Peninsula states that the Federal Energy Regulatory Commission's designated rate schedule for this contract is FERC No. 15.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 13, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26890 Filed 9-29-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-487-000]

Williston Basin Interstate Pipeline Co. and Montana-Dakota Utilities Co.; Application

September 24, 1982.

Take notice that on August 16, 1982, Williston Basin Interstate Pipeline Company (Williston Basin), 400 North Fourth Street, Bismarck, North Dakota 58501, and Montana-Dakota Utilities Co. (MDU), 400 North Fourth Street, Bismarck, North Dakota 58501, filed in Docket No. CP82-487-000 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing Williston Basin to acquire and operate certain natural gas transmission facilities by which it will transport gas in the states of North Dakota, South Dakota, Montana, and Wyoming, and provide various sales, exchange, storage, and transportation services and for permission and approval authorizing MDU to abandon those facilities and services for which Williston Basin seeks certificate authorization to acquire, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that MDU commenced operations as an electric utility in 1924. MDU indicates that it initially entered the natural gas business to supply boiler fuel to its electric generating plants. Over the years, however, MDU submits that it has developed an extensive interstate pipeline and distribution system that serves consumers in the states of North Dakota, South Dakota, Wyoming, and Montana.

MDU maintains that traditionally its investment in new electric facilities was greater than investment in new gas facilities; however, MDU asserts that gas plant additions have exceeded electric investment in six of the last ten years. Between the pipeline and distribution segments of the gas business, MDU claims that capital requirements for the pipeline segment are increasing more rapidly. The application shows distribution between pipeline and distribution investments for capital construction requirements as follows:

	1972	1973	1974	1975	1976	1977	1978	1979	1980	1981
Pipeline	$4,789,000	$3,860,000	$3,161,000	$4,243,000	$6,536,000	$4,852,000	$5,291,000	$8,795,000	$13,167,000	$21,233,000
Distribution	4,396,000	3,059,000	3,186,000	3,082,000	3,769,000	2,575,000	2,675,000	4,475,000	5,478,000	5,807,000

MDU expects this trend of increased pipeline investment to continue. In addition, MDU claims that earnings for its gas operations kept pace with the earings on its electric operations until 1977, when earnings on the gas

operations became inadequate to allow MDU to earn a fair return on its gas investment.

MDU states that in order to attract the capital necessary to continue to construct new gas supply facilities, earnings on its gas operations would have to improve greatly. It is asserted that earnings have not been higher than 1.29 percent on equity in any of the past five years. MDU avers that its gas operations can no longer depend on earnings generated by the electric operations of its business to attract sufficient capital for future gas construction because of increased electric utility construction requirements.

It is maintained that since the existing corporate structure is unable to generate sufficient earnings to finance new pipeline investment, MDU intends to restructure its operations so that its jurisdictional interstate facilities fall within a corporate entity regulated by the Commission. MDU proposes that its local distribution operations be maintained as they currently exist and that all of its jurisdictional facilities, services, and sales be concentrated within a separate transmission company, Williston Basin.

Williston Basin proposes to acquire all of MDU's pipeline facilities, land rights, and existing gas supply, transportation and sales operations in the states of North Dakota, South Dakota, Montana, and Wyoming. Williston Basin states that it would continue all sales, exchange, storage, and transportation services currently rendered by MDU. In addition, Williston Basin seeks authorization to make sales-for-resale of natural gas to MDU. The sales and deliveries would be made at existing city gate, field line, main line, and farm tap delivery points. Williston Basin states that it would sell the gas to MDU under its proposed Rate Schedules G–1, G–2, I–1, and I–2 and that Rate Schedules G–1 and I–1 would be similar to MDU's Rate Schedules G–1 and I–1. Proposed Rate Schedules G–2 and I–2 would cover service east of Bismarck, North Dakota. Further it is stated that initial rates would be based on the cost of service, cost allocations, and rate design proposed by MDU in its currently pending rate case in Docket No. RP82–84. Applicants indicate that assuming an October 1, 1982, start-up date, the principal proposed rates, exclusive of surcharges, would be as follows:

Customer	Rate schedule	Rate (cents per 1,000 ft.³)
MDU, Wyoming Gas Co., Byron Gas Service.	G–1	333.869
MDU	G–2	365.617
Wyoming Gas Co., Cody Gas Co.	PR–1	333.869
MDU, Wyoming Gas Co	I–1	330.869
MDU	I–2	362.617
Frontier Gas Storage Co	X–4	231.494
Colorado Interstate Gas Co	X–5	[1]421.481 [2]400.275
MIGC, Inc	X–6	[3]359.527 [4]29.660

[1] With storage.
[2] Without storage.
[3] Sale.
[4] Transportation.

Applicants state that Williston Basin would acquire MDU upon receipt of authorization from the Commission and upon receipt of a ruling from the Internal Revenue Service that the proposed acquisition would not be a taxable event. The purchase price would reflect the net depreciated book value of the assets as of the date of closing, less certain liabilities, plus all transaction expenses. It is shown that if the closing date were October 1, 1982, the estimated purchase price would be approximately $120,000,000. The application indicates that Williston Basin would finance the acquisition by issuing to MDU a combination of its common and preferred stock and several purchase money mortgages, whose total value would equal the purchase price.

Applicants further propose that MDU be granted abandonment authorization, for all of its currently authorized jurisdictional services and facilities, concurrently with the authorization sought by Williston Basin.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 15, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of August 23 Through August 27, 1982

During the week of August 23 through August 27, 1982, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Remedial Orders

Savage Gas Company, 8/27/82, HRO–0007, HRD–0025

The Economic Regulatory Administration (ERA) filed a Motion for Leave to Withdraw a Proposed Remedial Order which the agency had issued to Savage Gas Company. The ERA argued that the motion should be granted because the PRO did not accurately reflect the agency's present position. Savage did not object. In these circumstances, the DOE determined that good cause existed for granting ERA's motion. Accordingly, the DOE granted ERA's Motion to Withdraw the PRO issued to Savage without prejudice to the issuance of a new PRO or other enforcement action.

Stanco Petroleum, Inc., 8/25/82, DRO–0021, Crude Oil

Stanco Petroleum, Inc. objected to a Proposed Remedial Order (PRO) which the Central Enforcement District of the Economic Regulatory Administration (ERA) issued to the firm on April 4, 1979. In the PRO, the ERA alleged that Stanco had violated DOE pricing regulations pertaining to first sales of crude oil by improperly certifying production from

four of its properties as stripper well crude oil. Stanco contended that the ERA had erred in its calculation of average daily production from the four properties by excluding certain producing wells in its determination of the numbers of wells on the properties. After considering Stanco's objections, the DOE affirmed the findings of the PRO with respect to three of the four properties. The PRO's allegations concerning the fourth property, however, were rescinded with respect to two of the three stripper well qualifying periods at issue. Important issues considered in this Decision include: (i) Whether Stanco's destruction of company records precluded its introducing related evidence, (ii) whether the DOE was compelled to rescind the PRO due to delay between the date on which an evidentiary hearing was held and the issuance of a final remedial order, and (iii) the type of showing required for a crude oil producer to controvert information contained in its reports to a state regulatory authority.

Request For Exception

C. R. Mullis Oil and Heating Co., Inc., 8/23/82, BEE–1641

C. R. Mullis Oil and Heating Co., Inc. filed an Application for Exception from the reporting requirements of Form EIA–9A, the "No. 2 Distillate Price Monitoring Report." The applicant alleged that compliance with the reporting requirements of the Form EIA–9A would cause it to experience a serious hardship and a gross inequity. In considering the request, the DOE found that the firm had demonstrated that the reporting requirements resulted in a gross inequity which would seriously impede Mullis' business operation in the absence of exception relief. Accordingly, C. R. Mullis Oil and Heating Co., Inc. was excused entirely from the requirement that it submit Form EIA–9A to the DOE.

Motions for Discovery

Walter J. Scott & Benjamin J. Agajanian, HRD–0070, HRH–0070; William J. Scott, HRD–0071, HRH–0071; Walter J. Scott, d.b.a. Scott Oil Co., 8/27/82, HRD–0072, HRH–0072

Walter J. Scott & Benjamin J. Agajanian, William J. Scott, and Walter J. Scott, d.b.a. Scott Oil Co. filed Motions for Discovery and Evidentiary Hearing in connection with Proposed Remedial Orders issued to the firms on June 4, 1982. In a consolidated Decision and Order issued to the firms on August 27, 1982, the DOE found that the Motions failed to meet the requirements set forth in 10 C.F.R. §§ 205.198 and 205.199. In regard to the discovery requests, the DOE found that the firms failed to set forth the reasons why the particular discovery was necessary to obtain relevant and material evidence, and explain why such discovery was necessary to obtain relevant and material evidence, and explain why such discovery would not unduly delay the proceedings. It was also determined that the firms' Motions for Evidentiary Hearing failed to identify which disputed issues of fact they sought to address in the hearings. Nor did they explain why the testimony of witnesses would be necessary or even relevant to the issues in dispute. In an attempt to obtain all the information necessary in order to resolve the issues involved in the underlying Proposed Remedial Orders, the Decision permits the firms to submit further documentary evidence in support of the contentions set forth in their Statements of Objections.

Refund Application

Pennzoil Company/System Fuels, Inc., 8/26/82, RF10–30

On March 10, 1982, the Office of Hearings and Appeals issued a Decision and Order implementing special refund procedures with respect to a $3 million fund obtained by the DOE through a consent order with Pennzoil Company. *See Office of Special Counsel (Pennzoil),* 9 DOE ¶ 82,545 (1982). The March 10 Decision stated that the DOE would accept applications for refund filed by purchasers of Pennzoil's covered products during the period March 6, 1973 through December 31, 1980. The August 26 Decision addresses the request for refund filed by System Fuels, Inc. (SFI) on behalf of its related four electric utility operating companies that are regulated by state utility regulatory agencies. In considering SFI's claim for refund, the DOE determined that the firm was eligible for a portion of the Pennzoil consent order funds and that the refund should be paid directly to its operating companies in proportion to the percentage of each operating company's share of fuel oil purchased from SFI. Accordingly, the DOE concluded that SFI's application be granted.

Tenneco Oil Co./Mid-Continent Systems, Inc., 8/23/82, RF7–70

Mid-Continent Systems, Inc. (MCS) filed an Application for Refund pursuant to 10 C.F.R. § 205.283 for a portion of the fund obtained by the DOE through a consent order entered into with the Tenneco Oil Company. MCS is an independent reseller-retailer of petroleum products that purchased motor gasoline and diesel fuel from Tenneco during the period covered by the consent order. In analyzing the MCS application, the DOE found that MCS had a great deal of discretion in determining how much product it purchased from Tenneco, because MCS had many suppliers in addition to Tenneco and because Tenneco only furnished a small proportion of MCS's total motor gasoline and diesel fuel supplies. The DOE thus determined that MCS should only be permitted refunds for purchases it made from Tenneco at prices above market average prices during months in which it banked costs. Accordingly, the DOE concluded that MCS was entitled to a refund of $4,190 plus .065804 percent of the accrued interest in the Tenneco escrow account.

Tenneco Oil Company/Midway Enterprises, Inc., 8/23/82, RF7–43

Midway Enterprises (Midway) filed an Application for Refund seeking a portion of a fund obtained by the DOE through a consent order entered into by the agency and the Tenneco Oil Company. In considering its application, the DOE found that Midway had not submitted the required information demonstrating that it maintained banks of unrecovered product costs during the period covered by the consent order. The DOE also found that Midway had not submitted any evidence to substantiate its claim for a refund based upon alleged allocation violations by Tenneco. However, the DOE found that Midway had satisfied the requirements set forth in the *Tenneco* Decision that would allow it to receive a refund at the threshold level of 600,000 gallons annually per covered product. Accordingly, Midway's Application for Refund was granted in part.

Application For Refund

Tenneco Oil Co./Research Fuels, Inc., 8/27/82, RF7–56

Research Fuels, Inc. filed an Application for Refund in which it sought a portion of the settlement fund obtained by the DOE through a consent order entered into by the agency and Tenneco Oil Company. In its Application, RFI stated that Tenneco failed to supply RFI with its motor gasoline allocation during 1979. RFI alleged that it had suffered considerable injury due to lost profits from the motor gasoline that it was unable to market and due to the closing of ten of RFI's outlets. The DOE determined that RFI's claim was meritorious but that the firm's calculations of its inury were somewhat excessive. After examining the equitable factors in the case, the DOE concluded that RFI should be allotted $193,509.31 from the settlement fund along with a portion of the interest that had accrued on the fund.

Dismissals

The following submissions were dismissed without prejudice:

Name and Case No.

Ginsburg, Feldman, Weil, & Bress, HES–0035, HER–0035
Intercontinental Oil Co., BER–0109

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 111, New Post Office Building, 12th and Pennsylvania Ave., N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines,* a commercially published loose leaf reporter system.

Dated: September 23, 1982.

Director, Office of Hearings and Appeals.

Appeal

State of Maryland, 8/30/82, HEA-0005

The State of Maryland filed an Appeal from a decision issued by the Philadelphia Support Office of the DOE. In that decision, the DOE denied Maryland's request for authorization to use funds allocated to the State for energy conservation grants for local governments and public care institutions to defray administrative costs related to energy conservation programs for schools and hospitals. In considering the Appeal, the DOE found that Maryland did not claim, nor did it present arguments to support a claim, that the decision of the Philadelphia Support Office was erroneous in fact or law, or that it was arbitary or capricious. Accordingly, the Appeal was denied.

Request for Exception

Placid Refining Co., 8/30/82, BEE-1270

On July 3, 1980, Placid Refining Company filed with the Office of Hearings and Appeals an Application for Exception. In that Application, the firm requested that its small refiner bias entitlements for the period June 1979 through September 1979 be recalculated on a refinery-by-refinery basis, instead of a firm-wide basis. The firm stated that although the amended SRB provision, effective June 1, 1979, required the refinery-by-refinery calculation for SRB benefits, the ERA treated the firm's two refineries as one in calculating the firm's SRB benefits prior to October 1979, because the capacity certification for one of the firm's refineries was not completed. The OHA found that prior to the amendment of the SRB provision, Placid had filed an Application for Exception, in which it requested a separate calculation of the SRB benefits for its newly built refinery. Placid subsequently withdrew that request only because the firm believed that the ERA's adoption of the refinery-by-refinery calculation would have alleviated the adverse impact from which the firm sought relief, and therefore made its request moot. The OHA reasoned that since the new calculation method was not applied to Placid before its newly constructed refinery was certified, the regulatory effect was not removed, and Placid's pevious exception relief should be reconsidered. The OHA concluded that the reduction in Placid's SRB benefits due to the use of the firm-wide calculation method represented a gross inequity experienced by Placid. The OHA therefore granted the firm's exception request.

Motions for Discovery

Gary Energy Corporation, 9/3/82, BRD-1344; BRH-1344

Gary Energy Corporation filed Motions for Discovery and Evidentiary Hearing in connection with its Statement of Objections to a Proposed Remedial Order issued to the firm on November 12, 1980. In its Motions, the firm sought the production of certain DOE documents and the presentation of oral testimony of certain Gary employees and present and former DOE officials. In considering these requests, the DOE rejected Gary's arguments (1) that discovery was necessary to explore the DOE's contemporaneous constructions of regulations governing the pricing of condensate; (2) that discovery was warranted to verify Gary's claim that it relied upon erroneous advice of DOE employees; and (3) that an evidentiary hearing was warranted to establish the feasibility of allocating Gary's condensate production to the individual leases from which it was derived. On the basis of these considerations, Gary's Motions for Discovery and Evidentiary Hearing were denied.

Gulf Oil Corporation, 8/30/82, HRD-0050

Gulf Oil Corporation filed a Motion to compel Answers to Deferred Interrogatories in connection with its objections to a Proposed Remedial Order (PRO) issued to it by the Office of Special Consel for Compliance (OSC) on May 1, 1979. In that motion, Gulf sought to compel OSC to respond to discovery requests Gulf had filed on August 7, 1979, the consideration of which had been deferred pursuant to stipulations between the parties. The great majority of the deferred interrogatories sought further contemporaneous construction or administrative record discovery of the type Gulf was granted in *Atlantic Richfield Co.*, 5 DOE ¶82,521 (*Acro I*). The DOE concluded that these interrogatories should be denied because they either sought discovery denied in *Arco I*, or to the extent they sought discovery granted in *Arco I*, OSC had already produced responsive documents to Gulf or had claimed them to be privileged and interrogatory-specific responses were not required. A second category of deferred interrogatories asked OSC to identify agency personnel who drafted, edited, and approved certain portions of the regulations and rulings pertinent to the Gulf PRO proceeding. These requests were denied on the grounds they sought irrelevant information. A third category of deferred interrogatories sought information on matters not discussed in the *Arco I* decision. The interrogatories in this category which were determined to seek relevant information were granted. The final group of deferred interrogatories were a series of interrogatories OSC had agreed to answer, to which OSC was ordered to respond by a specific date. Accordingly, the Gulf motion was granted in part.

Keystone Fuel Oil Company, 9/2/82, BRD-1166; BRH-1166

Keystone Fuel Oil Company filed a Motion for Discovery and a Motion for Evidentiary Hearing in conjunction with an enforcement proceeding pending against the firm involving alleged overcharges in the sale of No. 2 fuel oil. In its Motion for Discovery, the firm sought information related to (1) prior audits of the firm conducted by predecessor agenices of the DOE; (2) investigations conducted by those agencies (3) congressional hearings wherein legislators allegedly pressured DOE officials into bringing the enforcement proceeding against the firm; (4) the ERA's modification of the PRO to effect a substitution of the declarant "primarily knowledgeable" about the facts of the case; and (5) the ERA's use of particular computer-printed material in calculating the firm's May 15, 1973 selling price. In its Motion for Evidentiary Hearing, Keystone asserted that a hearing should be held with regard to (1) the audit performed by the ERA and past agencies; (2) the facts surrounding the barge-lot sale of No. 2 fuel oil to customers that Keystone claims should be treated as ultimate consumers which form a separate class of purchaser pursuant to 6 C.F.R § 150.361(a)(2) and 10 C.F.R. § 212.111(a)(2); and (3) the firm's contentions of bias and harassment on the part of agency officials. The DOE granted limited discovery with regard to the calculation of the firm's May 15, 1973 cost of product in inventory but denied the remaining discovery requests, predominantly because of lack of relevance. The requests for an evidentiary hearing were also denied in some instances because of lack of relevance but also in large part because of the firm's failure to specify alternative findings pursuant to 10 C.F.R. § 205.199(b).

Interlocutory Order

Crown Central Petroleum Corporation, 9/2/82, HRZ-0077

Crown Central Petroleum Corporation (Crown) filed a Motion to Compel Discovery and the Office of Special Counsel for Compliance (OSC) filed a Motion in Limine with the Office of Hearings and Appeals. Both motions related to Crown's objections to a Proposed Remedial Order OSC issued to the firm on August 31, 1978.

In its Motion to Compel, Crown contended that OSC had failed to comply with the discovery order in *Crown Central Petroleum Corp.*, 9 DOE ¶ 84,020 (1982). The DOE determined that OSC had failed to provide a complete response to one of Crown's interrogatories that OSC had been ordered to answer, but that its response was not otherwise defective. Accordingly, the Crown motion was granted in part.

In its Motion in Limine, OSC requested issuance of an order striking from the record each reference in Crown's pleading to consent orders between the DOE and other firms and precluding Crown from making any further references to such consent orders. The DOE determined that OSC would not be prejudiced by the retention of material in the administrative record dealing with consent

orders. Accordingly, the OSC motion was denied.

Dismissals

The following submissions were dismissed without prejudice:

Name and Case No.

Brown, George R. DRO–0266
Johnny Paxton, HFA–0077
Simon Oil Co., BRO–1429.

Southwestern Power Administration

Proposed System Power Rates; Opportunities for Public Review and Comment

AGENCY: Southwestern Power Administration (SWPA), DOE.

ACTION: Notice of Proposed System Power Rates and Opportunities for Public Review and Comment.

SUMMARY: The Administrator, SWPA, has made a current power repayment study and a revised power repayment study showing the need for a $24,734,000 increase in annual revenues to meet cost recovery criteria for the integrated system projects. He has also developed proposed system rate schedules, supported by a rate design study, to recover the required revenues. The proposed rates would increase annual revenues 37.9 percent, from $65,204,600 to $89,938,600. Opportunities will be presented for the customers and other interested persons to receive copies of the studies, to participate in a public information forum and a public comment forum, and to submit written comments. Following review of the oral and written comments and other information received, the Assistant Secretary for Conservation and Renewable Energy will announce a decision on the proposed rates and transmit the rate studies in support of the proposed rates to the Federal Energy Regulatory Commission (FERC) for final confirmation and approval. The FERC will allow the public an opportunity to comment on the proposed rates before making a final decision.

DATES: The Public Information Forum will be held October 26, 1982, in Tulsa, Oklahoma. The Public Comment Forum will be held December 1, 1982, in Tulsa, Oklahoma. Written comments on the proposed rates are due on or before December 29, 1982.

ADDRESSES: Five copies of the written comments should be submitted to the Administrator, Southwestern Power Administration, U.S. Department of Energy, P.O. Box 1619, Tulsa, Oklahoma 74101. Five copies should also be submitted to the Assistant Secretary for Conservation and Renewable Energy, U.S. Department of Energy, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. The public forums will be at 9:30 a.m., in the Aaronson Auditorium, City County Library, 400 Civic Center, Tulsa, Oklahoma.

FOR FURTHER INFORMATION CONTACT:

Mr. Walter M. Bowers, Chief, Division of Power Marketing, Southwestern Power Administration, Department of Energy, P.O. Box 1619, Tulsa, Oklahoma 74101, (918) 581–7529.

Mr. John J. DiNucci, Office of Power Marketing Coordination, Conservation and Renewable Energy, Department of Energy, 12th Street and Pennsylvania Avenue NW., Washington, D.C. 20461, (202) 633–8380.

SUPPLEMENTARY INFORMATION: The U.S. Department of Energy was created by an Act of the U.S. Congress, Department of Energy Organization Act, Pub. L. 95–91, dated August 4, 1977, and SWPA's power marketing activities were transferred from the Department of the Interior to the Department of Energy, effective October 1, 1977.

SWPA markets power from 22 multiple-purpose reservior projects with power facilities constructed and operated by the U.S. Corps of Engineers. By 1984, one additional project presently under construction (Clarence Cannon) will be completed, bringing the total to 23 projects with 2.1 million kilowatts of power for which SWPA will have marketing responsibility. These projects are located in the States of Arkansas, Missouri, Oklahoma, and Texas. SWPA's marketing area includes these States plus Kansas and Louisiana.

One project (Sam Rayburn) is isolated hydraulically and electrically from SWPA's transmission system and is marketed under a contract through which the customer purchases the entire power output of the project at the dam. A separate power repayment study is prepared for the project which has a special rate that does not affect this proposal. The 22 projects to which the proposed rate schedules apply are interconnected through SWPA's transmission system and exchange agreements with other utilities.

Following departmental guidelines, the Administrator, SWPA, prepared a current power repayment study using the existing rates for the intergrated system projects. This study shows that the legal requirement to repay the power investment with interest is not being met. A revised power repayment study was then made which shows that additional annual revenues of $24,734,000 (a 37.9 percent increase) are needed. A rate design study has also been completed which allocates the revenue requirement to the various system rate schedules for recovery. Copies of the power repayment studies and rate design study will be mailed to SWPA's customers and others who have expressed an interest. The proposed increase would change annual revenues produced by the integrated system projects from $65,204,600 to $89,938,600, and satisfy the present financial criteria for repayment of the projects within the required number of years. Below is a comparison of the existing rates and proposed rates:

BILLING CODE 6450–01–M

Rate Schedule P-3

	Existing	Proposed	
		Before Cannon	After Cannon
Capacity:	@ 138-161 kV $1.40/kW/mo.	$2.18/kW/mo.	$2.22/kW/mo.
	@ 69 kV + .20 kW/mo.	+ .20/kW/mo.	+ .20/kW/mo.
	@ Load Center or less than 69 kV + .55/kW/mo.	+ .70/kW/mo.	+ .70/kW/mo.
Energy:	$.0035 for first 1200 kWh/kW/yr. $.007 for kWh in excess of first 1200 kWh/kW/yr.	All energy $.0035/kWh + Actual purchased energy costs recovered directly from customers. The determination of each customer's share of such costs shall be made on a proportionate basis weighted in accordance with the number of kWh used per kW and recognizing higher load factor loads are responsible for a greater share of the need for purchased energy.	
	$.0035/kWh of Supplemental Peaking Energy	$.0035/kWh of Supplemental Peaking Energy	

Rate Schedule F-2

	Existing	Proposed	
		Before Cannon	After Cannon
Capacity:	@ 138-161 kV $1.40/kW/mo.	$2.18/kW/mo.	$2.22/kW/mo.
	@ 69 kV + .20/kW/mo.	+ .20/kW/mo.	+ .20/kW/mo.
	@ Load Center or less than 69 kV + .55/kW/mo.	+ .70/kW/mo.	+ .70/kW/mo.
Energy:	$.0035 for first 100 kWh/kW/mo. of Firm Billing Demand $.007 for next 340 kWh/kW/mo. of Firm Billing Demand $.014 for energy in excess of first 440 kWh/kW/mo. of Firm Billing Demand	All energy $.0035/kWh + Actual purchased energy costs recovered directly from customers. The determination of each customer's share of such costs shall be made on a proportionate basis weighted in accordance with the number of kWh used per kW and recognizing higher load factor loads are responsible for a greater share of the need for purchased energy.	

Rate Schedule F-3

	Existing	Proposed	
		Before Cannon	After Cannon
Capacity:	$1.95/kW/mo. of Billing Demand	$2.88/kW/mo.	$2.92/kW/mo.
Energy:	$.0035 per kWh for federally-generated firm energy + Actual cost of thermal-generated energy purchased from the company specifically for the customer.	All federally-generated firm energy $.0035/kWh + Actual cost of thermal-generated energy purchased from the company specifically for the customer + Actual purchased energy costs to support the federally-generated energy recovered directly from customers. The determination of each customer's share of such costs shall be made on a proportionate basis weighted in accordance with the number of kWh used per kW and recognizing higher load factor loads are responsible for a greater share of the need for purchased energy.	

Rate Schedule EE-2

	Existing	Proposed
Energy:	$.003/kWh	$.0035/kWh

Rate Schedule IC-2

	Existing	Proposed
Capacity:	$.05/kW/day of Interruptible Billing Demand	$.075/kW/day of Interruptible Billing Demand
Energy:	$.0035/kWh	$.0035/kWh

BILLING CODE 6450-01-C

A Public Information Forum will be held October 26, 1982, in the Aaronson Auditorium, City County Library, 400 Civic Center, Tulsa, Oklahoma, at 9:30 a.m., to explain to the public the proposed rates and supporting studies. Questions may be submitted from interested persons. The forum will be conducted by a chairman who will be responsible for orderly forum procedure. Questions raised at the forum concerning the rates and studies will be answered, to the extent possible, at the forum. Questions not answered at the forum will be answered in writing, except that questions that involve voluminous data contained in SWPA's records may best be answered by consultation and review of pertinent records at SWPA's offices.

A Public Comment Forum will be held December 1, 1982, at the same time and location established for the Public Information Forum. At the Public Comment Forum, interested persons may submit written comments or make oral presentations of their views and comments. The forum will be conducted by a chairman who will be responsible for orderly procedure. SWPA's representatives will be present, and they and the chairman may ask questions of the speakers. Persons interested in speaking should submit a request to the Administrator, SWPA, at least three (3) days before the forum so that a list of speakers can be developed. The chairman may allow others to speak if time permits.

A transcript of each forum will be made. Copies of the transcripts may be obtained from the transcribing service. Copies of all documents introduced will be available from SWPA upon request for a fee. Written comments on the proposed rates are due on or before December 29, 1982. Five copies of the written comments should be submitted to the Administrator, Southwestern Power Administration, U.S. Department of Energy, P.O. Box 1619, Tulsa, Oklahoma 74101. Five copies should also be submitted to the Assistant Secretary for Conservation and Renewable Energy, U.S. Department of Energy, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Following review of the oral and written comments and the information gathered in the course of the proceedings, the Assistant Secretary for Conservation and Renewable Energy will announce a decision on the proposed rates and transmit the rate studies in support of the proposed rates to the FERC for final confirmation and approval. The FERC will allow the public an opportunity to make written comments on the proposal before making a final decision.

Issued in Tulsa, Oklahoma, September 24, 1982.

Richard B. Risk, Jr.,

Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS 140017; TSH-FRL 2218-8]

American Management Systems, Inc. and Versar, Inc.; Transfer of Data to Contractor and Subcontractor

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has contracted with American Management Systems, Inc. (AMS), (primary contractor) and Versar, Inc., (subcontractor) to review and analyze information reported under section 8(b) of the Toxic Substances Control Act (TSCA) for purposes of predicting potential exposures to toxic substances. Some of the materials which AMS and Versar, Inc., will review will contain confidential business information.

DATE: The transfer of data submitted under the Act and claimed to be confidential will occur no sooner than 10 working days after publication of this notice in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Douglas G. Bannerman, Acting Director, Industry Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-509, 401 M St. SW., Washington, D.C. 20460, Toll-free: (800-424-9065). In Washington, D.C.: (554-1404).

SUPPLEMENTARY INFORMATION: EPA will be evaluating the potential and magnitude of possible exposures to toxic substances. To accomplish this, EPA will require the assistance of outside experts. It has selected American Management Systems, Inc. (AMS), of Arlington, Virginia and Versar, Inc. (Versar), of Springfield, Virginia to perform analyses of the information which may be helpful to EPA in this evaluation. (Contract No. 68-01-5146).

AMS and Versar will examine the information obtained from the Inventory of Chemical Substances (section 8(b) of TSCA) to identify possible exposure situations. Pursuant to 40 CFR 2.306(j), EPA has determined that it will need to disclose confidential business information to AMS and Versar. If any information is claimed to be confidential, reports prepared by AMS and Versar dealing with this confidential business information will be treated as confidential. After evaluating the information obtained, AMS and Versar will return the information and any reports they prepare to EPA.

Under the EPA "Contractor Requirements for the Control and Security of TSCA Confidential Business Information Security Manual," AMS and Versar will be authorized to have access to this information. EPA has approved Versar's security plan and has conducted the required inspection of Versar facilities and found them to be in compliance for the control and security of TSCA confidential business information. AMS will have access to confidential business information only at EPA facilities.

Since AMS and Versar will review information claimed to be confidential, EPA is publishing this notice to inform all submitters of information listed under section 8(b) of TSCA that this contractor and subcontractor will have access to confidential business information from EPA.

Pursuant to the EPA manual "Contractor Requirements for the Control and Security of TSCA Confidential Business Information," AMS and Versar are legally required to safeguard this information form any unauthorized disclosure. AMS and Versar personnel will be required to sign a nondisclosure agreement and be briefed on appropriate security procedures before they are permitted access to such information.

Dated: September 8, 1982.

Don R. Clay,

Director, Office of Toxic Substances.

BILLING CODE 6560-50-M

[OPTS-59102, TSH-FRL 2218-6]

Certain Chemicals; Premanufacture Exemption Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which

must either be approved or denied within 45 days of receipt, are discussed in EPA's revised statement of interim policy published in the **Federal Register** of November 7, 1980 (45 FR 74378). This notice, issued under section 5(h)(6) of TSCA, announces receipt of four applications for exemptions, provides a summary, and requests comments on the appropriateness of granting each of the exemptions.

DATE: Written comments by: October 15, 1982.

ADDRESS: Written comments, identified by the document control number "[OPTS–59102]" and the specific TME number should be sent to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Management Support Division, Environmental Protection Agency, Rm. E–401, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: David Dull, Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M Street SW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TMEs received by EPA. The complete non-confidential document is available in the Public Reading Room E–107.

TME 82–51

Close of Review Period. November 3, 1982.
Importer. Confidential.
Chemical. (G) Substituted alkyl cyclic amine.
Use/Import. (G) Plastic additive. Import range: 1 yr-4,000 lbs.
Toxicity Data. Acute oral: >5,000 mg/kg.
Exposure. Manufacture and processing: dermal and inhalation, 10–12 workers; use: maximum of 18 workers could have dermal or inhalation exposure.
Environmental Release/Disposal. No data submitted.

TME 82–52

Close of Review Period. November 4, 1982.
Manufacturer. Confidential.
Chemical. (G) Polyester from an alkanedioic acid, carbomonocyclic anhydride and substituted alkane diols.
Use/Production. (G) Open use that will release more than 50 but less than 500 kg to the environment. Prod. range: 1 yr: 1,000–4,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal and eye, a total of 27 workers, up to 6 hrs/da, up to 3 da/yr; processing: a maximum of 15 workers may have dermal and eye irritation, up to 4 hrs/da, up to 4 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 10–100 kg/yr to land. Disposal by incineration and approved landfill.

TME 82–53

Close of Review Period. November 4, 1982.
Manufacturer. Confidential.
Chemcial. (G) Halogenated ketone.
Use/Production. (G) Ingredient for composite product. Prod. range: Confidential.
Toxicity Data. Acute oral: Low toxicity; Eye irritation: Mild to slight irritant; Ames Test: Not mutagenic; Skin sensitization: Slight irritation.
Exposure. Manufacture and processing; dermal and inhalation.
Environmental Release/Disposal. Release to air. Disposal by landfill.

TME 82–54

Close of Review Period. November 4, 1982.
Manufacturer. Confidential.
Chemical. (G) Halogenated hydrocarbon.
Use/Production. (G) Ingredient for composite product. Prod. range: Confidential.
Toxicity Data. Acute oral: Low toxicity; Eye irritation: Persistent irritant; Ames Test: Not mutagenic; Skin sensitization: Not an irritant.
Exposure. Manufacture and processing: dermal and inhalation.
Environmental Release/Disposal. Release to air. Disposal by landfill.

Dated: September 23, 1982.

V. Paul Fuschini,

Acting Director, Management Support Division.

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of fifteen PMNs and provides a summary of each.

DATES: CLOSE OF REVIEW PERIOD:

PMN 82–675, 82–676, 82–677, & 82–678—December 15, 1982
PMN 82–679 & 82–680—December 18, 1982
PMN 82–681, 82–682, 82–683, 82–684, 82–685, 82–686, 82–687 & 82–688—December 19, 1982
PMN 82–689—December 20, 1982

Written comments by:

PMN 82–675, 82–676, 82–677 & 82–678—November 15, 1982
PMN 82–679 & 82–680—November 18, 1982
PMN 82–681, 82–682, 82–683, 82–684, 82–685, 82–686, 82–687 & 82–688—November 19, 1982
PMN 82–689—November 20, 1982

ADDRESS: Written comments, identified by the document control number "[OPTS–51433]" and the specific PMN number should be sent to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M St., SW., Washington, DC 20460, (202–382–3532).

FOR FURTHER INFORMATION CONTACT: David Dull, Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M ST., SW., Washington, DC 20460 (202–382–3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E–107.

PMN 82–675

Manufacturer. Uniroyal, Inc.
Chemical. (G) Isocyanate terminated polyester-ether polyurethane prepolymer.
Use/Production. (S) Molded goods applications. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 4 workers, up to 8 hrs/da, up to 100 da/yr.
Environmental Release/Disposal. No release. Disposal by approved landfill.

PMN 82-676

Importer. Confidential.
Chemical. (G) Heterocyclic, aromatic methane.
Use/Import. (S) Pigment additive. Import range: 150–5,000 kg/yr.
Toxicity Data. Acute oral: >5 g/kg; Acute dermal: 700–2,000 mg/kg; Skin irritation: Non-irritant; Eye irritation: Non-irritant.
Exposure. Processing: dermal and inhalation.
Environmental Release/Disposal. No data submitted.

PMN 82-677

Importer. Confidential.
Chemical. (G) Chromium complex of a substituted phenolazophenylpyrazolone.
Use/Import. (S) Leather and paper dye. Import range: Confidential.
Toxicity Data. Acute oral: >5 g/kg; Skin irritation: Non-irritant; Eye irritation: Moderate irritant.
Exposure. Processing, use and disposal: dermal, a total of 6 workers, up to 2 hrs/da, up to 100 da/yr.
Environmental Release/Disposal. 10–100 kg/yr released to water. Disposal by publicly owned treatment works (POTW), incineration and approval landfill.

PMN 82-678

Importer. Confidential
Chemical. (G) Chlorinated aromatic azo anthraquinone pigment.
Use/Import. (S) Pigment for coatings. Import range: 2,400–64,000 kg/yr.
Toxicity Data. Acute oral: >5,000 mg/kg; Acute dermal; >2,000 mg/kg; Skin irritation: Non-irritant; Eye irritation: Non-irritant; Inhalation LC_{50}: >21.2 mg/1; Ames Test: Non-mutagenic.
Exposure. Processing and use: dermal and inhalation.
Environmental Release/Disposal. No data submitted.

PMN 82-679

Importer. Confidential.
Chemical. (G) Chlorinated aromatic azo pigment.
Use/Import. (S) Pigment for coatings. Import range: 2,400–64,000 kg/yr.
Toxicity Data. Acute oral: >5,000 mg/kg; Acute dermal: >2,000 mg/kg; Skin irritation: Non-irritant; Eye irritation: Non-irritant; Ames Test: Non-mutagenic.
Exposure. Processing and use: dermal and inhalation.
Environmental Release/Disposal. No data submitted.

PMN 82-680

Importer. Confidential.
Chemical. (S) 2-propenoic acid, 2-hydroxyethyl ester, polymer with 2-ethyl-2-(hydroxymethyl)-1,3-propanediol, -hydro-w-hydroxypoly(oxy-1,2-ethanediyl), 5-isocyanato-1-(isocyanatomethyl)-1,3,3-trimethycyclohexane and 2 oxepanone.
Use/Import. (G) Ingredient in coating formulations. Prod. range: Confidential.
Toxicity Data. Skin irritation: Severe irritant.
Exposure. Manufacture and processing: dermal, a total of 4 workers, up to 12 hrs/batch.
Environmental Release/Disposal. Disposal by incineration and landfill.

PMN 82-681

Importer. Confidential.
Chemical. (G) Chromium complex of a sulfonaphthylazophenylpyrazolone.
Use/Import. (S) Industrial dye for leather and paper. Import range: Confidential.
Toxicity Data. Skin irritation: Non-irritant; Eye irritation: Moderate irritant; Biodegradation (Static test, metric method): 50–100%.
Exposure. Processing, use and disposal: dermal, a total of 6 workers, up to 2 hrs/da, up to 100 da/yr.
Environmental Release/Disposal. Up to 50 kg/yr maximum released to water 2 hrs/da, 100 da/yr. Disposal by POTW, incineration and approved landfill.

PMN 82-682

Importer. Confidential.
Chemical. (G) Polyester from an alkanedioic acid, carbomonocyclic anhydride and substituted alkane diols.
Use/Import. (G) Open use. Prod. range: 10,000–50,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing and use: dermal, inhalation and eye, a total of 139 workers, up to 8 hrs/da, up to 200 da/yr.
Environmental Release/Disposal. Less than 10 kg/hr released to air and water with more than 10,000 kg/yr to land. Disposal by incineration.

PMN 82-683

Manufacturer. Confidential.
Chemical. (G) Halogenated ketone.
Use/Production. (G) Ingredient for composite product. Prod. range: Confidential.
Toxicity Data. Acute oral: 3,400 mg/kg; Skin irritation: Slight irritant; Eye irritation: Slight irritant; Ames Test: Non-mutagenic.
Exposure. Manufacture and processing: dermal and inhalation.
Environmental Release/Disposal. Release to air. Disposal by approved landfill.

PMN 82-684

Manufacturer. Confidential.
Chemical. (G) Halogenate hydrocarbon.
Use/Production. (G) Ingredient for composite product. Prod. range: Confidential.
Toxicity Data. Acute oral: 7,500 mg/kg; Skin irritation: Non-irritant; Eye irritation: Moderate irritant; Ames Test: Non-mutagenic.
Exposure. Manufacture: dermal and inhalation.
Environmental Release/Disposal. Release to air. Disposal by approved landfill.

PMN 82-685

Manufacturer. Ansul Specialty.
Chemical. (G) Diethylene glycol ether.
Use/Production. (S) Inert solvent for chemical reactions. Prod. range: Confidential.
Toxicity Data. Acute oral: 5,000 mg/kg; Acute dermal: 7.07 ml/kg; Skin irritation: Not a primary irritant; Eye irritation: Not a primary irritant; Ames Test: Non-mutagenic.
Exposure. Manufacture: dermal and inhalation, a total of 11 workers, up to 4 hrs/da, up to 50 da/yr.
Environmental Release/Disposal. 100–1,000 kg/yr released to water and land. Disposal by POTW.

PMN 82-686

Manufacturer. Confidential.
Chemical. (G) Disubstituted-1-naphthol.
Use/Production. (G) Minor constituent in an article for commercial and consumer use. Prod. range: 100–200 kg/yr.
Toxicity Data. Acute oral: >3,000 mg/kg; Acute dermal: & 1,000 mg/kg; Skin irritation: Slight irritant; Eye irritation: Non-irritant; Skin sensitization: Moderate; Acute aquatic effects LC_{50}: >0.9 mg/L; Secondary waste treatment compatibility: >0.125 mg/L.
Exposure. Manufacture and processing: dermal and inhalation, a total of 10 workers, up to 2 hrs/da, up to 10 da/yr.
Environmental Release/Disposal. No release. Disposal by biological treatment system, incineration and landfill.

PMN 82-687

Manufacturer. The Kendall Company.
Chemical. (G) Methacrylate copolymer.
Use/Production. (S) General purpose adhesive tapes. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing and use: dermal and inhalation, a total of 11 workers, up to 8 hrs/da, up to 50 da/yr.
Environmental Release/Disposal. No release.

PMN 82-688

Manufacturer. The Kendall Company.

Chemical. (G) Acrylate copolymer solution.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. Skin irritation: Slight irritant.

Exposure. Manufacture, processing and use: a total of 11 workers, up to 8 hrs/da, up to 100 da/yr.

Environmental Release/Disposal. No release.

PMN 82-689

Manufacturer. Exxon Chemical Americas.

Chemical. (G) Alkyl amino ethoxy ethanol.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. Acute oral: 1.7130 g/kg; Skin irritation: Severe irritant; Eye irritation: Severe irritant; Ames Test: Non-mutagenic

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

Dated: September 23, 1982.

Hazardous Waste Management System; Infectious Waste Management

AGENCY: Environmental Protection Agency.

ACTION: Notice of Availability of information manual.

SUMMARY: The Environmental Protection Agency (EPA) announces the availability of an information manual entitled "Draft Manual for Infectious Waste Management." This manual identifies those infectious wastes which the Agency believes require special management, and presents a number of environmentally acceptable techniques for packaging, transport, treatment, storage, and disposal of infectious waste. EPA is publishing the manual because the Agency has received many requests for guidance on infectious waste management over the past several years, and because the Agency has sought and accumulated much information on infectious waste management since publishing a proposed rule in the **Federal Register** on December 18, 1978. EPA welcomes comments on the usefulness of this document, and any suggestions for changes or revisions.

DATES: The Agency will accept public comment on the information manual until April 6, 1982.

ADDRESSES: The information manual, "Draft Manual for Infectious Waste Management," GPO stock number 055-000-00273-1, is available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 783-3238. The manual is immediately available for reading in all EPA libraries and in the EPA docket at the address listed below.

Comments on the manual are welcome and may be mailed to the Docket Clerk, (Docket No. 3001/3004, Infectious Waste Management), Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460

Comments received by EPA may be inspected in Room S-269, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C., from 9:00 a.m. to 4:00 p.m. Monday through Friday, except on legal holidays.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, at (800) 424-9346 (toll free), or at (202) 382-3000. For technical information contact Claire Welty at (202) 755-9187 or (202) 382-4806.

Dated: September 17, 1982.

Rita M. Lavelle,

Assistant Administrator for Solid Waste and Emergency Response.

Premanufacture Notices; Monthly Status Report for August 1982

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substances Control Act (TSCA) requires EPA to issue a list in the **Federal Register** at the beginning of each month reporting the premanufacture notices (PMNs) pending before the Agency and the PMNs for which the review period has expired since publication of the last monthly summary. This is the report for August 1982.

DATE: Written comments are due no later than 30 days before the applicable notice review period ends on the specific chemical substance. Nonconfidential portions of the PMNs may be seen in Rm. E-106 at the address below between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

ADDRESS: Written comments are to be identified with the document control number "[OPTS-53041]" and the specific PMN number should be sent to: Document Control Officer (TS-793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M Street, SW., Washington, DC 20460, (202-382-3532).

FOR FURTHER INFORMATION CONTACT: Kirk Maconaughey, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-208, 401 M Street, SW., Washington, DC 20460, (202-382-3746).

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during August; (b) PMNs received previously and still under review at the end of August; (c) PMNs for which the notice review period has ended during August; (d) chemical substances for which EPA has received a notice of commencement to manufacture during August; and (e) PMNs for which the review period has been suspended. Therefore, the August 1982 PMN Status Report is being published.

Dated: September 22, 1982.

V. Paul Fuschini,

Acting Director, Management Support Division.

Premanufacture Notices Monthly Status Report, August 1982

I. 110 Premanufacture Notices Received During the Month

PMN No.	Identity and generic name	FR citation	Expiration date
82-156	Methyl-[trifluoromethyl-poly-(oxy-difluoromethylene)-poly-[oxy-2-(trifluoromethyl)-trifluoroethylene]oxy]-difluoromethyl carboxylate.	47 FR 39241 (9/7/82)	Nov. 21, 1982.
82-157	Trifluoromethyl-poly-(oxydifluoro-methylene)-poly-[oxy-2-(trifluoromethyl)-trifluoro-ethylene]oxy-difluoromethyl carboxylic acid.	47 FR 39241 (9/7/82)	Do.

I. 110 PREMANUFACTURE NOTICES RECEIVED DURING THE MONTH—Continued

PMN No.	Identity and generic name	FR citation	Expiration date
82-158	2-(trifluoromethyl-poly-(oxy-difluoro-methylene)-poly-[oxy-2-(trifluoromethyl)-tri-fluoro-ethylene]oxy}2,2 difluoroethanol.	47 FR 39241 (9/7/82)	Do.
82-159	*Aryl*-[*aryl*-oxycarbonyl difluoromethyl-poly-(oxy-difluoromethylene)-poly-(oxydifluoromethylene)-poly-(oxytetrafluoro ethylene) oxy]-difluoro-methyl carboxylate.	47 FR 39242 (9/7/82)	Do.
82-160	Methyl[methyloxycarbonyl difluoromethyl-poly-(oxydifluoromethylene)-poly-(oxy tetrafluoro ethylene)oxy]-difluoromethyl carboxylate.	47 FR 39242 (9/7/82)	Do.
82-161	2-(cyano difluoromethyl-poly-(oxydifluoro-methylene)-poly-(oxytetrafluoroethylene)-oxy] 2,2-difluoroacetonitrile.	47 FR 39242 (9/7/82)	Do.
82-162	2-[2,2-difluorohydroxyethyl-poly-(oxy-difluoro-methylene)-poly-(oxy trifluoroethylene) oxy]-2, 2-di-fluoroethanol.	47 FR 39242 (9/7/82)	Do.
82-163	2-[2, 2-difluoroaminoethyl-poly-(oxydifluoro-methylene)-poly-(oxytetrafluoroethylene)oxy] 2,2-di-fluoro-ethylamine.	47 FR 39242 (9/7/82)	Do.
82-164	2-{1-[N-m-isocyanato-O-(p)-tolyl)carbamyl] 2,2-difluoroethyl-poly-(oxydifluoroethylene)-poly-tetra-fluoro-ethylene)oxy)2,2-difluoroethyl-N-(m-isocyanato-o-(p)-tolyl)-carbamate.	47 FR 39242 (9/7/82)	Do.
82-165	1[isocyanato-2,2-difluoroethyl-poly-oxydifluoro-methylene)-poly-(oxytetrafluoroethylene)oxy]-2,2-difluoroethyl isocyanate.	47 FR 39242 (9/7/82)	Do.
82-535	Generic name: Modified polymer of styrene and substituted alkyl methacrylates	47 FR 35333 (8/13/82)	Oct. 31, 1982.
82-539	Generic name: Terephthalate polyester transe-sterification product with dialkylene glycols and glycerine.	47 FR 35333 (8/13/82)	Do.
82-540	Polymer of butyl 2-methyl-2-propenoate, ethenyl benzene, N-[(2-methylproproxy)methyl]-2-propen-amide.	47 FR 35333 (8/13/82)	Do.
82-541	Generic name: Fumarated rosin ester	47 FR 35333 (8/13/82)	Nov. 1, 1982.
82-542	Generic name: Citric acid ester	47 FR 35333 (8/13/82)	Do.
82-543	Generic name: Maleic acid ester	47 FR 35333 (8/13/82)	Do.
82-544	Generic name: Benzoic acid ester	47 FR 35333 (8/13/82)	Do.
82-545	Polymer of hexane, 1,6-diisocyanato-, hopolymer, 2-butanone, oxime	47 FR 35333 (8/13/82)	Do.
82-546	Void		Do.
82-547	Generic name: Modified polymer of styrene and substituted alkyl methacrylates	47 FR 35333 (8/13/82)	Do.
82-548	Generic name: Organometallic coupling agent	47 FR 35333 (8/13/82)	Do.
82-549	Void		
82-550	Generic name: Sulfoaryl disazo substituted naphthalenesulfonic acid salt	47 FR 35333 (8/13/82)	Do.
82-551	Generic name: Sulfoaryl disazo substituted naphthalenesulfonic acid salt	47 FR 35334 (8/13/82)	Do.
82-552	Generic name: Sulfoaryl disazo substituted naphthalenesulfonic acid salt	47 FR 35334 (8/13/82)	Do.
82-553	Generic name: Sulfoaryl disazo substituted naphthalenesulfonic acid salt	47 FR 35334 (8/13/82)	Do.
82-554	Generic name: Sulfoaryl disazo substituted naphthalenesulfonic acid salt	47 FR 35334 (8/13/82)	Do.
82-555	Generic name: Sulfoaryl disazo substituted naphthalenesulfonic acid salt	47 FR 35334 (8/13/82)	Do.
82-556	Generic name: Sulfoaryl disazo substituted naphthalenesulfonic acid salt	47 FR 35334 (8/13/82)	Do.
82-557	Generic name: Acetamidodimethylsiloxane	47 FR 35334 (8/13/82)	Nov. 2, 1982.
82-558	Generic name: Acetamidodimethylsiloxane	47 FR 35334 (8/13/82)	Do.
82-559	Generic name: Disubstituted benzene	47 FR 35334 (8/13/82)	Do.
82-560	Generic name: Polymer of the homopolymer of hexane, 1,6-diisocyanato-, substituted alkyl alkanoates and a benzene derivative.	47 FR 35334 (8/13/82)	Do.
82-561	Generic name: Substituted unsaturated polycyclic alcohol	47 FR 35334 (8/13/82)	Do.
82-562	Generic name: 1-Naphthalenesulfonic acid, ((((triazin)amino)disulfo)azo)-, trisodium salt	47 FR 36469 (8/20/82)	Nov. 3, 1982.
82-563	Ethyllithium	47 FR 36469 (8/20/82)	Nov. 7, 1982.
82-564	Generic name: Aliphatic polyol oligocrylate oligopropionate	47 FR 36469 (8/20/82)	Do.
82-565	Generic name: Alkenyl alkanoate ester	47 FR 36469 (8/20/82)	Nov. 8, 1982.
82-566	Generic name: Heteromonocycle, substituted	47 FR 36469 (8/20/82)	Nov. 9, 1982.
82-567	Generic name: Heteromonocycle, substituted	47 FR 36469 (8/20/82)	Do.
82-568	Generic name: Chromophore substituted poly(oxy-alkylene)	47 FR 36469 (8/20/82)	Do.
82-569	Generic name: Epoxidized hydroxystearic acid	47 FR 36469 (8/20/82)	Do.
82-570	Generic name: Amino acid modified polyester	47 FR 37954 (8/27/82)	Nov. 10, 1982.
82-571	Generic name: Orthophthalic anhydride modified unsaturated polyester resin	47 FR 37954 (8/27/82)	Nov. 13, 1982.
82-572	Generic name: Organophosphorous compound	47 FR 37954 (8/27/82)	Do.
82-573	Generic name: Pentasubstituted pentanamide salt	47 FR 37954 (8/27/82)	Do.
82-574	Generic name: Glycol ester of fatty acids	47 FR 37954 (8/27/82)	Nov.14, 1982.
82-575	Void		
82-576	Generic name: Unsaturated polyester	47 FR 37954 (8/27/82)	Do.
82-577	Generic name: Unsaturated polyester	47 FR 37954 (8/27/82)	Do.
82-578	Generic name: Unsaturated polyester	47 FR 37954 (8/27/82)	Do.
82-579	Generic name: Unsaturated polyester	47 FR 37954 (8/27/82)	Do.
82-580	Generic name: Salt of sulfosuccinic diester	47 FR 37954 (8/27/82)	Do.
82-581	Generic name: N-alkyl-1,3-diamine propane salts of mixed mono and dialkyl hydrogen phosphate	47 FR 37954 (8/27/82)	Do.
82-582	Generic name: N-alkyl-1,3-diamine propane salts of mixed mono and dialkyl hydrogen phosphate	47 FR 37955 (8/27/82)	Do.
82-583	Generic name: N-alkyl-1,3-diamine propane salts of mixed mono and dialkyl hydrogen phosphate	47 FR 37955 (8/27/82)	Do.
82-584	Dimethyl ester of 4,4'-(hydroxymethylene)bis-1,2-benzenedicarboxylic acid	47 FR 39242 (9/7/82)	Nov. 17, 1982.
82-585	Polymer of dimethyl ester of 4,4'-(hydroxymethylene)bis-1,2-benzenedicarboxylic acid with 4,4'-methylenedianiline.	47 FR 39242 (9/7/82)	Do.
82-586	Generic name: Ethyl ester of tertiary butyl carbomonocyclic acid	47 FR 39242 (9/7/82)	Do.
82-587	Generic name: Alkylbenzenesulfonic acid compound with dialkyl fatty amine	47 FR 39242 (9/7/82)	Do.
82-588	4-(1,1-dimethylethyl)pyridine	47 FR 39242 (9/7/82)	Do.
82-589	Generic name: Cresol novolac modified methacrylic epoxy ester	47 FR 39242 (9/7/82)	Nov. 20, 1982.
82-590	Generic name: Fatty acid esters of monohydric alcohol	47 FR 39242 (9/7/82)	Nov. 21, 1982.
82-591	Generic name: Fatty acid esters of monohydric alcohol	47 FR 39243 (9/7/82)	Do.
82-592	Generic name: Polyester polymer	47 FR 39243 (9/7/82)	Do.
82-593	Generic name: Polyester polymer	47 FR 39243 (9/7/82)	Do.
82-594	Generic name: Polymer of alkyl and substitutedalkyl acrylates	47 FR 39243 (9/7/82)	Do.
82-595	Generic name: Di(substitutedalkyl)dimethyl-ammonium salt	47 FR 39243 (9/7/82)	Do.
82-596	Generic name: Di(substitutedalkyl)dimethyl-ammonium salt	47 FR 39243 (9/7/82)	Do.
82-597	Vinyl acetate-N-methylolacrylamide copolymer	47 FR 39243 (9/7/82)	Nov. 22, 1982.
82-598	Ethyl acrylate homopolymer	47 FR 39243 (9/7/82)	Do.
82-599	Vinyl acetate-ethyl acrylate-N methylol acrylamide polymer	47 FR 39243 (9/7/82)	Do.
82-600	Butyl acrylate-vinyl acetate copolymer	47 FR 39243 (9/7/82)	Do.
82-601	Ethyl acrylate-methyl methacrylate copolymer	47 FR 39243 (9/7/82)	Do.
82-602	Generic name: Mixed glycol oligoesters of mixed dicarboxylic acids	47 FR 39243 (9/7/82)	Do.
82-603	Generic name: Mixed glycol oligoesters of aromatic diocarboxylic acid	47 FR 39243 (9/7/82)	Do.
82-604	Generic name: Monoureido silane ester	47 FR 39244 (9/7/82)	Do.
82-605	Generic name: Thiadiazole derivative	47 FR 39244 (9/7/82)	Do.
82-606	Ethyl-{trifluoromethyl-poly-(oxy difluoromethylene)-poly-[oxy-2-trifluoromethyl-trifluoromethyl-trifluorpethylene]oxy}-difluoromethyl carboxylate.	47 FR 39244 (9/7/82)	Nov. 23, 1982.

I. 110 Premanufacture Notices Received During the Month—Continued

PMN No.	Identity and generic name	FR citation	Expiration date
82-607	Isopropyl-[trifluoromethyl-poly-(oxydifluoromethylene)-poly-[oxy-2-trifluoromethyl)-trifluoroethylene]oxy] difluoromethyl carboxylate.	47 FR 39244 (9/7/82)	Do.
82-608	Ethyl[ethyl oxycarbonyl difluoromethyl-poly-(oxydifluoromethylene)-poly-(oxytetrafluoroethylene)-oxy]difluoromethyl carboxylate.	47 FR 39244 (9/7/82)	Do.
82-609	Isopropyl[methyl oxycarbonyl difluoromethyl-poly-(oxydifluoromethylene)-poly-(oxytetrafluoro-ethylene)oxy]difluoromethyl carboxylate.	47 FR 39244 (9/7/82)	Do.
82-610	2-[2,20-difluorohydroxyethyl-poly-(oxydifluoromethylene)-poly-(oxytrifluoroethylene)oxy]-2,2-difluoro-irthanol.	47 FR 39244 (9/7/82)	Do.
82-611	2-[2,2-difluorohydroxyethyl-poly-(oxydifluoromethylene)-poly-(oxytrifluoroethylene)oxy]-2,2-difluro-ethanol.	47 FR 39244 (9/7/82)	Do.
82-612	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 25°-35°.	47 FR 39244 (9/7/82)	Do.
82-613	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 35°-50°.	47 FR 39244 (9/7/82)	Do.
82-614	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 50°-60°.	47 FR 39244 (9/7/82)	Do.
82-615	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 60°-75°.	47 FR 39244 (9/7/82)	Do.
82-616	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 75°-90°.	47 FR 39245 (9/7/82)	Do.
82-617	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 90°-105°.	47 FR 39245 (9/7/82)	Do.
82-618	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 105°-120°.	47 FR 39245 (9/7/82)	Do.
82-619	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 120°-140°.	47 FR 39245 (9/7/82)	Do.
82-620	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 140°-165°.	47 FR 39245 (9/7/82)	Do.
82-621	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 165°-180°.	47 FR 39245 (9/7/82)	Do.
82-622	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 180°-190°.	47 FR 39245 (9/7/82)	Do.
82-623	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 190°-200°.	47 FR 39245 (9/7/82)	Do.
82-624	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 200°-220°.	47 FR 39245 (9/7/82)	Do.
82-625	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 220°-235°.	47 FR 39246 (9/7/82)	Do.
82-626	Mixed C_9-C_{11} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 235°-255°.	47 FR 39246 (9/7/82)	Do.
82-627	Generic name: Modified polyester	47 FR 39884 (9/10/82)	Do.
82-628	Generic name: Polyacrylate	47 FR 39885 (9/10/82)	Do.
82-629	Dimethyl hydantoin, formaldehyde, toluene sulfonamide condensation product	47 FR 39885 (9/10/82)	Do.
82-630	Generic name: Unsaturated alkyl fatty amine	47 FR 39885 (9/10/82)	Do.
82-631	Generic name: Unsaturated amine adduct	47 FR 39885 (9/10/82)	Do.
82-632	Generic name: Fatty secondary amide	47 FR 39885 (9/10/82)	Do.
82-633	Generic name: Fatty secondary amide	47 FR 39885 (9/10/82)	Do.
82-634	Generic name: Fatty secondary amide	47 FR 39885 (9/10/82)	Do.
82-635	Generic name: Alkyl acid esters	47 FR 39885 (9/10/82)	Do.
82-636	Generic name: Alkyl ester	47 FR 39885 (9/10/82)	Do.
82-637	Generic name: Stearyl methacrylate copolymer	47 FR 39885 (9/10/82)	Do.
82-638	Ethanol 2,2'-[sulfonyl bis(4,1-phenyleneoxy)]bis	47 FR 39885 (9/10/82)	Do.
82-639	Generic name: Polyacrylate copolymer	47 FR 39885 (9/10/82)	Do.
82-640	Generic name: Amino modified polyester	47 FR 39885 (9/10/82)	Do.

II. 56 Premanufacture Notices Received Previously and Still Under Review at the End of the Month

PMN No.	Identity/generic name	FR citation	Expiration date
82-479	Generic name: Heteropolycyclic(dihydroxyheteropolycycle)	47 FR 30104 (7/12/82)	Sept. 29, 1982.
82-480	Generic name: Polyol polyacrylate	47 FR 30104 (7/12/82)	Do.
82-481	Generic name: Blocked urethane polymer	47 FR 31063 (7/16/82)	Sept. 30, 1982.
82-482	Generic name: Acetal of polyvinyl alcohol	47 FR 31063 (7/16/82)	Oct. 4, 1982.
82-483	Generic name: Polymer of acrylic acid and acrylic esters	47 FR 31063 (7/16/82)	Do.
82-484	Generic name: Phosphorodithioic acid, dialkyl ester amine salt	47 FR 31063 (7/16/82)	Do.
82-485	Generic name: Chlorotriazine modified copper phthalocyanine sodium salt	47 FR 31063 (7/16/82)	Do.
82-486	Generic name: Alkyl phosphate ester	47 FR 31063 (7/16/82)	Oct. 5, 1982.
82-487	Generic name: Copolymer of an alkenoic acid derivative, substituted and unsubstituted vinyl aromatic compounds and a substituted alkene.	47 FR 31063 (7/16/82)	Do.
82-488	Found to be invalid		
82-489	Generic name: Sulfurized di-carboxylic polyglycol ester	47 FR 31957 (7/23/82)	October 10, 1982.
82-490	Found to be on the inventory		
82-491	Generic name: Polyester polymer	47 FR 31957 (7/23/82)	Do.
82-492	Generic name: Substituted dithoic acid salt	47 FR 31957 (7/23/82)	Oct. 11, 1982.
82-493	Generic name: Tetrasubstituad benzisoxazole	47 FR 31957 (7/23/82)	Do.
82-494	Generic name: 2,2-dimethyl-1,3-propanediol, polymer with 1,6-hexanediol, 1,3-dihydro-1,3-dioxo-5-isobenzofurancarboxylic acid, 1,3-benzenedicarboxylic acid, 1,4-benzenecarboxylic acid and 1,6-hexanedioic acid.	47 FR 33234 (7/30/82)	Oct. 14, 1982.
82-495	Generic name: Substituted naphthalene	47 FR 33234 (7/30/82)	Do.
82-496	Generic name: Rosin ester resin	47 FR 33235 (7/30/82)	Do.
82-497	Generic name: Rosin ester resin	47 FR 33235 (7/30/82)	Do.
82-498	Generic name: Rosin ester resin	47 FR 33235 (7/30/82)	Do.
82-499	Generic name: Rosin ester resin	47 FR 33235 (7/30/82)	Do.
82-500	Generic name: Alkyl cycloalkanol alkanoate	47 FR 33235 (7/30/82)	Do.
82-501	Generic name: Sustituted pentenedioate	47 FR 33235 (7/30/82)	Do.
82-502	Generic name: Substituted diazo compound	47 FR 33236 (7/30/82)	Oct. 17, 1982.
82-503	Generic name: Water base vinyl acrylic copolymer	47 FR 33236 (7/30/82)	Do.
		47 FR 33236 (7/30/82)	Do.

II. 56 Premanufacture Notices Received Previously and Still Under Review at the End of the Month—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
82-504	Polymer of 2-methyl-2-propenoic acid, 1-dodecyl ester; 2-methyl-2-propenoic acid, methyl ester; 2-methyl-2-propenoic acid, 1-butyl ester.	47 FR 33235 (7/30/82)	Oct. 18, 1982.
82-505	4,4'-bis-(2,6-dimethylphenol)sulfone	47 FR 33235 (7/30/82)	Do.
82-506	Generic name: alkoxy ester of N-methylacetamide	47 FR 33235 (7/30/82)	Do.
82-507	Generic name: Substituted isothiocyanate	47 FR 33235 (7/30/82)	Do.
82-508	Generic name: Bis alkoxylated aluminum acetoacetic ester chelate	47 FR 33235 (7/30/82)	Oct. 19, 1982.
82-509	Generic name: Alkane diol	47 FR 33235 (7/30/82)	Do.
82-510	Generic name: Polyether urethane	47 FR 33236 (7/30/82)	Do.
82-511	Found to be on the Inventory		
82-512	Generic name: Phenyl derivative of an ethyl methacrylate	47 FR 33236 (7/30/82)	Do.
82-513	Generic name: Alkyl diol, toluene diisocyanate, alkene ester, adipic acid resin	47 FR 33236 (7/30/82)	Do.
82-514	Generic name: Substituted cycloaliphatic hydroxyalkyl ether ester	47 FR 33236 (7/30/82)	Do.
82-515	Generic name: Acrylate ester of acrylic polymer	47 FR 33236 (7/30/82)	Do.
82-516	Generic name: Aromatic amine derivative	47 FR 33236 (7/30/82)	Do.
82-517	Generic name: Polysulfide polymer with formal and alcohol moiety	47 FR 34187 (8/6/82)	Oct. 20, 1982.
82-518	Generic name: Metal complex substituted aromatic	47 FR 34187 (8/6/82)	Do.
82-519	2-(6-chloro-2-benzothiazolylazo)-5-[N-(2-cyano-ethyl)-N-(n-pentyl)amino]-acetanilide	47 FR 34187 (8/6/82)	Do.
82-520	2-(3-hydroxy-2-quinolinyl)-2,3-dihydro-1,3-dioxo-1H-indene-5-carboxylic acid methyl (ethyl) ester	47 FR 34187 (8/6/82)	Do.
82-521	4-(2,6-dichloro-4-nitrophenylazo)-[N-(2-cyano-ethyl)-N-(2-phenoxyethyl)amino]benzene	47 FR 34187 (8/6/82)	Do.
82-522	Generic name: Diureido silane ester	47 FR 34188 (8/6/82)	Oct. 24, 1982.
82-523	Generic name: Polyaryl sulfone ether	47 FR 34188 (8/6/82)	Do.
82-524	Generic name: Salt of polyhydroxy stearic acid and polyethyleneimine	47 FR 34188 (8/6/82)	Do.
82-525	Generic name: Polyester modified epoxy resin	47 FR 34188 (8/6/82)	Do.
82-526	Generic name: Polyester modified epoxy resin	47 FR 34188 (8/6/82)	Do.
82-527	Generic name: Titanium (4+) mixed alcohol complex	47 FR 34188 (8/6/82)	Do.
82-528	Generic name: Polymer of aromatic aldehyde and phenolic compound	47 FR 34188 (8/6/82)	Do.
82-529	Generic name: Aliphatic acid ester salt	47 FR 34188 (8/6/82)	Do.
82-530	Generic name: Acidic aliphatic ester	47 FR 34188 (8/6/82)	Do.
82-531	Generic name: Organophosphorus compound	47 FR 34188 (8/6/82)	Do.
82-532	Generic name: Organophosohorus compound	47 FR 34188 (8/6/82)	Oct. 25, 1982.
82-533	Generic name: Polyhydroxylated diisocyanate	47 FR 34188 (8/6/82)	Do.
82-534	Generic name: Polyether-urethane	47 FR 34188 (8/6/82)	Do.
82-535	Generic name: Modified phenol formaldehyde substituted alkylamine	47 FR 34189 (8/6/82)	Do.
82-536	Generic name: Alkyl ester of polyethylene glycol	47 FR 35332 (8/13/82)	Oct. 27, 1982.
82-537	Generic name: Amine/amine salt of dicarboxylic acid	47 FR 35333 (8/13/82)	Do.

III. 85 Premanufacture Notices for Which the Notice Review Period Has Ended During the Month. (Expiration of the Notice Review Period Does Not Signify That the Chemical Had Been Added to the Inventory.)

PMN No.	Identity/generic name	FR citation	Expiration date
82-323	Generic name: t/alkyl peroxyester	47 FR 20853 (5/14/82)	Aug. 1, 1982.
82-324	Generic name: phenoxy ester resin	47 FR 20853 (5/14/82)	Do.
82-325	Generic name: Acrylic resin	47 FR 20853 (5/14/82)	Do.
82-326	Generic name: Substituted pyridine	47 FR 20853 (5/14/82)	Do.
82-327	Generic name: Hydroxy, amine-substituted anthraquinone	47 FR 20853 (5/14/82)	Aug. 2, 1982.
82-328	Generic name: Modified amine	47 FR 20853 (5/14/82)	Do.
82-329	Generic name: Poly[(aminoalkylamino)alkylene oxide]	47 FR 20853 (5/14/82)	Do.
82-330	Generic name: poly(vinyl acrylate)	47 FR 20853 (5/14/82)	Aug. 3, 1982.
82-331	Generic name: Nitrophenyl amide	47 FR 20853 (5/14/82)	Do.
82-332	Generic name: Aminophenyl amide	47 FR 20853 (5/14/82)	Do.
82-333	Generic name: Polyacrylate	47 FR 20853 (5/14/82)	Do.
82-334	Generic name: 5-chloro-4-nitro-2-substituted aryloxydimethylaniline	47 FR 20853 (5/14/82)	Aug. 4, 1982.
82-335	Generic name: 5-chloro-2-substituted aryloxy-aniline	47 FR 20853 (5/14/82)	Do.
82-336	Generic name: 2-chloro-4(N,N-dimethylamino)-5-substituted aryloxydiazonium tetrafluroborate	47 FR 20854 (5/14/82)	Do.
82-337	Generic name: 5-chloro-2-substituted aryloxy-dimethylaniline	47 FR 20854 (5/14/82)	Do.
82-338	Generic name: Disubstituted triazolidine	47 FR 20854 (5/14/82)	Do.
82-339	Generic name: Disubstituted triazolidine salt	47 FR 20854 (5/14/82)	Do.
82-340	Generic name: Complex quaternary ammonium chloride	47 FR 22214 (5/21/82)	Aug. 5, 1982.
82-341	Generic name: Unsaturated hydrocarbons modified rosin	47 FR 22214 (5/21/82)	Do.
82-342	Generic name: Unsaturated hydrocarbons modified rosin	47 FR 22214 (5/21/82)	Do.
82-343	Generic name: Unsaturated hydrocarbons modified rosin	47 FR 22214 (5/21/82)	Do.
82-344	Generic name: Unsaturated hydrocarbons modified rosin	47 FR 22214 (5/21/82)	Do.
82-345	Generic name: Polyhalo alkoxyaryl nitrile	47 FR 22214 (5/21/82)	Aug. 8, 1982.
82-346	Generic name: Reaction product of a substituted benzene, formaldehyde and inorganic acid	47 FR 22214 (5/21/82)	Aug. 9, 1982.
82-347	Generic name: Polyurethane of a diisocyanate and a substituted alkanediol	47 FR 22214 (5/21/82)	Do.
82-348	Generic name: Urea/carbamate elastomer	47 FR 22214 (5/21/82)	Do.
82-349	Generic name: Polycyclic sulfonic acid salt	47 FR 22215 (5/21/82)	Aug. 10, 1982.
82-350	Generic name: Titanium (4) mixed alcohol complex	47 FR 22215 (5/21/82)	Do.
82-351	Generic name: Titanium (4) mixed alcohol complex	47 FR 22215 (5/21/82)	Do.
82-352	Generic name: Naphthalenedisulfonic acid, [[(aminosulfohydroxy naphthalenyl]azo]-, tri-sodium salt.	47 FR 22215 (5/21/82)	Do.
82-353	Generic name: Substituted phenyl-pyrimidine	47 FR 22215 (5/21/82)	Aug. 11, 1982.
82-354	Generic name: Substituted phenyl-pyrimidine	47 FR 22215 (5/21/82)	Do.
82-355	Generic name: Substituted phenyl-pyrimidin bicyclic azo heterocyclic merocyanine	47 FR 22215 (5/21/82)	Do.
82-356	Generic name: Polymer of 1,4-benzenedicarboxylic acid dimethyl ester; dihydroxyalkane; 1,6-hexanediol; alpha hydro-omega hydroxy poly (oxy-1,4-butanediyl).	47 FR 22215 (5/21/82)	Do.
82-357	Generic name: 2,5-diisopropoxy-4-morpholino benzene diazonium aryl sulfonic acid salt	47 FR 23552 (5/28/82)	Aug. 12, 1982.
82-358	Generic name: Modified phenoxy-S resin	47 FR 23552 (5/28/82)	Do.
82-359	Generic name: Polyester resin	47 FR 23552 (5/28/82)	Do.
82-360	Generic name: Trisubstituted benzisoxazole	47 FR 23553 (5/28/82)	Do.
82-361	Generic name: Tetrasubstituted benzene	47 FR 23553 (5/28/82)	Do.
82-362	Generic name: Substituted benzamide	47 FR 23553 (5/28/82)	Do.
82-363	Generic name: Polyoxypropylene ester acyl caprolactam	47 FR 23553 (5/28/82)	Aug. 15, 1982.
82-364	Poly(oxy-1,2-ethanediyl), alpha-(carboxymethyl)-omega-(4-nonylphenoxy)	47 FR 23553 (5/28/82)	Do.
82-365	Poly(oxy-1,2-ethanediyl), alpha-(carboxymethyl)-omega-(4-nonylphenoxy)	47 FR 23553 (5/28/82)	Do.
82-366	Poly(oxy-1,2-ethanediyl), alpha-(carboxymethyl)-omega-(4-nonylphenoxy)	47 FR 23553 (5/28/82)	Do.
82-367	Poly(oxy-1,2-ethanediyl), alpha-(carboxymethyl)-omega-(4-nonylphenoxy)	47 FR 23553 (5/28/82)	Do.

III. 85 Premanufacture Notices for Which the Notice Review Period Has Ended During the Month. (Expiration of the Notice Review Period Does Not Signify That the Chemical Had Been Added to the Inventory.)—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
82-368	Generic name: Alkenyl alkyl siloxane alkoxy terminated	47 FR 23553 (5/28/82)	Aug. 16, 1982.
82-369	Generic name: Benzenedicarboxylic acid saturated mixed glycols copolyester	47 FR 23553 (5/28/82)	Do.
82-370	Generic name: Benzenedicarboxylic acid saturated mixed glycols copolyester	47 FR 23553 (5/28/82)	Do.
82-371	Generic name: Disubstituted alkane	47 FR 23553 (5/28/82)	Do.
82-372	Generic name: ((Substituted phenyl)azo)-Dihydro-hydroxy-alkyl-oxo-pyridinecarbonitrile	47 FR 23554 (5/28/82)	Do.
82-373	Generic name: Poly(ester-urethane)	47 FR 23554 (5/28/82)	Aug. 17, 1982.
82-374	Generic name: Alkyl thiadiazole	47 FR 23554 (5/28/82)	Do.
82-375	Formaldehyde polymer with 2-furanmethanol and methyloxirane capped	47 FR 23554 (5/28/82)	Aug. 18, 1982.
82-376	Polymer of trimethylol propane, 1,6 hexanediol, neopentyl glycol, trimellitic anhydride, adipic acid, and isophthalic acid.	47 FR 23554 (5/28/82)	Do.
82-377	Generic name: Hybrid urethane	47 FR 23554 (5/28/82)	Do.
82-378	Generic name: Hybrid urethane	47 FR 23554 (5/28/82)	Do.
82-379	Generic name: Tetrasubstituted benzisoxazole	47 FR 23554 (5/28/82)	Do.
82-380	Generic name: Disubstituted benzoxazole	47 FR 23554 (5/28/82)	Do.
82-381	Generic name: Tetrasubstituted benzisoxazole	47 FR 25400 (6/11/82)	Do.
82-382	Generic name: Polymer of alkenoic acid alkyl esters, 2-propenoic acid, and 2-propenoic acid, 2-methyl.	47 FR 25400 (6/11/82)	Aug. 19, 1982
82-383	Generic name: Brominated xylenol	47 FR 25400 (6/11/82)	Aug. 22, 1982.
82-384	Generic name: Bis[bromo xylenol]sulfide	47 FR 25400 (6/11/82)	Do.
82-385	Generic name: Bis[xylenol]sulfide	47 FR 25400 (6/11/82)	Do.
82-386	Generic name: Metal complex of disazo aromatic acids, sodium salt	47 FR 25400 (6/11/82)	Aug. 23, 1982.
82-387	Phosphorodithioic acid, O,O', secondary butyl and isooctyl mixed esters	47 FR 25401 (6/11/82)	Do.
82-388	Phosphorodithioic acid, O,O', secondary butyl and isooctyl mixed esters, zinc salt	47 FR 25401 (6/11/82)	Do.
82-389	Reaction product of [[(phosphonomethyl]imino] bis-[6,1-hexanediyl-nitrilobis(methylene)] tetrakis-phosphonic acid (2,2' oxybisethanol, reaction products with ammonia; morpholine derivatives, mpx2mq].	47 FR 25401 (6/11/82)	Do.
82-390	Polymer of styrene, 2-propenoic acid, 1,1-dimethylethyl ester of 2-propenoic acid, 2-ethylhexyl ester of 2 propenoic acid, and 2-hydroxy propyl acrylate.	47 FR 25401 (6/11/82)	Do.
82-391	Invalid		
82-392	Generic name: Hydroxy ethyl ester substituted polybis imide of pyromellitic dianhydride	47 FR 25401 (6/11/82)	Aug. 25, 1982.
82-393	Amines, N-(3-aminopropyl)-N-talloalkyltri-methylenedibis-(3-aminopropyl)-N-tallowamine	47 FR 25401 (6/11/82)	Do.
82-394	Generic name: Modified polyurethane from diisocyanate, substituted alkanol and a substituted alkane diol.	47 FR 25401 (6/11/82)	Do.
82-395	Generic name: Polymer of a vegetable oil derivative, alkane diols and a carbomonocyclic anhydride.	47 FR 25401 (6/11/82)	Do.
82-396	Generic name: Substituted oxirane reacted with polyalkylene glycol	47 FR 25401 (6/11/82)	Do.
82-397	Generic name: Tetrasubstituted benzisoxazole	47 FR 25402 (6/11/82)	Aug. 26, 1982.
82-398	Generic name: A mixture of benzamide, N-((substituted naphthyl)azo)phenyl-(substituted amino-hydroxy-sulfonaphthyl)azo) and benzamide, N-((substituted naphthyl)azo)phenyl-((substituted amino-hydroxy-sulfonaphthyl)azo, compounded with organic acids.	47 FR 25402 (6/11/82)	Do.
82-399	C[illegible]-alkyl mercaptoacetates reaction products with dichlorodioctylstannane and trichloro-octystannane.	47 FR 25402 (6/11/82)	Do.
82-402	Generic name: Styrene-diene-substituted alkene copolymer	47 FR 254402 (6/11/82)	Aug. 30, 1982.
82-403	Ethyl acrylate-methyl acrylate copolymer	47 FR 25402 (6/11/82)	Aug. 31, 1982.
82-404	Ethyl acrylate-methyl methacrylate copolymer	47 FR 25402 (6/11/82)	Do.
82-405	Ethyl acrylate-methyl acrylate-methyl methacrylate copolymer	47 FR 25402 (6/11/82)	Do.
82-406	Ethyl acrylate-methyl acrylate copolymer	47 FR 25403 (6/11/82)	Do.
82-407	Vinyl acetate homopolymer	47 FR 25403 (6/11/82)	Do.
82-408	Generic name: Tetra tosylate porphine	47 FR 25403 (6/11/82)	Do.
82-410	Generic name: Substituted heterocycle, amine salt	47 FR 25403 (6/11/82)	Do.
82-411	Generic name: Mixed metal hydroxide	47 FR 25403 (6/11/82)	Do.

IV. 32 Chemical Substances for Which EPA Has Received Notices of Commencement to Manufacture

PMN No.	Chemical identification	FR citation	Date of commencement
80-110	Generic name: 2-((2-(methylsubstituted)ethyl-oxycarbonyl)substituted) phenyl, disulfo, di-heteropolycyclic heteropolycycle.	45 FR 42018 (6/23/80)	June 2, 1982.
80-111	Generic name: 2-((2-(methylsubstituted)ethyl-oxycarbonyl) substituted) phenyl, disulfo, di-heteropolycyclic heteropolycycle.	45 FR 42018 (6/23/80)	May 24, 1982.
80-112	Generic name: 2-((2-(methylsubstituted)ethyl-oxycarbonyl) substituted) phenyl, diheteropolycyclic heteropolycycle.	45 FR 42018 (6/23/80)	Apr. 29, 1982.
80-113	Generic name: 2-((2-(methylsubstituted)phenyl), diheteropolycyclic heteropolycycle	45 FR 42018 (6/23/80)	Mar. 9, 1982.
80-114	Generic name: (Dioxo heteropolycyclic), diheteropolycyclic heteropolycycle	45 FR 42018 (6/23/80)	Mar. 18, 1982.
80-115	Generic name: (Dioxoheteropolycyclic), diheteropolycyclic heteropolycycle	45 FR 42018 (6/23/80)	Feb. 2, 1982.
80-116	Generic name: (2-substitutedphenyl), diheteropolycyclic heteropolycycle	45 FR 42018 (6/23/80)	July 28, 1982.
81-218	Adipic acid-dipropylene glycol-linseed oil fatty acid-trimellitic anhydride-trimethylol propane	46 FR 29526 (6/2/81)	Aug. 3, 1982.
81-418	Generic name: Nitropolyhaloalkylbenzenepoly-amine	46 FR 45898 (9/16/81)	Aug. 23, 1982.
81-437	Generic name: Polynitro Polyhalo alkyl aniline	46 FR 47003 (9/23/81)	Aug. 9, 1982.
82-68	Generic name: Polymer of diphenylmethane diiso-cyanate and hydroxy alkyl ethers	47 FR 6365 (2/11/82)	July 21, 1982.
82-145	Generic name: Modified polyester polyurethane from substituted alkanediols acid and a diisocyanate.	47 FR 10074 (3/9/82)	July 22, 1982.
82-209	Generic name: Polymer from disubstituted monocycle and disubstituted alkanes	47 FR 13038 (3/26/82)	July 23, 1982.
82-223	Generic name: Polyester-urethane	47 FR 14218 (4/2/82)	Oct. 1, 1982.
82-245	Generic name: Modified polyurethane	47 FR 16403 (4/16/82)	July 1, 1982.
82-246	Generic name: Barium sulfonated red	47 FR 16403 (4/16/82)	July 8, 1982.
82-271	Generic name: Acid blocked amine	47 FR 16405 (4/16/82)	August 1982.
82-273	*m*-chlorophenylphenylsulfide	47 FR 16405 (4/16/82)	Do.
82-301	Generic name: Neutralized polymer of styrene, alkyl acrylates and substituted alkyl methacrylates	47 FR 18653 (4/30/82)	Aug. 19, 1982.
82-304	Generic name: Quaternary amine functional polyether urethane modified polyglycidyl	47 FR 18654 (4/30/82)	Oct. 1, 1982.
82-309	Generic name: Cationic substituted acid amide	47 FR 19782 (5/7/82)	Aug. 9, 1982.
82-310	Generic name: Cationic substituted acid amide polymer	47 FR 19782 (5/7/82)	Do.
82-311	Generic name: Unsaturated alkyl amino alkyl dioxane	47 FR 19782 (5/7/82)	July 25, 1982.
82-312	Generic name: Dihaloethylacetate	47 FR 19782 (5/7/82)	Do.
82-313	Acetamide, 2, 2-dichloro-N-(1,3-dioxian-2-ylmethyl)-N-2-propenyl	47 FR 19782 (5/7/82)	Do.
82-321	Generic name: Polyester random copolymer	47 FR 19783 (5/7/82)	Aug. 1, 1982.
82-322	Generic name: Styrene acrylate copolymer	47 FR [illegible] (5/14/82)	Sept. 1, 1982.

IV. 32 Chemical Substances for Which EPA Has Received Notices of Commencement to Manufacture—Continued

PMN No.	Chemical identification	FR citation	Date of commencement
82-343	Generic name: Polyacrylate	47 FR 20853 (5/14/82)	Aug. 3, 1982.
82-348	Generic name: Urea/carbamate elastomer	47 FR 22214 (5/21/82)	Aug. 9, 1982.
82-349	Generic name: Polycyclic sulfonic acid salt	47 FR 22215 (5/21/82)	Aug. 23, 1982.
82-392	Generic name: Hydroxy ethyl ester substituted poly bis imide of pyromellitic dianhydride	47 FR 25401 (6/11/82)	Aug. 27, 1982.
82-396	Generic name: Substituted oxirane reacted with polyalkylene glycol	47 FR 25401 (6/11/82)	Sept. 6, 1982.

V. 19 Premanufacture Notices for Which the Review Period Has Been Suspended

PMN No.	Identity/generic name	FR citation	Date suspended
80-137	Benzeneamine, 4,4'-methylene bis [*N*-(1-methybutylidene)	45 FR 48243 (7/18/80)	Sept. 22, 1980.
80-138	Benzeneamine, 4,4'-methylene bis [*N*-(1-methybutylidene)	45 FR 48243 (7/18/80)	Do.
80-146	Phosphorodithioic acid *O,O'*-di(isohexyl, isoheptyl, isooctyl, isononyl, isodecyl) mixed esters, zinc salt.	45 FR 49153 (7/23/80)	Sept 17, 1980.
80-147	Phosphorodithioic acid *O,O'* -di(isohexyl, isoheptyl, isooctyl, isononyl, isodecyl) mixed esters	45 FR 49153 (7/23/80)	Do.
80-264	Generic name: Benzeneamine, [*N*-(1-methylhexylidene)-*N*-(1-methyl butylidene)-4,4'-methylene bis]	45 FR 73127 (11/4/80)	Dec. 24, 1980.
81-534	2,3-epoxycyclohexanone	46 FR 53522 (10/29/81)	Nov. 2, 1981.
81-558	4-hydroxy-3-(5-(2-hydroxysulfonyloxy) ethylsulfonyl)-2-methoxyphenylazo)-7-succinylamino-2-naphthalenesulfonic acid disodium salt.	46 FR 55146 (11/6/81)	Jan. 27, 1982.
81-561	4-[4-[2-(hydroxysulfonyoxy)ethylsulfonyl]-5-methyl-2-methoxyphenylazo]-3-methyl-1-(3-sulfophenyl)-5-pyrazolone disodium salt.	46 FR 55146 (11/6/81)	Do.
81-860	4-hydroxy-3-(2-methoxy-5-methyl-4-(2-(hydroxy-sulfonyloxy)ethylsulfonyl)phenylazo)-1-naphthalene sulfonic acid disodium salt.	47 FR 1021 (1/8/82)	Mar. 28, 1982.
81-861	4-hydroxy-3-(2-methoxy-5-methyl-4-(2-(hydroxy-sulfonyloxy)ethylsulfonyl)phenylazo)-6-(3-sulfophenyl)amino-2-naphthalenesulfonic acid trisodium salt.	47 FR 1021 (1/8/82)	Do.
82-23	Generic name: Polyhalogenated aromatic alkylated hydrocarbon	47 FR 3595 (1/26/82)	May 12, 1982.
82-59	Generic name: Aromatic disazo dye	47 FR 5330 (2/4/82)	Apr. 20, 1982.
82-60	Generic name: Zinc, O,O-bis alkylphosphoro dithioate	47 FR 5932 (2/9/82)	Apr. 15, 1982.
82-387	Phosphorodithioic acid, O,O', secondary butyl and isooctyl mixed esters	47 FR 25410 (6/11/82)	July 30, 1982.
82-388	Phosphorodithioic acid, O,O', secondary butyl and isooctyl mixed esters, zinc salt	47 FR 25401 (6/11/82)	Do.
82-400	Potassium N,N-bis(hydroxyethyl) cocamine oxide phosphate	47 FR 25402 (6/11/82)	Aug. 20, through Sept. 4, 1982.
82-401	Generic name: Polyvinyl starch (6/11/82)	47 FR 25402	Aug. 19, 1982.
82-409	Potassium N,N-bis(hydroxyethyl) tallow amine oxide phosphate	47 FR 25403 (6/11/82)	Aug. 20, through Sept. 4, 1982.
82-432	Reaction mixture containing: isobornyl acetylacetate, isobornyl acetate and ethylacetylacetate	47 FR 27610 (6/25/82)	July 2, 1982.

BILLING CODE 6560-50-M

[WH-FRL 2204-5]

State and Local Assistance; Grants for Construction of Treatment Works

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Reallotment.

SUMMARY: This notice sets forth the distribution of construction grant funds subject to reallotment after September 30, 1981, under section 205 of the Clean Water Act, 33 U.S.C. 1285. These funds include unobligated fiscal year (FY) 1979 and 1980 allotments, recovered prior year funds, which were available but unobligated during fiscal year 1981, and unobligated FY 1978 funds inadvertently reallotted to the District of Columbia. This notice also explains the procedure by which the reallotment distribution was determined.

Section 205(d) of the Clean Water Act (the Act) requires that funds allotted for FY 1978 and beyond which are not obligated by the end of the initial allotment availability period "* * * shall be immediately reallotted by the Administrator * * * *". Through promulgation of this notice the public is notified of the additional amounts available to the other States for grants for the construction of municipal wastewater treatment facilities. Under section 205(d), these funds are available for obligation until September 30, 1983.

(a) Of the $4.2 billion appropriated by Pub. L. 95-392 for fiscal year 1979, $21,035,394 remained unobligated as of September 30, 1981 and thereby became available for reallotment.

(b) $3.4 billion was appropriated by Pub. L. 96-103 for fiscal year 1980. Of the $2.52 billion remaining after rescission of $0.88 billion, $17,518,325 remained unobligated as of September 30, 1981 and thereby became subject to reallotment.

(c) In making the reallotment of fiscal year 1978 funds (45 FR 83497, December 19, 1980), the $223,087 unobligated balance of the District of Columbia's fiscal year 1978 allotment was inadvertently not included. Those funds were subsequently reserved for reallotment as of September 30, 1981.

(d) $82,800 in recovered fiscal year 1978 supplemental funds and $28,760 in recovered fiscal year 1973-76 contract authority funds were also available for reallotment.

EFFECTIVE DATE: September 30, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Albert L. Pelmoter, Chief, Program Policy Branch, Municipal Construction Division (WH-547), Office of Water Program Operations, (202) 426-8820.

SUPPLEMENTARY INFORMATION:

Background

Sums allotted to a State under section 205 of the Act remain available for obligation for one year after the close of the fiscal year for which the funds were appropriated (§ 35.910-2(b)). Funds not obligated at the end of the period of availability are reallotted to the States which fully obligated their allotments. Ordinarily, only fiscal year 1980 unobligated funds would be available for reallottment at this time. However, section 7 of Pub. L. 96-483 extended the availability of fiscal year 1979 funds from September 30, 1980 to September 30, 1981. Consequently, unobligated funds from both years were available for reallotment after September 30, 1981. Also available were $223,087 in fiscal

year 1978 funds which were not obligated by the District of Columbia by September 30, 1979. These funds were inadvertently not included in a previous reallotment process (45 FR 83497, December 19, 1980). An adjustment was also needed to correct the District's inadvertent participation in the reallotment of fiscal year 1978 Ohio funds.

"Recoveries" made between the dates of the fiscal year 1979 and 1981 allotments were also subject to reallotment after September 30, 1981. Recoveries are deobligated funds which were issued or reissued in a prior fiscal year, and are treated in the same manner as the most recent allotment—in this case 1980 (§ 35.910–2(c)).

At the close of the fiscal years 1979 and 1980 allotment period (September 30, 1981), 22 States and territories had not obligated $21,035,394 of their fiscal year 1979 allotments and 16 States and territories had not obligated $17,518,325 of their fiscal year 1980 allotments. Five States and territories did not obligate $82,800 of their recovered fiscal year 1978 supplemental allotments; eight did not reobligate $28,760 of fiscal year 1973–76 contract authority recoveries before the September 30, 1981 deadline.

Issues

Reserves

Several issues had to be resolved before the reallotment could be made. Among these was the manner in which innovative and alternative (I/A) technology and rural alternative systems funding reserves would be handled. Section 205(i) of the Act required each State to set aside from its annual allotment a specific percentage to increase the Federal share of grant awards from 75 percent to 85 percent of the eligible cost of projects employing I/A technology. The reserves, of which a minimum of ½ of one percent was to be set aside for innovative technololgy, were two percent in fiscal years 1979 and 1980 and three percent in 1981 (35.915–1(b)). Under section 205(h) of the Act, the reserve for rural alternative systems (35.915–1(e)) was 4 percent in fiscal years 1979 and 1980. Two alternatives were investigated in reallotting the reserves: (a) Treat all the funds in a State's unobligated balance (for either fiscal year) as a lump sum, including the unobligated reserves or (b) treat each unobligated reserve as though it were a separate allotment and thus preserve it for I/A or rural alternative projects. It was concluded that the Act requires that any funds not obligated by a State by the end of the allotment period be reallotted as a lump sum regardless of the reserve(s) to which the funds had been assigned.

Further, consideration was given to whether any of the funds should be assigned to current reserves after reallotment. Since the Act requires reserves (including State Management Assistance under section 205(g)) to be based on an annual appropriation, and the reallotted funds would be in addition to the statutory amount, it was concluded that reallotted funds are not assignable to reserves.

Court Ordered Set Asides

Another issue involved funds not obligated by the September 30, 1981 deadline because they were included in court ordered set asides. In several States, State or Federal courts had ordered that certain amounts be set aside for specific projects to be funded after the end of the fiscal year. Since these set asides could only be used for the projects designated by the courts, the court ordered set asides were treated as obligated funds.

Recoveries

Although section 35.910–2 provides that recovered funds "* * * shall be treated in the same manner as the most recent allotment before deobligation", it was necessary to decide whether to treat recoveries which became available for reallottment after September 30, 1981, and unobligated fiscal year 1980 funds which became available for reallotment at the same time, as one sum or as two separate accounts. If they were treated as one account, States which had obligated all their 1980 funds but had not reobligated all their 1978 and 1973–76 recoveries would not have qualified to receive reallotted funds from States which did not obligate all their 1980 funds. Several EPA Regional Offices stated that they did not expect the amounts to be combined for reallotment purposes, so they did not track the 1978 and prior year recoveries closely enough to assure that these funds would be fully obligated. As a result, several States which obligated all of their 1980 funds were left with unobligated recoveries.

Because of this confusion, each account was reallotted separately this year. In the future, recoveries and balances from the allotment to which the recoveries are added will be treated together. Consequently, States with unobligated balances in any account will not qualify for reallotment.

Reconciliation of Records

Efforts to reconcile discrepancies between EPA Headquarters' and Regional Offices' financial records as well as an examination of the timeliness of the issuance of allowances for deobligated funds by EPA considerably delayed the reallotment process. These matters were resolved through extensive discussions among the States, EPA Regional Offices and EPA Headquarters. The basic criterion used was: A State should not be penalized for an error or lack of timeliness by EPA. It was also concluded that in determining when deobligated funds are subject to reallotment, the date to be used is the date the deobligated funds are reissued by the EPA Comptroller to the EPA Regional Administrator.

Northern Mariana Islands

Pub. L. 95–348 (1978) contains a provision preserving funds appropriated for use by the Northern Mariana Islands. Section 3(a)(2) provides that any funds made available to the Northern Mariana Islands by the Congress after March 24, 1976 "* * * are hereby authorized to remain available until expended." Accordingly, construction grant funds allotted to the Northern Mariana Islands which remain unobligated at the close of the period of availability prescribed by section 205(d) of the Act are not subject to reallotment. The Northern Mariana Islands does not participate in the reallotment of those funds which its unobligated balances would have been a part, however.

Correction of Previous Reallotment

Two States—Ohio and the District of Columbia—did not fully obligate their 1978 allotments. Ohio's unobligated balance of 1978 funds was realloted to the other States, including the District of Columbia. The District should not have been included among the States receiving realloted funds because it had an unobligated balance of 1978 funds in the amount of $223,087. This oversight has been corrected by realloting the $223,087 among all the States and territories except Ohio and the District. Also realloted was the $118,190 the District received in realloted 1978 Ohio funds. The $118,190 was transferred from the District's 1980 unobligated balance, since the realloted 1978 Ohio funds were treated as 1980 funds. The effect of this correction is put all States in the same position they would have been in had the 1978 reallotment been accomplished properly.

Reallotment Procedure

As a result of the above considerations, five pools of funds were reallotted among the States which had fully obligated their funds in each category. The five pools were:

(1) Fiscal year 1980 allotment;

(2) Fiscal year 1979 allotment;

(3) Fiscal year 1978 supplemental allotment;

(4) Fiscal year 1973–76 contract authority;

(5) District of Columbia unobligated 1978 balance, including 1978 Ohio funds inadvertently reallotted to the District.

To distribute the funds in each pool in accordance with the requirements of sections 205(g) and 205(e) of the Act, the following procedure was used:

1. Applicable percentages (35.910–8(a)) to reflect the absence of States which had not fully obligated the funds in a pool were computed and applied to the amount available for reallotment from that pool.

2. Since section 205(e) of the Act requires that no State shall receive less than one-half of one percent of an allotment, 0.5 percent of the amount to be reallotted from each pool was computed and the States whose allotments were less than this amount had their shares raised to the 0.5 percent level. By so doing, the reallotment total was increased by the amount required to bring those States up to 0.5 percent "floor". Since supplemental funds are not provided, a recomputation was necessary so that, in raising those States to the 0.5 percent minimum, the overall total would not exceed the amount available for reallotment.

Results of Reallotment

The following table lists the States which did not fully obligate funds and the amounts subject to reallotment:

TABLE 1

	D.C. (1978)	1973–76	1978	1979	1980	Total
Alaska				$1,236,740	$492,175	$1,728,915
Arkansas					46,166	46,166
Colorado					27,896	27,896
Connecticut				225,704		225,704

Total	[1]341,456	28,700	82,800	21,035,300	17,518,300	39,006,556

[1] Individual reallotments rounded to $100 except for Guam, American Samoa and Trust Territories, which received the $256 difference between the true total ($39,006,556) and the rounded total ($39,006,300).

These funds have been available for obligation since July 7, 1982, when advices of allowance were issued by the Comptroller to the Regional Administrators. Under section 205(d) of the Act, the funds will remain available for obligation until September 30, 1983.

Dated: September 20, 1982.

Anne M. Gorsuch,

Administrator.

[FR Doc. 82-26669 Filed 9-29-82; 8:45 am]

BILLING CODE 6560-50-M

[PH-FRL 2217-4; OPP-240022]

State Registration of Pesticides

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received notices of registration of pesticides to meet special local needs under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) from 47 States. A registration issued under this section of FIFRA shall not be effective for more than 90 days if the Administrator disapproves the registration or finds it to be invalid within that period. If the Administrator disapproves a registration or finds it to be invalid after 90 days, a notice giving that information will be published in the **Federal Register.**

DATE: The last entry for each item is the date the State registration of that product became effective.

FOR FURTHER INFORMATION CONTACT: Mary Waller, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 716E, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-7700).

SUPPLEMENTARY INFORMATION: The registrations listed below were received by EPA between January 1, 1982 and April 30, 1982. Receipts by EPA of state registrations will be published periodically. Except as indicated by (CUP) in four of the registrations listed below, there is no changed use pattern involved in any of these registrations.

Alabama

EPA SLN No. AL 82 0001. E.I. du Pont de Nemours and Co. Registration is for Du Pont Lexone Weed Killer, to be used on soybeans to control sicklepods. February 8, 1982.

EPA SLN No. AL 82 0002. E.I. du Pont de Nemours and Co. Registration is for Du Pont Lexone #4 Weed Killer, to be used on soybeans to control sicklepods. February 8, 1982.

EPA SLN No. AL 82 0003. E.I. du Pont de Nemours and Co. Registration is for Du Pont Lexone DF Weed Killer, to be used on soybeans to control sicklepods. February 8, 1982.

EPA SLN No. AL 82 0004. Vertac Chemical Corp. Registration is for Vertac Premerge 3, to be used on peanuts to control Florida beggarweed and sicklepods. February 25, 1982.

EPA SLN No. AL 82 0005. B and W Quality Growers, Inc. Registration is for D.Z.N. Diazinon 50W, to be used on watercress to control cylamen mites. March 16, 1982.

EPA SLN No. AL 82 0006. Mobay Chemical Corp. Registration if for Monitor 4, to be used on cotton to control aphids and thrips (early season), fleahoppers, whiteflies, beet armyworms, cabbage loopers, mites, aphids, and thrips (mid to late season). March 16, 1982.

EPA SLN No. AL 82 0008. Dow Chemical USA. Registration is for Dowfume-100, to be used on soybeans to control lance, spiral, sting, and moderate infestations of cyst and root-knot nematodes. April 14, 1982.

EPA SLN No. AL 82 0009. Dow Chemical USA. Registration is for Dowfume-90, to be used on soybeans to control lance, spiral, sting, and moderate infestations of cyst and root-knot nematodes. April 14, 1982.

EPA SLN No. AL 82 0010. Dow Chemical USA. Registration is for

Dowfume-85, to be used on soybeans to control lance, spiral, sting, and moderate infestations of cyst and root-knot nematodes. April 14, 1982.

EPA SLN No. AL 82 0011. Mobay Chemical Corp. Registration is for Nemacur 15% GR, to be used on soybeans to control nematodes. April 19, 1982.

EPA SLN No. AL 82 0012. Mobay Chemical Corp. Registration is for Nemacur-3, to be used on soybeans to control nematodes. April 19, 1982.

EPA SLN No. AL 82 0013. Great Lakes Chemical Corp. Registration is for Soilbrom-90 to be used on peanuts to control nematodes in sandy soil. April 22, 1982.

EPA SLN No. AL 82 0014. Dow Chemical USA. Registration is for Lorsban 4E Insecticide, to be used on grain sorghum to control chinch bugs. April 22, 1982.

EPA SLN No. AL 82 0015. Dow Chemical USA. Registration is for Lorsban 15G, to be used on soybeans to control larvae of lesser cornstalk borers. April 22, 1982.

EPA SLN No. AL 82 0016. ICI Americas Inc. Registration is for Ambush 4E EC, to be used on cotton to control the boll weevil, tobacco budworm, cabbage looper, bollworm, lygus bug, cotton aphid, and whitefly. April 23, 1982.

EPA SLN No. AL 82 0017. American Cyanamid Co. Registration is for Cythion Insecticide-Malathion ULV Concentrate Insecticide, to be used as a ground control of adult mosquitoes. April 23, 1982.

EPA SLN No. AL 82 0018. FMC Corp. Registration is for Furadan 10 GR-Insecticide-Nematicide to be used on soybeans to control nematodes (root-knot, cyst, stunt, ring, sting, spiral, lesion, lance, dagger, and stubby root). April 23, 1982.

EPA SLN No. AL 82 0019. FMC Corp. Registration is for Furadan 15 GR-Insecticide-Nematicide, to be used on soybeans to control nematodes (root-knot, cyst, stunt, ring, sting, spiral, lesion, lance, dagger, and stubby root). April 23, 1982.

Arizona

EPA SLN No. AZ 82 0001. E.I. du Pont de Nemours and Co. Registration is for Du Pont Lannate Insecticide, to be used on beet tops, collards, kale, mustard greens, parsley, Swiss chard, and turnip greens (tops) to control beet armyworms, cabbage loopers, imported cabbage worms, and diamondbacked moths. January 27, 1982.

EPA SLN No. AZ 82 0002. E.I. du Pont de Nemours and Co. Registration is for Du Pont Lannate L Insecticide, to be used on beet tops, collards, kale, mustard greens, parsley, Swiss chard, and turnip greens (tops) to control beet armyworms, cabbage loopers, imported cabbage worms, and diamondbacked moths. January 27, 1982.

EPA SLN No. AZ 82 0003. Bruce Church, Inc. Registration is for Prefar 4-E, to be used on bulb onions and garlic to control annual broadleaf weeds, lambsquarters, purslane, palmer's amaranth, annual grasses, jungle rice, watergrass, sprangletop, and canary grass. January 27, 1982.

EPA SLN No. AZ 82 0004. Vertac Chemical Corp. Registration is for Vertac Selective Weed Killer, to be used on onions to control newly emerged London rocket, lambsquarters, mustard, and shepherd's purse. February 3, 1982.

EPA SLN No. AZ 82 0005. E.I. du Pont de Nemours and Co. Registration is for Du Pont Lannate Insecticide, to be used on endive and escarole to control beet armyworms. April 27, 1982.

EPA SLN No. AZ 82 0006. E.I. du Pont de Nemours and Co. Registration is for Du Pont Lannate Insecticide, to be used on endive and escarole to control certain insects. April 27, 1982.

EPA SLN No. AZ 82 0007. BASF Wyandotte Corp. Registration is for Basalin Herbicide, to be used on cotton to control grasses and broadleaf weeds. March 31, 1982.

Arkansas

EPA SLN No. AR 82 0001. Burroughs Wellcome Co. Registration is for Wellcome Insecticide Ear Tags, to be used on dairy and beef cattle and calves to control horn flies, face flies, Gulf Coast Ticks, spinose ear ticks, stable flies, and house flies. January 27, 1982.

EPA SLN No. AR 82 0002. Dow Chemical USA. Registration is for Dowfume-100, Dowfume-90, and Dowfume-85, to be used on soybeans at planting to control nematodes including lance, root-knot, spiral, and sting. January 27, 1982.

EPA SLN No. AR 82 0003. Dow Chemical USA. Registration is for N-Serve 24E Nitrogen Stabilizer, to be used on rice to control the nitrification process of rice. January 27, 1982.

EPA SLN No. AR 82 0004. Dow Chemical USA. Registration is for N-Serve 24 Nitrogen Stabilizer, to be used on rice to control the nitrification process of rice. January 27, 1982.

EPA SLN No. AR 82 0005. Mobay Chemical Corp. Registration is for Oftanol 5% GR to be used on turf grasses to control insects. March 9, 1982.

EPA SLN No. AR 82 0006. FMC Corp. Registration is for Furadan 4 FL, to be used on soybeans to control nematodes and Mexican bean beetles. March 9, 1982.

EPA SLN No. AR 82 0007. FMC Corp. Registration is for Furadan 10 GR, to be used on soybeans to control nematodes. March 9, 1982.

EPA SLN No. AR 82 0008. Chevron Chemical Co. Registration is for Bolero 8 EC, to be used on rice to control annual grasses and aquatic weeds. March 9, 1982

EPA SLN No. AR 82 0009. BFC Chemicals, Inc. Registration is for Attac 8, to be used on soybeans to control sicklepods. March 24, 1982.

EPA SLN No. AR 82 0010. Red Panther Chemical Co. Registration is for Red Panther Ethylene Dibromide 90, to be used on soybeans to control nematodes including lance, root-knot, spiral, and sting. March 24, 1982.

EPA SLN No. AR 82 0011. Great Lakes Chemical Corp. Registration is for Soilbrom-90, Soilbrom-90EC, and Soilbrom-100, to be used on soybeans to control nematodes including lance, root-knot, spiral, and sting. March 24, 1982.

EPA SLN No. AR 82 0012. Bell Laboratories, Inc. Registration is for P.C.Q. Rat and Mouse Bait, to be used on orchards and groves to control meadow and pine mice and voles. March 24, 1982.

California

EPA SLN No. CA 82 0001. Modoc County Department of Agriculture. Registration is for Sevin Bait 5% (Insecticide), to be used on grapes to control cutworms and grasshoppers; on sorgum to control cutworms and armyworms; on ornamental plants to control grass pests and earwigs; on turf to control grasshoppers; on rangeland to control cutworms, sowbugs, and crickets. January 27, 1982

EPA SLN No. CA 82 0002. Kern County Department of Agriculture. Registration is for Diaznion 14G, to be used on almond orchard floors to control ants. January 15, 1982.

EPA SLN No. CA 82 0003. Olin Corp. Registration is for Terrazole 4 lb. Emulsifiable, to be used on strawberries to control soil-borne diseases. January 15, 1982

EPA SLN No. CA 82 0004. Ciba-Geigy Corp. Registration is for Supracide 2E, to be used on citrus to control California red scale. February 1, 1982.

EPA SLN No. CA 82 0005. Stoller Chemical Co., Inc. Registration is for That Flowable Sulfur, to be used on sugar beets to control powdery mildew. January 27, 1982.

EPA SLN No. CA 82 0006. Stoller Chemical Co., Inc. Registration is for That Big 8 FL Sulfur, to be used on sugar

beets to control powdery mildew. January 27, 1982.

EPA SLN No. CA 82 0007. American Cyanamid Co. Registration is for Cythion Insecticide-Malathion ULV Concentrate Insecticide, to be used on oranges, lemons, grapefruit, limes, tangelos, tangerines, kumquats, and ornamental citrus to control the Mediterranean fruit fly. January 28, 1982.

EPA SLN No. CA 82 0008. American Cyanamid Co. Registration is for Cythion 8E Insecticide, to be used on citrus to control the Mediterranean fruit fly. January 28, 1982.

EPA SLN No. CA 82 0009. Degesch America, Inc. Registration is for Degesch Phostoxin New Coated Tablets-R, to be used on orchards and other non-croplands to control ground squirrels. February 1, 1982.

EPA SLN No. CA 82 0010. Joe Terry Farms. Registration is for Mesurol 75% WP, to be used on peppers grown for seed production to repel birds. February 19, 1982.

EPA SLN No. CA 82 0011. Mobay Chemical Corp. Registration is for Nemacur 3, to be used on non-bearing citrus, deciduous fruit and nut trees, vineyards, and commercial tree and vine nurseries to control nematodes. February 19, 1982.

EPA SLN No. CA 82 0012. Mobay Chemical Corp. Registration is for Nemacur 15% GR, to be used on non-bearing citrus, deciduous fruit and nut trees, vineyards, and commercial tree and vine nurseries to control nematodes. February 19, 1982.

EPA SLN No. CA 82 0013. Helena Chemical Co. Registration is for Omni Supreme Spray (Insecticide-Miticide), to be used on pears, almonds, apricots, peaches, cheerries, nectarines, prunes, and plums to control insects. March 31, 1982.

EPA SLN No. CA 82 0014. Occidental Chemical Co. Registration is for Super 94 Oil, to be used on lemons, grapefruit, and navel and Valencia oranges to control black scale, also brown, red, purple, and yellow, and different kinds of mites. April 5, 1982.

EPA SLN No. CA 82 0016. Monterey County Department of Agriculture. Registration is for Tenoran 50 WP, to be used on onions to control annual weeds. April 9, 1982.

EPA SLN No. CA 82 0017. Santa Clara County Department of Agriculture. Registration is for Rodent Bait Block Chloropacinone Treated Grain/Paraffin (0.005 percent), to be used as a bait block to control Norway rats, roof rats, muskrats, and wood rats. April 13, 1982.

EPA SLN No. CA 82 0018. Santa Clara County Department of Agriculture. Registration is for Rodent Bait Block Diphacinone Treated Grain/Paraffin (0.005 percent), to be used as a bait block to control Norway rats, roof rats, muskrats, and wood rats. April 13, 1982.

EPA SLN No. CA 82 0019. San Benito County Agricultural Commissioner. Registratioin is for Rodent Bait Diphacinone Treated Grain (0.005 percent), to be used to control rodents. April 19, 1982.

EPA SLN No. CA 82 0022. Modoc County Department of Agriculture. Registration is for pocket Gopher Bait Strychnine Treated Grain (2.63%), to be used to control gophers April 19, 1982..

EPA SLN No. CA 82 0023. Modoc County Department of Agriculture. Registration is for Rodent Bait Zinc Phosphide Treated Grain (1.0%), to be used to control rodents. April 19, 1982.

EPA SLN No. CA 82 0024. Ciba-Geigy Corp. Registration is for Ridomil 2E Fungicide, to be used on strawberries to control *Phytophthora cactorum* in nurseries only. April 23, 1982.

EPA SLN No. CA 82 0025. Archem Corp. Registration is for Parapel, to be used on home lawns and yards to control ground squirrels and pocket gophers. April 23, 1982.

EPA SLN No. CA 0028. Rhone-Poulenc Inc. Registration is for Asulox Herbicide, to be used on reforestation areas of red fir, white fir, Jeffrey pine, ponderosa pine, and sugar pine to control western bracken. April 28, 1982.

Connecticut

EPA SLN No. CT 0001. O.M. Scott and Sons. Registration is for Progrow Ornamental Herbicide II, to be used to control weeds in container and field grown ornamentals. January 28, 1982.

EPA SLN No. CT 0002. Shell Chemical Co. Registration is for Bladex 80W Herbicide, to be used on corn to control weeds, grasses, and broadleaf weeds. March 12, 1982.

EPA SLN No. CT 0003. Shell Chemical Co. Registration is for Bladex 4L Herbicide, to be used on corn to control weeds, grasses, and broadleaf weeds. March 12, 1982.

EPA SLN No. CT 82 0004. FMC Corp. Registration is for Furadan 10 GR, to be used on sweet corn to control flea beetles, northern corn rootworms, and nematodes. March 26, 1982.

EPA SLN No. CT 82 0005. FMC Corp. Registration is for Furadan 4 FL, to be used on sweet corn to control the European corn borer. March 26, 1982.

Delaware

EPA SLN No. DE 82 0001. O.M. Scott and Sons. Registration is for Proturf Insecticide 4, to be used on turf grass to control insects. January 12, 1982.

EPA SLN No. DE 82 0002. Rohm and Haas Co. Registration is for Blazer 2S Herbicide, to be used on soybeans to control major weeds, morning glories, cockleburs, and pigweeds. February 8, 1982.

EPA SLN No. DE 82 0003. Bell Laboratories, Inc. Registration is for P.C.O. Rat and Mouse Bait, to be used on orchards and groves to control meadow and pine mice, and voles (*Microtus* spp). March 10, 1982.

EPA SLN No. DE 82 0004. FMC Corp. Registration is for Furadan 10 GR, to be used on sweet corn to control flea beetles, northern corn rootworms, and nematodes. March 12, 1982.

EPA SLN No. DE 82 0005. FMC Corp. Registration is for Furadan 4 FL, to be used on sweet corn to control the European corn borer. March 12, 1982.

EPA SLN No. DE 82 0006. E. I. du Pont de Nemours and Co. Registration is for Du Pont Sinbar Weed Killer, to be used on alfalfa to control weeds. March 30, 1982.

EPA SLN No. DE 82 0007. ICI Americas Inc. Registration is for Gramoxone Paraquat Herbicide, to be used on alfalfa to control weeds between cuttings. April 30, 1982.

Florida

EPA SLN No. FL 82 0001. Kocide Chemical Corp. Registration is for Koplex, to to used on flowing rivers, streams, and canals to control *Hydrilla verticillata*. February 15, 1982.

EPA SLN No. FL 82 0002. Polk County Environmental Services. Registration is for Dowpon M, to be used on drainage ditches to control cattails and perennial grasses. February 15, 1982.

EPA SLN No. FL 82 0003. Ciba-Geigy Corp. Registration is for Evik 80W, to be used on Florida grapefruit and oranges to control guineagrass, broadleaf panicum, and signalgrass. February 15, 1982.

EPA SLN No. FL 82 0004. Pasco Products Co. Registration is for Suncoast Weed Control plus Lawn Fertilizer, to be used on St. Augustine type lawns, centipedegrass, and zoysiagrass only, to control weeds. February 15, 1982.

EPA SLN No. FL 82 0005. Mobay Chemical Corp. Registration is for Oftanol 5% GR, to be used on turf grasses to control white grub larvae. February 16, 1982.

EPA SLN No. FL 82 0006. Pasco Products Co. Registration is for Suncoast Weed Control plus Lawn Fertilizer, to be used on Bahia type lawns to control weeds. February 16, 1982.

EPA SLN No. FL 82 0007. Pasco Products Co. Registration is for P.O.C. Weed Control plus Lawn Fertilizer, to be

used on Bahia type lawns to control broadleaf weeds. February 16, 1982.

EPA SLN No. FL 82 0008. Pasco Products Co. Registration is for P.P.C. Weed Control plus Lawn Fertilizer, to be used on St. Augustine type lawns to control weeds. February 16, 1982.

EPA SLN No. FL 82 0009. Dow Chemical USA. Registration is for Dowfume-100, Dowfume-90, and Dowfume-85, to be used on soybeans at planting to control nematodes including lance, root-knot, spiral, and sting. February 19, 1982.

EPA SLN No. FL 82 0010. Great Lakes Chemical Corp. Registration is for Brom-O-Gas (2%), Brom-O-Gas (1%), Brom-O-Gas (.25%), Terr-O-Gas 98, and Brom-O-Gas (2%), to be used for eggplants, muskmelons, broccoli, cauliflower, and peppers as a preplant treatment in soil. February 19, 1982.

EPA SLN No. FL 82 0011. Chevron Chemical Co. Registration is for Ortho Paraquat CL, to be used on Bahia grass pastures to kill emerged little barley. February 19, 1982.

EPA SLN No. FL 82 0012. Burroughs Wellcome Co. Registration is for Atroban WP, to be used on horse, beef, dairy, swine, sheep, and poultry premises to control house flies, stable flies, and *Fannia* spp. February 19, 1982.

EPA SLN No. FL 82 0013. Chevron Chemical Co. Registration is for Monitor 4 Spray, to be used on Boston, bibb, romaine, and leaf lettuce to control aphids, cabbage loopers, diamondback moth larvae, granulate cutworms, and leafminers. March 9, 1982.

EPA SLN No. FL 82 0014. E. I. du Pont de Nemours and Co. Registration is for Du Pont Lannate Insecticide, to be used on radishes to control beet armyworm. March 9, 1982.

EPA SLN No. FL 82 0015. E. I. du Pont de Nemours and Co. Registration is for Du Pont Lannate L Insecticide, to be used on radishes to control armyworms. March 9, 1982.

EPA SLN No. FL 82 0016. FMC Corp. Registration is for Furadan 10 GR, to be used on sweet corn to control wireworms, lesser cornstalk borers, corn stalk weevils, and corn earworms. March 9, 1982.

EPA SLN No. FL 82 0018. Florida Department of Natural Resources. Registration is for Weeder 64, to be used on ponds, lakes, rivers, drainage and flood control canals, ditches, reservoirs, and bayous to control Eurasian watermilfoil. March 19, 1982.

EPA SLN No. FL 82 0019. Red Panther Chemical Co. Registration is for Red Panther Ethylene Dibromide 90, to be used on soybeans to control nematodes including lance, root-knot, spiral, and sting. March 25, 1982.

EPA SLN No. FL 82 0020. Soil Chemicals Corp. Registration is for Pic Brom 33, to be used on peppers to control *Verticillium* wilt, nematodes, and weeds. March 26, 1982.

EPA SLN No. FL 82 0021. Mineral Research and Development Corp. Registration is for Copper-Count-N, to be used on limes to control greasy spot, and on mangoes and avocados to control anthracnose. April 5, 1982.

EPA SLN No. FL 82 0022. Mobay Chemical Corp. Registration is for Furadan 10 GR, to be used on sweet corn to control wireworms, lesser cornstalk borers, cornstalk weevils, corn earworms in whorls, and banded cucumber beetles. April 28, 1982.

Georgia

EPA SLN No. GA 82 0001. Helena Chemical Co. Registration is for Helena Dimethoate 267 Systemic Insecticide, to be used on pecans to control aphids, mites, leafhoppers, and leafminers. January 15, 1982.

EPA SLN No. GA 82 0002. Ameribrom, Inc. Registration is for Edabrom 85, to be used on soybeans to control root knot, lesion, lance, soybean cyst, sting, and spiral nematodes. February 22, 1982

EPA SLN No. GA 82 0003. Philips Roxane, Inc. Registration is for Overtime Long Lasting Livestock and Premise Spray, to be used on horse, beef, dairy, swine, pet, and poultry premises to control house flies, face flies, stable flies and false stable flies. March 11, 1982.

EPA SLN No. GA 82 0004. O.M. Scott and Sons Co. Registration is for Progrow Ornamental Herbicide II, to be used on container- and field-grown ornamentals to control weeds. January 27, 1982.

EPA SLN No. GA 82 0005. Olin Corp. Registration is for Terraclor 2N EC, to be used on peanuts to control southern blight. April 12, 1982.

EPA SLN No. GA 82 0006. Chevron Chemical Co. Registration is for Orthene Tobacco Insect Spray, to be used on tobacco to control insects. March 9, 1982.

EPA SLN No. GA 82 0007. Dow Chemical USA. Registration is for Dowfune W–85, Dowfune W–90, and Dowfune W–100, to be used on peanuts as in an-plant application to control nematodes including root-knot. April 9, 1982.

EPA SLN No. GA 82 0009. ICI Americas Inc. Registration is for Ambush 4 Insecticide Oil Concentrate, to be used on cotton to control the boll weevil, tobacco budworm, cabbage looper, bollworm, lygus bug, cotton aphid, and whitefly. April 20, 1982.

EPA SLN No. GA 82 0011. Helena Chemical Co. Registration is for Helena MSMA, to be used on cotton as a postemergent application to control weeds. April 27, 1982.

EPA SLN No. GA 82 0012. Helena Chemical Co. Registration is for Liquid DSMA, to be used on cotton to control weeds. April 27, 1982.

Idaho

EPA SLN No. ID 82 0002. Velsicol Chemical Corp. Registration is for Ramik Brown Rodenticide, to be used on small grains to control meadow voles. January 29, 1982.

EPA SLN No. ID 82 0003. U.S. Fish and Wildlife Service. Registration is for Zinc Phosphide Rodenticide for Controlling Jack Rabbits, to be used on haystacks and field borders to control black-tailed jackrabbits. February 23, 1982.

EPA SLN No. ID 82 0004. Wilbur-Ellis Co. Registration is for Red-Top Contact Weedkiller, to be used on forestry as a brush desiccant. February 25, 1982.

EPA SLN No. ID 82 0005. Sandoz Inc. Registration is for Solicam 80WP, to be used on cherries, plums, prunes, peaches, and non-bearing apple and pear trees to control various grasses and broadleaf weeds. February 22, 1982.

EPA SLN No. ID 82 0007. Elanco Products Co. Registration is for Treflan EC, to be used on radishes grown for seed to control weeds. March 30, 1982.

EPA SLN No. ID 82 0008. Elanco Products Co. Registration is for Treflan MT.F., to be used on radishes grown for seed to control weeds. March 30, 1982.

EPA SLN No. ID 82 0009. Mobay Chemical Corp. Registration is for Oftanol 5% GR, to be used on turf grasses to control white grub larvae, hyperodes weevils, billbugs, chinch bugs, and sod webworm larvae. April 16, 1982.

EPA SLN No. ID 82 0010. Mobay Chemical Corp. Registration is for Sencor DF/Sencor Sprayule, to be used on lentils and dry field peas to control broadleaf weeds. April 28, 1982.

Illinois

EPA SLN No. IL 82 0001. Stauffer Chemical Co. Registration is for Eradicane 6.7–E Selective Herbicide, to be used on corn (field, silage, and sweet) for wild proso millet suppression. January 4, 1982.

EPA SLN No. IL 82 0002. FMC Corp. Registration is for Furadan 4F Insecticide, to be used on alfalfa to control potato leafhoppers, pill bugs, crickets, and grasshoppers. January 4, 1982.

EPA SLN No. IL 82 0003. Mobay Chemical Corp. Registration is for Nemacur 3 to be used on deciduous fruit trees (apple, peach, and cherry) to

control lesion and dagger nematodes. January 22, 1982.

EPA SLN No. IL 82 0004. Union Carbide Agricultural Products Co., Inc. Registration is for Temik 15% GR Aldicarb Pesticide, to be used on soybeans at planting to control nematodes. April 9, 1982.

Indiana

EPA SLN No. IN 82 0001. Petrolite Corp. Registration is for X-Cide 133 Industrial Bactericide, to be used in gas storage and transmission systems as an industrial bactericide. February 3, 1982.

EPA SLN No. IN 82 0002. Burroughs Wellcome Co. Registration is for Wellcome Insecticide Ear Tags, to be used on dairy and beef cattle and calves to control horn flies, face flies, Gulf Coast ticks, and spinose ear ticks. February 3, 1982.

EPA SLN No. IN 82 0003. State Chemist, Department of Biochemistry, Purdue University. Registration is for Proturf Insecticide 4, to be used on fairway and putting green turf to control white grubs. February 3, 1982.

EPA SLN No. IN 82 0004. E.I. du Pont de Nemours and Co. Registration is for Du Pont Vydate L Insecticide/Nematicide, to be used on cucurbits to control nematodes. February 24, 1982.

EPA SLN No. IN 82 0005. Vertac Chemical Corp. Registration is for Premerge 3 Dinitro Amine Herbicide, to be used on field corn as a possible enhancement of grain yields. February 24, 1982.

EPA SLN No. IN 82 0006. Thompson-Hayward Chemical Co. Registration is for PCO Lindane E-1, to be used on existing structures to control wood-infesting beetles, *Lyctidae, Anobiidae,* and *Cerambycidae.* March 17, 1982.

EPA SLN No. IN 82 0007. Residex Corp. Registration is for Residex Lindane 20% Emulsifiable, to be used on homes, barns, and other existing structures (wood) to control beetles. March 17, 1982.

EPA SLN No. IN 82 0008. Rohm and Haas Co. Registration is for Goal 2E Herbicide, to be used on peppermint and spearmint fields to control weeds. March 17, 1982.

EPA SLN No. IN 82 0011. Rohm and Haas Co. Registration is for Blazer 2S Herbicide, to be used on soybeans for postemergence weed control. April 22, 1982.

Iowa

EPA SLN No. IA 82 0001. Mobay Chemical Corp. Registration is for Oftanol 5% GR, to be used on lawn and turf to control insects. February 26, 1982.

Kansas

EPA SLN No. KS 82 0001. Monsanto Co. Registration is for Roundup, to be used on grain sorghum to control weeds. March 22, 1982.

EPA SLN No. KS 82 0002. Shell Chemical Co. Registration is for Bladex 80W Herbicide, to be used on field corn or grain sorghum to control weeds. April 1, 1982.

EPA SLN No. KS 82 0003. Rohm and Haas Co. Registration is for Blazer 2S Herbicide, to used on soybeans to control weeds. April 5, 1982.

EPA SLN No. KS 82 0004. Platte Chemical Co. Registration is for Clean Crop Formulation 60 4# Amine 2,4-D, to be used on pastures, rangeland, and non-croplands to control musk thistles. April 15, 1982.

EPA SLN No. KS 82 0005. Bell Laboratories, Inc. Registration is for P.C.Q. Rat and Mouse Bait, to be used in orchards and groves to control meadow and pine mice. April 22, 1982.

EPA SLN No. KS 82 0006. Mobay Chemical Corp. Registration is for Amaze 20% GR, to be used on corn (field, sweet, and pop) to control nematodes. April 22, 1982.

Louisiana

EPA SLN No. LA 82 0001. Dow Chemical USA. Registration is for Dowfume W-100 Full Strength Soil Fumigant to be used on soybeans at planting or in preplant application to control nematodes including lance, lesion, root-knot, spiral, and sting. February 2, 1982.

EPA SLN No. LA 82 0002. Dow Chemical USA. Registration is for Dowfume W-90 High Strength Soil Fumigant, to be used on soybeans at planting or in preplant application to control nematodes including lance, lesion, root-knot, spiral, and sting. February 2, 1982.

EPA SLN No. LA 82 0003. Dow Chemical USA. Registration is for Dowfume W-85 High Strength Soil Fumigant, to be used on soybeans at planting or in preplant application to control nematodes including lance, lesion, root-knot, spiral, and sting. February 2, 1982.

EPA SLN No. LA 82 0004. Louisiana Department of Agriculture. Registration is for Progrow Ornamental Herbicide II, to be used on container and field grown ornamentals to control weeds. February 9, 1982.

EPA SLN No. LA 82 0005. Chevron Chemical Co. Registration is for Bolero 8 EC, to be used on seedling rice to control weeds. March 12, 1982.

EPA SLN No. LA 82 0006. Cotton States Chemical Co., Inc. Registration is for Ketokil No. 52, be used on cotton to control boll worms and boll weevils. March 19, 1982.

EPA SLN No. LA 82 0007. ICI Amercias Inc. Registration is for Ambush 4E EC, to be used on cotton to control boll weevils, tobacco budworms, cabbage loopers, bollworms, lygus bugs, cotton aphids, and whiteflies. March 19, 1982.

EPA SLN No. LA 82 0008. American Cyanamid Co. Registration is for Cythion Insecticide-Malathion ULV Concentrate, to be used on cotton to control boll weevils. March 19, 1982.

EPA SLN No. LA 82 0009. Stauffer Chemical Co. Registration is for Ordram 10-G, to be used on rice for suppression of sprangletop and barnyardgrass, post-flood and post-emergence application. March 19, 1982.

EPA SLN No. LA 82 0010. Union Carbide Agricultural Products Co., Inc. Registration is for Temik 15G Aldicarb Pesticide, to be used on sugarcane (stubble or ratoon cane) to control nematodes. March 24, 1982.

EPA SLN No. LA 82 0011. FMC Corp. Registration is for Furadan 10 GR, to be used on soybeans to control nematodes. April 6, 1982.

EPA SLN No. LA 82 0012. FMC Corp. Registration is for Furadan 4 FL, to be used on soybeans to control nematodes. April 6, 1982.

EPA SLN No. LA 82 0013. Philips Roxane, Inc. Registration is for Bioceutic Overtime L/P Long Acting Livestock and Premise Insecticide, to be used on livestock and poultry as an insecticide. April 26, 1982.

EPA SLN No. LA 82 0014. Philips Roxane, Inc. Registration is for Anchor Permectrin Long Lasting Livestock and Premise Spray, to be used on livestock and poultry as an insecticide. April 26, 1982.

EPA SLN No. LA 82 0015. Citrus Lands of Louisiana, Inc. Registration is for Roundup, to be used in pastures to control weeds. April 27, 1982.

Maine

EPA SLN No. ME 82 0001. Vertac Chemical Corp. Registration is for Vertac General Weed Killer, to be used for preharvest desiccation of potato vines. February 10, 1982.

EPA SLN No. ME 82 0002. Dow Chemical USA. Registration is for Garlon 3A Herbicide, to be used on industrial sites, non-crop areas, and at forest preparation sites to control woody plants and broadleaf weeds. April 16, 1982.

EPA SLN No. ME 82 0003. Dow Chemical USA. Registration is for Garlon 4 Herbicide, to be used on

industrial sites, non-crop areas, and at forest preparation sites to control woody plants and broadleaf weeds. April 16, 1982.

EPA SLN No. ME 82 0004. Hopkins Agricultural Chemical Co. Registration is for Hopkins Quintar 5F, to be used on apples to control scab. April 16, 1982.

EPA SLN No. ME 82 0005. Chevron Chemical Co. Registration is for Orthene-Specialty Concentrate, to be used for the suppression of larval populations of spruce budworm. April 16, 1982.

Maryland

EPA SLN No. MD 82 0001. Monsanto Co. Registration is for Roundup, to be used on apple orchards to control annual and perennial weeds. Janary 26, 1982.

EPA SLN No. MD 82 0002. O.M. Scott and Sons Co. Registration is for Proturf Insecticide 4, to be used on cool season grasses only to control sod webworms, chinch bugs, mole crickets, and hyperodes weevils. January 29, 1982.

EPA SLN No. MD 82 0003. Mobay Chemical Corp. Registration is for Nemacur-Dasanit 2+4 Spray Concentrate, to be used on tobacco to control root-knot nematodes and wireworms. March 15, 1982,

EPA SLN No. MD 82 0004. Rhom and Haas Co. Registration is for Blazer 2S Herbicide, to be used on soybeans for post-emergence weed control. March 15, 1982.

EPA SLN No. MD 82 0005. Mobay Chemical Corp. Registration is for Nemacur 3, to be used on tobacco to control nematodes and wireworms. March 15, 1982.

EPA SLN No. MD 82 0006. B and W Quality Growers, Inc. Registration is for D.Z.N. Diazinon 50W, to be used on watercress to control cyclamen mites. March 15, 1982.

EPA SLN No. MD 82 0007. FMC Corp. Registration is for Furadan 4 FL, to be used on sweet corn to control European corn borers. April 26, 1982.

EPA SLN No. MD 82 0008. FMC Corp. Registration is for Furadan 10 GR, to be used on sweet corn to control flea beetles, northern corn rootworms, and nematodes. April 26, 1982.

EPA SLN No. MD 82 0009. E.I. du Pont de Nemours and Co. Registration is for Du Pont Sinbar Weed Killer, to be used on alfalfa to control certain weeds. April 26, 1982.

Michigan

EPA SLN No. MI 82 0001. Mobay Chemical Corp. Registration is for Furadan 10 GR, to be used on non-bearing peach, nectarine, apple, apricot, cherry, and plum trees to control nematodes. January 19, 1982.

EPA SLN No. MI 82 0002. Mobay Chemical Corp. Registration is for Furadan 4 FL, to be used on non-bearing peach, nectarine, apple, apricot, cherry, and plum trees to control nematodes. January 19, 1982.

EPA SLN No. MI 82 0003. Michigan Department of Agriculture. Registration is for Progrow Ornamental Herbicide II, to be used on container and field grown ornamentals to control weeds. Janary 19, 1982.

EPA SLN No. MI 82 0004. Michigan Department of Agriculture. Registration is for Proturf Insecticide 4, to be used on cool season grasses only to control sod webworms, chinch bugs, mole crickets, and hyperodes weevils. February 3, 1982.

EPA SLN No. MI 82 0005. E.I. du Pont de Nemours and Co. Registration is for Du Pont Benlate Fungicide, to be used on grapes to control the eutypa dieback. February 9, 1982.

EPA SLN No. MI 82 0006. Mobay Chemical Corp. Registration is for Furadan 4 FL, to be used on field corn to control corn rootworm larvae at cultivation. February 16, 1982.

EPA SLN No. MI 82 0007. Olin Corp. Registration is for Terraclor 75% WP, to be used on beans (snap and dry) to prevent white mold. February 16, 1982.

EPA SLN No. MI 82 0008. Dow Chemical USA. Registration is for Lorsban 15G GR Insecticide, to be used on onions (dry bulb) to control onion maggots April 21, 1982.

EPA SLN No. MI 82 0009. Dow Chemical USA. Registration is for Lorsban 4E Insecticide, to be used on onions (dry bulb) to control onion maggots. April 21, 1982.

EPA SLN No. MI 82 0010. FMC Corp. Registration is for Furadan 4F Insecticide, to be used on sweet corn to control the corn earworm and European corn borer. April 21, 1982.

EPA SLN No. MI 82 0011. FMC Corp. Registration is for Furadan 10G Insecticide/Nematicide, to be used on sweet corn to control flea beetles, corn rootworms, and nematodes. April 21, 1982.

EPA SLN No. MI 82 0012. Union Carbide Agricultural Products Co., Inc. Registration is for Temick 15G Aldicarb Pesticide, to be used on dry beans at planting to control seedcorn maggots. April 21, 1982.

EPA SLN No. MI 82 0013. FMC Corp. Registration is for Furadan 10G-Insecticide/Nematicide to be used on cucurbits (cucumbers, melons, squash, and pumpkins) to control nematodes and cucumber beetles. April 22, 1982.

EPA SLN No. MI 82 0014. Miller Chemical and Fertilizer Corp. Registration is for Pratt Oxamyl 10% GR, to be used on potatoes to control root lesion and northern root-knot nematodes, and on carrots to control northern root-knot nematodes. April 23, 1982.

Minnesota

EPA SLN No. MM 82 0001. Clarke Outdoor Spraying Co. Registration is for 1% Skeeter Abate, to be used on marsh lands, margins of streams, and intertidal zones of sandy beaches to control mosquito and midge larvae. February 12, 1982.

EPA SLN No. MN 82 0002. Dow Chemical USA. Registration is for Tordon 22K Herbicide, to be used on rangelands, permanent grass pastures, spring barley and oats, and spring and winter wheat to control broadleaf weeds. February 12, 1982.

EPA SLN No. MN 82 0003. Dow Chemical USA. Registration is for Tordon 2K Pellets Herbicide, to be used on rangeland, forests, and permanent grass pastures to control susceptible broadleaf weeds and woody plants. February 12, 1982.

EPA SLN No. MN 82 0004. Agsco, Inc. Registration is for Agsco Blitex 80 MN, to be used on beans (dry) to control rust. March 11, 1982.

EPA SLN No. MN 82 0005. FMC Corp. Registration is for Furadan 10 GR, to be used on sugar beets to control sugar beet root maggots. April 8, 1982.

EPA SLN No. MN 82 0006. FMC Corp. Registration is for Furadan 4 FL, to be used on pure seeded alfalfa to control lesion nematodes and *Pratylenchus penetrans*. April 8, 1982.

EPA SLN No. MN 82 0007. Philips Roxane, Inc. Registration is for Golden Sun Secticide-10, to be used as a livestock and poultry long-lasting barn and premise fly spray. April 8, 1982.

Mississippi

EPA SLN No. MS 82 0001. FMC Corp. Registration is for Furadan 4 FL, to be used on soybeans to control nematodes and Mexican bean beetles. February 10, 1982.

EPA SLN No. MS 82 0002. FMC Corp. Registration is for Furadan 10 GR, to be used on soybeans to control nematodes at planting time. Febraury 10, 1982.

EPA SLN No. MS 82 0003. Olin Corp. Registration is for Magnum Agricultural Chlorinator, to be used on sweet potatoes to reduce the spread of bacterial wilt and root rot. February 17, 1982.

EPA SLN No. MS 82 0004. Chevron Chemical Co. Registration is for Bolero 8

EC, to be used on rice to control annual grasses and aquatic weeds, March 24, 1982.

EPA SLN No. MS 82 0005. Red Panther Chemical Co. Registration is for Red Panther Ethylene Dibromide 90, to be used on soybeans to control nematodes including lance, root-knot, spiral, and sting. April 2, 1982.

EPA SLN No. MS 82 0006. Union Carbide Agricultural Products Co., Inc. Registration is for Temik 15% GR Aldicarb Pesticide, to be used on soybeans to control nematodes. April 2, 1982.

EPA SLN No. MS 82 0007. Dow Chemical USA. Registration is for N-Serve 24E Nitrogen Stabilizer, to be used on rice to control the nitrification process on rice. April 5, 1982.

EPA SLN No. MS 82 0008. Dow Chemical USA. Registration is for N-Serve 24 Nitrogen Stabilizer, to be used on rice to control the nitrification process on rice. April 5, 1982.

EPA SLN No. MS 82 0009. ICI Americas Inc. Registration is for Ambush 4E–EC, to be used on cotton to control boll weevils, tobacco budworms, cabbage loopers, bollworms, lygus bugs, cotton aphids, and whiteflies. April 2, 1982.

EPA SLN No. MS 82 0010. Dow Chemical USA. Registration is for Dowfume W–85, to be used as an at-plant application on cotton to control nematodes. April 2, 1982.

EPA SLN No. MS 82 0011. Dow Chemical USA. Registration is for Dowfume W–90, to be used as an at-plant application on cotton to control nematodes. April 2, 1982.

EPA SLN No. MS 82 0012. Dow Chemical USA. Registration is for Dowfume W–100, to be used on cotton to control nematodes. April 2, 1982.

EPA SLN No. MS 82 0014. Dow Chemical USA. Registration is for Dowfume W–90, to be used as an at-plant application on peanuts to control nematodes. April 2, 1982.

EPA SLN No. MS 82 0015. Dow Chemical USA. Registration is for Dowfume W–100, to be used as an at-plant application on peanuts to control nematodes. April 2, 1982.

Missouri

EPA SLN No. MO 82 0001. O. M. Scott and Sons Co. Registration is for Proturf Insecticide 4, to be used on cool season grasses only to control sod webworms, chinch bugs, mole crickets, and hyperodes weevils. January 7, 1982.

EPA SLN No. MO 82 0002. Fairfield American Corp. Registration is for Permanone Tick Repellent, to be used on outer clothing to control ticks, chiggers, and mosquitoes. (CUP). January 11, 1982.

EPA SLN No. MO 82 0003. Philips Roxane, Inc. Registration is for Golden Sun Fly-Ban Concentrate, to be used as a livestock and poultry long-lasting barn and premise fly spray. February 1, 1982.

EPA SLN No. MO 82 0004. Dow Chemical USA. Registration is for Dowfume W–100 Full Strength Soil Fumigant, to be used on soybeans to control nematodes including lance, lesion, root-knot, spiral, and sting. February 10, 1982.

EPA SLN No. MO 82 0005. Dow Chemical USA. Registration is for Dowfume W–80 High-Strength Soil Fumigant, to be used on soybeans to control nematodes including lance, lesion, root-knot, spiral, and sting. February 10, 1982.

EPA SLN No. MO 82 0006. Dow Chemical USA. Registration is for Dowfume W–85 High Strength Soil Fumigant, to be used on soybeans to control nematodes including lance, lesion, root-knot, spiral, and sting. February 10, 1982.

EPA SLN No. MO 82 0007. Vertac Chemical Corp. Registration is for Vertac Premerge 3 Dinitro-Amine Herbicide, to be used on many crops, including peas, beans, and soybeans, to control broadleaf weeds. April 25, 1982.

EPA SLN No. MO 82 0009. Rohm and Haas Co. Registration is for Dithane M–22 Special, to be used on field grown tobacco to control blue mold. March 25, 1982.
